**Abbreviations:** CI = confidence interval; DTaP = diphtheria, tetanus toxoids, and acellular pertussis vaccine; HepA = hepatitis A vaccine; HepB = hepatitis B vaccine; Hib = *Haemophilus influenzae* type b conjugate vaccine; MMR = measles, mumps, and rubella vaccine; PCV = pneumococcal conjugate vaccine.

\* The combined 7-vaccine series (4:3:1:3\*:3:1:4) includes ≥4 doses of DTaP, ≥3 doses of poliovirus vaccine, ≥1 dose of measles-containing vaccine, full series of Hib vaccine (≥3 or ≥4 doses, depending on product type), ≥3 doses of HepB, ≥1 dose of varicella vaccine, and ≥4 doses of PCV.

† Children in the 2017 National Immunization Survey were born January 2014–May 2016.

§ Includes children who might have been vaccinated with diphtheria and tetanus toxoids vaccine or diphtheria, tetanus toxoids and pertussis vaccine.

¶ One dose HepB administered from birth through age 3 days.

\*\* Either ≥2 or ≥3 doses of rotavirus vaccine, depending on product type received (≥2 doses for Rotarix [RV1] or ≥3 doses for RotaTeq [RV5]).

†† Statistically significant increase in coverage compared to 2016 (p<0.05).

§§ Statistically significant decrease in coverage compared to 2016 (p<0.05).

¶¶ No comparison was made to coverage in 2016; Travis County was not sampled in 2016 and “rest of state” is not comparable between the 2 years.

\*\*\* Children from Guam (n = 440 total, 266 with adequate provider data) were excluded from the national estimates.
