

NIOSH Project: Expansion and Maintenance of the National Agricultural Safety Database — Final Report

Covering the period 9/1/2006 through 8/31/2010

NIOSH/CDC Grant#: 1 R25 OH008968

Principal Investigator: Carol J. Lehtola, Ph.D.
Department of Agricultural and Biological Engineering
University of Florida
Gainesville, Florida

Subcontractor: Conceptual Arts, Inc.
Gainesville, Florida

Summary

A significant number of new educational materials and on-line videos were added to the National Agricultural Safety Database (NASD; www.nasdonline.org) during the project period, including print documents, video abstracts, and on-line videos. The collection now consists of over 2,700 print publications comprising over 6,000 pages, over 380 video abstracts, and over 20 on-line videos. A complete review and update of all video abstracts was conducted to ensure availability and relevance. NASD solicited and received permission from the *Journal of Agricultural Safety and Health* to host abstracts of its entire 15-year run, thus incorporating a major agricultural safety and health reference into the collection.

A new interactive training component called the NASD Training Series was introduced. Located at www.nasdtraining.org, this new component includes an administrative back-end, a user registration system, and lessons on PTO safety and on safely sharing the road with agricultural equipment. These two on-line lessons have already been used in the field and have received the Blue Ribbon Awards for Educational Media from the American Society for Agricultural and Biological Engineers in 2010.

It became necessary during the contract period to relocate NASD from its old home on the CDC server (www.cdc.gov/nasd) to an external server. The site now has its own URL -- www.nasdonline.org. There were numerous ramifications of this necessary move.

The NASD site was redesigned inside and out. From a user's perspective, the interface was greatly simplified and the site has a more modern appearance. From a developer's perspective, maintenance and expansion tasks are much more efficient. Promotional materials related to the site relocation and site redesign were disseminated to the ag safety community. Finally, an on-line, voluntary survey was conducted.

Project Background

The National Agricultural Safety Database (NASD) was first developed at the University of Florida (UF) in the 1990s as a means of facilitating the exchange of training and educational materials. Since that time, UF and NIOSH have partnered to maintain and develop a system that is well-known throughout the agricultural safety community and one of the most heavily accessed NIOSH resources. NASD has won several awards from the American Society of Agricultural and Biological Engineers.

In October 1993, NIOSH provided funds through its Agricultural Health Promotion System (AHPS) to develop the first NASD as a CD-ROM. For that first effort, publications were solicited from a wide variety of sources, including Extension and commercial sources, and hundreds of publications and video abstracts were submitted. In October 1994, the prototype was delivered to reviewers, and a few months later, in June 1995, the NASD '95 CD-ROM was released publically.

With many active state Extension agricultural safety programs, there were many specialists producing materials, and the process of collecting publications and updating the database continued. Updated CD-ROMS were produced in 1996, 1997, and 1998.

In the meantime, the World Wide Web had been launched, and the Internet as a means of publishing and collecting information became the obvious path for NASD. Again, NIOSH stepped in with funds and, in 1996, it made available a three-year contract directed by Dr. Rick Niemeier of NIOSH to both expand the collection and bring NASD to the Web. The entire database was converted into HTML, and by October 1997 the first NASD Web site went public. The project continued to publish CD-ROMS during this transitional period. This contract brought Conceptual Arts, Inc. (CA), of Gainesville, Florida, onto the NASD team.

After 1999, no more funding was made available for NASD, but in 2001, NIOSH supported NASD through the Southern Coastal Agromedicine Center at Eastern Carolina University. The center and NASD were supported for five years. NASD and its development were led by Dr. Carol Lehtola, Extension agricultural safety specialist at the University of Florida.

The Southern Coastal Agromedicine Center was not continued after 2006, but NIOSH continued supporting the development and availability of NASD through the three-year R25 to the University of Florida (PI: C. J. Lehtola) that is the subject of this report. The original contract supported the project from September 2006 through August 2009, and then a one-year, no-cost extension was approved that carried the project through August 2010.

Major Project Accomplishments

A. Updates and Additions to the NASD Collection

NASD is a collection of information about health, safety, and injury prevention in agriculture, and it consists of more than 2,700 publications. Materials in the database are formatted as hypertext, Adobe Acrobat PDF files, and streaming video. The collection includes fact sheets, training manuals, activity sheets, posters, sample news releases, public service announcements, and journal abstracts, among others. The information was submitted by governmental, non-governmental, and industrial safety professionals. All materials in NASD have been reviewed by a safety specialist and were subject to review and approval of the NASD editorial review board, when needed.

The basic work of building the NASD collection continued throughout the project period. With the decrease in the number of Extension agricultural safety programs across the country, the number of small documents contributed to NASD -- the fact sheet category -- also continued to decline. NASD has a substantial collection of these documents collected over the years, and the information they contain remains relevant. Authors, users, and an internal review called attention to a few materials that were not up-to-date, and we worked with authors to revise or amend those materials.

In addition to the document collection, NASD includes information on most of the organizations and authors that have contributed NASD materials -- all existing author and organization records were updated or verified, and hundreds of new author contact pages were created.

A complete review and update of all video abstracts was conducted to ensure availability and relevance. NASD solicited and received permission from the *Journal of Agricultural Safety and Health* to host abstracts of its entire 15-year run, thus incorporating a major agricultural safety and health reference into the collection.

Over 20% of the documents in the collection were submitted during this most recent grant period. Land-grant institutions have contributed the greatest number of documents to the collection.

Appendix A contains a list of everything updated or added to the NASD collection during the contract period. **Appendix B** contains a comprehensive list of everything contained in the NASD collection.

B. Site Relocation

NASD was first created as a CD-ROM - based database. Since its adaptation for web-delivery, the NASD website was always hosted on CDC.gov servers. Because of CDC-imposed restrictions, NASD was built and existed as a collection of static HTML pages while on the CDC servers. Because of its static, HTML-only construction and its large size, many aspects of site expansion and maintenance were cumbersome and time-intensive. Examples of cumbersome and time-intensive tasks included publishing new documents or changing existing documents and performing site-wide adjustments to content located on all pages, such as navigation links and header graphics.

CA was informed by NIOSH staff that in the coming years CDC would likely require all pages stored on their servers to use a pre-built CDC template. Redesigning NASD to use a CDC-specified template would have stripped NASD of its independent design identity while incurring an unanticipated and time-intensive cost. Additionally, a mandatory training visit to CDC offices by CA staff would have been required to begin work on the CDC template-based designs. CA was also warned of the possibility that NASD would need to be moved off the servers unless all content

contained in the site passed a NIOSH review.

In reaction to this combination of circumstances, CA developed a list of benefits and costs associated with moving NASD to a non-CDC server:

Benefits

[1] Freedom from programming restrictions – From a programming perspective, the CDC servers where NASD was located were very confining. Gaining the ability to use more advanced tools would enable NASD to be less time-consuming and expensive to maintain. Also, having the freedom to use these tools would open the possibility of adding features to NASD that were previously impractical or impossible.

[2] Updating – NASD was updated by sending a CD-ROM containing the large collection of individual static html files that comprise the website to CDC. CDC staff then had to manually upload this collection of files. Because of problems with updates in the past, CA had found it necessary to at least spot check NASD after each update. Clearly, this process did not allow for quick, on-the-fly fixes and adjustments. By relocating NASD to a less restrictive hosting environment, updates and adjustments could be made instantaneously. Further, the elimination of CDC's involvement in this process would help reduce errors.

[3] Maintenance efficiency – Early in NASD's development, an MS Access support database had been used to keep track of items in NASD. CA had rebuilt this support database as a web application using MySQL and PHP -- this gave UF staff direct access to the support database so that they could make additions and modifications directly. By moving NASD to a server that supports programming, CA would be able to "marry" the data in the support database to the actual website, making the administrative "support" database and the user/public database part of the same web application. This proposed solution would increase productivity and reduce errors by adding significant automation to this process.

