Rows represent BMI at the time of ART initiation and columns represent BMI after one or 3 years of ART treatment.

^a421 patients did not have a weight measurement at 1 year, but did have a measurement prior to 3 years.

^b141 participants were missing data on race or classified as “unknown” and were not included in the categorized analyses. For patients who died or were lost to follow-up, the last recorded BMI prior to 1 and 3 years was used for categorization.
