APPENDIX I

NIOSH CRITERIA DOCUMENT PROGRAM
JANUARY 1981

The development and periodic revision of criteria documents as a basis for standards for occupational exposure to chemical and physical hazards in the workplace is a major legislatively mandated activity of NIOSH. Criteria documents are publications on specific occupational health and safety problems which are prepared after a critical evaluation of all known scientific information on a particular subject. The purpose of these documents is to establish recommended occupational health standards. In addition to permissible levels of exposure in the occupational environment, they include recommendations for medical surveillance, personal protective equipment, work practices and sanitation, informing the worker of the hazards, labeling and posting, monitoring and surveillance, and recordkeeping. By law, this information is intended to serve as the technical basis for standards to be promulgated by the Occupational Safety and Health Administration (OSHA). In producing a criteria document, NIOSH's goal is to identify in a candid and unbiased manner the adverse effects produced, to determine safe levels of exposure, and to suggest work practices which will protect employees during their normal working lifetime. Table A lists those 98 hazards for which criteria documents have been issued. Copies of the criteria documents can be ordered from the National Technical Information Service (NTIS), Port Royal Road, Springfield, Virginia 22161, telephone (703) 487-4650, or can be obtained from NIOSH as explained below. A summary table of all the NIOSH recommendations for occupational health standards is also available from NIOSH.

In addition to the criteria document recommendations, NIOSH also produces two related documents. They are special hazard reviews and current intelligence bulletins. Special hazard reviews support and complement the other standards activities of the Institute. Their purpose is to assess, from a health standpoint, specific problems associated with a given agent or hazard, such as a potential for carcinogenic, mutagenic, or teratogenic effects, and to recommend appropriate control and surveillance methods. While they are not intended to supplant the more comprehensive NIOSH criteria documents, they are prepared in such a way as to assist in the formulation of regulations. To date, special hazard reviews have been issued for the following substances: aldrin/dieldrin, benzidine-based dyes, chrysene, DDT, ethylene dichloride, ethylene oxide, ethylene thiourea, 4,4'-methylene-bis(2-chloroaniline), nickel carbonyl, and trichloroethylene. Additional information about NIOSH criteria documents and special hazard reviews is contained in a NIOSH folder (unnumbered) entitled "Criteria Documentation and Standards Development." Further questions about these two NIOSH programs should be directed to the Division of Criteria Documentation and Standards Development (DCDSD), Rockville, Maryland 20857, telephone (301) 443-3680.

The current intelligence bulletins are the primary products of the NIOSH Current Intelligence System. The purpose of this system is to promptly review, evaluate, and supplement information received by NIOSH on occupational hazards that are either unrecognized or are greater than generally known. The bulletins are based on the evaluation of new information on a particular hazard in light of other known epidemiology, production, and use data. Accuracy and speed are emphasized in issuing bulletins, with the review and evaluation process taking only three to four weeks. The bulletins are then disseminated to Federal agencies and/or the general occupational health community. Table B lists the 33 current intelligence bulletins issued to date. Additional information about this activity is contained in NIOSH folder 77-211, "Current Intelligence System." Further questions should be directed to DCDSD at the above address.

Until the supplies are exhausted, single complimentary copies of the summary table; the individual NIOSH criteria documents, special hazard reviews, and current intelligence bulletins; and the two folders describing these programs are available from:

APPENDIX II

NIOSH SAMPLING AND ANALYTICAL METHODS

The "NIOSH Manual of Analytical Methods" has been revised and reissued in a Second Edition of six volumes. This Manual contains over 450 methods for monitoring chemical exposures in the workplace. The Manual is not available from NIOSH and must be ordered from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402.

Volume	GPO Stock Number	Price
1	017-033-00267-3	$12.00
2	017-033-00260-6	$10.00
3	017-033-00261-4	$13.00
4	017-033-00317-3	$ 7.25
5	017-033-00349-1	$ 9.00
6	017-033-00369-6	$ 8.00

Add 25% for non-U.S. orders to GPO.

The following is a cumulative index of those chemicals included in the above six volumes:

Volume 1, Methods 102-262
Volume 2, Methods S1-S134
Volume 3, Methods S135-S391
Volume 4, Methods marked with asterisk (*)
Volume 5, Methods marked with pound sign (#)
Volume 6, Methods marked with at sign (@)

Specific questions about any of the analytical methods should be directed to NIOSH, Division of Physical Sciences and Engineering, Measurements Research Branch, 4676 Columbia Parkway, Cincinnati, Ohio 45226, telephone (513) 684-4271.

