

## ***Health Services Reports to Resume The Title, Public Health Reports***

Beginning with the issue of July–August 1974, *Health Services Reports* will resume its former title, *Public Health Reports*. Resumption of the name *Public Health Reports* will also mark another change. The journal will be published by the Health Resources Administration on a bimonthly basis.

Under the aegis of the Health Resources Administration, the journal will be able to take advantage of HRA's emphases on the research, statistical, resource development, and planning functions in the health field. *Public Health Reports* will continue its 96-year-old tradition of publishing significant papers that are concerned with the broad responsibilities of the Public Health Service. The staff will seek papers describing important research and will report on new policies and initiatives in the field of public health.

*Cover:* Student from Mount Sinai School of Medicine examines a patient under the supervision of his field preceptor (not shown), a HIP medical group partner. Under a joint program of the medical school and HIP, students learn how a health maintenance organization functions. See pages 219–229 for reports on the program and students' perspectives on their experiences.

# Information for Contributors to Health Services Reports

HEALTH SERVICES REPORTS, formerly PUBLIC HEALTH REPORTS, published by the Health Services Administration, welcomes from any source contributions of value to public health, health and medical care, and community medicine.

We are particularly interested in publishing scientific papers concerned with the delivery of health services and with the many facets of health care, as well as technical reports documenting studies and research efforts. We also seek papers on new programs, new projects, and new ideas, even when they are experimental in nature. We want to record the current happenings in the health field.

Our readers are practicing public health officials, community health practitioners, faculty and students in colleges where the health disciplines are taught, and workers in research institutions, hospitals, and community health organizations.

Manuscripts are reviewed with the understanding that they have not been committed elsewhere for publication. Appropriate information should be supplied if a paper has been given or is prepared for presentation at a meeting.

*Tearsheets.* In lieu of reprints, senior authors are provided with 50 to 100 sets of tearsheets after publication. Associate authors receive a smaller number.

*Manuscript form.* Authors will facilitate review if they submit four copies of their manuscripts. All copy should be typed double-spaced, and each page should end with a completed paragraph. Each chart and table should be placed on a separate sheet of paper. References should follow

the style used by HEALTH SERVICES REPORTS. Footnotes should be worked into the text.

Authors are expected to recognize scientific contributions by those who have assisted them only if such contributions warrant mention in the text or in the paragraph identifying the authors. It is not the policy of HEALTH SERVICES REPORTS to publish acknowledgements. More detailed instructions for potential contributors will be supplied on request.

*Manuscript review.* Most manuscripts submitted for publication are reviewed by technical experts, and authors are given the benefit of their comments before type is set. Authors also receive edited typescripts and galley proofs for approval. Authors are responsible for the accuracy and validity of all material, including tables, charts, and references.

HEALTH SERVICES REPORTS publishes a synopsis, in lieu of a summary, of most technical reports. Authors are requested to submit with appropriate papers a synopsis of approximately 250 words. The staff will supply on request information on the preparation of synopses.

*Bound copies.* Librarians and others should preserve their copies for binding, as the journal does not supply bound copies. Indexes are published each year in the December issue.
