- Lesson 6 – Taking Action

DHHS (NIOSH) PUBLICATION NUMBER 2018-165A

JULY 2018

While many young people have thought about working, but have they considered that, while work has many benefits, it also has risks? This video covers Lesson 1, *Young Worker Injuries*. It explains how to: introduce the topic of workplace safety, assess students’ prior knowledge about workplace safety and health, and teach students that injuries at work are predictable and preventable.

The video also covers the activities in Lesson 1: job safety quiz, *Mallory’s Story* video, and real life stories of teens injured on the job.
