

Seminars: Respiratory Health

Select seminars offered by the University of Michigan School of Public Health have been recorded and are available for online viewing. These seminars have been arranged according to The National Institute for Occupational Safety and Health (NIOSH)'s National Occupational Research Agenda (NORA) sector and cross-sector groups. Click on a category below to view the associated seminars related to Respiratory Health.

IAQ in Michigan Schools: Improving Indoor Air Quality to Respond to COVID and Beyond

A 21st Century Toolkit for the Modern Exposure Scientist: Crayons, Paper, and Plastic

2016

[A 21st Century Toolkit for the Modern Exposure Scientist: Crayons, Paper, and Plastic](#)

John Volckens, PhD, Colorado State University

This lecture highlights recent research at Colorado State University at the interface of engineering, exposure science, and public health, with an emphasis on air quality. This lecture will also discuss technologies (which leverage innovations that over 100 years

old) designed to overcome classic limitations associated with exposure assessment: time, cost, usability, and scalability.
