# Introduction and Definition of the Problem

Bullying, particularly among school-age children, is a major public health problem both domestically and internationally (Nansel, Craig, Overpeck, Saluja, & Ruan, 2004). Current estimates suggest that nearly 30% of American adolescents reported at least moderate bullying experiences as the bully, the victim, or both. Specifically, of a nationally representative sample of adolescents, 13% reported being a bully, 11% reported being a victim of bullying, and 6% reported being both a bully and a victim (Nansel et al., 2001).

How bullying experiences are defined and measured, however, varies greatly. Much of the work on bullying has adopted the definition of Daniel Olweus, whose work in the 1990s increased attention on bullying as a research topic. According to Olweus, a person is bullied when he or she is exposed repeatedly over time to negative actions by one or more others, excluding cases where two children of similar physical and psychological strength are fighting (Olweus, 1994). Olweus added that bullying can be direct (open attacks that are physical or verbal in nature) and indirect (exclusion). Since the 1990s, researchers have modified Olweus' definition of bullying, for example, to assess the difference in power between bullies and victims (e.g., Vaillancourt, Hymel, & McDougall, 2003). Regarding measurement, some scholars provide respondents with a definition of bullying similar to Olweus' definition (e.g., Nansel, Overpeck, Haynie, Ruan, & Schiedt, 2003) before inquiring about their experiences with bullying, while others measure bullying by providing behaviorally specific questions, such as the frequency of name-calling or hitting (e.g., Bosworth, Espelage, & Simon, 1999).

Despite the variability in the literature, scholars agree that bullying experiences include not only physical aggression, but also verbal aggression, including verbal harassment, spreading rumors, or social rejection and isolation. Moreover, research suggests that boys are more likely to engage in physical aggression, while verbal aggression, often called relational aggression, is more common among girls (e.g., Baldry & Farrington, 2000; Nansel et al., 2001; Rivers & Smith, 1994).

Studies indicate that bullying experiences are associated with a number of behavioral, emotional, and physical adjustment problems. Adolescents who bully others tend to exhibit other defiant and delinquent behaviors, have poor school performance, be more likely to drop-out of school, and be more likely to bring weapons to school (e.g., Berthold & Hoover, 2000; Nansel et al., 2003; Nansel et al., 2004; Sourander, Helstela, Helenius, & Piha, 2000). Victims of bullying tend to report feelings of depression, anxiety, low self-esteem, and isolation; poor school performance; suicidal ideation; and suicide attempts (e.g., Bond, Carlin, Thomas, Ruin, & Patton, 2001; Eisenberg, Neumark-Sztainer, & Perry, 2003; Gladstone, Parker, & Malhi, 2006; Hawker & Boulton, 2000; Klomeck, Marrocco, Kleinman, Schonfeld, & Gould, 2007; Nansel et al., 2004; Sourander et al., 2000). Evidence further suggests that people who are the victims of bullying and who also perpetrate bullying (i.e., bully-victims) may exhibit the poorest functioning, in comparison with either victims or bullies (e.g., Nansel et al., 2004). Emotional and behavioral problems experienced by victims, bullies, and bully-victims may continue into adulthood and produce long-term negative outcomes, including low self-esteem and self-worth, depression, antisocial behavior, vandalism, drug use and abuse, criminal behavior, gang membership, and suicidal ideation (e.g., Nansel et al., 2001; Gladstone et al., 2006; Hugh-Jones & Smith, 1999; Olweus, 1994).

In the bullying literature, the experiences of bystanders—that is, individuals who watch bullying happen or hear about it—have largely been overlooked (Twemlow, Fonagy, & Sacco, 2004). What is known is that youth who witness bullying often report increased feelings of guilt or helplessness for not confronting the bully and/or supporting the victim (Hoover, Oliver, & Hazler, 1992; O'Connell, Pepler, & Craig, 1999). Additionally, adolescent bystanders may separate themselves from a bullied peer to avoid being bullied (Salmivalli, 2001).

## Purpose of the Compendium

This compendium provides researchers, prevention specialists, and health educators with tools to measure a range of bullying experiences: bully perpetration, bully victimization, bully-victim experiences, and bystander experiences. Some researchers continue to examine the risk and protective factors associated with bullying experiences. Others are working to design, implement, and evaluate bully prevention interventions aimed at reducing bully victimization and perpetration, as well as increasing prosocial bystander involvement in bullying situations. The ability to measure bullying experiences broadly and completely is crucial to the success of these activities.

Given that numerous measures of bullying experiences exist, researchers and practitioners—particularly those new to the field—may find it challenging to identify which of the available measures is appropriate for assessing a particular bullying experience. This compendium represents a starting point from which researchers can consider a set of psychometrically sound measures for assessing self-reported incidence and prevalence of a variety of bullying experiences.

## What the Compendium Includes

This compendium contains 33 measures, which were selected using specific procedures. Bullying search terms were drawn from a review of the most salient literature on bullying victimization and perpetration as well as bystander experiences

among adolescents and young adults. These terms were used to conduct searches of multiple electronic databases, which yielded a variety of different measures and scales.

We used the following inclusion criteria:

- To maximize inclusiveness of our review of measures, we included a measure if the article in which it was published referred to the construct “bullying,” even if the authors did not assess the power differential and chronicity of the target behavior or did not label the behavior as bullying for the research participants.
- The measure had to assess constructs related to bullying, such as physical aggression, relational aggression, sexualized and homophobic bullying, and bystander experiences.
- The measure had to have been administered to respondents between 12 and 20 years of age.
- Since the bulk of work on bullying began in the 1990s, the measures had to be developed or revised between 1990 and 2007 (when the review of literature was concluded).
- Measures had to be self-administered in English.
- The measure had to be published in a peer-reviewed journal or book, including psychometric information about the measure, when available.

If the authors modified a measure, and the psychometric properties of the modified version had been published, we included only the modified version of the measure in the compendium. The current compendium contains more bullying and

victimization measures than it does bully-victim or bystander measures. This likely reflects the historical focus of the field on either bully perpetration or victimization. As more research identifies the importance of having experiences as both a bully and a victim of bullying, as well as the experiences of bystanders, it is likely more scales will be developed to assess these constructs.

The measures in the compendium are presented to help researchers and practitioners make informed decisions when choosing measures to use in their work. CDC does not endorse any particular scale presented in this compendium. Additionally, it is not an exhaustive listing of available measures. Other measures were identified but could not be included because we were unable to obtain copyright permission. The appendix provides the scale name and the citation of measures for which we did not receive copyright permission to publish.

It should be noted that some of the behaviors assessed by scales included in this compendium are considered crimes (e.g., sexual harassment and physical assault). The inclusion of these scales in this compendium does not diminish the seriousness of such illegal behaviors.

## How the Compendium Is Organized

This compendium includes measures of bully perpetration only (Section A: Bully Only); bully victimization only (Section B: Victim Only); being both a bully and a victim (Section C: Bully and Victim); and being a bully, a bystander (observer), and/or a victim of bullying situations (Section D: Bystander, Bully, and/or Victim). Each section begins with a table summarizing important

information about each of the measures in the section: the name of the measure, developer(s), year of publication, characteristics of the measure, target groups with whom the measure has been tested, and reliability and validity information when known.

For each measure, the compendium provides measure items, response categories, scoring instructions, and the information provided to respondents at the beginning of the measure, when available. Because the majority of the measures in this compendium have been published previously, CDC obtained permission to reprint the measure, either in full or in part, from the author of the measure and the journal in which it was published as necessary. In some cases, the author or publishing company required CDC to include a statement about a scale's copyright status. In those cases, a scale's copyright status is referenced in the summary table at the beginning of each section, and specific copyright information is provided at the end of the scale.

## How to Use the Compendium

When selecting bullying measures for use, researchers, prevention specialists, and health scientists should consider measurement issues such as: what specific bullying experiences he or she is interested in measuring, how bullying is defined by the specific measure, and what reporting time frame is used. Moreover, developing measures that are psychometrically sound and free of bias may not be possible. Thus, the following criteria may be helpful when choosing among measures in this compendium.

