

SUPPLEMENTARY FIGURE. Prevalence of employer requirement or recommendation* (A) and employer offer for on-site vaccination† (B) for influenza and COVID-19 vaccination by work settings[§] — Internet panel surveys[¶] — United States, 2024–25 Respiratory Virus Season

*Respondents were asked ‘Since July 1, 2024, has your employer recommended or required that you be vaccinated for flu?’ and ‘Has your employer recommended or required that you be vaccinated with the 2024-25 COVID-19 vaccine?’ separately for each location where they work.

†Respondents were asked ‘Since July 1, 2024, has your employer offered flu vaccinations on site?’ and ‘Does your employer offer the 2024-25 COVID-19 vaccine onsite?’ separately for each location where they work.

[§]Respondents could select more than one work setting. Long-term care facility/Home health care included nursing home, assisted living facility, other long-term care facility, home health agency, or home health care. Other clinical setting included dentist office or dental

[¶]Respondents were recruited from two preexisting national opt-in Internet sources: Medscape, a medical website managed by WebMD Health Professional Network, and general population Internet panels operated by Dynata
