SUPPLEMENTARY FIGURE. Movement of cruise passenger and airlines contacts and subsequent monitoring of residents potentially exposed to Andes virus during cruise and air travel – U.S. Hantavirus Response, 2026

* Cruise counts, disembarkations, embarkations, stops, and dates were based on investigation findings and Oceanwide Expeditions Press Releases.

† 1 person deceased.

§ Investigation revealed that a symptomatic non-U.S. cruise passenger, later confirmed to have Andes virus infection, flew on the flight from Saint Helena to Johannesburg and briefly boarded, and then disembarked from the Johannesburg to Amsterdam flight.