<b>General Rating Criteria for Evaluating Measures</b>				
<i>Criterion Rating</i>	<i>Exemplary</i>	<i>Extensive</i>	<i>Moderate</i>	<i>Minimal</i>
<i>Inter-Item Correlation</i>	Average of 0.30 or better	Average of 0.20 to 0.29	Average of 0.10 to 0.19	Average below 0.10
<i>Alpha-Coefficient</i>	0.80 or better	0.70 to 0.79	0.60 to 0.69	Less than 0.60
<i>Test-Retest Reliability</i>	Scores correlate more than 0.50 across a period of at least 1 year.	Scores correlate more than 0.40 across a period of 3–12 months.	Scores correlated more than 0.30 across a period of 1–3 months.	Scores correlated more than 0.20 across less than a 1 month period.
<i>Convergent Validity</i>	Highly significant correlations with more than two related measures.	Significant correlations with more than two related measures.	Significant correlations with two related measures.	Significant correlations with one related measure.
<i>Discriminant Validity</i>	Significantly different from four or more unrelated measures.	Significantly different from two or three unrelated measures.	Significantly different from one unrelated measure.	Different from one correlated measure.

## Future Considerations

Since the 1980s, researchers investigating bullying have made a great deal of progress. The three hallmarks of bullying are (a) aggressive behavior (either physical or relational/verbal) that is (b) repeated over time and (c) involves a real or perceived imbalance of power or strength. All of the bullying measures included in this compendium assess the aggressive nature of the bullying behavior. Many of the measures assess the frequency with which these aggressive behaviors occur. Almost none of the measures, however, address the power differential in the relationship between a bully and his or her victim. With the exception of those measures that specifically define or reference bullying, most of the measures in this compendium could as likely be classified as assessing youth violence and/or aggression as they are classified as assessing bullying. Future measures of bullying need to better assess the power differential between the bully perpetrator and his or her victim.

Future measures also need to better assess bullying of a sexual nature and bullying that occurs electronically. Bullying has been defined as physical or nonphysical bullying behavior that is based on a person's sexual life or gender. Homophobic bullying, teasing, threats, harassment, and assault based on negative beliefs, attitudes, and stereotypes about gays and lesbians, is an example of sexualized bullying that is prevalent among adolescents but remains largely unstudied. Much of the research on homophobic bullying focuses on homosexual respondents (e.g., Rivers, 2001); less

research investigates its use among heterosexual respondents, who are also likely victims of homophobic bullying (e.g., Kimmel & Mahler, 2003). Only one measure was identified for inclusion in the compendium that assesses homophobic bullying.

It is estimated that more than 9 in 10 adolescents use some form of online communication (Center for the Digital Future, 2009), leading to increased opportunities for youth to use and be exposed to bullying online. This electronic aggression, or cyberbullying, is typically defined as intentional and repeated harm inflicted through the use of computers, cell phones, and other electronic devices (Hinduja & Patchin, 2009). Although research indicates that adolescents are more likely to be bullied in person rather than online (e.g., Li, 2007), the effects of these online bullying experiences are not trivial and are often similar to those associated with in-person bullying (Hinduja & Patchin, 2009). Only two measures of electronic aggression were identified for inclusion in this compendium. Future work is needed to expand our knowledge and measurement of electronic aggression.

It is our hope that this document will provide a starting point for researchers and others who are interested in studying bullying behavior and serve as a guide for developing future measures that can assess all types of bullying behavior as well as the interpersonal dynamics (e.g., power differentials) that are so important when assessing bullying.

# A1. Aggression Scale

Think about what happened DURING THE LAST 7 DAYS, when you answer these questions.

During the last 7 days:	0 times	1 time	2 times	3 times	4 times	5 times	6+ times
1. I teased students to make them angry.	0	1	2	3	4	5	6+
2. I got angry very easily with someone.	0	1	2	3	4	5	6+
3. I fought back when someone hit me first.	0	1	2	3	4	5	6+
4. I said things about other kids to make other students laugh.	0	1	2	3	4	5	6+
5. I encouraged other students to fight.	0	1	2	3	4	5	6+
6. I pushed or shoved other students.	0	1	2	3	4	5	6+
7. I was angry most of the day.	0	1	2	3	4	5	6+
8. I got into a physical fight because I was angry.	0	1	2	3	4	5	6+
9. I slapped or kicked someone.	0	1	2	3	4	5	6+
10. I called other students bad names.	0	1	2	3	4	5	6+
11. I threatened to hurt or to hit someone.	0	1	2	3	4	5	6+

## Scoring Instructions

Point values are assigned as indicated above. This scale is scored by adding responses to all items. Possible score range is 0 to 66 points. Higher scores indicate a greater frequency of engaging in overt and relational aggression.

If four or more items are missing, the score cannot be computed. If three or fewer items are missing, these values are replaced by the respondent's average.

### Scoring Instructions

Item numbers refer to position inserted on the Self-Perception Profile for Children (SPPC; Harter, 1985). For each question, respondents indicate which of two discordant statements is most like him or her. Then, respondents indicate how true (“really” or “sort of”) the statement is for him or her.

Each item is scored 1 (*Really True for Me* on the left side) to 4 (*Really True for Me* on the right side). Items 15, 31, and 39 are reverse-scored. The scale is scored by computing the mean item score (i.e., sum of the items / 6). The scale has a range of 1 to 4. Higher scores indicate greater bullying behavior.

### A3. Children's Social Behavior Scale – Self Report

#### Instruction to Respondents

We are interested in how kids get along with one another. Please think about your relationship with other kids and how often you do these things while you're with them.

#### Sample Items

##### *Relational Aggression*

1. Some kids tell lies about classmates so that the other kids won't like the classmates anymore. How often do you do this?
10. Some kids tell their friends that they will stop liking them unless the friends do what they say. How often do you tell friends this?

##### *Overt Aggression*

5. Some kids hit other kids at school. How often do you do this?
8. Some kids yell at others and call them mean names. How often do you do this?

##### *Prosocial Behavior*

3. Some kids try to cheer up other kids who feel upset or sad. How often do you do this?
7. Some kids help out other kids when they need it. How often do you do this?

##### *Loneliness*

5. Some kids wish that they had more friends at school. How often do you feel this way?

#### Response Alternatives

Never, Almost Never, Sometimes, Almost All of the Time, All of the Time

#### Scoring Instructions

Item numbers refer to position inserted on the Children's Social Behavior Scale – Self Report (CSBS-S). Scores on individual items on each subscale are summed and then compared across the sample.

3. I said things about other students to make other students laugh.					
4. I teased other students.					
5. I threatened to hit or hurt another student.					
<b>Anger</b>					
6. I was angry most of the day.					
7. I was grouchy or irritable, or in a bad mood, so even little things made me mad.					
	Never	Seldom	Sometimes	Often	Always
8. I frequently got angry.					
9. I took my anger out on an innocent person.

### Scoring Instructions

Point values are assigned as follows:

Never = 0	Never = 0
1 or 2 times = 1	Seldom = 1
3 or 4 times = 2	Sometimes = 2
5 or more times = 3	Often = 3
	Always = 4

Scores on the *Bullying* subscale are computed by summing across subscale items. This subscale has a possible range of 0 to 15. Because the response options for the *Anger* subscale are dissimilar across items, individual item scores are converted to *z* scores and summing across *z* scores. High scores indicate more bullying behavior and anger.

