Meningococcal Vaccines Session

David S. Stephens, M.D.

Chair, Meningococcal Work Group

Advisory Committee on Immunization Practices

February 22, 2018

Meningococcal Work Group Activities

- Updated the Work Group Terms of Reference

- Reviewing updated data on meningococcal disease epidemiology:
  - College students
  - Infants and young children

- Reviewing newly available data for MenB vaccines.
  - Antibody persistence and response to a booster dose
  - Safety and immunogenicity of MenB vaccines in children aged <10 years

- Reviewing and grading evidence for booster doses of MenB vaccine for persons at increased risk

Timeline of Upcoming Activities

- June 2018: Complete GRADE evaluation for MenB booster dose (tentative)

- October 2018: Full session on a single MenB booster dose in persons aged ≥10 at increased risk (tentative)

- Late 2018/early 2019: Publication of consolidated ACIP Recommendation and Report on Meningococcal Vaccines (MenACWY and MenB)

Agenda

- Epidemiology of Meningococcal Disease Among College Students – United States, 2014-2016
  - Sarah Meyer (CDC/NCIRD)
