

CDC is preventing violence in New York communities

Violence is one of the leading causes of death in the US. CDC has been the leading federal agency focused on preventing injury and violence for over 40 years.

Violence is preventable. It's scientifically proven.

When traumatic events happen to children—such as experiencing abuse or neglect, living in a home with substance misuse, or witnessing community violence—these adverse childhood experiences, or ACEs, can cause lasting, negative effects on health including an increased risk of experiencing or perpetrating violence later in life. CDC is uniquely positioned to help communities across the country prevent ACEs and other forms of violence, to ensure that all people are safe, healthy, and thriving.

In 2024, New York received \$2,801,081 from CDC to prevent violence before it happens. CDC funds states and communities to use data to implement proven prevention approaches with the greatest potential to reduce violence. CDC scientists provide data analysis, the latest research findings and additional expertise to support state and local health departments, community organizations, and others working to prevent violence. Their efforts help save lives and improve community safety and well-being.

Violence prevention is critical for New York

Violence doesn't only affect victims and their families in the immediate term—it has long-term effects on their surrounding communities. Violence can lead to physical and mental illness, chronic diseases, fewer employment opportunities, childhood developmental delays, and premature deaths. Violence can discourage people from participating in neighborhood activities, limit business growth and prosperity, strain education, justice, and medical systems, and slow community progress.

Example Prevention Approaches

- Safe routes to and from school
- Home visitation programs to support new mothers
- Mentoring and afterschool programs
- Job training programs
- Cleaning and maintaining vacant lots
- Programs in hospitals that provide social and job support to victims to prevent future violence

Violence in New York, by the numbers

745

homicides
in 2023

14%

of adults have
experienced four or
more ACEs in their
lifetimes

27%

of women have
experienced rape
or survived rape
attempts in their
lifetimes

CDC funds violence prevention programs in New York

CDC has been researching violence for over 40 years—building, implementing, and evaluating programs designed to reduce and prevent violence for entire populations.

Programs with a check mark below are active in New York and are using the best available evidence to inform prevention in the state. Programs without a check mark are other CDC programs that New York can apply for in the future.

National Violent Death Reporting System

is CDC's flagship state-based data system that links up to 700 unique data elements about the "who, when, where, and how" of violent deaths and suicides and provides insights about "why" they occurred to inform prevention activities.

Rape Prevention and Education Program

funds sexual violence prevention approaches such as bystander programs, anti-bullying, and anti-sexual harassment policies in all 50 states, Washington, D.C., Puerto Rico, and the U.S. Virgin Islands.

DELTA funds state domestic violence coalitions to prevent intimate partner violence by engaging in statewide prevention efforts and providing training, technical assistance, and financial support to local community organizations.

Essentials for Childhood: Preventing Adverse Childhood Experiences through Data to Action supports states and communities to prevent ACEs by improving data collection to best guide programs for their area.

Preventing Violence Affecting Young Lives

recipients implement proven strategies that prevent youth violence, teen dating violence, and ACEs in communities with high violence rates.

National Centers of Excellence in Youth Violence Prevention

connect community leaders with research universities to create and study lasting youth violence prevention methods, such as programs that reduce rates of violence through bystander reporting, social media monitoring, and youth involvement in activities to improve community parks, vacant lots, and public spaces.

FASTER: AVERT provides near real-time data from emergency department visits for a range of violence-related injuries and mental health conditions to inform community-level prevention of violence and suicide.

Rigorously Evaluating Approaches to Prevent Adult-Perpetrated Child Sex Abuse recipients conduct research to learn what prevents child sexual abuse and sex trafficking, by rigorously evaluating different programs, policies, and practices.

CDC Supports New York

CDC's Rape Prevention and Education funding supports New York to implement programs to prevent sexual violence. For example, New York implements the Know Your Power campaign, a nationally recognized program focused on reducing sexual violence and stalking on college campuses. The campaign consists of a series of images which portray realistic and thought-provoking scenarios that highlight the important role all members of the community have in ending sexual violence. It was released in TikTok, Snapchat, Instagram and Google Ads. The campaign has been shown to be effective in increasing knowledge of how to safely intervene in situations that could lead to sexual violence and in increasing willingness to intervene. Overall, the campaign had over 25 million impressions across social media platforms, driving more than 380,000 visits to the New York State violence prevention website.
