# ACIP Recommendations Process

- Research evidence is systematically collected, and *Grading of Recommendations Assessment, Development and Evaluation* (GRADE) is used to develop evidence-based recommendations.
- Key factors for developing recommendations include the balance of benefits and harms, type or quality of evidence, values and preferences, and health economic analyses.
- The ACIP GRADE recommendation categories are –
  - Category A: Recommendation that applies to all persons in an age- or risk-based group.
  - Category B: Recommendation for individual clinical decision making.
  - No recommendation/unresolved issue.

# Affordable Care Act

- ACIP recommendations become policy following approval by CDC Director and MMWR publication
- The Affordable Care Act (ACA) was enacted in 2010 and requires private insurance coverage for immunizations included in the approved immunization schedules without copays/deductibles when provided by an in-network provider
- Health plans have one plan year from MMWR publication to implement recommendations according to CDC Immunization schedules (graphics and footnotes)
