# Public Pealth Reports.

(Formerly "Abstract of Sanitary Reports.")

Treasury Department, United States Marine-Hospital Service. Published in accordance with act of Congress approved February 15, 1893.

Vol. XI.

Washington, D. C., October 23, 1896.

No. 43.

# UNITED STATES.

Department order relative to entry at Apalachicola of vessels from Cuban ports.

WASHINGTON, D. C., October 14, 1896.

Refuse entry to all vessels from Cuban ports unless provided with quarantine certificate from quarantine officer at Pensacola, Tampa Bay, Tortugas, Fernandina, Brunswick, or South Atlantic quarantine. Notify Apalachicola authorities of this order and deputy collector at Carrabelle. See Quarantine Regulations, page 25, article 2, paragraph 2; also page 29, article 8. This action is necessary because it is learned that vessels from yellow fever infected ports are being admitted without the required disinfection and contrary to regulations.

CHARLES S. HAMLIN,

Acting Secretary.

COLLECTOR OF CUSTOMS, Apalachicola, Fla.

 $[Reports \ to \ the \ Supervising \ Surgeon-General \ United \ States \ Marine-Hospital \ Service.]$ 

Report of transactions at San Francisco quarantine.

ANGEL ISLAND, CAL., October 6, 1896.

SIR: I have the honor to report that, during the month of September, 451 Chinese steerage passengers were quarantined, all of whom were bathed and their clothing and baggage disinfected.

The bills of health from the Orient still indicate the presence of plague in China and relapsing fever, cholera, and smallpox in Japan.

Very respectfully.

M. J. ROSENAU,

tfully, M. J. ROSENAU,
Passed Assistant Surgeon, U. S. M. H. S.

(979)

## Reports of States and yearly and monthly reports of cities.

CALIFORNIA.—Month of September, 1896. Reports to the State board of health, Sacramento, from 46 cities, towns, and villages, having an aggregate population of 728,714, show a mortality of 805, including phthisis pulmonalis, 156; diphtheria, 3; enteric fever, 21, and measles, 1.

Los Angeles.—Month of September, 1896. Estimated population, 100,000. Total deaths, 98, including diphtheria, 1; enteric fever, 3, and phthisis pulmonalis, 21.

Oakland.—Month of September, 1896. Estimated population, 60,000. Total deaths, 54, including enteric fever, 2; whooping cough, 1, and phthisis pulmonalis, 12.

Sacramento.—Month of September, 1896. Estimated population, 30,000. Total deaths, 40, including 6 from phthisis pulmonalis.

San Francisco.—Month of September, 1896. Estimated population, 330,000. Total deaths, 466, including enteric fever, 7; whooping cough, 2, and phthisis pulmonalis, 90.

CONNECTICUT.—Month of September, 1896. Reports to the State board of health from 164 cities, towns, and villages, having an aggregate population of 850,290, show a total of 1,188 deaths, including measles, 3; scarlet fever, 10; diphtheria and croup, 39; enteric fever, 34, and whooping cough, 5.

IOWA—Boone.—Month of August, 1896. Estimated population, 8,845. Total deaths, 5. No deaths from contagious diseases.

Cedar Rapids.—Month of August, 1896. Estimated population, 21,555. Total deaths, 17. No deaths reported from contagious diseases.

Council Bluffs.—Month of August, 1896. Estimated population, 20,189. Total deaths, 13. No deaths reported from contagious diseases.

Davenport.—Month of August, 1896. Estimated population, 31,484. Total deaths, 44, including whooping cough, 2, and phthisis pulmonalis, 4.

Month of September, 1896. Total deaths, 27, including whooping cough, 1, and phthisis pulmonalis, 3.

Dubuque.—Month of August, 1896. Estimated population, 40,000. Total deaths, 34, including diphtheria, 1; enteric fever, 2, and phthisis pulmonalis, 5.

Eldora.—Month of August, 1896. Estimated population, 1,900. One death from noncontagious disease.

Fort Dodge.—Month of August, 1896. Estimated population, 8,000. Total deaths, 11, including phthisis pulmonalis, 1.

Oskaloosa.—Month of August, 1896. Estimated population, 8,500. Total deaths, 3, including 1 from phthisis pulmonalis.