[4] Portability – Migrating NASD to an improved hosting solution would provide enhanced portability. This portability would make it easy to relocate NASD to new hosting providers if and when the need arose. Further, following complete renovation of the NASD infrastructure, the cost and effort involved in such moves would be significantly reduced.

[5] Future expansion and maintenance will be more efficient and there will be fewer opportunities for the introduction of errors.

Costs:

[1] Potential loss of links: Most Search engines consider the number of links from external web pages when ranking search results (the more external links, the higher the ranking). Links from other websites that point to cdc.gov URLs may be lost in a move. To ameliorate this problem, CA could upload a collection of files to the CDC servers that identically mirrors the current NASD structure. These files would consist of special redirection pages that would a) automatically redirect users to their corresponding file at their new location, and b) inform search engines that the files had been permanently relocated. Also, CA could generate a report of referring links that bring in significant amounts of site traffic and contact the corresponding webmasters about updating those links.

[2] Potential loss of traffic: In the short-term, a potential loss of traffic would be expected with NASD's relocation. The redirection pages and referring links update efforts described

above would soften this expected loss in the short-term. In the long-term, we would expect traffic to normalize and return to pre-relocation levels.

[3] Credibility: Whatever credibility is lent to NASD by virtue of its residing on a "cdc.gov" server would be lost. It was difficult to estimate or characterize this particular cost of a relocation.

This analysis was presented to UF on August 11, 2008 in a proposal submitted by CA for the relocation and database upgrade effort. On December 9, 2008, CA's contract with UF was amended to allocate funds for the server relocation and database upgrade effort.

The process below was followed to complete the NASD site relocation:

[Step 1] Web-Hosting Account: the webhosting account used for hosting the NASD support database was upgraded so that it could accommodate the addition of both NASD as well as the NASD Training Series. The appropriate Domain Name Service (DNS) adjustments were made.

[Step 2] Relocate files: All of the files that made up NASD were loaded onto the new server. CA then constructed new search functionality along with new contact forms for the system. Extensive testing of the site took place to make sure the site was functioning at the same level as the site hosted on CDC.gov. UF was given access to NASD as it existed on the new server to assess the site content and performance.

[Step 3] Generate Redirect Pages: Once UF was satisfied with the functionality of NASD on the new server, CA wrote a script that generated redirect pages for each page in NASD. The redirect pages were then sent to NIOSH for uploading. With the re-direct pages in place, Google and other search engines would be able to adjust their indexes to point to the new NASD server.

[Step 4] Notification of linking site webmasters: CA then obtained statistics from NIOSH on which sites link to NASD the most. CA then attempted to notify those sites of the address change.

[Step 5] CDC/NIOSH search engines re-indexing: CA worked with NIOSH/CDC staff to create summaries of each and every NASD document to reside on the CDC server. These pages were then indexed by the CDC search engine so that users of the CDC search feature could locate and navigate to NASD articles.

[Step 6] Administrative Interface Modification: The support database was modified in order to accept and store NASD item body contents so that it can later be retrieved and displayed to NASD end-users.

[Step 7] NASD Website Reimplementation: The NASD website itself was re-implemented as a database-driven web application.

Because of the functionality required to host the NASD Training Series, it was never possible to host that site on the CDC servers. For this reason, the NASD Training Series was hosted externally and had its own URL. Because it existed before the NASD relocation occurred, NASD and the NASD Training Series exist as two separate websites with distinct URLs (www.nasdonline.org and www.nasdtraining.org respectively) linked to one another via hyperlinks only. If the project is re-funded in the future, the two sites should be integrated into a single site.

C. Site Redesign

The NASD website now includes an integrated system for managing the collection. The original set of support databases were developed using Microsoft Access. Those support databases were ported over to a newly-built Web-based MySQL/PHP system. This allowed us to build custom web-interfaces for UF staff and CA staff to automate various site management tasks (including a streamlined document submission process).

Web design standards continually evolve, and the NASD site had last been overhauled in 2003. CA and UF staff felt that improvements (both navigational and graphical) were needed. Figures 1 through 6 contain screen shots that document the site "before" and "after" the redesign.