Substance	Method No(s).
Acetaldehyde	S345#
Acetic acid	S169*
Acetic anhydride	S170
Acetone	127, S1
Acetonitrile (Methyl cyanide)	S165
Acetylene dichloride (see 1,2-Dichloroethylene)	
Acetylene tetrabromide (Tetrabromoethane)	S117
Acrolein	118, 211
Acrylonitrile	202, S156
ALAD (delta-Aminolevulinic acid dehydratase)	328@
Aldrin	S275
Allyl alcohol	S52
Allyl chloride	S116

Allyl glycidyl ether	S346*
Aluminum	173#
Amines, aliphatic	211
Amines, aromatic	168
4-Aminobiphenyl	269*
Aminoethanol compounds	270*
bis(2-Aminoethyl)amine (see Diethylenetriamine)	
delta-Aminolevulinic acid dehydratase	328@
p-Aminophenylarsonic acid	320@
2-Aminopyridine	S158*
Ammonia	205, S347#
Ammonium sulfamate	S348#
Amorphous silica	316@
n-Amyl acetate	S51
sec-Amyl acetate (alpha-Methyl butyl acetate)	S31
Aniline	168, S310
Anisidine	168, S163#
Anthanthrene	183, 184, 206
Anthracene	206
Antimony	107, 173, 189, 193, 197, 261*, S2
ANTU (alpha-Naphthyl Thiourea)	S276#

APPENDIX III

NIOSH HEALTH HAZARD EVALUATIONS

Title 42—PUBLIC HEALTH

Chapter I—Public Health Service, Department of Health, Education, and Welfare

SUBCHAPTER G—OCCUPATIONAL SAFETY AND HEALTH RESEARCH AND RELATED ACTIVITIES

PART 85—REQUESTS FOR HEALTH HAZARD EVALUATIONS

On March 17, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (37 F.R. 5634) which prescribed the conditions and procedures for conducting health hazard evaluations pursuant to section 20(a)(6) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 669(a)(6)). That section directs the Secretary of Health, Education, and Welfare to determine, following a written request by any employer or authorized representative of employees, whether any substance normally found in a place of employment has potentially toxic effects in such concentrations as used or found and further provides that such determinations shall be submitted to the appropriate employer and affected employees.

Interested persons were invited to submit, within 30 days, written comments, suggestions, or objections regarding the proposed regulations.

In addition, on June 20, 1972, the proposed regulations and the issues raised by the public comments concerning them were discussed with the National Advisory Committee on Occupational Safety and Health established by section 7 of the Occupational Safety and Health Act. All public comments, as well as the views expressed by the members of the Committee, have been taken into consideration with the result that a number

of changes, as discussed below, have been made in the regulations which were proposed. All comments in response to the rules as proposed and the transcript of the Committee proceedings on June 20 are available for public inspection at the National Institute for Occupational Safety and Health, Room 10–05, 5600 Fishers Lane, Rockville, MD.

1. *Applicability.* A statement has been added to the applicability section to indicate that Part 85 is not intended to preclude the use of other channels of communication with the National Institute for Occupational Safety and Health (NIOSH) to obtain information and assistance concerning toxic substances.

2. *Definitions.* Definitions of the terms "investigation" and "health hazard evaluation" have been added and these terms have been used throughout Part 85 in an effort to distinguish the physical inspection of a place of employment by NIOSH in conducting a health hazard evaluation, from the compliance inspection conducted by the Department of Labor. The definition of "toxic effects" has been revised to exclude those which produce acute discomfort.

3. *Procedures for requesting evaluations.* The main thrust of the comments on the procedures for requesting evaluations went to the question of who should be considered an "authorized representative of employees". The comments ranged from a suggestion that any individual employee should be allowed to make the request, to the contention that the authorized representatives should be limited to those who represent the employees for purposes of collective bargaining. The final regulations provide that an authorized representative may be either: (1) A representative for purposes of collective bargaining; (2) an employee of the employer who has written authorization from two or more employees employed in the work place where the substance is normally found, to represent them for purposes of the Act; or (3) where three or less employees are employed in the work place where the substance is normally found, any one of such employees. Objections to the Institute's withholding the identity of requesters have been considered and rejected. Such protection is, in our judgment, necessary to assure utilization of this procedure by employees. The option to withhold the requester's identity has been extended to those who have authorized the requester to represent them. Copies of these written authorizations must accompany the request.

4. *Authority for investigation.* The section has been amended to make clear that the duty to conduct a health hazard evaluation and the authority to investigate and inspect for purposes of conducting that evaluation extend only to the place of employment with respect to which the request has been made, which under the definition of "place of employment" can be the entire factory or a single work place.

5. *Advance notice of visits.* NIOSH experience over the last several months has revealed that failure to give advance notice can interfere with a thorough and effective plant visit and thus impede the health hazard evaluation. The very process to which the request is directed may not be in operation on the day of the visit and the problem becomes even more serious when the place of employment is not readily accessible. Furthermore, the employer and, in the case of employee requests, the employees may wish to have a particular representative accompany the NIOSH officer. The surprise visit would conflict with this desire. The Institute, after considering all comments on this matter, has concluded that the evil which this surprise visit is intended to avoid—the misrepresentation of actual production conditions—can be avoided by exercise of the authority under section 8 to conduct private interviews with appropriate employees. Thus, the Institute's decision to give employers advance notice must be read in the light of the authority of NIOSH to question employees privately.

