S/ Male cases reported on Morbidity Form PHS 9.688 with the exception of New York, New York City, and Hawaii. These figures do not agree with clinic morbidity because of exclusion of certain types of cases not subject to clinic interview.  
 V/ Some areas may have over 100% because some females were interviewed.

\* A diagnostic observation is an examination of a person to determine the presence or absence of venereal disease (other than observations to determine response to therapy). Observations are excluded for persons given prophylactic treatment, transferred to another clinic, or lapsing from observation before the diagnosis is completed.