MARYLAND—Baltimore.—Month of September, 1896. Estimated population, 506,398. Total deaths, 767, including diphtheria, 20; scarlet fever, 1; enteric fever, 29; measles, 1; whooping cough, 4, and phthisis pulmonalis, 93.

pulmonalis.

MASSACHUSETTS—Brockton.—Month of September, 1896. Estimated population, 33,165. Total deaths, 26, including 2 from phthisis pulmonalis.

Fitchburg.—Month of September, 1896. Estimated population, 26,409. Total deaths, 28, including enteric fever, 1, and phthisis pulmonalis, 5. North Attleboro.—Month of September, 1896. Estimated population, 6,727. Total deaths, 13, including 1 from diphtheria and 2 from phthisis

Worcester.—Month of September, 1896. Estimated population, 102,000. Total deaths, 141, including 20 from phthisis pulmonalis.

MICHIGAN.—Reports to the State board of health, Lansing, from 71 observers throughout the State, indicate that during the week ended October 10 inflammation of the bowels, pleuritis, neuralgia, and dysentery increased, and intermittent fever and inflammation of kidney decreased in area of prevalence. Phthisis pulmonalis was reported present at 228 places, enteric fever at 79, diphtheria at 38, scarlet fever at 26, whooping cough at 15, and measles at 7 places.

MINNESOTA—Minneapolis.—Month of September, 1896. Estimated population, 225,602. Total deaths, 131, including diphtheria, 18; scarlet fever, 1; enteric fever, 7; whooping cough, 1, and phthisis pulmonalis, 9.

St. Paul.—Month of September, 1896. Estimated population, 215,000. Total deaths, 115, including diphtheria, 4; membranous croup, 2, and phthisis pulmonalis, 17.

NEW JERSEY—Hudson County.—Month of September, 1896. Estimated population, 338,671. Total deaths, 410, including scarlet fever, 2; diphtheria and croup, 21; enteric fever, 7; whooping cough, 13, and phthisis pulmonalis, 39.

OHIO—Cleveland.—Month of September, 1896. Estimated population, 330,279. Total deaths, 360, including enteric fever, 16; scarlet fever, 1; diphtheria, 12, and phthisis pulmonalis, 28.

RHODE ISLAND—Newport.—Month of September, 1896. Estimated population, 21,500. Total deaths, 36, including enteric fever, 3; whooping cough, 2, and phthisis pulmonalis, 2.

Washington—Seattle.—Month of September, 1896. Estimated population, 60,000. Total deaths, 32, including enteric fever, 2, and phthisis pulmonalis, 2.

# Sanitary reports from Rio de Janeiro.

RIO DE JANEIRO, September 15, 1896.

SIR: I have the honor to transmit the report for the week ended

September 12, 1896:

There were 6 deaths from accesso pernicioso, an increase of 2; 3 from yellow fever, none in the foregoing week; 2 from smallpox, an increase of 1; 1 from beriberi, a decrease of 1; 2 from whooping cough, none in the foregoing week; 43 from tuberculosis, an increase of 4, and none from influenza, 1 in the foregoing week. From all causes there were 264 deaths, an increase of 42. With the incoming hot season we may expect an increase in the mortality rates, especially as the winter has been unusually mild and moist.

Since last report the following-named ships have been visited or received bills of health from this office: September 9, steamship Salerno, German, for New York, N. Y.; steamship Yarrowdale, British, for Galveston, Tex.; ship Parthenope, British, for Norfolk, Va.; barkentine, James W. Elwell, American, for Barbados, West Indies; steamship Velleda, British, for Galveston, Tex., and bark Virginia, American, for Pensacola, Fla. September 11, steamship Lassell, British, for New York, N. Y. September 12, steamship Freshfield, British, for New Orleans, La.; bark Inverurie, British, for New York; steamship Niagara, British for Galveston, Tex., and steamship Carib Prince, British, for New York from Santos.

Respectfully, yours,

R. CLEARY, M. D., Sanitary Inspector, U. S. M. H. S.

RIO DE JANEIRO, September 22, 1896.

SIR: I have the honor to transmit the report for the week ended

September 19, 1896.

There were 3 deaths from accesso pernicioso, a decrease of 3; none (nor cases) of yellow fever; 3 from smallpox, an increase of 1; 2 from beriberi, a decrease of 1; 5 from enteric fever, an increase of 2; 1 from measles, none in the foregoing week; none from whooping cough, 2 in the former week; 53 from tuberculosis, an increase of 10, and 258 from all causes, a decrease of 6.