Accordingly, the section on advance notice (§ 85.6) has been completely revised to provide that advance notices of visits to the place of employment may be given to expedite a thorough and effective investigation. Advance notice will not be given when, in the judgment of the NIOSH officer, giving such notice would adversely affect the validity and effectiveness of an investigation. In the case of employee requests, advance notice will be given by the Institute to the requester, the representative of the employees for purposes of collective bargaining if such representative is other than the requester, and to the employer. Where the request is from the employer, advance notice will be given to such employer and, upon the request of the employer, to an authorized representative of employees.

6. *Conduct of investigations.* The major change in section 85.7 concerns trade secret information. This provision has been expanded to set forth the procedure where the Institute questions the designation by an employer of certain information as trade secret information. Where the Institute questions the identification, the employer will be given written notice of the Institute's intention to remove the trade secret designation from such information. The employer may within that period request reconsideration and provide additional information in support of the trade secret designation. If, after reconsideration, the decision of NIOSH is to remove the designation, the employer shall then be notified. Since the decision does not become effective until 15 days after the date of the written notice, the employer has the opportunity to take appropriate steps to retain the trade secret designation.

7. *Representatives of employers and employees; employee requests.* This section of the regulations has been revised to provide that in the case of employee requests, a representative authorized by the employees shall be given an opportunity to accompany the NIOSH officer during the initial physical inspection of the workplace. Since NIOSH experience in the conduct of this program indicates that visits subsequent to the initial inspection are principally for the purpose of environmental sampling and medical examinations, the presence of the representative of employees will not be routinely requested during these aspects of the investigation.

8. *Imminent dangers.* In response to a number of comments, the term "serious hazard" has been deleted and the statutory phrase "imminent danger" has been substituted therefor.

9. *Notification of determination to employers, affected employees and Department of Labor.* The method of notifying affected employees of the determination was the subject of a substantial number of comments. Section 85.11 requires that the employer post a copy of the determination at or near the work places of the affected employees. However, no posting is required if the employer requests NIOSH to mail copies to the affected employees and furnishes the Institute with a list of the names and mailing addresses of the employees determined by NIOSH to be exposed to the substance which is the subject of the health hazard evaluation.

Effective date. These regulations shall be effective 30 days after their publication in the FEDERAL REGISTER.

Dated: October 16, 1972.

VERNON E. WILSON,
Administrator, Health Services and Mental Health Administration.

Approved: October 30, 1972.

ELLIOT L. RICHARDSON,
Secretary.

85.9 Representatives of employers and employees; employee requests.
85.10 Imminent dangers.
85.11 Notification of determination to employers, affected employees, and Department of Labor.
85.12 Subsequent requests for health hazard evaluations.

AUTHORITY: The provisions of this Part 85 issued under the authority of section 8(g), 84 Stat. 1600; 29 U.S.C. 657(g).

§ 85.1 Applicability.

The provisions of this Part 85 are applicable to requests submitted by any employer or authorized representative of employees pursuant to section 20(a)(6) of the Occupational Safety and Health Act of 1970 for a determination of potentially toxic effects of any substance normally used or found in any place of employment to which the Act is applicable. This Part 85 is not intended

to preclude the use of other channels of communication with the National Institute for Occupational Safety and Health to obtain information and technical assistance related to toxic substances.

§ 85.2 Definitions.

Any term defined in the Occupational Safety and Health Act of 1970 and not defined below shall have the meaning given it in the Act. As used in this part:

(a) "Act" means the Occupational Safety and Health Act of 1970 (29 U.S.C. 651, et seq.).

(b) "Authorized representative of employees" means any person or organization meeting the conditions specified in § 85.3(b)(4) (i), (ii), or (iii).

(c) "Investigation" includes a physical inspection of the place of employment pursuant to section 8 of the Act and means such inspection, sampling, observations, and other measurements reasonably necessary to determine whether any substance found in the place of employment for which the request is made has potentially toxic effects in such concentrations as used or found.

(d) "Health hazard evaluation" means the investigation and the determination of potentially toxic effects of any substance normally used or found in any place of employment to which the Act is applicable.

(e) "Place of employment" means any factory, plant, establishment, construction site, or other area, workplace, or environment where work is performed by any employee of an employer.

(f) "NIOSH" means the National Institute for Occupational Safety and Health.

(g) "NIOSH officer" means a person authorized by NIOSH to conduct investigations.

(h) "Substance means any chemical or biological agent which has the potential to produce toxic effects.

(i) "Toxic effects" are those which result in short- or long-term disease, bodily injury, affect health adversely, or endanger the life of man.

§ 85.3 Procedures for requesting health hazard evaluations.

(a) A request for a health hazard evaluation should be addressed to the National Institute for Occupational Safety and Health, Hazard Evaluation Services Branch, U.S. Department of Health, Education, and Welfare, Cincinnati, Ohio 45202.

