

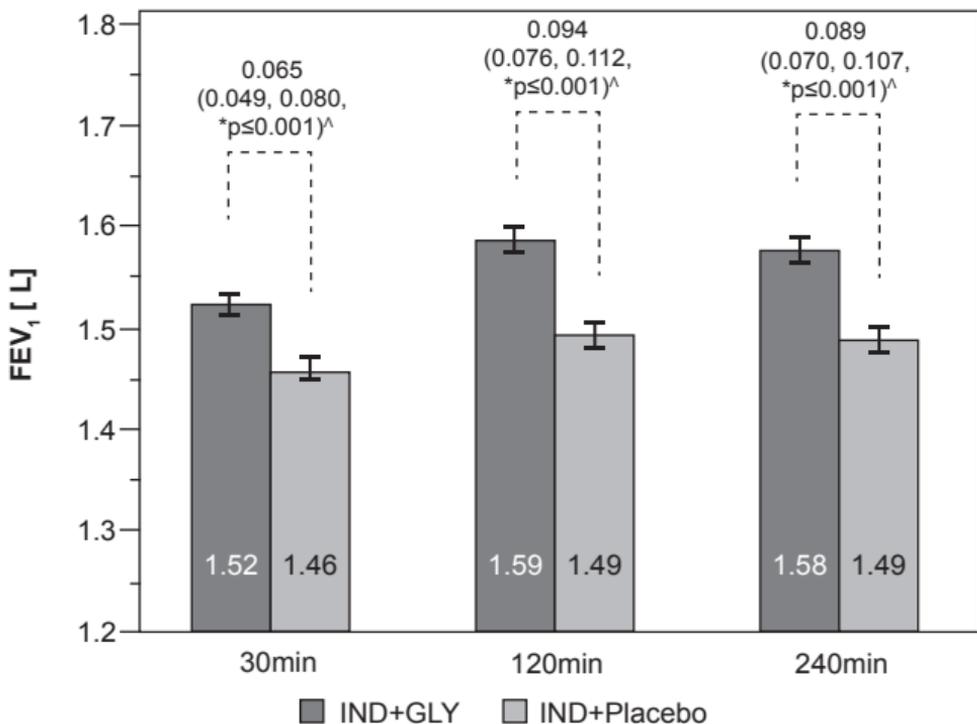

Figure S2: Forced expiratory volume in 1 sec (FEV₁) [L] – pooled analysis of SYNERGY, SHINE and GLOW6 (N=1503)

Least Squares Means values were displayed; Some observations were not included due to missing values; [^]Adjusted treatment difference (95% CI); *P-value based on ANCOVA model with treatment as a fixed effect, the pre-dose FEV₁ as a covariate and patient as a random effect.

#Two periods were used

CI, confidence interval; IND, indacaterol; GLY, glycopyrronium
