

## All Countries & Territories with Active Zika Virus Transmission

This map includes countries and territories where mosquito-borne transmission of Zika virus has been reported, including countries with current travel notices issued for Zika. Shading does not necessarily indicate that mosquito-borne transmission is occurring throughout the entire country or territory. This map does not include countries and territories that have reported only travel-associated cases, nor does it include countries and territories with past transmission of Zika virus.

For information on countries and territories with Zika travel notices, see CDC’s [Travelers’ Health Zika website](https://wwwnc.cdc.gov/travel/page/zika-information) (<https://wwwnc.cdc.gov/travel/page/zika-information>).

For information on Zika cases in the United States, see [Case Counts in the US](https://www.cdc.gov/zika/intheus/maps-zika-us.html#active-florida). A [detailed map](https://www.cdc.gov/zika/intheus/maps-zika-us.html#active-florida) (<https://www.cdc.gov/zika/intheus/maps-zika-us.html#active-florida>) of areas of the United States with active transmission of Zika is available.

See [CDC’s Country Classification Technical Guidance](#)

- Anguilla
- Antigua and Barbuda
- Argentina
- Aruba
- The Bahamas
- Barbados
- Belize
- Bolivia
- Bonaire
- Brazil
- British Virgin Islands