(b) A request for such an evaluation shall:

(1) Be in writing and signed by (i) the employer in whose place of employment the substance is normally found, or (ii) by an authorized representative of employees who are employed by such employer;

(2) State the requester's name, address, and telephone number, if any; the address of the place of employment where the substance is normally found; the specific workplace or workplaces involved, and the specific process or type of work which is the source of the substance or in which such substance is used;

(3) Specify with reasonable particularity the nature of the conditions, circumstances, or other grounds on which the request is made;

(4) State, where the requester is other than the employer:

(i) That he is an authorized representative, or an officer, of the organization representing the employees for purposes of collective bargaining; or

(ii) That he is an employee of the employer and is authorized by two or more employees employed in the workplace where the substance is normally found to represent them for purposes of the Act. Each such authorization shall be in writing and included in the request; or

(iii) That he is one of three or less employees employed in the workplace where the substance is normally found.

(5) Indicate whether the requester or those persons who have authorized the requester to represent them desire that NIOSH not reveal their names to the employer.

(c) The request shall, if the information is known to the requester:

(1) Identify the potentially toxic substance or substances involved;

(2) State the trade name, chemical name, and the manufacturer of each such substance;

(3) State whether the substance or the container of such substance has a warning label; and

(4) Specify the physical form of the substance, number of people exposed, length of exposure (hours/day), and occupations of exposed employees.

NOTE: The National Institute for Occupational Safety and Health has developed a form, entitled "Request for Health Hazard Evaluation," to assist persons in requesting evaluations under this part. Forms are available upon request from NIOSH, Hazard Evaluation Services Branch, Cincinnati, Ohio 45202, or from the NIOSH representative in any Regional Office of the Department of Health, Education, and Welfare.

§ 85.4 Acting on requests.

(a) When a request meeting the requirements of this part has been submitted in accordance therewith and designated employees of NIOSH have concluded that there is reasonable cause to believe that an investigation is warranted, a NIOSH officer will inspect the place of employment, collect samples where appropriate and perform such tests as necessary, including medical examinations of employees, to the conduct of a health hazard evaluation.

(b) If there is no reasonable cause to conclude that an investigation is warranted, the requester shall be notified in writing of such decision.

(c) Investigations shall be conducted in accordance with the requirements of this part.

§ 85.5 Authority for investigations.

(a) Employees of the National Institute for Occupational Safety and Health who have been issued the NIOSH official credentials (consisting of HSM Form 599-2 entitled "Identification Record") are authorized by the Director, NIOSH, for the purposes of section 20(a)(6) of the Act and pursuant to section 8, to enter without delay and at reasonable times any place of employment for which a request has been submitted, to inspect and investigate during regular working hours and at other reasonable times, and within reasonable limits and in a reasonable manner, any such place of employment, and all pertinent conditions, structures, machines, apparatus, devices, equipment, and materials therein as may be directly related to the determination whether any substance normally found in the place of employment for which a request has been submitted has potentially toxic effects in such concentrations as used or found. In connection with any such investigation, such NIOSH employees may question privately any employer, owner, operator, agent, or employee and review records required by the Act and regulations, and other related records.

(b) Areas containing information which is classified by any agency of the U.S. Government in the interest of national security will be inspected only by NIOSH employees who have obtained the appropriate security clearance.

§ 85.6 Advance notice of visits.

(a) Advance notice of visits to the place of employment may be given to expedite a thorough and effective investigation. Advance notice will not be given when, in the judgment of the NIOSH officer, giving such notice would adversely affect the validity and effectiveness of the investigation.

(b) Where a request in accordance with this part has been made by an authorized representative of employees, advance notice in accordance with paragraph (a) of this section will be given by NIOSH to the requester, the representative of the employees for purposes of collective bargaining if such representative is other than the requester, and to the employer.

(c) Where a request in accordance with this part has been made by any employer, advance notice will be given by NIOSH to the employer. Upon the request of the employer, NIOSH will inform the authorized representative of employees of the visit: *Provided*, The employer furnishes NIOSH in writing with the identity of such representative and with such information as is necessary to enable NIOSH promptly to inform such representative of the visit.

§ 85.7 Conduct of investigations.

(a) Prior to beginning an investigation, NIOSH officers shall present their credentials to the owner, operator, or agent in charge at the place of employment, explain the nature, purpose, and scope of the investigation and the records specified in § 85.5 which they wish to review. Where the investigation is the result of a request submitted by an authorized representative of employees, a copy of the request shall be provided to the employer, except where the requester or any person authorizing the requester pursuant to § 85.3(b)(4)(ii) has indicated

that NIOSH not reveal his name to the employer, in which case, a summary of the basis for the request shall be provided to the employer.

(b) At the commencement of an investigation, the employer should precisely identify information which can be obtained in the workplace or workplaces to be inspected as trade secrets. If the NIOSH officer has no clear reason to question such identification, such information shall not be disclosed except in accordance with the provisions of section 20(a)(6) and section 15 of the Act. However, if NIOSH at any time questions such identification by an employer, not less than 15 days' notice to an employer shall be given of the intention to remove the trade secret designation from such information. The employer may within that period submit a request to the Director, NIOSH, to reconsider this intention and may provide additional information in support of the trade secret designation. The Director, NIOSH, shall notify the employer in writing of the decision which will become effective no sooner than 15 days after the date of such notice.

