Safety Material for the Trucking Industry
August 2021

After 16 Years, TIRES Says Goodbye, Rolls Out Online Trucking Safety Program Development Tool

The [Trucking Injury Reduction Emphasis \(TIRES\)](#) project is coming to a final stop after 16-years of blazing new trails in trucking safety research, hazard and injury identification, digitally-mediated education and training, and online safety program development. The project designed a wide variety of free products to keep truck drivers, diesel mechanics, loading dock workers, and other employees safe on the job. All of our products will continue to be available on our website keeptruckingsafe.org.

The Trucking Injury Reduction Emphasis (TIRES) project was developed by the Safety and Health Assessment and Research for Prevention (SHARP) program of Washington's Department of Labor & Industries.

The Trucking Injury Reduction Emphasis (TIRES) project team and the TIRES steering committee are working with the Washington State trucking industry to identify causes for the most frequent injuries to develop effective strategies for preventing them. Free safety training materials are available at KeepTruckingSafe.org.

The TIRES steering committee is made up of a diverse group of professionals that includes: drivers, safety people from large and small trucking companies, labor and business associations, insurers and a representative from a publicly funded truck driving school.

Funded in part by a grant from CDC NIOSH 5 U60 OH 008487. The contents are solely the responsibility of the authors and do not necessarily represent the official views of CDC/NIOSH.
