

WORLD
NO TOBACCO DAY

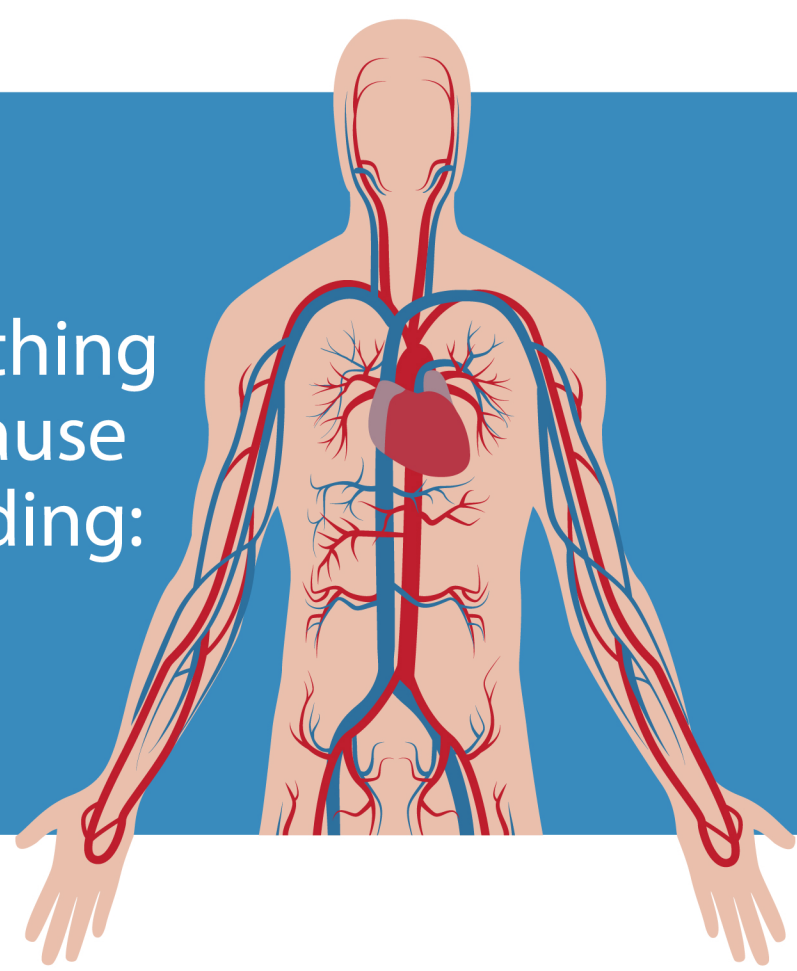

TOBACCO USE AND CARDIOVASCULAR DISEASE

Over **7 Million** people die from tobacco use each year worldwide, including **890,000** from exposure to secondhand smoke

Tobacco smoking and breathing in secondhand smoke can cause cardiovascular disease including:

- **Heart Disease**
- **Stroke**

Tobacco use is a **major cause** of cardiovascular disease

Tobacco use is responsible for 10% of all **cardiovascular disease** deaths worldwide

Implementation of the World Health Organization **MPOWER demand reduction measures** can reduce tobacco use and help protect people from secondhand smoke