(c) NIOSH officers are authorized to collect environmental samples and samples of substances, to take or obtain photographs related to the purpose of the investigation, employ other reasonable investigative techniques, including medical examinations of employees with the consent of such employees, and to question privately any employer, owner, operator, agent, or employee. The employer shall have the opportunity to review photographs taken or obtained for the purpose of identifying those which contain or might reveal a trade secret.

(d) NIOSH officers shall comply with all safety and health rules and practices at the place of employment being investigated, and they shall provide and use appropriate protective clothing and equipment. In situations requiring specialized or unique types of protective equipment, such equipment shall be furnished by the employer.

(e) The conduct of investigations shall be such as to preclude unreasonable disruption of the operations of the employer's establishment.

§ 85.8 Provision of suitable space for employee interviews and examinations; identification of employees.

An employer shall, on request of the NIOSH officer, provide suitable space, if such space is reasonably available, to NIOSH to conduct private interviews with, and examinations of, employees. NIOSH officers shall consult with the employer as to the time and place of the medical examination and shall schedule such examinations so as to avoid undue disruption of the operations of the employer's establishment. NIOSH shall conduct, and assume the medical costs of, examinations conducted under this part.

§ 85.9 Representatives of employers and employees; employee requests.

(a) NIOSH officers shall be in charge of investigations. Where the request for a health hazard evaluation has been made by an authorized representative of employees, a representative of the employer and a representative authorized by his employees who is an employee of the employer shall be given an opportunity to accompany the NIOSH officer during the initial physical inspection of any workplace for the purpose of aiding the investigation by identifying the suspected hazard. The NIOSH officer may permit additional employer representatives and such additional representatives authorized by employees to accompany him where he determines that such additional representatives will further aid the investigation. However, if in the judgment of the NIOSH officer, good cause has been shown why accompaniment by a third party who is not an employee of the employer is reasonably necessary to the conduct of an effective and thorough investigation of the workplace, such third party may accompany the NIOSH officer during the inspection: *Provided, however,* That access by such persons to areas described in paragraph (d) of this section shall be in accordance with the requirements of such provision, and access to areas described in paragraph (e) of this section shall be with the consent of the employer. A different employer and employee representative may accompany the officer during each different phase of an inspection if this will not interfere with the conduct of the investigation.

(b) NIOSH officers are authorized to resolve all disputes as to who is the representative authorized by the employer and employees for the purpose of this section. If there is no authorized representative of employees, or if the NIOSH officer is unable to determine with reasonable certainty who is such representative, he shall consult with a reasonable number of employees concerning matters directly related to the health hazard evaluation.

(c) NIOSH officers are authorized to deny the right of accompaniment under this section to any person whose conduct interferes with a fair and orderly physical inspection.

(d) With regard to information classified by an agency of the U.S. Government in the interest of national security, only persons authorized to have access to such information may accompany an officer in areas containing such information.

(e) Upon request of an employer, any representative authorized under this § 85.9 by employees in any area containing trade secrets shall be an employee in that area or an employee authorized by the employer to enter that area.

§ 85.10 Imminent dangers.

Whenever, during the course of, or as a result of, an investigation under this part, the NIOSH officer believes that there is a reasonable basis for an allegation of an imminent danger, NIOSH will immediately advise the employer and those employees who appear to be in immediate danger of such allegation and will inform appropriate representatives of the Department of Labor or the State agency designated under section 18(b) of the Act.

§ 85.11 Notification of determination to employers, affected employees and Department of Labor.

(a) A determination made pursuant to section 20(a)(6) of the Act will, as a minimum: (1) Identify and set forth, where appropriate, the concentrations of the substance(s) found in the place of employment and the conditions of use, and (2) state whether such substance(s) has potentially toxic effects in such concentrations, as well as the basis for such judgments.

(b) Copies of the determination will be mailed to the employer and to the authorized representatives of employees.

(c) Except as hereinafter provided, the employer shall post a copy of the determination for a period of 30 calendar days at or near the workplace(s) of affected employees. The employer shall take steps to insure that the posted determinations are not altered, defaced, or covered by other material during such period. The employer will not be required to post the determination if the employer requests that copies of the determination be mailed to affected employees and furnishes NIOSH with a list of the names and mailing addresses of the employees employed in the workplace(s) designated by the NIOSH Officer. In the latter event, NIOSH will mail such copies to affected employees at the mailing addresses provided by the employer.

(d) For purposes of this section, the term "affected employees" means those employees determined by NIOSH to be exposed to the substance(s) which is the subject of the health hazard evaluation.

(e) Copies of all determinations will be forwarded to the Department of Labor and the appropriate State agency designated under section 18(b) of the Act. If the Secretary of Health, Education, and Welfare determines that any substance is potentially toxic at the concentrations in which it is used or found in a place of employment, and such substance is not covered by an occupational safety or health standard promulgated under section 6 of the Act, the Secretary of Health, Education, and Welfare will immediately submit such determination to the Secretary of Labor together with all pertinent criteria.

