# Protect yourself. Protect your family. Protect the public.

## How can a correctional health care worker be exposed to bloodborne pathogens on the job?

- Needlesticks or cuts from used needles or sharps.
- Contact of your eyes, nose, mouth, or broken skin with blood.
- Assaults bites, cuts, or knife wounds.
- Splashes or punctures especially when drawing blood.

#### How can you protect yourself?

- Get the hepatitis B vaccine.
- Read and understand your employer's Exposure Control Plan.
- Dispose of used sharps promptly into an appropriate sharps disposal container.
- Use sharps devices with safety features whenever possible.
- Use personal protective equipment (PPE), such as gloves and face shields, every time there is a potential for exposure to blood or body fluids.
- Clean work surfaces with germicidal products.

### What should you do if you're exposed?

- Wash needlesticks and cuts with soap and water.
- Flush splashes to nose, mouth, or skin with water.
- Irrigate eyes with clean water, saline, or sterile wash.
- Report all exposures promptly to ensure that you receive appropriate followup care.
