

Table S3. Prevalence of ever being told by a health care provider that they had hypertension, not including hypertension during pregnancy among reproductive aged women, overall, and by age group, race/ethnicity, and insurance status—Behavioral Risk Factor Surveillance System, United States, 2013 and 2015*

State	Age Group				Race-Ethnicity [§]				Insurance Status [¶]

Abbreviations: NR = not reported (if <50 respondents), CI = confidence interval

* Data self-reported by women ages 18-44 years

[†] Percentages and their associated confidence intervals are weighted to adjust for complex survey design and non response

[§] White = non-Hispanic white; Black = non-Hispanic black; Other = non-Hispanic other

[¶] Defined as having any kind of health care coverage, including prepaid plans such as health maintenance organizations, government plans such as Medicare, or Indian Health Service (IHS)

** Represents 50-59 respondents; might not be reliable
