<sup>a</sup> mean transplantation activity over the study period (2010–2014); <sup>b</sup> number of cases divided by the number of grafts in the centers that participated to case report, cumulative data over the study period (2010–2014); <sup>c</sup> minimal doses or intakes; <sup>d</sup> or 480 mg/d indifferently; <sup>e</sup> No of centers with screening/no of centers dealing with the type of transplant

Un, unknown data (no participating center or no participation in case report); Na, not applicable (no such transplantation in the country); wk, week; d, day.