### Scoring Instructions

A score for peer victimization is computed for each of the four types of bullying (teasing, rumors, deliberate exclusion/social isolation, and physical threats/violence). This scale was devised with the objective of rating the severity of peer victimization to which an individual was subjected. Being bullied frequently and being upset by bullying were considered to have equal value; the presence of both factors was considered to be worse than either factor on its own. Thus, the following scale is used to score each of the four types of bullying:

0 = Not bullied

1 = Bullied but not frequently and not upset

2 = Bullied, either frequently or upset, but not both

3 = Bullied frequently and upset

Item scores can be used individually or a scale score can be computed by taking the mean item score across the four types of bullying

### Scoring Instructions

Point values are assigned as follows:

Not at all = 0

Once = 1

More than once = 2

Physical victimization scale: Items 6, 7, 8, and 9

Verbal victimization scale: Items 1, 4, 5, and 16

Social manipulation scale: Items 2, 11, 13, and 14

Attacks on property scale: Items 3, 10, 12, 15

Scale scores are computed by summing item responses. Scores on the total scale have a possible range of 0 to 32; scores on each of the four subscales have a possible range of 0 to 8. Higher scores reflect more victimization.

## B3. “My Life in School” Checklist

### Introducing the Checklist

Pupils should be given some explanation about why they are being presented with the questionnaire, for example, “We would like to know what happens to people in school. In this booklet are various things that might have happened to you during the last week.” At least the first item should be read out loud to the pupils. They should be shown how to complete the questions. Each item can be read out loud, and if there are children with a reading age below 8 years, they may need individual assistance.

### Achieving the Right Atmosphere

Pupils should work individually. Each pupil should have as much privacy as possible. There should be no discussion between pupils whilst the checklist is being completed.

#### Scoring Instructions

Bully Victimization Index: Items 4, 8, 10, 24, 37, and 39

The Index should be used with groups of forty pupils or more (i.e., a whole year group) to establish levels of bully victimization in a school. For groups smaller than forty, the Index will not be sufficiently reliable to allow valid comparisons. For schools with small classes, the Bully Victimization Index can be calculated for the whole school.

**Steps for scoring the bully victimization index:****Step One:**

For each of the six items above, count the number of times that a tick was placed under the category “more than once.” Do this separately for each of the six key items (items 4, 8, 10, 24, 37, 39).

**Step Two:**

Divide the scores for each separate item by the number of checklists completed. This will give you the percentage of pupil responses for each item.

**Step Three:**

Add all the six percentages.

**Step Four:**

Divide this number by six. Use two decimal points e.g., 7.12 or 8.03. This figure is the “Bully Victimization Index” for your school.

**Interpreting the Results: Gender Differences**

Boys’ responses are normally around two or three times as high as girls’ responses. This does not necessarily mean that boys are bullied more often than girls. Girls are more likely to engage in subtler, indirect forms of bullying and these behaviors are not referred to in the checklist. The six items used to score the bullying index have a bias towards more physical bullying. Consequently, bullying by boys may be detected more easily with the Index than bullying by girls. However, physical and verbal bullying usually co-exist, so a high Bullying Index can be interpreted as indicating the likelihood of a high level of bullying all round, and vice versa.

For the same reasons, girls who are bullied may not be as readily identified with the six items alone. Other items e.g., Item 35, “Laughed at me horribly,” or item 38, “Told a lie about me,” may be useful in identifying girls’ bullying. Alternatively, additional items that refer to more indirect forms of bullying can be included.

## B4. Perception of Teasing Scale (POTS)

The following questions should be answered with respect to the period of time when you were growing up (ages 5–16). First, rate how often you think you have been the object of such behavior (using the scale provided, **never** to **very often**). Second, unless you responded never to a particular question, rate how upset you were by the teasing (**not upset** to **very upset**).

### Scoring Instructions

Point values are assessed as indicated above. This tool contains a Weight-Related Teasing (Items 1–6) and a Competency-Related Teasing (Items 7–11) subscale. The subscales are summed and scored separately. The range of scores on the Weight-Related Teasing subscale is 6–30, and the range for the Competency-Related Teasing subscale is 5–25. Higher scores denote higher bullying/teasing victimization frequency.

The tool also assesses the teasing effect for each subscale: Weight Teasing Effect is assessed by items 1a–6a; Competency Teasing Effect is assessed by items 7a–11a. Per the instructions, respondents were only to provide an effect score if they indicated something other than “Never” for the teasing behavior. Effect scores for each subscale are computed by taking the sum of all non-“Never” teasing behaviors in that subscale and dividing by the number of non-“Never” teasing behaviors. For example, if a respondent reported three teasing behaviors on the Weight-Related Teasing subscale,

they should also provide an effect rating for each of those behaviors. The summed effect score would be divided by 3, yielding a mean effect score for the subscale. The range of scores on both effect measures is 1–5, and higher scores indicate more teasing-based distress.

### Scoring Instructions

Item numbers refer to position inserted on the Self-Perception Profile for Children (SPPC; Harter, 1985). For each question, respondents indicate which of two discordant statements is most like him or her. Then, respondents indicate how true (“really” or “sort of”) the statement is for him or her.

Each item is scored 1 (*Really True for Me* on the left side) to 4 (*Really True for Me* on the right side). Items 3, 11 and 27 are reverse scored so that higher scores indicate greater experience of victimization. The scale is scored by computing the mean item score (i.e., sum of the items / 6). The scale has a range of 1 to 4. Higher scores indicate greater bully victimization.

### THANK YOU VERY MUCH FOR YOUR COOPERATION.

#### Scoring Instructions

Victims are identified from their responses about frequency and intensity of reported physical, verbal, and indirect bullying. A respondent is considered a victim if they report being bullied in one or more ways "sometimes" or more often (frequency) AND classified the experience as "quite serious" or "extremely serious" (intensity). This measure can be used to differentiate 3 types of victims: those who only experienced victimization in primary school (*primary school victims*); those who only experienced victimization in secondary school (*secondary school victims*); and those who experienced victimization in both (*stable victims*).

## B7. Victimization Scale

Think about what happened DURING THE LAST 7 DAYS, when you answer these questions.

During the last 7 days:	0 times	1 time	2 times	3 times	4 times	5 times	6+ times
1. A student teased me to make me angry.	0	1	2	3	4	5	6+
2. A student beat me up.	0	1	2	3	4	5	6+
3. A student said things about me to make other students laugh (made fun of me).	0	1	2	3	4	5	6+
4. Other students encouraged me to fight.	0	1	2	3	4	5	6+
5. A student pushed or shoved me.	0	1	2	3	4	5	6+
6. A student asked me to fight.	0	1	2	3	4	5	6+
7. A student slapped or kicked me.	0	1	2	3	4	5	6+
8. A student called me (or my family) bad names.	0	1	2	3	4	5	6+
9. A student threatened to hurt or to hit me.	0	1	2	3	4	5	6+
10. A student tried to hurt my feelings.	0	1	2	3	4	5	6+

### Scoring Instructions

Point values are assigned as indicated above. This scale is scored by adding all responses. Possible range is 0 to 60 points. Higher scores indicate a greater frequency of being the victim of overt and relational aggression.

If three or more items are missing, the score cannot be computed. If two or fewer items are missing, these values are replaced by the respondent's average.

## B8. Weight-Based Teasing Scale

How often do any of the following things happen?

	Never	Less than once a year	A few times a year	A few times a month	At least once a week
1. You are treated with less respect than other people					
2. People act as if they're better than you					
3. You are called names or insulted					
4. You are teased about your appearance					
5. You are teased about your weight					

### Scoring Instructions

Point values are assigned as follows:

Never = 0

Less than once a year = 1

A few times a year = 2

A few times a month = 3

At least once a week = 4

Responses can be used individually or can be summed to create a single scale score; the range for the scale score is 0 to 20. Individual item responses are examined descriptively, and the overall scale score is examined in relationship to school connectedness and academic achievement. Higher scores indicate more weight-based teasing victimization.

