

# Dengue Surveillance Weekly Report

CDC Dengue Branch & Puerto Rico Department of Health

# Data through March 25, 2015

# February 26 through March 4, 2015 (Week 9)

# Summary<sup>1</sup>

#### Week 9

- 45 suspected cases reported
- This level of reporting is BELOW the historical average.<sup>2</sup>

### Week 8

- 50 suspected cases reported
- 3 (6%) confirmed in the laboratory<sup>3</sup>
- 3 (4%) municipios<sup>\*\*</sup> had confirmed cases

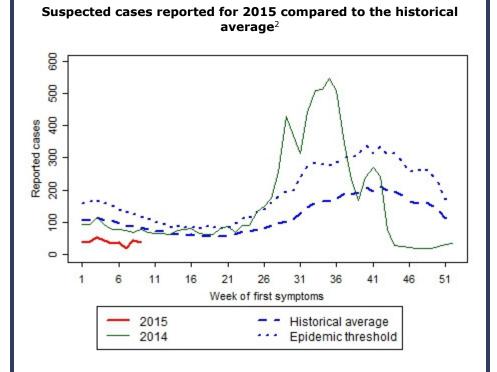

# Serotypes

In the last 8 weeks:

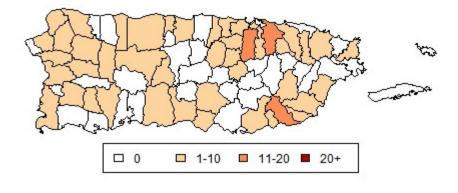

67%	DENV-4
17%	DENV-2
17%	DENV-1
0% DENV-3	

# Accumulated in 2015

- 401 suspected cases reported
- 13 (3%) confirmed in the laboratory<sup>3</sup>
- 0 confirmed cases of dengue hemorrhagic fever (DHF)
- 0 confirmed fatal cases pending review

#### Municipios\*\* with suspected cases in weeks 6-9

- <sup>1</sup>The numbers reported in the Summary reflect all data from regular and enhanced surveillance.
- <sup>2</sup>The historical average represents the years 1986 2014. The threshold level is the 75th percentile of the distribution of cases in the same years. Data from the areas involved in an enhanced surveillance project are not included\*. For this reason, the total number of reported cases in the figure may differ from the number reported in the Summary.
- <sup>3</sup>In this report laboratory confirmation refers to a positive IgM or PCR test.
- <sup>\*</sup>Reported cases from the municipios of Arroyo, Guayama, Maunabo, Patillas, and Salinas may be higher due to their involvement in an enhanced surveillance project.
- \*\*Municipios are administrative units roughly equivalent to counties.
