

# Occupational Health Profile, 2008–2012

## Sarpy/Cass Department of Health and Wellness

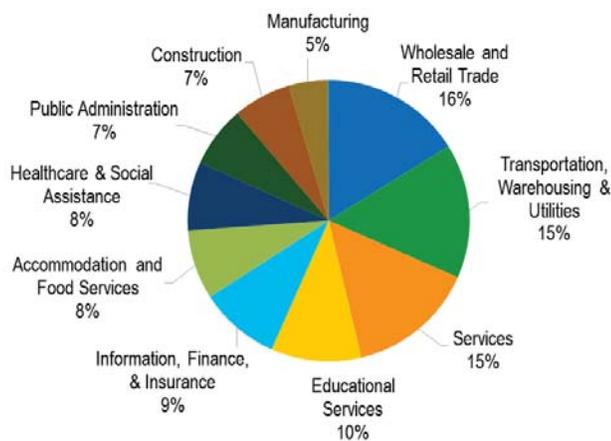

### WORK AND PUBLIC HEALTH

- Work is one of the most important determinants of a person's health.
- A safe and healthy workforce benefits Nebraska's overall health and economy.
- The Nebraska Occupational Safety and Health Surveillance Program tracks work-related injuries, illnesses and hazards.
- Occupational health surveillance helps identify worker health trends, detect emerging hazards, and develop prevention strategies with the goal of reducing work-related injuries and illnesses.

### WORKFORCE

- In 2012, there were 93,454 employed persons residing in the Sarpy/Cass Department of Health and Wellness district. <sup>1</sup>
- The wholesale and retail trade industry employed 16% of workers and was the largest employing sector. <sup>2</sup>

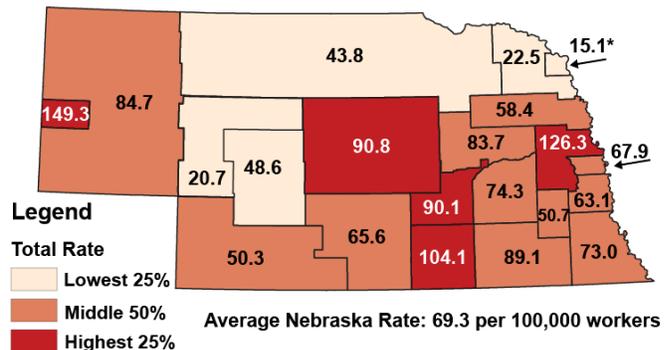

Distribution of LHD workforce by industry, 2012 <sup>2</sup>

Average rate of work-related inpatient hospitalizations per 100,000 workers, LHD regions, 2008–2012 <sup>3</sup>

\*Rate does not reflect patients treated in out-of-state hospitals

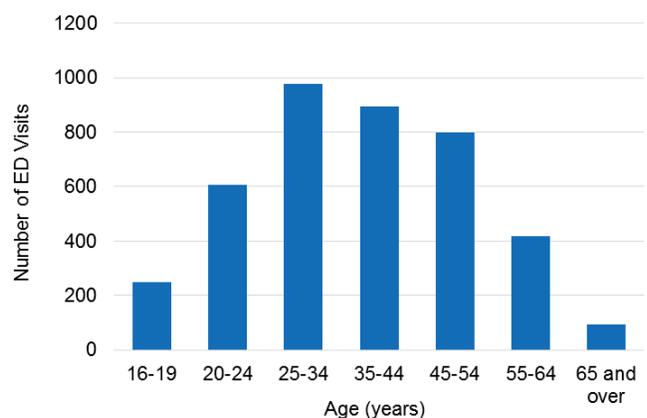

### INPATIENT HOSPITALIZATIONS

- From 2008 to 2012, there were 286 inpatient hospitalizations due to work-related injury or illness. <sup>3</sup>
- The work-related inpatient hospitalization rate was 63.1 per 100,000 workers and was lower than the overall Nebraska rate of 69.3. <sup>3</sup>

### EMERGENCY DEPARTMENT VISITS

- From 2008 to 2012, there were 4,038 emergency department visits due to work-related injury or illness. <sup>4</sup>
- The average work-related emergency department (ED) visit rate was 890.3 cases per 100,000 workers and was higher than the overall Nebraska rate of 716.2. <sup>4</sup>
- Workers aged 25–34 years old experienced the most work-related ED visits. <sup>4</sup>

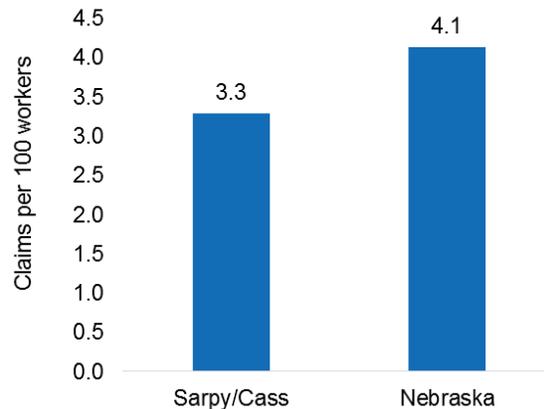

Work-related ED visits by age group, LHD, 2008–2012 <sup>4</sup>

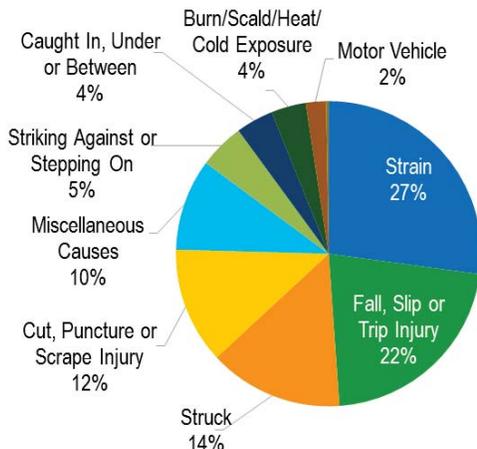

## WORKERS' COMPENSATION CLAIMS

- From 2008 to 2012, there were 14,928 injuries and illnesses reported to workers' compensation. <sup>5</sup>
- The workers' compensation claim rate was 3.3 claims per 100 workers, which was lower than the overall Nebraska rate of 4.1. <sup>5</sup>
- Strains were the most common cause of injury, representing 27% workers' compensation claims. <sup>5</sup>
- The most common types of injuries/illnesses reported were strain, contusion, and laceration. <sup>5</sup>

Average workers' compensation claim rate, LHD and Nebraska, 2008–2012 <sup>5</sup>

Percent of LHD workers' compensation claims by cause of injury, 2008–2012 <sup>5</sup>

Top 10 types of injury among LHD workers' compensation claims, Nebraska, 2008–2012 <sup>5</sup>

Type of Injury	Number	Percent
Strain	4,342	29.1
Contusion	2,467	16.5
Laceration	2,128	14.3
Sprain	1,145	7.7
Specific Injuries-not classifiable	956	6.4
Puncture	620	4.2
Fracture	516	3.5
Foreign Body	420	2.8
Burn	361	2.4
Inflammation	320	2.1