## Description of Measures

Scale/ Assessment	Characteristics	Target Groups	Psychometrics	Developer
C1. <i>AAUW Sexual Harassment Survey</i>	14-item measure with 2 subscales assessing the frequency of verbal/non-physical and physical sexual harassment as both the perpetrator and victim.	Youth 10–18 years old	Cronbach's alpha: Physical victimization = 0.91 Verbal victimization = 0.76	American Association of University Women, 2001
C2. <i>Adolescent Peer Relations Instrument</i>	36-item measure with 6 subscales assessing the frequency of physical, verbal, and social bullying as both the perpetrator and victim.	Youth 12–17 years old	Chronbach's alpha: Total bully score = 0.93 Total victim score = 0.95 Subscale scores = 0.83 to 0.92	Parada, 2000
C3. <i>Child Social Behavior Questionnaire</i>	24-item measure with 5 subscales assessing the frequency of prosocial, antisocial, and victimization experiences.	Youth 9–10 years old	Cronbach's alpha: Prosocial = 0.68 Antisocial = 0.63	Warden, Christie, Cheyne, & Fitzpatrick, 2000; Warden, Cheyne, Christie, Fitzpatrick, & Reid, 2003
C4. <i>Homophobic Content Agent Target Scale</i>	10-item scale with 2 subscales with 5 items per subscale (i.e., Agent and Target), with 5 response options. The scale assesses frequency of homosexual name-calling directed at different targets by different sources.	Youth 10–18 years old	Cronbach's alpha: Agent subscale = 0.77–0.85 Target subscale = 0.81–0.85	Poteat & Espelage, 2005 © 2005 Springer Publishing Company
C5. <i>Illinois Bully Scale</i>	18-item scale with 3 subscales assessing the frequency of bullying behavior, fighting, and victimization by peers.	Youth 8–18 years old	Cronbach's alpha for subscales: Bullying = 0.87 Fighting = 0.83 Victimization = 0.88	Espelage & Holt, 2001 © 2001 The Haworth Press, Inc.
C6. <i>Introducing My Classmates</i>	8-item peer-nomination measure in which respondents identify classmates that are similar to fictitious characters described in each item. Nominations are made from a provided list of all classmates.	Youth 8–12 years old	Evidence of convergent validity	Gotthiel & Dubow, 2001a
C7. <i>Modified Peer Nomination Inventory</i>	26-item peer-nomination measure used to identify same-sex classmates that have bullied others or been the victim of bullying.	Youth 10–14 years old	Cronbach's alpha: Victimization scale = 0.96 Victimization scale: 3-month test-retest reliability = 0.93	Perry, Kusel, & Perry, 1988 © 1988 American Psychological Association (APA) Original Inventory: © 1961 Southern Universities Press
C8. <i>Olweus Bullying Questionnaire</i>	39-item measure assessing the frequency of bully perpetration and victimization.	Youth 11–17 years old	Cronbach's alpha: Bully perpetration = 0.88 Bully victimization = 0.87	Solberg & Olweus, 2003 © Hazelden Publishing

<i>C9. Peer Interactions in Primary School Questionnaire</i>	22-item measure with 2 subscales assessing direct and indirect bullying and victimization.	Youth 8–12 years old	Cronbach's alpha: Overall scale = 0.90 1- to 3-day test-retest reliability: Victimization scale: ICC = 0.88 Bully scale: ICC = 0.84	Tarshis & Huffman, 2007 © 2007 Lippincott Williams & Wilkins (LWW)
<i>C10. Reduced Aggression/ Victimization Scale</i>	11-item measure with 2 subscales assessing experience with overt and relational aggression as both the perpetrator and victim.	Youth 8–12 years old	Cronbach's alpha: Victimization = 0.84 Aggression = 0.86	Orpinas & Horne, 2006
<i>C11. School Life Survey</i>	24-item, 2-part measure, assessing the frequency of physical, verbal, and relational bullying as both the perpetrator and the victim.	Youth 8–12 years old	Bully perpetration items: 1-week test-retest reliability = 0.84 Victimization items: Cronbach's alpha = 0.83 1-week test-retest reliability = 0.94	Chan, Myron, & Crawshaw, 2005 © 2005, Sage Publications, Ltd.
<i>C12. School Relationships Questionnaire</i>	20-item measure with 4 four subscales assessing the victimization and perpetration of direct and relational bullying/aggression.	Youth 6–9 years old	NA	Wolke, Woods, Bloomfield, & Karstadt, 2000
<i>C13. Setting the Record Straight</i>	30-item measure with 2 subscales assessing bullying and victimization experiences. The measure assesses these experiences from both the respondents' point of view (self-report) and how the respondents believe they are viewed by their peers.	Youth 8–11 years old	Cronbach's alpha: Self-report subscales: Bullying = 0.72 Victimization = 0.88 Perceived peer perception subscales: Bullying = 0.69 Victimization = 0.85	Gottheil & Dubow, 2001b © 2001 The Haworth Press, Inc.

### Scoring Instructions

Questions 1 and 6:

a = 0 b = 1 c = 2 d = 3 e = missing value

For questions 1 and 6: Verbal/non-physical: Items a–g, Physical: Items h–n

Item responses to questions 1 and 6 can be summed to create a total score and/or verbal and physical subscale scores can be separately computed as indicated above. The range for the total scores for these questions is 0 to 72; range for the subscales is 0 to 21. Higher scores indicate more sexual harassment experiences as either a perpetrator or a victim.

Questions 2, 3, 4, 7, and 8: Yes = 1 No = 0

Item responses are summed individually and analyzed accordingly.

17. I was left out of activities, games on purpose	1	2	3	4	5	6
18. I was called names I didn't like	1	2	3	4	5	6

**Scoring Instructions**

Point values are assigned as indicated above.

Section A contains the bullying items.

Subscale scores are computed as follows:

Verbal bullying: Items 1, 3, 5, 7, 10, and 14

Social bullying: Items 4, 8, 11, 13, 17, and 18

Physical bullying: Items 2, 6, 9, 12, 15, and 16

Section B contains the victim items.

Subscale scores are computed as follows:

Verbal victimization: Items 1, 4, 7, 11, 13, and 18

Social victimization: Items 3, 6, 9, 12, 14, and 17

Physical victimization: Items 2, 5, 8, 10, 15, and 16

Scoring is achieved by adding the items up for each individual total score (bullying and victimization) or for each subscale score (verbal, social, and physical). Any student who scores 18 for either the bullying or victimization total score has never been bullied or has never bullied others. There are no cut off scores for this instrument. For the subscales, a score of 6 means the respondent has never been bullied or has never bullied others in that particular way.

NOTE: This scale is the self-report version of the Child Social Behavior Questionnaire. There are also peer-nomination and teacher-rating versions of this scale reported in Warden et al. (2003).

**Scoring Instructions**

Point values are assigned as follows:

Never = 0

Sometimes = 1

Often = 2

Practical prosocial behavior: Items 1, 8, 11, and 16

Relational prosocial behavior: Items 5, 14, 18, and 22

Overt antisocial behavior: Items 4, 7, 12, and 20

Relational antisocial behavior: Items 17, 19, 23, and 24

Victimization: Items 3, 6, 9, and 13

Scale scores are computed by summing up the respective items scores for each subscale. Each subscale has a range of 0 to 8. High scores indicate more experience with the construct assessed by the subscale.

Exploring the relation between bullying and homophobic verbal content: The Homophobic Content Agent Target (HCAT) Scale. *Violence and Victims, 20*, 513–528.

### Scoring Instructions

Point values are assigned as indicated above.

Compute separate subscale (Agent and Target) scores by summing the responses to items a–e for each subscale. The Agent subscale emerged as a distinct factor from the Victim subscale in factor analysis; thus, it is inappropriate to compute a total scale score. Scores for each subscale range from 5 to 25. Higher scores on the Agent subscale indicates greater perpetration of homophobic teasing, while higher scores on the Target subscale indicate more experience being the victim of homophobic teasing.

### Scoring Instructions

Point values are assigned as follows:

Never = 0

1 or 2 times = 1

3 or 4 times = 2

5 or 6 times = 3

7 or more times = 4

Victim subscale: Items 4, 5, 6, and 7

Bully subscale: Items 1, 2, 8, 9, 14, 15, 16, 17, and 18

Fight subscale: Items 3, 10, 11, 12, and 13

Subscale scores are computed by summing the respective items. The range for the victim subscale is 0 to 16, with higher scores indicating more victimization. The range for the bully subscale is 0 to 36, with higher scores indicating more bully perpetration. The range for the fight subscale is 0 to 20, with higher scores indicating more fighting.

