Welcome to the July 2013 edition of TIRES e-news, a periodic newsletter brought to you by the health and safety experts of KeepTruckingSafe.org.

New this month

Set it

Many truckers have died because they jumped out quickly and didn't set the parking brake. Use this poster to remind drivers to always set it. [Brake \(192 KB\)](#)

This poster may be printed on 11x17 paper.

Setting the parking brake would have saved him

Here's a true story about a tanker driver killed when he exited the cab without setting the parking brake.

[Click here](#) for one page training with tips (395 KB).

[Click here](#) to read the full fatality investigation report.

Training simulation: Based on the true story of a driver killed on the job

A Washington State truck driver was killed on the job a few years ago. This simulation discusses what happened. Review it with your workers to help prevent similar occurrences.

Training simulation tools

Interactive Simulation Chaining Tires

Two drivers chaining. Can you spot the differences? [Click here to try the simulation](#). Scroll down to try more training simulation tools.

Compare the force of lever and ratchet binders

Compare the body forces needed to use a lever ratchet or binder ratchet to strap a load. [Click here to try the simulation](#).

Test your tarping skills

Explore strategies for [safer tarping](#).

Choose your footwear wisely

Slips, trips and falls cause many injuries in the trucking industry. Test your safety knowledge with the [friction simulation tool](#).

Force simulation tool

Does it really matter if you jump or use 3 points-of-contact when you exit the cab or trailer? Find out with our force-simulator. Use it as a training tool. Click [force simulation tool](#).

Need ideas?

Check out the TIRES idea bank for solutions to common trucking issues. Got solutions? This is a work in progress so send us your ideas. Click for [TIRES Idea Bank](#). Click to send us your solutions at info@KeepTruckingSafe.org.

Safety materials en Español

Bienvenido a nuestra edición en español del sitio web TIRES. [Estamos actualmente traduciendo al español todos los folletos y artículos.](#)

[Si tiene que moverlo manualmente — Organize y coloque objetos pesados a una altura de fácil acceso. \(223 KB\)](#)

Upcoming events

[Click here to check out upcoming events in trucking.](#) Let us know if you have a trucking industry related safety or health event that you'd like to add to the page.

Have questions? We're here to help. Email us at info@KeepTruckingSafe.org.

To learn more about the TIRES initiative, or to find more information about injuries in the trucking industry please visit us at, www.KeepTruckingSafe.org.

The Trucking Injury Reduction Emphasis (TIRES) project was developed by the Safety and Health Assessment and Research for Prevention (SHARP) program of Washington's Department of Labor and Industries.

The Trucking Injury Reduction Emphasis (TIRES) project team and the TIRES steering committee are working with the Washington State trucking industry to identify causes for the most frequent injuries to develop effective strategies for preventing them.

The TIRES steering committee is made up of a diverse group of

professionals that includes: drivers, safety people from large and small trucking companies, labor and business associations, insurers and a representative from a publicly funded truck driving school.

Funded in part by a grant from CDC NIOSH 5 U60 OH 008487. The contents are solely the responsibility of the authors and do not necessarily represent the official views of CDC/NIOSH.
