Diseases Scientific Resources Program for synthesis of oligonucleotides.

This study was supported in part by the Association of Public Health Laboratories through an appointment of the Emerging Infectious Diseases Fellowship Program and in part by Howard Hughes Medical Institute Undergraduate Biological Science Education Program Grant no. 52003033 to Washington and Jefferson College.

Dr Massung is a supervisory research microbiologist in the Viral and Rickettsial Zoonoses Branch, Centers for Disease Control and Prevention. His primary research interests include molecular biology, diagnostic microbiology, and the molecular epidemiology of *Coxiella*, *Anaplasma*, and *Ehrlichia* species.

**etymologia**

**botulism**

[bɒˀˈlɪzəm]  
Food poisoning with neurotoxicity caused by eating food contaminated with *Clostridium botulinum*. From the Latin *botulus*, "sausage," the disease was first recognized in Germany in persons who had eaten tainted sausage and was originally called "sausage poisoning."