Figure 1: Previous NASD Homepage Design

Figure 3: Previous NASD Menu Category Page Design

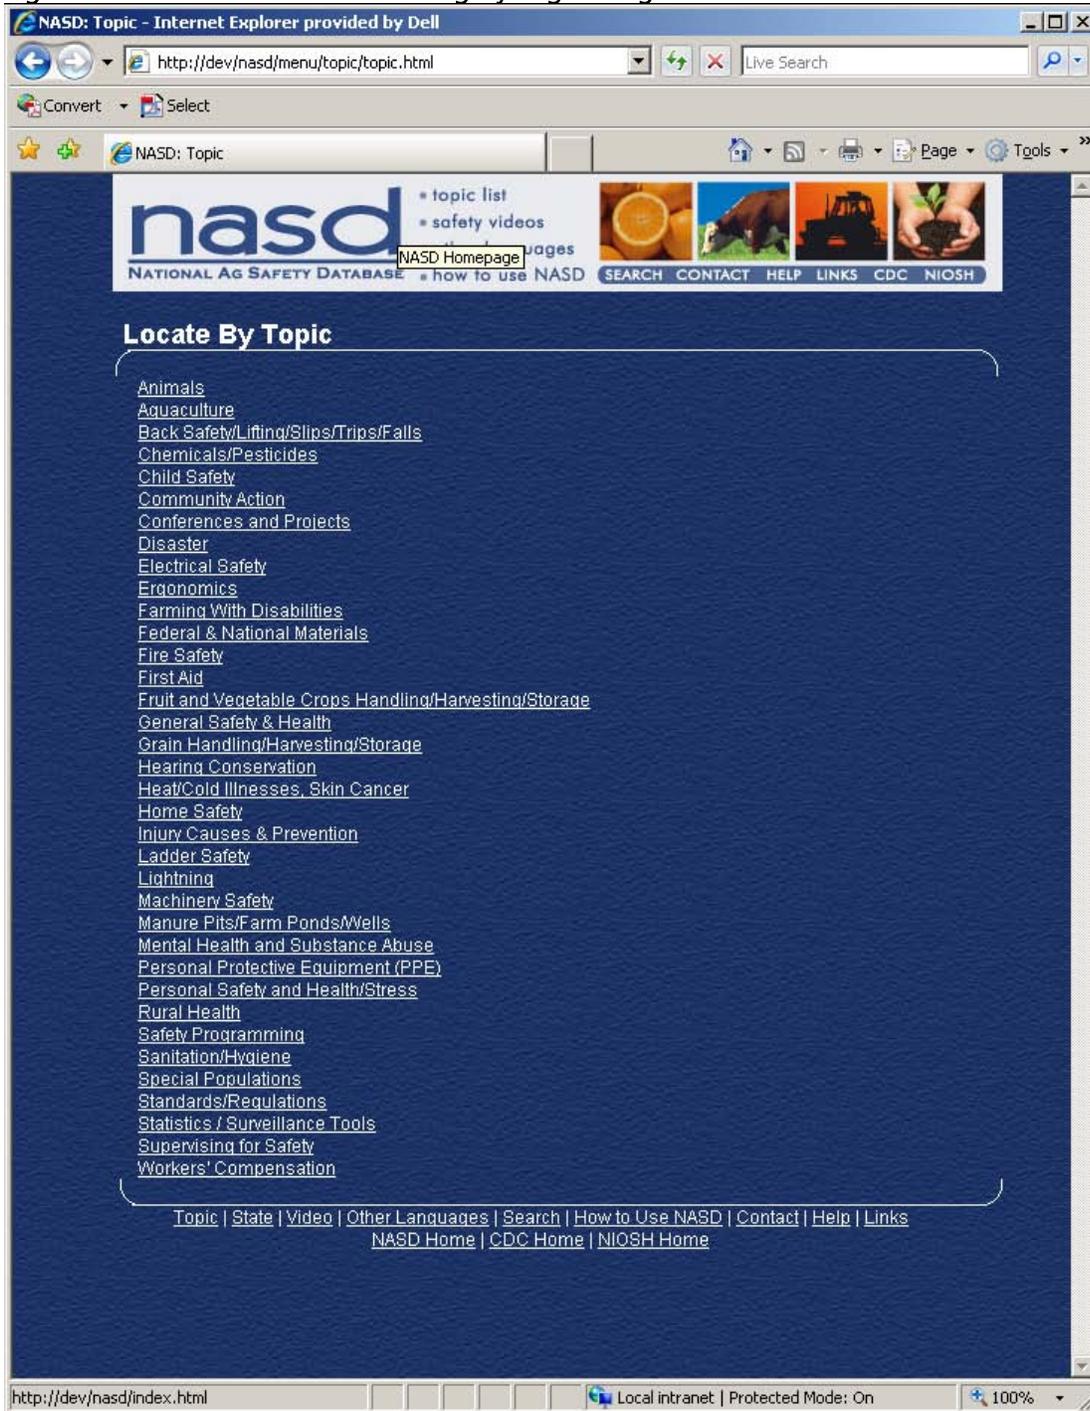

Figure 4: New NASD Menu Category Page Design

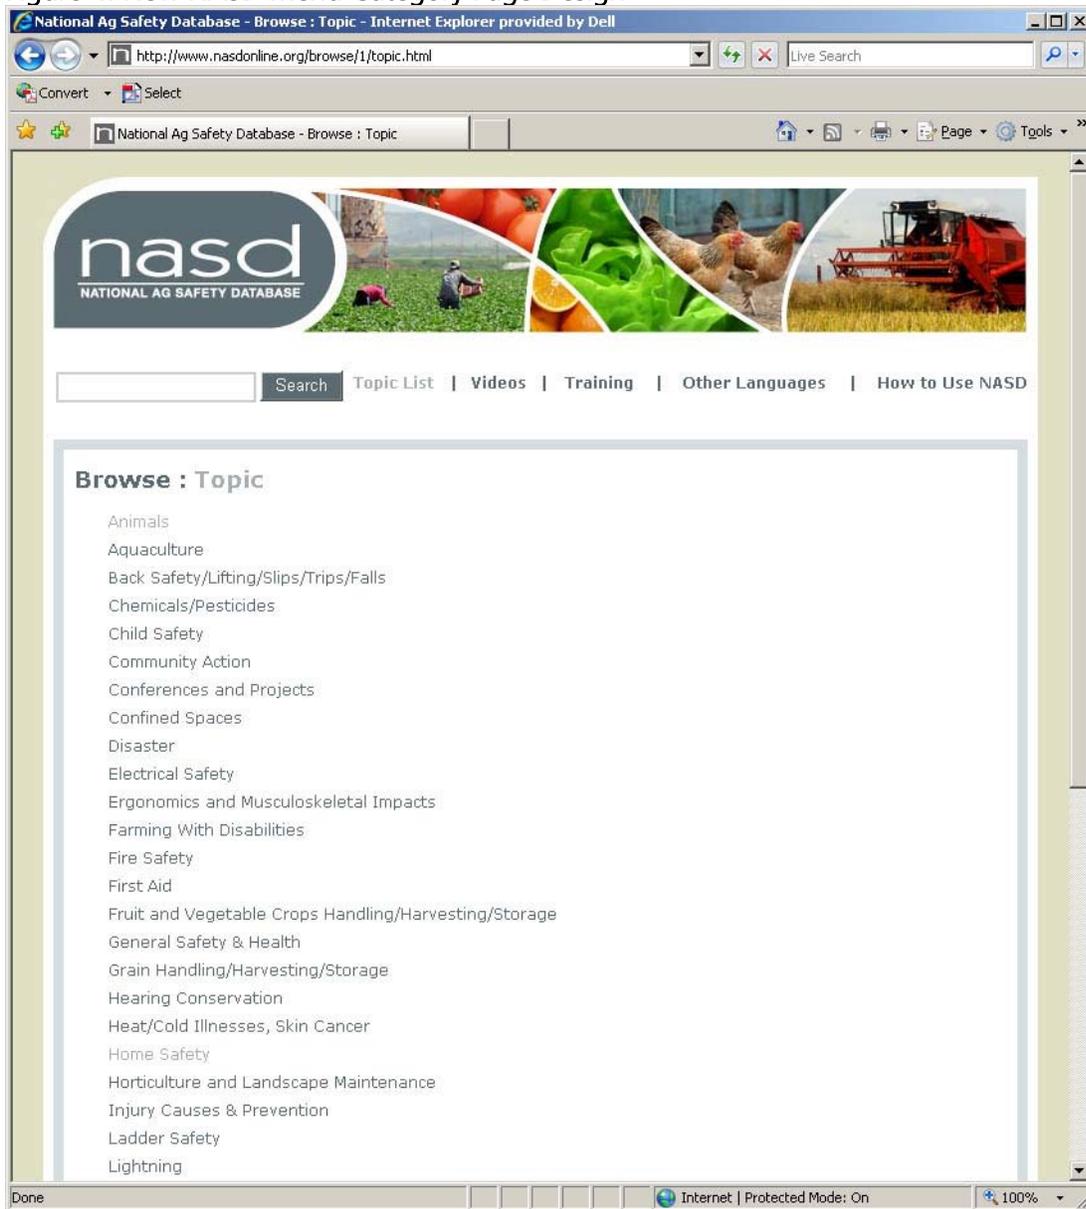

Figure 5: Previous NASD Document Page Design

The screenshot shows an Internet Explorer browser window with the following elements:

- Address Bar:** <http://dev/nasd/docs/d001601-d001700/d001612/d001612.html>
- Navigation:** Back, Forward, Stop, Refresh buttons, and a search box with "Live Search" text.
- Page Title:** NASD: Handling Farm Animals Safely
- Header:** NASD logo with "NATIONAL AG SAFETY DATABASE" and a list of links: "topic list", "safety videos", "other languages", "how to use NASD". Navigation links include "SEARCH", "CONTACT", "HELP", "LINKS", "CDC", "NIOSH".
- Main Content:**
 - ## Handling Farm Animals Safely
 - 
 - Farm Safety Association, Inc.**

Regardless of the types of animals you raise on your farm, complacency and the feeling of being safe in their presence may leave you off guard. Injuries usually occur when the victim does not expect it and all animals should be considered unpredictable. A lack of knowledge of animal behavior could put a handler into dangerous situations. Thousands of animal related injuries occur each year, some even resulting in death. Don't overlook the importance of safety around livestock, particularly with inexperienced employees and family members.

Some of the most common injuries include being stepped on by large animals, being knocked down, kicked, thrown while riding, or pinned between the animal and a hard surface. Many injuries also occur each year from bites.
 - 
 - ### FACILITIES AND EQUIPMENT

What can you do to prevent animal injuries? Proper equipment and handling facilities for your type of operation are a must. Larger animals, in particular need equipment that is able to restrain them for

D. NASD On-line, Interactive Training

As noted above, because of the functionality required to host the NASD Training Series, it was never possible to host that site on the CDC servers. For this reason, we acquired a new URL, <http://www.nasdtraining.org>, for the NASD Training Series - the newest feature of NASD. We created a shell structure that could be used to efficiently add lessons as they were developed. Part of the shell structure included a user account system. The system enables individuals to create an account that keeps track of their progress through the courses offered in the NASD Training Series, along with giving them the ability to provide us with additional information about their field of work and topic interests.

