LIMITED EDITION

This paper has been prepared for a special audience, and should not be listed in reading lists or periodicals as available on request.

1. If you run into any problems while I am away, Vincent Nguyen (last name) should be able to help you out if you have any basic problems with scanning.
2. Start the scanner before you log onto the computer. The button to turn on the scanner is on the back right (side close to the computer) of the scanner.
3. Most of the settings will be automatic, but...
4. Make sure the scanner is set to 300 dpi.
5. The file format is correct. They should be saved as a .TIF file.
6. For images not scanned in color, use "Grayscale 8-bit".
7. For images scanned in color, use "24-bit color".
8. If anything is in color on the page, scan in color.
9. The scanner program has an option to create a PDF. Do not use this option. A PDF will be created later in the process. The PDFs that the scanner creates are large files. Smaller ones will be created later.

ERRATA -- VD STATISTICAL LETTER

In the VD Statistical Letter §71, November, 1961, on Pages 13, 14, 15, 20, 21, and 22, the Columns headed "Number Per Case Reported" and "Number Per Case Interviewed" are reversed.

On each of the aforementioned pages, please change both Columns titled "Number Per Case Reported" to "Number Per Case Interviewed" and change "Number Per Case Interviewed" to "Number Per Case Reported".

15. Sometimes the program for the scanner acts up. This is usually corrected by closing out the program, then restarting it (sometimes it can take several restarts to get scanning right).
16. On another note for number 2, sometimes the computer (when fully tested/rebooted) doesn't recognize the actual scanner. For this, turn computer fully off, wait a few minutes, and restart. This also can take a few tries.

CHANGE IN MORBIDITY SUMMARY TABLE

Beginning with this issue of the VD Statistical Letter, the United States Summary of Cases of Venereal Disease in the form of PHS 9.688 Morbidity Report will be discontinued. In its place will be a table of different format (see page 5) but containing the same information. The new table will contain both cases and rates for each reporting source, race and sex computed on an annual basis.
