

All Countries & Territories with Active Zika Virus Transmission

The following countries and territories have reported mosquito-borne Zika virus transmission and includes countries with [current travel notices](https://wwwnc.cdc.gov/travel/page/zika-travel-information) (<https://wwwnc.cdc.gov/travel/page/zika-travel-information>) issued for Zika.

These maps **do not** include countries and territories that have reported only travel-associated cases, nor do they include countries and territories with past transmission of Zika virus.

Shading indicates countries and territories where mosquito-borne transmission of Zika virus has been reported. It does not necessarily indicate that mosquito-borne transmission is occurring throughout the entire country or territory.

Pregnant women should not travel to areas with active Zika virus transmission. See the [Travelers' Health Zika website](https://wwwnc.cdc.gov/travel/page/zika-information) (<https://wwwnc.cdc.gov/travel/page/zika-information>) for international travel guidance, and check the [US Maps](#) page for details on active Zika virus transmission in the United States.

Americas

Shading indicates countries and territories where mosquito-borne transmission of Zika virus has been reported. It does not necessarily indicate that mosquito-borne transmission is occurring throughout the entire country or territory.

Pregnant women should not travel to areas with active Zika virus transmission. See the [Travelers' Health Zika website](https://wwwnc.cdc.gov/travel/page/zika-information) (<https://wwwnc.cdc.gov/travel/page/zika-information>) for international travel guidance, and check the [US Maps](#) page for details on active Zika virus transmission in the United States.