Figure 7: User Account Login Page

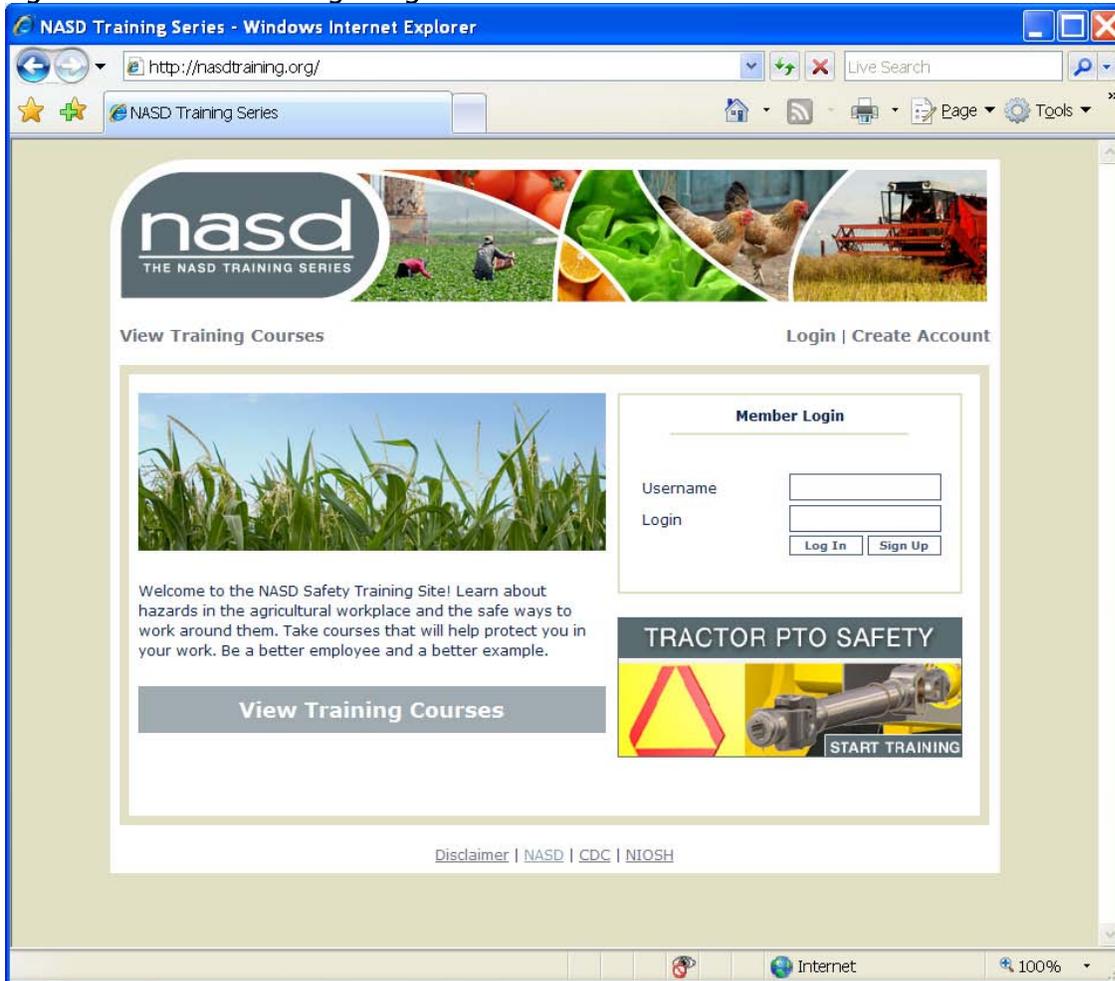

Figure 8: NASD User Account: View Profile

The screenshot shows a Windows Internet Explorer browser window displaying the NASD Training Series user profile page. The browser's address bar shows the URL <http://nasdtraining.org/home>. The page features a header with the NASD logo and a collage of agricultural images. Navigation links for 'View Training Courses' and 'View Profile | Logout' are present. The main content area is titled 'Your Account' and contains several sections:

- Personal Information** (with a [change](#) link):
 - Email:** chris@c-arts.com
 - State:** Arizona
 - Organization/Company:** Conceptual Arts
 - I work in:** Education
 - I am or work for a(n):** Local government
- Interests in Order of Preference:**
 - Interest 1: Federal & National Materials
 - Interest 2: Grain Handling/Harvesting/Storage
 - Interest 3: Workers' Compensation
- Receive Newsletter?** No
- Training Courses:** A table listing completed courses.

Course Title	Date Completed	Score
Tractor Safety: PTO Safety	08/29/2008	33%

At the bottom of the page, there is a [Disclaimer](#) link and logos for NASD, CDC, and NIOSH.

Two lesson modules were developed: "Tractor PTO Safety" and "Road Safety: Sharing the Road with Agricultural Equipment". The table below includes the module content and objectives for each lesson.

Lesson 1 - Tractor Safety: PTO Safety	Lesson 2 - Road Safety: Sharing the Road with Agricultural Equipment
<p>Contents:</p> <ul style="list-style-type: none"> • Overview • PTO Anatomy • PTO Guards • Use Proper Shields and Keep Them in Working Order • Never Step Over a PTO • Wear Proper Clothing • Disengage the PTO • Summary • Case Study • Quiz 	<p>Contents:</p> <ul style="list-style-type: none"> • Overview • Limitations of Agricultural Machines • Reaction Time, Stopping Distance, and Speed of Closure • The SMV Emblem • Reflectors and Lighting on Agricultural Equipment • Three Leading Ways to Crash • The Right Attitude Helps • Summary • Case Study • Clippings • Quiz
<p>Learning Objectives:</p> <ul style="list-style-type: none"> • What is a PTO (power take-off)? • How can you be injured by a PTO? • How can you make a PTO safer? • How can you work more safely around a PTO? 	<p>Learning Objectives:</p> <ul style="list-style-type: none"> • How are agricultural machines limited when they are on the public roads? • What is reaction time? • What is speed of closure? • What is an SMV emblem and what does it mean? • What do the lights and reflectors on agricultural equipment tell you? • What are the three main ways that cars collide with agricultural equipment? • What does it mean to "share the road"?

Two separate versions of each training module were developed: An interactive (Flash-based) version and a text-only version. The text-only version was designed for users with disabilities that may limit their ability to use the interactive version, and also for those who need to print the training course in order to take it to a location where access to a computer is unavailable.

The interactive version of each training module relies heavily on the use of illustrations, games, voiceovers, and other interactive components. Through different sections of the interactive version of the training module there are Flash-based games that help reinforce concepts taught in the training. Instructor materials have also been made available through the site for teachers.

Prior to the official release, Conceptual Arts and UF staff conducted a focus group at the University of Florida for each module. Based on feedback received from the focus group, appropriate adjustments were made.

E. Voluntary Survey of NASD Users

In 2009, we posted a voluntary survey on the NASD Web site with a prominent link on the homepage. Carol Lehtola sent an email to her extensive list of safety contacts requesting that they visit the site and consider responding to the brief set of questions. We had conducted a similar survey in 2003 composed of eleven questions. In the earlier survey we asked a more general set of questions:

1. Where do you typically obtain ag safety and health information?
2. On average, how often do you use the Internet to find information about a safety and health?
3. Which, if any of the following Web sites have you used to obtain ag safety and health information?
4. Have you ever used NASD before?
5. On average, how often do you use NASD to find information about ag safety and health?
6. How important to you is NASD as an information resource?
7. How did you first find out about NASD?
8. In general, when you use NASD to search for information, are you able to find enough information quickly and without frustration?
9. Rank the top ag safety top areas you are interested in.
10. Rank the three types of materials you are interested in.
11. How would you best describe yourself?

