Where Has Chikungunya Virus Been Found?

- Chikungunya outbreaks have occurred in countries in Africa, Asia, Europe, and the Indian and Pacific Oceans.
- In late 2013, the first local transmission of chikungunya virus in the Americas was identified in Caribbean countries and territories. Local transmission means that mosquitoes in the area have been infected with the virus and are spreading it to people.
- For information on current outbreaks, consult [CDC's Traveler's Health website](https://web.archive.org/web/20140411094033/http://wwwnc.cdc.gov/travel/notices) (<https://web.archive.org/web/20140411094033/http://wwwnc.cdc.gov/travel/notices>).
