## NIOSH EDUCATION AND RESEARCH CENTERS

The National Institute for Occupational Safety and Health (NIOSH) was created to conduct research and training and make recommendations for the prevention of work-related illnesses and injuries. NIOSH developed the Education and Research Centers (ERCs) and currently funds 16 ERCs at universities to serve as regional resources and provide multidisciplinary graduate and continuing education programs in occupational medicine, occupational health nursing, industrial hygiene and safety.

## COURSE TOPICS OFFERED

Listed below are current Continuing Education (CE) course topics offered by the NIOSH Education and Research Centers. ERC's also offer graduate level courses. Not all Centers offer all topics and Centers introduce new topics throughout the year. Get the most updated information on courses offered at each Center by checking out their website (listed below) or the NIOSH website at [www.niosh-erc.org](http://www.niosh-erc.org).