This is the first week in the year without either a case or a death from

yellow fever. The health of the town and port is good.

Since last report the following-named ships have been inspected or received bills of health from this office: September 15, ship Bellona, British, for Ship Island, Miss.; schooner Katie J. Iselan, American, for Barbados. West Indies. and shipentine Kate Thomas, British, for Portland, Oreg. September 16, bark C. P. Dixon, American, for Barbados; September 17, ship Pengwern, British, for Portland, Oreg., and steamship Entre Rios, French, for New Orleans. September 18, bark Serapis, Danish, for Apalachicola, Fla. September 19, steamship Hevelius, Belgian, for New York, N. Y., and barkentine Grace Lynwood, American, for Barbados, West Indies. September 21, steamship Samoa, British, for New Orleans, La.; steamship Monrovia, British, for New Orleans, La.; steamship Monrovia, British, for New Orleans, La.; steamship Monrovia, British, for Galveston, Tex., and ship Rosa Alegreto, Spanish, for Brunswick, Ga. September 22, bark Gurla, Swedish, for Tybee Roads, Ga.

Respectfully, yours,

R. CLEARY, M. D., Sanitary Inspector, U. S. M. H. S. 995

#### October 23, 1896

#### CANADA.

# Bacteriological diagnosis of typhoid fever.

COATICOOK, CANADA, October 12, 1896.

SIR: I have the honor to communicate the following, relating to the matter of typhoid fever, viz: The board of health of the Province of Quebec have just issued a circular to the medical profession offering to make serum-diagnosis of typhoid fever, free of charge. The offer is made to test the practical utility of the method proposed to be conducted under the direction of Dr. Wyatt Johnson, bacteriologist of the board. Physicians are requested to submit samples of dried blood of patients in sterilized paper (furnished gratis by the board). A report is communicated by telephone at 2 P. M. following the day upon which the sample is received. A copy of the circular has been requested which will be forwarded if the same can be obtained.

I am, sir, your obedient servant,

J. LINSLEY, United States Consul.

#### CUBA.

Smallpox and yellow fever in Cuban seaports.

The United States consul at Cardenas reports 2 deaths from yellow fever during the week ended October 10.

The United States consul at Matanzas reports 14 deaths from yellow fever during the week ended October 7.

Under date of October 6 the United States consul at Cienfuegos reports that during the week ended October 11 there were in that city 15 deaths from yellow fever and 5 from smallpox.

The United States sanitary inspector at Santiago de Cuba reports 32 deaths from yellow fever and 31 deaths from smallpox, during the 3 weeks ended October 10.

The United States sanitary inspector at Habana reports 195 cases of yellow fever, with 65 deaths, during the week ended October 15.

# HABANA, CUBA, October 17, 1896.

SIR: In the following mortuary report which I have the honor of forwarding you to-day, it will be seen that yellow fever does not exist to any great extent among civilians in this city, which circumstance is probably owing to the fact that but few of such persons have come here during the past year who are liable to have it. But that disease continues with all its malignancy and perhaps in increasing numbers among the Spanish soldiers. The statistics of the many military hospitals in the neighborhood of Habana, that is to say within a radius of 25 miles or so, and in which there are more or less cases of yellow fever, can not at present be obtained, if ever.

I am informed that the government here has appropriated and is already using for hospital purposes the extensive "Almacenes," or sugar storehouses of Regla, which structures it will be remembered are situated contiguous to the wharf on the opposite side of the harbor from

October 23, 1896 996

this city. This measure, of course, will infect those buildings and possibly such sugar as may or will be stored in them.

Smallpox here is now limited almost entirely to civilians, as the Spanish troops are now supposed to be vaccinated either before leaving

Spain or on their way here.

Mortuary report: During the week ended October 15, there were 238 deaths in this city from all diseases. Sixty-five of those deaths were caused by yellow fever, with approximately 195 new cases; 23 were caused by smallpox, with 160 new cases approximately; 13 were caused by enteric fever, 8 by so-called pernicious fever, 5 by paludal fever, 7 by dysentery, 9 by enteritis, 1 by glanders, 1 by the grippe, 1 by pneumonia, and 26 by tuberculosis.