## C6. Introducing My Classmates

**Below you will read brief descriptions of different boys and girls. After reading the descriptions, use the list of students in your class you feel are similar to the boy or girl in the description.**

- A. This boy, Felix, is good at sports, has lots of friends, seems to understand his homework, and rarely gets upset.

Write the code numbers for all the boys on your list that you feel are like Felix.

- B. This boy, Oscar, is picked on, made fun of, called names, and is hit and pushed by other kids. Kids do mean things to him and try to hurt his feelings.

Write the code numbers for all the boys on your list that you feel are like Oscar.

- C. This boy, Alex, is funny, always telling jokes, and making the other kids laugh. He is fun to be around.

Write the code numbers for all the boys on your list that you feel are like Alex.

- D. This boy, Johnny, makes fun of people, says he can beat everyone up, hits and pushes others around, tries to pick fights, and if someone gets in his way he is likely to shove that person out of the way

Write the code numbers for all the boys on your list that you feel are like Johnny.

- E. This girl, Rachel, is good at sports, has lots of friends, seems to understand her homework, and rarely gets upset.

Write the code numbers for all the girls on your list that you feel are like Rachel.

- F. This girl, Loraine, is picked on, made fun of, called names, and is hit and pushed by other kids. Kids do mean things to her, and try to hurt her feelings.

Write the code numbers for all the girls on your list that you feel are like Loraine.

- G. This girl, Lynetta, is funny, always telling jokes, and making the other kids laugh. She is fun to be around.

Write the code numbers for all the girls on your list that you feel are like Lynetta.

- H. This girl, Marianna, makes fun of people, says she can beat everyone up, hits and pushes others around, tries to pick fights with people, and if someone gets in her way she is likely to shove that person out of the way.

Write the code numbers for all the girls on your list that you feel are like Marianna.

**NOTE:** All students must be provided with a list of names of all the students in the class; each name should be linked with a unique identification code for the respondents to record in response to the survey questions.

**Scoring Instructions**

Bully items = D and H; Victim items = B and F. Scores are computed separately by adding up all the nominations a given child receives from his or her classmates on the respective bully and victim items. These scores are then divided by the total number of raters and multiplied by 100 to obtain a percentage score of peer-nominated bully and victim behavior. Scores can range from 0 to 100 with higher scores reflecting a greater percentage of classmate nominations.

**NOTE:** The names of all same-sex classmates are presented along the top of the survey form and respondents are asked to place an X under the name of each classmate who fit the behavior described in each item. Respondents are instructed to cross their own name off the list, so they cannot nominate themselves.

### Scoring Instructions

Victimization scale: Items 3, 6, 10, 15, 20, 22, and 25

Aggression scale: Items 5, 8, 12, 13, 16, 18, and 24

A victimization score for each child is computed by calculating the percentage of same-sex classmates who nominated him or her for each victimization item and then totaling these percentages. Because there are seven items on the Victimization scale, it has a range of 0 to 700, with higher values indicate more victimization. An aggression score for each child is computed for each child in an analogous way. Because there are seven items on the Aggression scale, it has a range of 0 to 700, with higher values indicating more aggressive behavior.

## C8. Olweus Bullying Questionnaire

### Sample Items

#### ABOUT BEING BULLIED BY OTHER STUDENTS

Here are some questions about being bullied by other students. First, we define or explain the word bullying. We say a student is being bullied when another student or several other students:

- say mean and hurtful things or make fun of him or her or call him or her mean and hurtful names;
- completely ignore or exclude him or her from their group of friends or leave him or her out of things on purpose;
- hit, kick, push, shove around, or lock him or her inside a room;
- tell lies or spread false rumors about him or her or send mean notes and try to make other students dislike him or her;
- and other hurtful things like that.

When we talk about bullying, these things happen repeatedly, and it is difficult for the student being bullied to defend himself or herself. We also call it bullying, when a student is teased repeatedly in a mean and hurtful way.

But we don't call it bullying when the teasing is done in a friendly and playful way. Also, it is not bullying when two students of about equal strength or power argue or fight.

### Scoring Instructions

Point values are assigned as follows:

Never = 0    Sometimes = 1    A Lot = 2

Victim subscale: Items 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 20, and 22

Bully subscale: Items 2, 4, 6, 8, 10, 12, 14, 16, 18, and 21

Items on each subscale are summed. The intended range for the Victim subscale is 0–24, with higher scores indicating more victimization. The intended range for the Bully subscale is 0–20, with higher scores indicating more bully perpetration.

## C10. Reduced Aggression/Victimization Scale

Think about what happened DURING THE LAST 7 DAYS, when you answer these questions.

During the last 7 days:	0 times	1 time	2 times	3 times	4 times	5 times	6+ times
1. How many times did a kid from your school tease you?	0	1	2	3	4	5	6+
2. How many times did a kid from your school push, shove, or hit you?	0	1	2	3	4	5	6+
3. How many times did a kid from your school call you a bad name?	0	1	2	3	4	5	6+
4. How many times did kids from your school say that they were going to hit you?	0	1	2	3	4	5	6+
5. How many times did other kids leave you out on purpose?	0	1	2	3	4	5	6+
6. How many times did a student make up something about you to make other kids not like you anymore?	0	1	2	3	4	5	6+
7. How many times did you tease a kid from your school?	0	1	2	3	4	5	6+
8. How many times did you push, shove, or hit a kid from you school?	0	1	2	3	4	5	6+
9. How many times did you call a kid from your school a bad name?	0	1	2	3	4	5	6+
10. How many times did you say that you would hit a kid from your school?	0	1	2	3	4	5	6+
11. How many times did you leave out another kid on purpose?	0	1	2	3	4	5	6+
12. How many times did you make up something about other students to make other kids not like them anymore?	0	1	2	3	4	5	6+

Adapted by Pamela Orpinas from the Aggression Scale: Orpinas & Frankowski, 2001.

### Scoring Instructions

Point values are assigned as indicated above.

Victimization Scale:

Overt aggression: Items 1–4

Relational aggression: Items 5–6

Aggression Scale:

Overt aggression: Items 7–10

Relational aggression: Items 11–12

Each point represents one instance of victimization or aggression reported by the student during the week prior to the survey. If four or more items are missing, the score cannot be computed. If three or fewer items are missing, these values are replaced by the respondent's average. Ranges for the victimization and aggression subscales are 0 to 24 and 0 to 12 for overt and relational aggression, respectively. Higher scores indicate higher levels of victimization and aggression.

**Scoring Instructions****PART I**

Physical Bullying: Items 1, 4, and 7

Verbal Bullying: Items 2, 5, and 8

Relational Bullying: Items 3, 6, and 9

**PART II**

Physical Victimization: Items 1, 4, 7, 10, and 13

Verbal Victimization: Items 2, 5, 8, 11, and 14

Relational Victimization: Items 3, 6, 9, 12, and 15

Underlying the scoring rationale of the questionnaire is a frequency and duration parameter designed to operationally define persistence over time, and it is the average occurrence of at least one incident per week during the past four weeks, expressed as a frequency of  $f \geq 4$ .

The application of the cut-off criterion at  $P + V + R \geq 4$  (P stands for physical, V for verbal, R for relational) must be considered exploratory. This criterion was chosen for its comparability to other studies in defining a magnitude of weekly occurrence.

It is also reasonable to expect that with equal weight assigned to the three types of bullying and victimization in the combined rates  $P + V + R \geq 4$  cut-off, student's responses will be pushed towards reporting less severe events, which would not have been included as bullying if the global method had been used instead.

Scores on the subscales are computed by summing the reported frequency of occurrence across subscale items. A frequency of four acts during the past four weeks is selected as the cut-off level for determining whether someone has engaged in bully perpetration or experienced bully victimization (e.g.,  $P + V + R \geq 4$ , where P stands for physical, V for verbal, and R for relational).

