

SUPPLEMENTARY FIGURE: Food and symptom history of persons (N = 107) who ate food from a Wisconsin restaurant during October 22–24, 2024 and completed a Public Health Madison & Dane County questionnaire

Abbreviation: THC = tetrahydrocannabinol.

* The link to the questionnaire was posted on Public Health Madison & Dane County website on October 24 and was widely distributed via press release and social media.

† Persons who ate pizza, garlic bread, cheese bread, or a grinder purchased from the restaurant on October 22, 23, or 24 and reported at least one sign or symptom of THC intoxication that began within five hours after eating food from the restaurant.

§ Numbers do not sum to the total as persons who did not take action were not included.

¶ THC test results were self-reported in the questionnaire comments or reported by the hospital. Information about whether THC testing was performed was not available from the other 70 respondents.