A selection of answers was supplied for all questions, including a place for respondents to write in additional answers.

In the 2009 survey, we asked five questions. The questions, answers, and responses are all shown below. Both surveys had a similar number of voluntary respondents: 125 in 2003 and 129 in 2009.

In considering how NASD and its users will interact in the future, we took note that a majority of respondents wanted email notification about updates in NASD. This feature fits in nicely with the user account system we have created. However, when asked if they wanted blogs or chat rooms, they were strongly negative. This gave us an indication that these respondents want to know if they need to know something, but they do not have the time or interest to use NASD as a means to discuss safety issues.

Three of these questions were the same as in the 2003 survey: the question about how often respondents used NASD; rank the top ag safety areas you are interested in; and describe yourself. Answers to the last question were worded differently, and so they are not directly comparable.

When asked how often they used NASD, respondents in both surveys gave similar answers. Roughly one-half of respondents used NASD a few times a year, roughly one third used it monthly, about one tenth used it weekly, and a few percent used it daily.

An interesting shift took place in the most requested topics:

Rank	2003 Topic	2009 Topic
1	Machinery Safety	Vehicles/Road Safety
2	Chemical Safety	Chemical Safety
3	Child Safety	Machinery Safety
4	Injury Causes/Prevention	Specific Commodities
5	Electrical Safety	General Safety

While we cannot explain this change, it is interesting to note the emphasis on vehicles and road safety, which corresponded with 2009's National Ag Safety and Health Week and with the release of our training unit on this topic.

2009 Survey

1. How would you prefer to find out when new safety information is added to NASD? (117 answered out of 129)

Email update notices	59% (69)
Occasionally check the "What's New" section	9% (10)
Mentioned in other ag safety newsletters	32% (38)

2. What topics would be useful for you to be included in the interactive training sections? (68 answered out of 129)

Vehicle: Roads	20	Training	4	Horticulture	1
Chemical	11	Ear	2	Lightning	1
Machinery	11	Electrical	2	Mental Health	1
Commodity Specific	7	Ergonomics/Musculo	2	Policy	1
General	7	PPE	2	Programming	1
Animal	6	Statistics	2	Resources	1
NASD	6	Structure	2	Respiratory	1
Child safety	5	Zoonotic Diseases	2	Rural Health	1
Confined Spaces	5	Eye	1	Standards	1
Equipment	5	Hand Tools	1		
Special populations	5	Health	1		

3. On average, how often do you use NASD to find information about agricultural safety and health? (118 answered out of 129)

Few times a year:	Monthly:	Weekly:	Daily:
58% (68)	28% (33)	9% (11)	5% (6)

4. Would you be interested in participating in blogs or chat rooms on NASD? (116 answered out of 129)

Yes:	No:
33% (38)	67% (78)

5. How would you best describe yourself? (128 answered out of 129)

Site Usage

Monthly site use statistics are available for September 2006 through August 2010. Site analytics data was supplied by NIOSH using Omniture up through June 19, 2009 -- subsequent data was captured by Google Analytics. On average, NASD received 1,222,900 visits per year and 2,205,058 page views per year (detail can be found in the tables below). Shortly after the move off the NIOSH server on June 19, 2009, NASD began to see a drop in traffic. Prior to the move off the CDC/NIOSH servers, Conceptual Arts created custom re-direct pages for each page in NASD that were loaded on the CDC/NIOSH server. Once the site was moved to the new server, they managed an extensive email campaign for requesting updates of inbound links. Shortly after the transfer to the new server, Google dropped the page rank for the NASD homepage from 6 to 0. CA drafted and submitted a 10-page appeal to Google, which reinstated the page rank to 7.

Unfortunately, the remaining funds that were rolled over into the one-year, no-cost extension were not sufficient reimburse the subcontractor (CA) for any additional work in the final year. CA donated their services to maintain the site and paid for the site hosting out of its own funds. Throughout this year there was no expansion of the document collection. We see in the site analytics that the site traffic continued to drop over this period. While a certain amount of the decline was related to the site relocation and was expected, we suspect that this was significantly exacerbated by the cessation of all expansion activities. Without future support for site expansion and site promotion, additional declines in traffic are expected.

	Total	1,323,930	2,315,539

Statistics generated by Omniture for September 2008 through May 2009.

^ On June 10th the NASD website was moved from its location on the CDC server (<http://www.cdc.gov/nasd>) to its new location (<http://www.nasdonline.org>) on a non-CDC server.

* From June 10th through the end of August, Omniture did not log traffic for NASD. Google Analytics code, which was installed before the site move, did capture traffic usage for this time period. Google Analytics's statistics are always lower than statistics provided by Omniture. To account for this difference and to project usage statistics that would be closest to those provided by Omniture, pageviews were increased by 10.6% and visits were increased by 5.9% for Google Analytics statistics.

NIOSH Project: Expansion and Maintenance of the
National Agricultural Safety Database — Final Report

Appendix A: Items added and updated to the NASD
collection during the period 9/1/2006 through
8/31/2010

Documents Added

Title	Pages
2006 Farm and Ranch Safety Survey	4
A Community Participation Approach to Farm Health and Safety	1
A Community-Based Telephone Survey of Work and Injuries in Teenage Agricultural Workers	1
A Comparison of Agricultural Injuries Between the Young and Elderly: New York and Kentucky	1
A Conceptual Model of Overexertion, Safety, and Risk of Injury in Occupational Settings	1
A Control Study of the Physical and Mental Health of Residents Living Near a Large-scale Swine Operation	1
A Description of the Standardized Measurement Procedures and Recommended Threshold Limit Values for Biological Hazards in Germany	1
A Light-Meter Method for Assessment of Blind Areas in Operator Field of View	1
A Mathematical Equation for Quantifying Control Functionality in Agricultural Tractors	1
A National Childhood Agricultural Injury Prevention Initiative	1
A Portable Environmental Monitoring System to Assess Barn Worker Indoor Air Exposure	1
A Qualitative Assessment of Children's Farm Safety Day Camp Programs	1
A Qualitative Assessment of Farmer Responses to the Certified Safe Farm Concept in Iowa and Nebraska	1
A Safety Survey of Auctioned Farm Equipment	1
A Stable Dynamic Cohort Analysis of Installing Cost-Effective Rollover Protective Structures (CROPS)	1
A Study of Five Years of Tractor-related Fatalities in Iowa	1
A Study of the Impact and Efficacy of Health Fairs for Farmers	1
A Summary of Roadway Accidents Involving Agricultural Machinery	1
A Summary of State Laws Regulating Youth Operating Farm Tractors on Highways	1
A Survey of Tractors and Rollover Protective Structures in Washington State	1
A Visit to the Coroner's Office	1
Acute and Chronic Disability among U.S. Farmers and Pesticide Applicators: The National Health Interview Survey (NHIS)	1
Acute Changes in Lung Function in Farmers Exposed to Grain Dust	1
Aerial Lift Safety	44
Agricultural Employers' Hiring and Safety Practices for Adolescent Workers	1
Agricultural Equipment on Public Roads	49
Agricultural Injuries among Operation Household Members: RRIS-II 1999	1
Agricultural Injuries in Central India: Nature, Magnitude, and Economic Impact	1
Agricultural Machinery Injuries in Ontario, 1985-1996: A Comparison of Males and Females	1

