

Chromosomal 16S Ribosomal RNA Methyltransferase RmtE1 in *Escherichia coli* Sequence Type 448

Technical Appendix

Technical Appendix Figure. Comparative analysis of the *rmtE1*-carrying region of the chromosome of *Escherichia coli* YDC774 (GenBank accession number no. MIGD00000000.0) and pYDC637 (GenBank accession no. KP056256) from *E. coli* YDC637. Red arrows indicate antimicrobial resistance genes. Green arrows indicate mobile elements. Gray arrows indicate other genes. ST, sequence type.