§ 85.12 Subsequent requests for health hazard evaluations.

Where a request is received for a health hazard evaluation in a place of employment in which an evaluation under this part previously has been made, the Secretary may make a subsequent investigation if, as a result of the passage of time or additional information, he deems such a subsequent investigation consistent with the purpose of the Act.

REQUEST FOR HEALTH HAZARD EVALUATION

This form is provided to assist in registering a request for a health hazard evaluation with the U.S. Department of Health, Education, and Welfare as provided in Section 20(a)(6) of the Occupational Safety and Health Act of 1970 and 42 CFR Part 85. (See Statement of Authority on Reverse Side.) *The provisions of this section provide for evaluation of health hazards resulting from exposure to chemical substances only: Physical agents (noise, heat, etc.) and safety are not covered by this section.*

Name of Establishment Where Substance(s) Exists _____

Company Address { Street _____ Telephone _____
City _____ State _____ Zip Code _____

1. What Product or Service does the Establishment Produce? _____

2. Specify the particular building or worksite where the substance(s) is located, including address.

3. Specify the name, title, and phone number of the employer's agent(s) in charge. _____

4. Describe briefly the substance(s) which exists by completing the following:

   Identification of Toxic Substance(s) _____

   Trade Name(s) (If Applicable) _____ Chemical Name(s) _____

   Manufacturer(s) _____

   Does the material have a warning label? ____Yes ____No. If yes; attach copy of label or a copy of the information contained on the label.

   Physical Form of Substance(s): ☐ Dust ☐ Gas ☐ Liquid ☐ Mist ☐ Other

   How are you exposed? ☐ Breathing ☐ Swallowing ☐ Skin Contact

   Number of People Exposed _____ Length of Exposure (Hours/Day) _____

   Occupations of Exposed Employees _____

5. Using the space below describe further the nature of the conditions or circumstances which prompted this request and other relevant aspects which you may consider important, such as the nature of the illness or symptoms of exposure, the concern for the potentially toxic effects of a new chemical substance introduced into the workplace, etc. _____

1028

6. (a) To your knowledge has this substance been considered previously by any Government agency? _____ (b) If so, give the name and address of each. _____

_____

_____

(c) and, the approximate date it was so considered. _____

7. (a) Is a similar request currently being filed with or under investigation by any other Government (State or Federal) agency? _____ (b) If so, give the name and address of each _____

_____

8. Requester — (*Employees of State, Local or Federal Agencies are not eligible.*)
The undersigned Requester believes that a substance (or substances) normally found in the place of employment may have potentially toxic effects in the concentrations used or found.

Signature _____ Date _____

Typed or Printed Name _____ Phone: Home— _____

Address { Street _____ Business— _____
City _____ State _____ Zip Code _____

Check One:

☐ I am an Employer Representative

☐ I am an Authorized Representative of, or an officer of the organization representing the employees for purposes of collective bargaining. State the name and address of your organization. _____

_____

☐ I am an employee of the employer and an Authorized Representative of two or more employees in the workplace where the substance is normally found. Add signatures of authorizing employees below:

Name _____ Phone _____

Name _____ Phone _____

☐ I am one of three or less employees in the workplace where the substance is normally found.

Please indicate your desire: ☐ I do not want my name revealed to the employer.

☐ My name may be revealed to the employer.

Authority:
Section 20(a)(6) of the Occupational Safety and Health Act, (29 U. S. C. 669(a)(6)) provides as follows: The Secretary of Health, Education, and Welfare shall . . . determine following a written request by any employer or authorized representative of employees, specifying with reasonable particularity the grounds on which the request is made, whether any substance normally found in the place of employment has potentially toxic effects in such concentrations as used or found; and shall submit such determination both to employers and affected employees as soon as possible. If the Secretary of Health, Education, and Welfare determines that any substance is potentially toxic at the concentrations in which it is used or found in a place of employment, and such substance is not covered by an occupational safety or health standard promulgated under section 6, the Secretary of Health, Education, and Welfare shall immediately submit such determination to the Secretary of Labor, together with all pertinent criteria.

APPENDIX IV

RTECS TUMORIGENIC, MUTAGENIC, AND REPRODUCTIVE EFFECTS CITATIONS SUBFILES

A new edition of the NIOSH Registry of Toxic Effects of Chemical Substances (RTECS) Subfiles is now available. It is titled "Tumorigenic, Mutagenic, and Reproductive Effects Citations," and is dated July 1981. Since the 1980 printed Registry reflects the RTECS file as of January 1981, the Subfiles include information not contained in this printed edition of the Registry (see Volume 1, Preface). The Subfiles supersede the 1975 and 1976 editions of "Suspected Carcinogens" and the October 1979 edition of "Tumorigenic, Teratogenic, and Mutagenic Citations." The three Subfiles are available as a single publication on microfiche only, and they must be ordered from:

Superintendent of Documents
U.S. Government Printing Office (GPO)
Washington, D.C. 20402

When ordering from the Superintendent of Documents, specify GPO stock number 017-033-00396-3. The cost for U.S. orders is $5.00 per copy; for orders mailed outside the U.S., the price is $6.25.

