## NIOSH's research agenda-setting for indoor environments

**Jean Cox-Ganser**, Research Team Supervisor, Division of Respiratory Disease Studies, National Institute for Occupational Safety and Health, 1095 Willowdale Road, MS 2800, Morgantown, WV 26505, (304) 285-5818, [jcox-ganser@cdc.gov](mailto:jcox-ganser@cdc.gov)

This presentation will describe the history of and the current work on NIOSH's research agenda-setting for indoor environments. Emphasis will be focused on how adult occupational health and indoor environmental research is approached and the gaps in institutional infrastructure and sciences for addressing children's exposures.

### Learning Objectives:

- Participants will learn how adult occupational health and indoor environmental research is approached and gain an appreciation for the gaps in institutional infrastructure and sciences for addressing children's exposures.

### Presenting author's disclosure statement:

I do not have any significant financial interest/arrangement or affiliation with any organization/institution whose products or services are being discussed in this session.
