### Updated Guidance for Yellow Fever Vaccine

To avoid a lapse in yellow fever vaccine availability in the United States, the manufacturer, Sanofi Pasteur, has received approval from FDA to import Stamaril yellow fever vaccine. Stamaril is produced by Sanofi Pasteur in France and has comparable safety and efficacy to YF-Vax. See the MMWR [Addressing a Yellow Fever Vaccine Shortage – United States, 2016–2017](#) for further information for providers regarding yellow fever vaccine.

### ACIP Meeting Information

The ACIP holds three meetings each year at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia to review scientific data and vote on vaccine recommendations. Meetings are open to the public and available online via live webcast. During committee meetings, members present findings and discuss vaccine research and scientific data related to vaccine effectiveness and safety, clinical trial results, and manufacturer's labeling or package insert information. Outbreaks of vaccine-preventable disease or changes in vaccine supply also are reviewed during these meetings. Vaccine recommendations include the age(s) when the vaccine should be given, number of doses needed, dosing interval, and precautions and contraindications to administration of vaccines.