APPENDIX V

RTECS COMPUTER TAPE

The 1980 edition of the NIOSH Registry of Toxic Effects of Chemical Substances (RTECS) is now available on computer magnetic tape. The 1980 RTECS tape, which supersedes the 1979 edition, contains the 45,156 substance entries listed in this printed edition of the Registry.

The tape contains two files: (1) RTECS data records and (2) CODEN bibliographic references. Complete documentation, including a description of all file layouts and data fields, is provided in the User's Guide. Characteristics of the tape are as follows: 1 reel; 9 track; 6250 BPI; EBCDIC character code (upper and lower case); odd parity; 107-character fixed-length records.

Both the tape and the file documentation are available only from:

National Technical Information Service (NTIS)
Port Royal Road
Springfield, Virginia 22161
Telephone: (703) 487-4650

Stock numbers and domestic prices are listed below. Non-U.S. customers should contact NTIS for foreign prices and purchasing instructions before ordering.

NTIS Stock No.	Title	Price
PB81 190431	1980 Edition-Registry of Toxic Effects of Chemical Substances, Computer Tape File	$125.00
PB81 190449	1980 Edition-Registry of Toxic Effects of Chemical Substances, User's Guide to the Computer Tape File	$9.00 (paper) $4.00 (microfiche)

APPENDIX VI

RTECS ON-LINE DATA BASE

The NIOSH Registry of Toxic Effects of Chemical Substances (RTECS) is now available as a real-time, interactive computer data base from two different sources: (1) the National Library of Medicine (NLM) Medical Literature Analysis and Retrieval System (MEDLARS), and (2) the National Institutes of Health/Environmental Protection Agency (NIH/EPA) Chemical Information System (CIS). These systems permit the user to search the RTECS file for specific data or subsets of data and to compile RTECS subfiles tailored to his particular needs. Updates to these systems are provided on a quarterly basis.

National Library of Medicine MEDLARS

MEDLARS is NLM's computerized literature retrieval service, which is available through a nationwide network of more than 1300 NLM on-line centers. The MEDLARS RTECS file is accessed like other NLM files (such as TOXLINE and MEDLINE) and is available as a standard service to all NLM on-line service subscribers. The RTECS data fields are structured in the same format as they appear in the printed and microfiche Registry. RTECS records can be searched on a given route, species, toxic dose type, toxic effect, etc., and can be retrieved by entering the desired free text terms or specific toxic effects. Chemical substances can be entered by their prime names or synonyms, RTECS accession numbers, or Chemical Abstracts Service (CAS) registry numbers. Terms may be entered singly or combined using AND, OR, and AND NOT. One can generate subfiles of compounds with similar attributes, for example, all substances with oral-rat LDLo toxicity data or all substances for which IARC monographs have been issued. Records can be printed on-line at the user's terminal, or off-line and mailed to the user from NLM. For additional information on how to interrogate the MEDLARS RTECS file, contact:

RTECS
Toxicology Information Program
Specialized Information Services
National Library of Medicine
8600 Rockville Pike
Bethesda, Maryland 20209
Telephone: (301) 496-1131

NIH/EPA Chemical Information System

The NIH/EPA CIS consists of a collection of chemical data bases available commercially via TELENET. A major feature of the CIS is the common link between data bases provided by the Structure and Nomenclature Search System (SANSS) component. The RTECS component of CIS permits one to search the file on either CAS or RTECS accession number, or on toxicity data. In the latter case, one can specify species, route of entry, type and numerical range of toxic dose, and toxic effect. Using the SANSS, one can specify an actual chemical structure or substructure, or its name, and generate a list of all compounds in the RTECS file which contain that feature, along with their toxicity data. For information about subscribing to and interrogating the CIS, contact:

NIH/EPA CIS Project
Information Sciences Corporation
2135 Wisconsin Avenue, N.W.
Washington, D.C. 20007
Telephone: (toll free) (800) 424-2722
(in Washington) (202) 298-6200

APPENDIX VII

RTECS MICROFICHE

Since October 1977, the NIOSH Registry of Toxic Effects of Chemical Substances (RTECS) has been produced in microfiche on a quarterly basis. Each quarterly issue of the Registry contains the Introduction and Detailed File Description, Appendixes, file statistics, a list of all bibliographic references alphabetized by CODEN, and the complete RTECS data file. The January 1981 issue contains 47 fiche (48:1 reduction ratio) and includes the 45,156 substances listed in this printed edition of the Registry.

The use of microfiche facilitates data storage and processing, and allows NIOSH to economically update and produce the RTECS file four times per year. This is especially valuable for those who wish to maintain current RTECS toxicity data, since approximately 1500 new substances are input to the file each quarter. In addition, both new and revised data lines are continually being added to previously listed substances. Each quarterly issue contains the complete data file as of the date of publication so that prior issues do not have to be retained, except for historical purposes. Furthermore, all new substances added to the file since the previous quarterly update are highlighted to facilitate their immediate identification.