Agricultural Machinery Safety Alert System Using Ultrasonic Sensors	1
Agricultural Work Activities Reported for Children and Youth on 498 North American Farms	1
Agricultural Work-Related Fatalities in Australia, 1989-1992	1
Agriculture at Risk: A Report to the Nation A Historical Review, Critical Analysis, and Implications for Future Planning	1
Agroterrorism: A Mixed Methods Study Examining the Attitudes and Perceptions of Utah Producers	1
Air Quality in a Multiple Tier Rearing System for Layer Type Pullets	1
Airborne Antibiotic Concentrations in a Swine Feeding Operation	1
An Agricultural Safety and Health Information Needs Assessment for Rural Service Providers	1
An Analysis of Injury Deaths on Florida Farms for Years 1989 Through 1998	1
An Analysis of Self-Reported Joint Pain among New York Farmers	1
An Assessment of Gases in Oxygen-Deficient Hay Silos and the Effects of Forced Ventilation	1
An Ecologic Analysis of Congenital Anomalies and Agricultural Chemicals in Colorado, 1989-1991	1
An Economic Motivator for Safe Farming: Changing Perceptions through Learning	1
An Exploratory Analysis of Occupational Skin Disease Among Latino Migrant and Seasonal Farmworkers in North Carolina	1
An Insight into the Grain Auger Injury Problem in Queensland, Australia	1
An Instrument to Measure Musculoskeletal Symptoms among Immigrant Hispanic Farmworkers: Validation in the Nursery Industry	1
An Investigation of Three Physical Parameters of PTO Entanglements	1
An Overview of the Ohio Migrant Farmworker Safety Needs Assessment	1
Analysis of 151 Agricultural Driveline-Related Incidents Resulting in Fatal and Non-Fatal Injuries to U.S. Children and Adolescents under Age 18 from 1970 through 2004	1
Analysis of Biomechanical Load When Shoveling	1
Animal-related Occupational Injuries in Farm Residents	1
Antinuclear Antibodies in Mice Exposed to Pesticides	1
Application of a Tractor Stability Index for Protective Structure Deployment	1
Application of Auditory Signals to the Operation of an Agricultural Vehicle: Results of Pilot Testing	1
Assessing Pesticide Safety Knowledge among Hispanic Migrant Farmworkers in Oregon	1
Assessing Senior Farmers' Perceptions of Tractor and Machinery-related Hazards	1
Assessment of Iowa Farmers' Perceptions about Auger Safety	1
Assessment of the Condition of Iowa Augers, Auger-related Injuries, and Farmers' Perceptions about Auger-related Injuries	1
Assessment of Work-Related Injury Risk for Farmers and Ranchers with Physical Disabilities	1
Back Pain-related Absenteeism: Differences Between Small and Large Companies	1

Barriers to Research Participation Identified by Rural People	1
Baseline Childhood Farm Safety Data for Indiana	1
Bienvendidos Al Rancho/Welcome to the Farm	11
Bites, Stings and Venomous Things	10
Building Community Capacity for Agricultural Injury Prevention in a Navajo Community	1
California Farm Survey of Occupational Injuries and Hazards	1
Case Reports of On-Site Investigations of Auger-Related Farm Injuries	1
Catching Up with Our Neighbors	1
Census of Fatal Occupational Injury in the Agriculture, Forestry, and Fishing Industry	1
Characteristics Associated with Increased Farm Work-related Injuries Among Male Resident Farm Operators in Colorado, 1993	1
Characteristics of Farm Injuries in Greece	1
Characteristics of Flowing Grain-related Entrapments and Suffocations with Emphasis on Grain Transport Vehicles	1
Characteristics of Persons with Learning Disorders in Central Wisconsin Who Suffer Agricultural Injuries	1
Chemicals: The Good, The Bad, and The Deadly -- The Mystery Club	4
Childhood Cancer in Texas Counties with Moderate to Intense Agricultural Activity	1
Chipper/Shredder Safety	40
Citrus Workers Resist Ergonomic Modifications to Picking Ladder	1
Clinically Significant Occupational Stressors in New York Farmers and Farm Families	1
Coalitions: Partnerships to Promote Agricultural Health and Safety	1
Cognitive-Behavioral Approaches to Farm Community Safety Education: A Conceptual Analysis	1
Combine Anti-crush Safety System	1
Community Partners for Healthy Farming Intervention Research	1
Comparability of Information on Pesticide Use Obtained from Farmers and Their Proxy Respondents	1
Comparison Between Perceptions of Farm Hazards and Injury Records in Iowa	1
Comparison of Operator Exposure for Five Different Greenhouse Spraying Applications	1
Comparison of Two Techniques to Obtain Information on Pesticide Use from Iowa Farmers by Interview	1
Comparisons of Colorado Women's Cancer Screening Practices by Residence: Metropolitan, Non-metropolitan, and Farm	1
Computational Fluid Dynamics Modeling of Ventilation of Confined-Space Manure Storage Facilities: Applications	1
Cost-Effectiveness of a ROPS Retrofit Education Campaign	1
Costs and Issues Associated with Implementing Industrial Confined Space Standards in Manure Storage Facilities	1

Cultivating an Effective Agricultural Center Advisory Board	1
Current Health Effects of Agricultural Work: Respiratory Disease, Cancer, Reproductive Effects, Musculoskeletal Injuries, and Pesticide-Related Illnesses	1
Dangers of Agricultural Machinery	4
Depression and Perceived Stress among Cash Grain Farmers in Ohio	1
Depression and Somatic Symptoms within the Farming Community	1
Descubriendo Los Peligros Escondidos de la Granja – El Club Misterio	4
Developing an Instrument to Assess Attitudes of Agricultural Employers and Employees Toward Farm Safety	1
Development and Evaluation of the Kids Count Farm Safety Lesson	1
Development and Validation of a Computer Program to Design and Calculate ROPS	1
Development of a Test Device for Evaluation of Thrown Object Hazards	1
Development of the Farm Safety and Health Beliefs Scale	1
Development of the Safe Tractor Assessment Rating System	1
Diagnosed Skin Diseases Among Migrant Farmworkers in North Carolina: Prevalence and Risk Factors	1
Disability and Rural Living	4
Disease and Injury Among Participants in the Agricultural Health Study	1
Distance to Health Care and the Prevalence of Asthma in School Age Children	1
Documentation of Hazards and Safety Perceptions for Mechanized Logging Operations in East Central Alabama	1
Drawing on Experience: Mexican-Origin Workers' Evaluation of Farm Safety Illustrations	1
Driving Risk and Rural Life: Everyday and Reconstructed Realities	1
Dust- and Endotoxin-related Acute Lung Function Changes and Work-related Symptoms in Workers in the Animal Feed Industry	1
Dust in Pig Buildings	1
Dust Levels and Control Methods in Poultry Houses	1
Dust Settling Efficiency and Electrostatic Effect of a Negative Ionization System	1
Dynamic Performance of the Mechanism of an Automatically Deployable ROPS	1
Eco-Friendly Rubberized Cotton Fabric Roller for Ginning Machines	1
Effect of Age on Hospitalized Machine-Related Farm Injuries Among the Saskatchewan Farm Population	1
Effect of Airflow on Ion Distribution for Potential Dust Reduction Applications	1
Effectiveness of the Indiana 4-H Tractor Program at Instilling Safe Tractor Operating Behaviors and Attitudes in Youth	1
Emerging Technologies and the Safety and Health of Farming People	1
Encouraging Farmers to Retrofit Tractors: A Qualitative Analysis of Risk Perceptions among a Group of High-Risk Farmers in New York	1
Enhancing Cattle Handling Safety with the Work Crew Performance Model	1
Environmental Alternatives for Rural Development: The Case of Oaxaca, Mexico	1
Environmental Conditions in the Homes of a Rural Iowa County	1

