

**Supplemental Figure 1:** Scatterplot of RBC folate concentrations to compare microbiologic assay by Immulite 2000 immunoassay using weighted Deming regression fit

Scatterplot of RBC folate concentrations for microbiologic assay by Immulite 2000 immunoassay with weighted Deming regression fit. Outliers were removed ( $n=6$ ). The thin solid line marks the line of identity, the thick solid line marks the weighted Deming fit ( $-22.95 + 0.81x$ ).