**School Life Survey Disclaimer:**

You may use this instrument for the purpose of conducting school surveys, prevention, intervention, and other kinds of anti-bullying work, as well as for research. The usual rules of research ethics need to be observed, and the researchers are expected to explicitly cite the source in all publications.

For the advancement of knowledge, the instrument authors would also like to receive information about studies conducted using this instrument.

The *School Life Survey* (SLS) provides a new procedure for measuring school bullying and victimization, and at this stage, it remains largely experimental in nature. Its properties, administration, and limitations are detailed in Chan's (2002) unpublished doctoral dissertation (Psychology Department, University of Hull, UK). However, it was not intended for public use, and a test manual or interpretive guide has not been compiled to assist those who might be interested in using it.

Anyone choosing to use the *School Life Survey* in its current form, therefore, assumes sole responsibilities for its use and application. Users should be familiar with the Standards for Educational and Psychological Testing (APA, 1999) and are reminded of the need to adhere to

the ethical standards pertaining to research with human participants (e.g., APA Ethical Principles of Psychologists and Code of Conduct, 2002), as well as compliance with local laws and regulations governing the use of the knowledge and data collected using the instrument.

The precautions and ethical issues in relation to conducting non-anonymous surveys were addressed in Chan's original unpublished doctoral dissertation:

Chan, H. F. J. (2002). *The School Life Survey – A new instrument for measuring bullying and victimization*. Unpublished doctoral dissertation, University of Hull, UK.

Some of these issues and ethical dilemmas were discussed in the following article:

Section C: Bully and Victim Scales

## C12. School Relationships Questionnaire

Age: \_\_\_ \_\_\_

Gender: male / female

ID number: \_\_\_ \_\_\_ \_\_\_

School: \_\_\_\_\_

This questionnaire asks about your relationships with other pupils at school. All of the questions refer to experiences you have had **since the start of this school year** (i.e., since the end of the summer holidays in September). Please answer all of the questions as honestly as possible.

If you have any queries, please raise your hand and ask. If at any point you do not wish to continue with the questionnaire, please stop.

This questionnaire is **completely confidential and anonymous**. The information that you give will not be seen by any other pupils or teachers. You will **not** be asked for your name, or anybody else's.

### Section 1. Direct Aggression Received

This section asks you about any bullying behavior that you have received.

We would like to find out about any bullying behavior that may have happened to you **since the start of this school year** (i.e., since the end of the summer holidays in September).

Please answer the following questions as honestly as possible.

#### What has happened to you since the start of this school year?

Please circle the answer that best fits your experience. For example:  yes    no

a. Have you ever had personal belongings taken?    yes    no

If yes, how often has this happened?

Not very often  
(1-3 times)

Often  
(more than 4 times)

Very often  
(at least once a week)

b. Have you been threatened / blackmailed?    yes    no

If yes, how often has this happened?

Not very often  
(1-3 times)

Often  
(more than 4 times)

Very often  
(at least once a week)

c. Have you been hit or beaten up?    yes    no

If yes, how often has this happened?

Not very often  
(1-3 times)

Often

### Scoring Instructions

The SRQ is subdivided into four sections: “Direct Aggression Received,” “Verbal & Relational Aggression Received,” “Direct Aggression Given,” and “Verbal & Relational Aggression Given.” The SRQ allows the classification of four roles for both direct (physical) and relational bullying: (1) “pure bully” (perpetrator of aggressive acts only), (2) “pure victim” (receiver of aggressive acts), (3) “bully/victim” (both perpetrator and receiver), and (4) “neutral” (non-involvement in bullying or victimization).

Responses are scored 0–2 depending on how frequently the individual has been involved in a victimization or bullying situation (“not very often” = 0, “often” = 1 or “very often” = 2). Scores of 1 or 2 (often or very often) in the “Direct Aggression Received” section result in categorization as a direct victim. Scores of 1 or 2 (often or very often) in the “Direct Aggression Given” section result in categorization as a direct bully. Classification as both a direct victim and a direct bully (scores of 1 or 2, often or very often, in both the “Direct Aggression Received” and “Direct Aggression Given” sections) result in categorization as a direct bully/victim. All other subjects are categorized as direct neutrals. The same principles are applied for categorization as a relational victim, bully, bully/victim, and neutral.

**Scoring Instructions**

Points are assigned as follows:

True = 1 False = 0

Self-report

Victimization subscale: Items 2, 4, 6, 10, 14, 16, 18, 22, 24, and 30

Bully subscale: Items 8, 12, 20, 26, and 28

Perceived peer perception

Victimization subscale: Items 1, 3, 5, 9, 13, 15, 17, 21, 23, and 29

Bully subscale: Items 7, 11, 19, 25, and 27

The score for each of the four subscales is computed by summing item scores, dividing this sum by the total number of items for a given subscale, and multiplying the result by 100 (so that a percentage is obtained). Scores for each subscale range from 0 to 100, with higher scores reflecting more bullying and/or victimization.

## D1. Bully Survey

### The Bully Survey – Student Version (BYS-S)

This project is being undertaken by researchers at the University of Nebraska-Lincoln and Creighton Prep. Participation in this survey is voluntary and you may stop any time you desire.

#### Instructions:

In this survey you will be asked to respond to questions and statements about “bullies” and “bullying.”

Bullying happens when someone hurts or scares another person on purpose and the person being bullied has a hard time defending himself or herself. Usually, bullying happens over and over. Examples include the following:

- Punching, shoving, and other acts that hurt people physically
- Spreading bad rumors about people
- Keeping certain people out of a “group”
- Teasing people in a mean way
- Getting certain people to “gang up” on others

There are four parts to this survey: (A) When you were bullied by others, (B) When you saw other students getting bullied, (C) When you were a bully, and (D) Your thoughts about bullying.

### The Bully Survey - Part A

In this part, you will be asked about times when you were bullied.

**REMEMBER:** Bullying happens when someone hurts or scares another person on purpose and the person being bullied has a hard time defending himself or herself. Usually, bullying happens over and over.

- Punching, shoving, and other acts that hurt people physically
- Spreading bad rumors about people
- Keeping certain people out of a “group”
- Teasing people in a mean way
- Getting certain people to “gang up” on others

#### Have you been bullied this school year?

- Yes     No

#### IF YES, how often have you been bullied? (Check one)

- one or more times a day,     one or more times a week,     one or more times a month.

If you have not been bullied this year, you may move on to Part B.

### Scoring Instructions

Points are assigned as follows:

Never happened = 0

Rarely happened = 1

Sometimes happened = 2

Often happened = 3

Always happened = 4

To assess being bullied, use Items 2a–k in Part A.

To assess being a bystander, use items 2a–k in Part B.

To assess bullying others, use items 2a–k in Part C.

Seven items assess verbal bullying and four items assess physical bullying. Scale scores are created by summing item scores. The range for each scale is 0–44.

Higher scores indicate more frequent bully-related experiences.

Although not behavioral in nature, Part D assesses attitudes toward bullying. Items are scored on a

5-point Likert-type scale (1 = “Totally false” to 5 =

“Totally true”). In Part D, items 1b, 1e, 1g, and 1j–m

are reversed scored. The range for the scale is 12–60.

Higher scores denote more pro-bullying attitudes.

### Scoring Instructions

Points are assigned as follows:

Never = 0

Once or twice = 1

A few times = 2

Many times = 3

Every day = 4

Cyberbullying Victimization Scale: Items 1–6, 9–11

Cyberbullying Offending Scale: Items 14–18

Scale score created by summing item scores. Range of the victimization scale is 0–36; range of the offending scale is 0–20. Higher values represent more involvement with cyberbullying.

## D3. Cyber-Harassment Student Survey

Thank you for participating in this survey.

