

SUPPLEMENTARY FIGURE. Time from receipt of nirsevimab* to symptom onset among eligible children in their first or second respiratory syncytial virus season who had medically attended acute respiratory illness, by respiratory syncytial virus test result — Yukon-Kuskokwim Region, Alaska, October 23, 2023–June 30, 2024

Abbreviations: RSV = respiratory syncytial virus.

* Current season receipt of nirsevimab documented by state immunization information system or provider electronic health record. Days 0–6 are not presented because children who received nirsevimab <7 days before their medical visit for acute respiratory illness were excluded from the analysis.
