

Czech Republic - Pharmacy Students 2011 (3rd Year Students Only) Global Health Professions Student Survey (GHPSS)

FACT SHEET

The Czech Republic pharmacy students GHPSS includes data on prevalence of cigarette smoking and use of other tobacco products, knowledge and attitudes about tobacco use, exposure to second-hand smoke, desire for smoking cessation, and training received during pharmacy school regarding patient counseling on smoking cessation techniques.

This information could be very useful in monitoring and developing Czech Republic's comprehensive tobacco control program. The Czech Republic pharmacy students GHPSS was a census of third year pharmacy students attending two pharmacy schools in Czech Republic conducted in 2011. A total of 331 3rd year students participated in the Czech Republic pharmacy students GHPSS. The overall response rate of all pharmacy students surveyed was 96.0%.