Epidemiological Characteristics of Reported Hand Injuries - New York State 1991-1995	1
Ergonomic Analysis of New York Apple Harvest Work Using a Posture-Activities-Tools-Handling (PATH) Work Sampling Approach	1
Ergonomic Concerns with Lightbar Guidance Displays	1
Ergonomic Considerations of Manually Harvesting Maine Wild Blueberries	1
Ergonomic Evaluation of Winegrape Trellis Systems Pruning Operation	1
Estimating Farmworker Population Size in New York State Using a Minimum Labor Demand Method	1
Evaluating the Impact of an Intervention to Reduce Injuries among Loggers in West Virginia, 1999-2007	1
Evaluation Challenges in Agricultural Health and Safety Centers	1
Evaluation of a Farm Safety Day Program: Participants and Non-Participants over a One-Year Follow-Up Period	1
Evaluation of a Microwave and Infrared Human-Presence Sensing System for Agricultural Equipment	1
Evaluation of an Occupational Injury Intervention among Wisconsin Dairy Farmers	1
Evaluation of Engineering Plastic for Rollover Protective Structure (ROPS) Mounting	1
Evaluation of Mechanical Tractor Pedal Extensions	1
Evaluation of the Agricultural Safety and Health Best Management Practices Manual	1
Evaluation of the Farm and Agricultural Injury Classification Code and Follow-up Questionnaire	1
Evaluation of the Improvements in Working Conditions on Farms Funded by the Swedish Working Life Fund	1
Evaluation of Tractor and Grain Wagon Safety Marking at Selected Commercial Iowa Grain Elevators	1
Evidence-Based Decision Making in Agricultural Health and Safety	1
Exposure to Pollutants: Genotoxic Effects in Plants and Immunotoxic Effects in Humans	1
Exposure to Tick-borne Encephalitis (TBE) Virus and Borrelia burgdorferi s.l. in Agricultural Workers in Southwestern Germany	1
Extrinsic Allergic Alveolitis/Hypersensitivity Pneumonitis: A World Perspective from Japanese and Canadian Data	1
Eye Injury in Migrant Farm Workers and Suggested Hazard Controls	1
Factors Affecting Farm Noise during Common Agricultural Activities	1
Factors Affecting Initial Cholinesterase Levels from a Pilot Study of Central Wisconsin Farmers	1
Factors Associated with Back Trouble in Dairy Farmer	1
Factors Contributing to Guidance Performance when Using a Camera-Based Guidance Aid	1
Factors Influencing the Occurrence and Severity of Farm Accidents: Comparing Work-Related and Non-Work-Related Events	1

Factors Influencing Tractor Owners' Potential Demands for Rollover Protective Structures on Farm Tractors	1
Farm Health and Safety: Rural Couples' Beliefs and Practices	1
Farm Health Surveillance in the Marshfield Epidemiologic Study Area: A Pilot Study	1
Farm Injuries in Ohio, 2003-2006: A Report from the Emergency Medical Services Prehospital Database	1
Farm Injury Surveillance in Two California Counties - General Findings	1
Farm Mishaps: Who You Gonna Call? -- The Mystery Club	4
Farm Noise Emissions during Common Agricultural Activities	1
Farm Safety Day Camps: Developing a Definition Using the Delphi Method	1
Farm Safety Issues in Old Order Anabaptist Communities: Unique Aspects and Innovative Intervention Strategies	1
Farm Safety through the Camera's Eye	1
Farm Stressors: The Hazards of Agrarian Life	1
Farm Tractor Rollover Protection: Why Simply Getting Rollover Protective Structures Installed on All Tractors Is Not Sufficient	1
Farm Work-Related Injury among Middle School Students in Rural China	1
Farmer Health Beliefs about an Occupational Illness that Affects Farmworkers: The Case of Green Tobacco Sickness	1
Farmers Occupational Health - The Swedish Model	1
Farmers' Perceptions and Concerns: The Risks of Driving Farm Vehicles on Rural Roadways in North Carolina	1
Fatal Head Injuries among Hispanic Farmworkers and Farmers in Colorado, 1983-1992	1
Fatal Injuries in Finnish Agriculture, 1988-2000	1
Fatal On-Farm Injuries among Youth 16 to 19 Years of Age: 1982-1994	1
Fatal Work Injuries Involving Farmworkers, 1991-1995	1
Fatalities in Farming and Forestry: An Examination of the Registry Information Used in the Swedish National Statistics, 1988-1997	1
Feasibility Study of Inspection of Farm Machinery Safety Features	1
Field Comparison of Methods for Evaluation of Vapor/Particle Phase Distribution of Ammonia in Livestock Buildings	1
Finite Element Modeling of ROPS in Static Testing and Rear Overturns	1
Fluorescent Tracer Evaluation of Chemical Protective Clothing during Pesticide Applications in Central Florida Citrus Groves	1
Frequency and Severity of Injuries to Operators during Overturns of Farm Tractors	1
From the Editor	1
FS4JK Farm Safety Day Camps: Who Learns the Most?	1
Fungicide Application Practices and Personal Protective Equipment Use among Orchard Farmers in the Agricultural Health Study	1
Gender Difference in Prevalence of Upper Extremity Musculoskeletal Symptoms among Swedish Pig Farmers	1

Gender, Environmental Tobacco Smoke, and Pulmonary Function in Rural Children and Adolescents: The Humboldt Study	1
Guest Editorial: Our Role as Agricultural Safety and Health Professionals in the Post-9/11 World	1
Guía del Instructor: Para las Industrias de la Jardinería y Servicios Hortícolas	228
Guía para Manejar la Seguridad	40
Guide to Managing Safety for Employers and Supervisors	40
Hand Problems in Migrant Farmworkers	1
Handling Pesticides Safely	4
Have You Heard? Hearing Loss Caused by Farm Noise is Preventable (Young Farmers' Guide for Selecting and Using Hearing Protection)	4
Health and Environment of Rural Families: Results of a Community Canvass Survey in the Prairie Ecosystem Study (PECOS)	1
Health and Well-Being of Farm Women: Contradictory Roles in the Contemporary Economy	1
Health Risk Behaviors and Work Injury among Hispanic Adolescents and Farmworkers	1
Hearing Conservation Program for Farm Families: An Evaluation	1
Hearing Screening Program Impact on Noise Reduction Strategies	1
Helping Four-Legged Friends Survive the Storm	14
High Pesticide Exposure Events Among Farmers and Spouses Enrolled in the Agricultural Health Study	1
Horizontal Silo Safety	6
Host Factors, Occupation, and Testicular Cancer in Saskatchewan, Canada: 1979-2002	1
Housing Quality among North Carolina Farmworker Families	1
Human Health Effects of Dust Exposure in Animal Confinement Buildings	1
Hydrogen Sulfide Assessment in Shallow-Pit Swine Housing and Outside Manure Storage	1
Identification of Risk Factors for Sub-Optimal Housing Conditions in Australian Piggeries: Part 1. Study Justification and Design	1
Identification of Risk Factors for Sub-Optimal Housing Conditions in Australian Piggeries: Part 2. Airborne Pollutants	1
Identification of Risk Factors for Sub-Optimal Housing Conditions in Australian Piggeries: Part 3. Environmental Parameters	1
Identification of Risk Factors for Sub-Optimal Housing Conditions in Australian Piggeries: Part 4. Emission Factors and Study Recommendations	1
Identifying Feed and Seed Stores as a Site to Promote Skin Cancer Control: A Social Marketing Approach to Agricultural Health Communication	1
Identifying Training Needs of Logging Truck Drivers Using a Skill Inventory	1
Identifying Work-related Fatalities in the Agricultural Production Sector Using Two National Occupational Fatality Surveillance Systems, 1990-1995	1
Immigrant Farmworkers' Health-Related Quality of Life: An Application of the Job Demands-Control Model	1