A subscription to the quarterly microfiche edition of the Registry is available only from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402. As of September 1981, the domestic cost is $29.00 per year for a series of four revisions dated January, April, July, and October. (NOTE: The cost to non-U.S. customers is $36.25 per year, which includes a 25% special handling charge for orders mailed outside of the United States.) The four issues that you receive will commence with the most current quarterly revision; back issues will not be provided. Note that the RTECS quarterly microfiche has no GPO Stock Number. Instead, when ordering this microfiche subscription from GPO, you should specify "Subscription to Microfiche Edition, Registry of Toxic Effects of Chemical Substances." Payment to GPO must be made in one of the following three ways: (1) enclose remittance with your order (make checks payable to Superintendent of Documents), (2) charge to your GPO deposit account, or (3) charge to your VISA or Master Card account (for additional information telephone (202) 783-3238).

KEY TO ABBREVIATIONS

(Refer to Introduction for Elaboration of Certain Definitions)

ALR - allergenic effects
AQTX - Aquatic Toxicity
asn - Aspergillus nidulans
BCM - blood clotting mechanism effects
bes - Bacillus subtilis
BLD - blood effects
bmr - bone marrow
BPR - blood pressure effects
brd - bird (domestic or lab)
bwd - wild bird species
C - continuous
CAR - carcinogenic effects
cat - cat
cc - cubic centimeter
chd - child
ckn - chicken
CL - ceiling concentration

ial - intraaural
IARC - International Agency for Research on Cancer
iat - intraarterial
ice - intracerebral
icv - intracervical
idr - intradermal
idu - intraduodenal
ihl - inhalation
imm - immersion
imp - implant
ims - intramuscular
inf - infant
ipc - intraplacental
ipl - intrapleural
ipr - intraperitoneal
IRDS - primary irritation dose
irn - intrarenal
IRR - irritant effects (systemic)
isp - intraspinal
itr - intratracheal
ivg - intravaginal
ivn - intravenous
kg - kilogram (one thousand grams)
kdp - Klebsiella pneumoniae
L - liter
LC50 - lethal concentration 50 percent kill
LCLo - lowest published lethal concentration
LD50 - lethal dose 50 percent kill
LDLo - lowest published lethal dose
leu - leukocyte
lng - lung
lvr - liver
lym - lymphocyte
M - minute
m3 - cubic meter
mam - mammal (species unspecified)
man - man
mg - milligram (one thousandth of a gram;10-3 gram)
mky - monkey
ml - milliliter
MLD - mild irritation effects
mma - microsomal mutagenicity assay
MMI - mucous membrane effects
mmo - mutation in microorganisms
mmol - millimole
mmr - mammary gland
mnt - micronucleus test
MOD - moderate irritation effects
mol - mole
mppcf - million particles per cubic foot
mrc - gene conversion and mitotic recombination
msc - mutation in somatic mammalian cells
MSK - musculo-skeletal effects
MTDS - mutation dose
MTH - mouth effects
mul - multiple routes
mus - mouse
NEO - neoplastic effects
ng - nanogram (one billionth of a gram;10-9 gram)
nmol - nanomole
nsc - Neurospora crassa
nse - non-standard exposure
OBS. - obsolete (trade name)
ocu - ocular
open - open irritation test
orl - oral
ORM - Other Regulated Material (DOT)
OSHA - Occupational Safety and Health Administration
otr - oncogenic transformation
ovr - ovary
par - parenteral
pg - picogram (one trillionth of a gram;10-12 gram)
pgn - pigeon
pig - pig
Pk - peak concentration
pmol - picomole
PNS - peripheral nervous system effects
ppb - parts per billion (v/v)
pph - parts per hundred (v/v) (percent)
ppm - parts per million (v/v)
ppt - parts per trillion (v/v)
preg - pregnant
PSY - psychotropic effects
PUL - pulmonary system effects
qal - quail
rat - rat
RBC - red blood cell effects
rbt - rabbit
rec - rectal
REGS - standards and regulations
rns - rinsed with water
S - second
sat - Salmonella typhimurium
sce - sister chromatid exchange
SCP - Standards Completion Program
scu - subcutaneous
SEV - severe irritation effects
skn - administration onto skin
SKN - skin effects (systemic)
sln - sex chromosome loss and nondisjunction
slt - specific locus test
sme - Saccharomyces cerevisiae
spm - sperm morphology
sql - squirrel
srm - Serratia marcescens
sxp - Schizosaccharomyces pombe
SYS - systemic effects
TC - toxic concentration
TCLo - lowest published toxic concentration
TD - toxic dose
TDLo - lowest published toxic dose
TER - teratogenic effects
tes - testis
TFX - toxic effects
TLV - Threshold Limit Value
tod - toad
trk - turkey
tm - heritable translocation test
TWA - time weighted average
TXDS - toxic dose
ug - microgram (one millionth of a gram;10-6 gram)
umol - micromole
unk - unreported
UNS - toxic effects unspecified in source
W - week
WBC - white blood cell effects
wmn - woman
Y - year
% - percent
