PrEP 101

PrEP Basics

PrEP stands for Pre-Exposure Prophylaxis The word "prophylaxis" means to prevent or control the spread of an infection or disease

PrEP can help

prevent you from getting HIV if you are exposed to the virus

How Does It Work?

In several studies of PrEP, the risk of getting HIV infection was much lower — up to 92% lower for those who took the medicines consistently than for those who didn't take the pill

Some of the same medicines prescribed for the treatment of HIV can also be prescribed for its prevention

When taken every day, PrEP can provide a high level of protection against HIV, and is <u>even</u> <u>more effective when</u> <u>it is combined with</u> <u>condoms</u> and other prevention tools

People who use PrEP must take the medicine <u>every day</u> and return to their health care provider every 3 months for repeat testing for HIV

and sexually transmitted diseases, prescription refills, and follow up

Some people in clinical studies of PrEP had early side effects such as an upset stomach or loss of appetite, but these were mild and usually went away in the first month. Some people also had a mild headache. No serious side effects were observed. You should tell your health care provider if these or other symptoms become severe or do not go away.

PrEP Access

How Can I Start PrEP?

Talk with your doctor or health care provider to determine if PrEP is right for you

If you and your health care provider agree that PrEP might reduce your risk of getting HIV, he or she will conduct a general physical and test you for HIV and other sexually transmitted diseases

Your health care provider will also do tests to see if your kidneys and liver are working well

If PrEP is a good option for you, your health care provider will give you a **prescription**

How Do I Pay for PrEP?

PrEP is covered by most insurance programs

If you do not have insurance, your health care provider can direct you to <u>medication assistance</u> <u>programs</u> that may help pay for PrEP

You can also contact your local health department and HIV/AIDS service organizations for more information

Is PrEP Right For Me?

I am thinking about PrEP to prevent HIV. What now?

Do your research. Seek out information to help you decide