Impact Agricultural Safety and Health: Know Producers, Know Agriculture, and Engage in a Professional Community of Practice	1
Impact of In-Barn Manure Separation on Biological Air Quality in an Experimental Setup Identical to that in Swine Buildings	1
Impact of Telephone Triage on Medical Service Use: Implications for Rural and Remote Areas	1
Influence of Environmental, Structural, and Behavioral Factors on the Presence of Phosphine in Worker Areas During Fumigations in Grain Elevators	1
Influence of Warning Label Signal Words on Perceived Hazard Level	1
Initial Rollover Effectiveness Evaluation of an Alternative Seat Belt Design for Agricultural Tractors	1
Injuries in the Iowa Certified Safe Farm Study	1
Injury Prevention Programming for Aged Tractor Operators	1
Injury Risk Factors Associated with Agricultural Workplace Fatalities	1
Installing a Cost-Effective Rollover Protective Structure (CROPS): A Cost-Effectiveness Analysis	1
Instructional Practices at Farm Safety 4 Just Kids (FS4JK) Safety Day Camps	1
Instructor Guide for the Landscaping and Horticultural Services Industry	228
Intellectual Property Rights, Agriculture, and Rural Communities	1
Intervention Research in Occupational Health and Safety	1
Intervention Tools for Farmers - Safe and Productive Work Practices in a Safer Work Environment	1
Interventions to Reduce Low-Back Injury Risk among Youth Who Perform Feed Handling and Scooping Tasks on Farms	1
Interviews with Widows Following Fatal Farming Incidents	1
Introduction to the Special Issue Research to Practice in the Agricultural Workplace	1
Is It Time for a Coordinated International Effort in Agricultural Health and Safety Research?	1
Job Hazards for Musculoskeletal Disorders for Youth Working on Farms	1
Keokuk County Iowa Rural Health Study: Self-reported Use of Pesticides and Protective Equipment	1
Kids and Communities Count: Reaching Migrant Children and Families with the North American Guidelines for Children's Agricultural Tasks (NAGCAT)	1
Las Máquinas Poderosas -- El Club Misterio	4
Laundering Pesticide-Contaminated Clothing	2
Lessons Learned: Geographic Information Systems and Farmworkers in the Lake States	1
Logging Fatalities in the United States by Region, Cause of Death, and Other Factors-1980 through 1988	1
Longitudinal Analysis of Pulmonary Dysfunction in the Initial Years of Employment in the Grain Industry	1
Los Químicos: lo Bueno, lo Malo y lo Mortal -- El Club Misterio	4

Low Back Disorders in Agriculture and the Role of Stooped Work: Scope, Potential Interventions, and Research Needs	1
Management as a Risk Factor for Farm Injuries	1
Measurement of Operator Exposure to Power Take-Off Driven Augers	1
Minimizing Bias in a Case-Control Study of Farm Injury	1
Mixed-mode Survey of Cash Grain Farmers Yields Mixed Response	1
Monitoring Acetylcholinesterase Levels In Migrant Agricultural Workers and Their Children Using a Portable Test Kit	1
Mortality and Morbidity in Agriculture in the United States	1
Motor Vehicle Safety	47
Motorcycle & ATV Crashes in New Zealand Resulting in Death and Hospitalization III: Non-traffic Crashes	1
Motorist Comprehension of the Slow-Moving Vehicle (SMV) Emblem	1
Mowing and Trimming Safety	44
Musculoskeletal Discomfort, Injuries, and Tasks Accomplished by Children and Adolescents in Wisconsin Fresh Market Vegetable Production	1
National AgrAbility Project Impact on Farmers and Ranchers with Disabilities	1
National Safe Tractor and Machinery Operation Program: Development and Content Evaluation	1

NIOSH Project: Expansion and Maintenance of the
National Agricultural Safety Database — Final Report

Appendix B: Items contained in the NASD collection as
of 8/31/2010

Documents

1978 Minnesota Farm Accident Survey

1980 Utah Farm Accident Survey

1982 Farm Accident Survey Report

1990 Wisconsin Farm-related Fatalities

1992 National Data for Occupational Fatalities of Farmers: Using Census of Fatal Occupational Injuries Data

1993/1995 Pennsylvania Farm Work Injury Report

2001 LNI Pesticide-Related Inspection and Claims Data

2006 Farm and Ranch Safety Survey

A Case-control Study of Farmwork-related Injuries in Olmsted County, Minnesota

A Census-based Record Linkage Study of Canadian Farmers

A Community Participation Approach to Farm Health and Safety

A Community-Based Telephone Survey of Work and Injuries in Teenage Agricultural Workers

A Comparative Study of Urban and Rural Tetanus in Adults

A Comparison of Agricultural Injuries Between the Young and Elderly: New York and Kentucky

A Comparison of Worker's Compensation Agricultural Data and the Farm Accident Survey in California

A Conceptual Model of Overexertion, Safety, and Risk of Injury in Occupational Settings

A Consumer Guide to Safe Handling and Preparation of Ground Meat and Ground Poultry

A Control Study of the Physical and Mental Health of Residents Living Near a Large-scale Swine Operation

A Cooperative Outreach Training Program in Accident Rescue to Meet Ohio's Needs

A Description of the Standardized Measurement Procedures and Recommended Threshold Limit Values for Biological Hazards in Germany

A Farm Accident Study in California

A Farm Family Health and Hazard Surveillance Program for Cash Grain Farmers in Ohio: Survey Response and Preliminary Findings

A Farm Operator's Rules of the Road (PSA Radio Script)

A Freak Accidental Injury to the Spinal Cord

A Frightening Scenario (PSA Radio Script)

A Global Need: Farm Worker Safety

A Good Fit Is Important (PSA Radio Script)

A GUIDE ON LAUNDERING PESTICIDE CONTAMINATED CLOTHING

A Guide To Safe Farm Tractor Operation

A Harvest of Harm: The Farm-Health Crisis

A Light-Meter Method for Assessment of Blind Areas in Operator Field of View

A Mathematical Equation for Quantifying Control Functionality in Agricultural Tractors

A Method of Partnering for Evaluating Educational Materials

A Methodology for the Collection of Supplemental Information on Agricultural Fatalities

A Misestimated Aspect of Tropical Traumatology: Abdomen Penetrating Injuries Caused By Buffalo Horn. Review of 64 Cambodian Cases

A Model Program for Occupational Pesticide Illness Prevention: The 'SENSOR' Project in Fresno County

A National Childhood Agricultural Injury Prevention Initiative

A Need For Population-Based Studies of Health and Safety Risks in Canadian Agriculture

A New Approach to Collecting Farm Accident Data

A One Year Survey of Accidents on Irish Farms and Their Medical Outcome

A Personalized Mail Survey for Collecting Agricultural Data

A Plea You Can't Afford to Grant

A Portable Environmental Monitoring System to Assess Barn Worker Indoor Air Exposure

A Practice Based Study of Trauma in a Rural Community

A Proportionate Mortality Analysis of California Agricultural Workers, 1978-1979

A Qualitative Assessment of Children's Farm Safety Day Camp Programs

A Qualitative Assessment of Farmer Responses to the Certified Safe Farm Concept in Iowa and Nebraska

A Retrospective Cohort Study of Mortality Among New York State Farm Bureau Members

A Review of Farm Accident Data Sources and Research: References

A Review of Farm Accident Data Sources and Research: Research Directions for the Future

A Review of Farm Accident Data Sources and Research: Review of Data Sources

A Review of Farm Accident Data Sources and Research: Review of Recently Published and Current Research

A Review of Farm Accident Data Sources and Research: Summary and Introduction

A Review of Work-related Fatal Injuries in New Zealand 1975-84--Numbers, Rates and Trends

A Safety Survey of Auctioned Farm Equipment

A Stable Dynamic Cohort Analysis of Installing Cost-Effective Rollover Protective Structures (CROPS)

A Study of Accidents Occurring to Farm People in Michigan

A Study of Farm Machinery Use in Michigan

A Study of Five Years of Tractor-related Fatalities in Iowa

A Study of Power Take-off Accidents

A Study of the Impact and Efficacy of Health Fairs for Farmers

A Study of Trauma in an Amish Community
