Mining Product: How Health & Safety Professionals Can Use EVADE Software to Assess Worker Exposure

Original creation date: January 2018

Authors: E Haas, A Cecala, A Glowacki, J Schall, B Connor

A video tutorial describing the use of NIOSH developed software called EVADE. EVADE matches up recorded video and logged data to identify potential health exposure risks. The video comes from a worker-mounted camera and the logged data comes from a personal assessment monitor used to measure either dust, noise, diesel, or chemical exposure. This tutorial shows where to access and download this free software, and then how to create, save, and perform a basic exposure assessment using the software.

Video - January 2018
