\*Teen births are births occurring to females aged 15-19 years.

† Includes teen births of known birth order ( $\geq 95.5\%$  of all teen births in 2004 and 2015).

§ Decreases in percentage of teen births that were repeat teen births are represented by a minus (–) sign; increases are prefaced by a plus (+) sign.

¶ Change from 2004 to 2015 in the percentage of births that were repeat teen births in these 13 states and the District of Columbia was not statistically significant ( $P > 0.05$ ).