School \_\_\_\_\_ Grade \_\_\_\_\_ Gender \_\_\_\_\_

Harassment occurs when a student, or several students, say mean and hurtful things or make fun of another student or call him or her mean and hurtful names, completely ignore or exclude him or her from their group of friends, or leave him or her out of things on purpose, tell lies or spread false rumors about him or her, send mean notes and try to make other students dislike him or her, and other hurtful things like that. When we talk about harassment, these things happen repeatedly, and it is difficult for the student being harassed to defend himself or herself. We also call it harassment when a student is teased repeatedly in a mean and hurtful way. But we don't call it harassment when the teasing is done in a friendly and playful way. Also, it is not harassment when two students of about equal strength or power argue or fight.

- 1. Have you heard of students using technology to harass other students (for example, the Internet, computers, cell phones, answering machines, video cameras)? If yes, what types of technology were used?**

---

---

- 2. If yes, how was the technology used? Please describe the event.**

---

---

	Never	Once/Twice	A few times	Many times	Every day
3. Have these types of harassing behaviors involving technology been directed toward you?	<input type="checkbox"/>				
4. If yes, how have you been impacted? (Check One)	<input type="checkbox"/>				
a. I felt sad and hurt.	<input type="checkbox"/>				
b. I felt angry.	<input type="checkbox"/>				
c. I felt embarrassed.	<input type="checkbox"/>				
d. I felt afraid.	<input type="checkbox"/>				
e. I felt anxious.	<input type="checkbox"/>				
f. I missed school because of it.	<input type="checkbox"/>				
g. I cried.	<input type="checkbox"/>				
h. I had difficulty concentrating.	<input type="checkbox"/>				
i. My marks have dropped because of it.	<input type="checkbox"/>				
j. I blame myself.	<input type="checkbox"/>				
5. Do the people who harassed you by using technology also harass you in other way (not using technology)?	<input type="checkbox"/>				
6. Do you ever use technology to harass others?	<input type="checkbox"/>

**Scoring Instructions**

Point values are assigned as indicated above. Items 1–3, 5, and 6 are treated individually and responses are examined descriptively. Responses to Item 1 may need to be categorized. The developers used the following general categories: computer, cell phone, voicemail/answering machine, and video camera. The computer category was further subdivided based on means of cyber-harassment (e.g., via email or instant messaging, chat rooms, web pages, etc.). Higher scores indicate more awareness of or experience with cyber-bullying.

The emotional/behavioral impact items can be summed together for an overall impact scale score or by type, yielding an emotional impact score (sum of 7 emotion items) and a behavioral impact score (sum of 3 behavior items). High scores indicate greater impact as a result of cyber-bullying.

### Scoring Instructions

Point values are assigned as indicated above. Items are scored by domain (school, community, family) and by whether violence is direct or vicarious. More specific timeframes can be used with this measure (e.g., past 30 days, past 3 months, past 6 months). Higher scores reflect more bullying experiences.

## D6. Participant Role Questionnaire

Students were told to fill out the questionnaire based on their evaluations of other student's behavior (this is a peer-nomination instrument). Students were provided with the following definition of bullying:

*“One child being exposed repeatedly to harassment and attacks from one or several other children; harassment and attacks may be, for example, shoving or hitting the other one, calling names or making jokes of him/her, leaving him/her outside the group, taking his/her things, or any other behavior meant to hurt the other one.”*

The name of each student in the class is printed on the questionnaire. Respondents are asked to determine, on a 3-point scale (never, sometimes, often), how often each of their classmates behaves in the ways described.

The Bully Scale	Never	Sometimes	Often
1. Starts bullying	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Makes the others join in.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Always finds new ways of harassing the victim	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The Assistant Scale	Never	Sometimes	Often
1. Joins in the bullying, when someone else has started it	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Assists the bully.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Helps the bully, maybe by catching the victim	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The Reinforcer Scale	Never	Sometimes	Often
1. Comes around to see the situation.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Laughs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Incites the bully by shouting or saying: "Show him/her!"	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The Defender Scale	Never	Sometimes	Often
1. Comforts the victim or encourages him/her to tell the teacher about the bullying	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Tells the others to stop bullying	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Tries to make the others stop bullying	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The Outsider Scale	Never	Sometimes	Often
1. Is not usually present in bullying situations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Stays outside the situation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Doesn't take sides with anyone	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Scoring Instructions

Points are assigned as follows:

Never = 0, Sometimes = 1, Often = 2

Scale scores are computed by summing items ratings on each scale and dividing by the number of evaluators (i.e., the number of classmates present), producing a continuous score from 0.00 to 2.00 for each student on each scale.

## D7. Peer Estimated Conflict Behavior Inventory

### AN INVENTORY FOR THE MEASUREMENT OF CONFLICT BEHAVIOR IN SCHOOL CHILDREN

The purpose of this inventory is to find out what children do when they have problems with or get angry with other pupils in their class. We hope that you will, as honestly as possible, tell exactly how you and your friends act in such situations.

There are no right or wrong answers to these questions. You should only answer what you think is right.

The answers are secret. Nobody except for the researchers (no teachers or anybody else!) will ever know how you answered these questions.

Please answer all the questions carefully, still quickly. Use the first choice that comes to your mind; do not think too long.

Thank you for helping us

Country \_\_\_\_\_ School \_\_\_\_\_

City \_\_\_\_\_ Class and grade \_\_\_\_\_

Your first name \_\_\_\_\_

*(if there is somebody else in your class with the same first name, write the first letter of your last name, too)*

Mark the right alternative.

**1. Are you:**

- a girl  
 a boy

**2. How old are you?** \_\_\_\_\_ years old.

**3. How tall are you?** \_\_\_\_\_ cm/ft. in.

**4. How much do you weigh?** \_\_\_\_\_ kg/lbs.

**5. Do you like going to school?**

- very much  
 fairly much  
 sometimes  
 I don't really like it  
 I really hate school

On the following pages, tell us how each of your classmates act when he/she has problems with or gets angry with another classmate.

Answer the questions on the following pages by marking the alternative which seems to tell about how each boy or girl in the class behaves in the closest way.

Please remember to mark for each one of your classmates, even those who may be away today.

**Physical Aggression:** *Who is physically aggressive, that is, who hits, kicks, trips, shoves, or pushes others?*

### Scoring Instructions

Points are assigned as follows:

Never = 0                  Seldom = 1  
 Sometimes = 2        Quite Often = 3  
 Very Often = 4

As a peer-nomination measure, the names of **all** students in the class should be listed in the first column on each table. Respondent data for fellow classmates are considered peer-estimated data, while data about him/herself are considered self-estimations.

Peer-estimated scores are computed by calculating the mean rating for each student: the sum of the *peer-nomination* ratings for each respondent (a respondent's self-estimation should be excluded when computing these scores) divided by the total number of respondents present, minus one (the child him/herself). Higher scores in each section indicate more experience with construct being assessed in that section.

## D8. Student School Survey

### WELCOME TO THE SURVEY!

We really appreciate your help. This survey is a series of statements allowing you to tell us how you think and feel about things in your school. Remember: we are only asking for what you think, not what other people think. There are no right and wrong answers, so please choose the answer that best tells us how you think or feel about each statement. If you do not wish to respond to the question, please choose the “pass” option.

