DHHS (NIOSH) PUBLICATION NUMBER 2018-165C

JULY 2018

After identifying a hazard, what should a young worker do? This video covers Lesson 3, Making the Job Safer. It guides instructors on how to explain the three main ways to reduce or eliminate hazards in the workplace:

- remove the hazard,
- implement policies and procedures, and
- use personal protective equipment (PPE).

It also covers the hazard control game, Safety Pyramid.

The video also covers the activities in Lesson 1: job safety quiz, *Mallory's Story* video, and real life stories of teens injured on the job.