**MY SCHOOL** *Think about how strongly you disagree or agree with the following statements about your school.*

*Mark the answer that best shows us what you feel based on your experience since this past year.*

	Really Disagree	Disagree	Agree	Really Agree	Pass
1. Students in my school can be trusted.	<input type="checkbox"/>				
2. Students in my school generally get along with each other.	<input type="checkbox"/>				
3. Students in my school generally feel the same way about things.	<input type="checkbox"/>				
4. Teachers and staff in my school can be trusted.	<input type="checkbox"/>				
5. Teachers and staff in my school usually get along with students.	<input type="checkbox"/>				
6. Teachers and staff in my school generally feel the same way about things.	<input type="checkbox"/>				
7. This is a pretty close-knit school where everyone looks out for each other.	<input type="checkbox"/>				
8. My teachers respect me.	<input type="checkbox"/>				
9. My teachers are fair.	<input type="checkbox"/>				
10. Teachers in my school are nice people.	<input type="checkbox"/>				
11. When students break rules at my school, they are treated fairly.	<input type="checkbox"/>				
12. The principal asks students about their ideas at my school.	<input type="checkbox"/>				
13. My school is a good place to be.	<input type="checkbox"/>				
14. I feel like I belong at my school.	<input type="checkbox"/>				
15. My school is important to me.	<input type="checkbox"/>				
16. Teachers and staff at my school are doing the right things to prevent bullying.	<input type="checkbox"/>				

**HOW BIG A PROBLEM** *Think about whether the following things are problems at your school. Mark the answer that shows how big of a problem you think they have been since this past year.*

How much of a problem is:	A Huge Problem	A Pretty Big Problem	Sort of a Problem	Not at All	Pass
17. Students picking fights with other students.	<input type="checkbox"/>				
18. Students who push, shove, or trip weaker students.	<input type="checkbox"/>				
19. Students who hurt or threaten to hurt teachers or adults at school.	<input type="checkbox"/>				
20. Students teasing, spreading rumors and lies, or saying mean things to other students.	<input type="checkbox"/>				
21. Students saying mean things about teachers to make them feel bad.	<input type="checkbox"/>				
22. Students telling lies or making fun of other students using the Internet (email, instant messaging, cell phone text messaging, or websites).	<input type="checkbox"/>				

**GETTING ALONG WITH OTHERS** *Think about how many times each of the following things has happened in over the past year. Mark how often these things have happened since this past year.*

First, think about things you might have done.	A Lot	Several Times	Once or Twice	Never	Pass
23. I pushed, shoved, tripped, or picked fights with students who I know are weaker than me.	<input type="checkbox"/>				
24. I teased or said mean things to certain students.	<input type="checkbox"/>				
25. I spread rumors about some students.	<input type="checkbox"/>				
26. I told lies or made fun of some students using the Internet (email, instant messaging, cell phone text messaging, or websites).	<input type="checkbox"/>				
27. I encouraged students to push, shove, or trip weaker students.	<input type="checkbox"/>				
28. I cheered when someone was beating up another student.	<input type="checkbox"/>				
29. I joined in when students were teasing and being mean to certain students.	<input type="checkbox"/>				
30. I joined in when students told lies about other students.	<input type="checkbox"/>				
31. I stood by and watched other students getting hit, pushed, shoved, or tripped.	<input type="checkbox"/>				
32. I ignored rumors or lies that I heard about other students.	<input type="checkbox"/>				
33. I tried to defend the students who always get pushed or shoved around.	<input type="checkbox"/>				
34. I asked an adult to help someone who was getting teased, pushed, or shoved around by other students.	<input type="checkbox"/>				
Now, think about things that might have happened to you.	A Lot	Several Times	Once or Twice	Never	Pass
35. A particular student or group of students pushed, shoved, tripped, or picked fights with me.	<input type="checkbox"/>				
36. A particular student or group of students teased and said mean things to me.	<input type="checkbox"/>				
37. A particular student or group of students spread rumors or made fun of me.	<input type="checkbox"/>				
38. A student or group of students told lies or made fun of me using the Internet (email, instant messaging, cell phone text messaging, or websites).	<input type="checkbox"/>				

**ABOUT ME AND OTHERS** *Now, think about students your age (not just your closest friends) since this past year. Mark how true each of the following statements are for you.*

Students my age:	No, Not at All	A Little	Pretty Much	Yes, Completely	Pass
39. Really care about what happens to me.	<input type="checkbox"/>				
40. Are there for me whenever I need help.	<input type="checkbox"/>				
41. Can be trusted a lot.	<input type="checkbox"/>				
42. Care about my feelings.	<input type="checkbox"/>				
43. Only think about themselves.	<input type="checkbox"/>				
44. Think bad things about me.	<input type="checkbox"/>				

**ABOUT ME AND OTHERS** Now, think about your opinion of yourself since this past year. Mark whether or not you agree or disagree with each of the statements below.

	Really Disagree	Disagree	Agree	Really Agree	Pass
45. I feel I am just as good as other students.	<input type="checkbox"/>				
46. I feel there are lots of good things about me.	<input type="checkbox"/>				
47. All in all, I feel like a failure.	<input type="checkbox"/>				
48. I am able to do things as well as most other people.	<input type="checkbox"/>				
49. I feel I do not have much to be proud of.	<input type="checkbox"/>				
50. I take a positive attitude toward myself.	<input type="checkbox"/>				
51. I wish I could have more respect for myself.	<input type="checkbox"/>				
52. I certainly feel useless at times.	<input type="checkbox"/>				

**WRONG AND RIGHT** Now think about whether the following actions are *WRONG* or *OK* for students your age based on your experience since this past year. Mark whether you think the actions are really wrong, sort of wrong, sort of OK, or perfectly OK.

Is it Wrong or OK when ...	Really Wrong	Sort of Wrong	Sort of OK	Perfectly OK	Pass
53. Students tease weaker students in front of others.	<input type="checkbox"/>				
54. Students spread rumors and lies about other students behind their back.	<input type="checkbox"/>				
55. Students tell lies or make fun of less popular students using the Internet (email, instant messaging, cell phone text messaging, or websites).	<input type="checkbox"/>				
56. Students push, shove, or pick fights with weaker students.	<input type="checkbox"/>				
57. Students encourage others to fight weaker students and cheer them on.	<input type="checkbox"/>				
58. Students encourage others to be mean and spread lies about less popular students.	<input type="checkbox"/>				
59. Students ignore it when someone weaker is being pushed around.	<input type="checkbox"/>				
60. Students defend others who are being shoved around by stronger students.	<input type="checkbox"/>				
61. Students go to the teacher or an adult for help when someone is getting beaten up.	<input type="checkbox"/>				
62. Students go to the teacher or an adult for help when others are spreading rumors and lies about someone.	<input type="checkbox"/>				

**SITUATIONS** Think about what most *STUDENTS* in your *SCHOOL* would do in the following situations since this past year. Could *MOST STUDENTS IN YOUR SCHOOL* be counted on to stop what is happening?

STUDENTS in your school would help out if:	Never	Sometimes	Most of the Time	Always	Pass
63. A student is making fun of and teasing another student who is obviously weaker.	<input type="checkbox"/>				
64. A student is spreading rumors and lies about another student behind their back.	<input type="checkbox"/>				
65. A student in my school is telling lies or making fun of another student who gets picked on a lot using the Internet (email, instant messaging, cell phone text messaging, or websites).	<input type="checkbox"/>				
66. A student or group of students is pushing, shoving, or trying to pick a fight with a weaker student.	<input type="checkbox"/>				

**SITUATIONS** Now think about what **TEACHERS** and **STAFF** at school would do in the following situations since this past year. Could **TEACHERS AND STAFF AT YOUR SCHOOL** be counted on to stop what is happening?

<b>TEACHERS and STAFF in your school would help out if:</b>	<b>Never</b>	<b>Sometimes</b>	<b>Most of the Time</b>	<b>Always</b>	<b>Pass</b>
67. A student is making fun of and teasing another student who is obviously weaker.	<input type="checkbox"/>				
68. A student is spreading rumors and lies about another student behind their back.	<input type="checkbox"/>				
69. A student in your school is telling lies or making fun of another student who gets picked on a lot using the Internet (email, instant messaging, cell phone text messaging, or websites).	<input type="checkbox"/>				
70. A student or group of students is pushing, shoving, or trying to pick a fight with a weaker student.	<input type="checkbox"/>

### Scoring Instructions

The Student School Survey employs several response alternatives. Researchers are encouraged to assign item scores as appropriate. Scale scores (see scale items below) can be computed either additively or as mean scores. They can also be treated as weighted factor scores.

#### Individual Scales

Social cohesion and trust: Items 1–7

School climate: Items 8–16

Perceived problem of bullying at school: Items 17–22

Bully perpetration: Items 23–26

Bully bystander behavior: Items 27–34

Bully victimization: Items 35–38

Perceived peer support: Items 39–44

Self-esteem: Items 45–52

Moral approval of bullying: Items 53–62

Informal social control: Items 63–70