Sixty-one of the 65 deaths from yellow fever during the week were among Spanish soldiers in the military hospitals, while the remaining

4 deaths from that disease were among civilians in the city.

All of the deaths from smallpox were among civilians in poor circumstances.

Very respectfully,

D. M. BURGESS, Sanitary Inspector, U. S. M. H. S.

# SANTIAGO DE CUBA, September 26, 1896.

SIR: I have the honor to inform you that the sanitary condition of Santiago de Cuba during the week ended September 26 is not so favorable as that of the week before. The deaths have increased again, the records giving 100 against 74 last week. Yellow fever has caused 14 deaths, smallpox 13, remittent fever 12, tuberculosis 10, enterocolitis 15, pernicious fever 8; the rest from common diseases, both acute and chronic, of noncontagious character.

The terrible heat of the last few days, allied to the agglomeration of the poor in hovels and houses too small to contain them, keep up the unhealthy condition of the city, world renowned for the total absence

of hygienic measures to preserve the health of its inhabitants.

I am happy to inform you that Dr. P. H. Hyatt, the American consul, has again taken charge of the United States consulate, and, although not feeling quite well or strong, manages to get through its arduous duties.

# SANTIAGO DE CUBA, October 3, 1896.

SIR: I have the honor to inform you that there have been 69 deaths during the week ended this Saturday, October 3. Of these, 6 were from yellow fever, 8 from smallpox, 2 from tuberculosis, 3 from pernicious fever, 7 from diarrhea, 1 from typhomalarial fever, 3 from remittent

fever, and the rest from noncontagious diseases.

The sanitary condition of Santiago has become better owing to heavy rainfalls and to a cooler temperature, also to the absence of great bodies of troops gone into active operations to the seat of war. Smallpox, as I have reported before, is gradually dying out from want of material for the disease to work on. Yellow fever prevails among the unacclimated soldiers to a large extent. Malarial fevers are very common, especially among children under the form of typhomalaria.

# SANTIAGO DE CUBA, October 10, 1896.

SIR: I have the honor of submitting the following report on the sanitary condition of Santiago de Cuba for the week ended October 10: Seventy-eight deaths have been reported for this period, of which 12 were from yellow fever, 6 from smallpox, 3 from typhomalarial fever,

7 from remittent fever, 5 from tuberculosis, 1 from dysentery, 3 from diarrhea, and the rest from common affections of noncontagious character.

The smallpox epidemic is almost at an end as there are few cases now under treatment and no new invasions are reported. Yellow fever is about the same as last week. Remittent fever and typhomalaria prevail to a great extent. Diarrhea is very common.

Respectfully,

HENRY S. CAMINERO, M. D. Sanitary Inspector, U. S. M. H. S.

#### JAPAN.

Report of the prevalence of cholera, dysentery, and smallpox.

YOKOHAMA, September 23, 1896.

SIR: I have the honor to transmit herewith my usual report of infectious disease in Japan for the period September 15 to 23, inclusive. I am, sir, very respectfully, your obedient servant,

STUART ELDRIDGE, M. D., Sanitary Inspector, U. S. M. H. S.

#### PERU.

## One case of yellow fever in Callao.

Under date of September 21, 1896, the United States consul at Callao

reports as follows:

A suspicious case of fever, thought to be yellow, was reported at the hospital here. It was that of a sailor who had stopped at Guayaquil. He died last week. Season not propitious to the spread of this disease.

#### SALVADOR.

Yellow fever reported present in Salvador.

The following telegram has been received through the Department of State:

MANAGUA, NICARAGUA, October, 19, 1896.

Quarantine Salvador—yellow fever.

#### TURKEY.

#### [Report No. 160.]

Report of the United States Sanitary Commissioner.

Constantinople, September 23, 1896.

As a sequel to what I have already said in my last report I must state that a commission has been appointed in consequence of an irade or imperial order, the mission of which commission was to ascertain if the corpses of the massacred people have been buried according to the rules of hygiene and have not endangered public health. The above-mentioned commission, the members of which were mostly members of the international board of health, has visited the Armenian cemetery at Shishly, where they saw three large graves, one of which was 45 by 5 meters and nearly 2 meters deep. The two other graves were smaller, about 8 by 3 meters each, where several hundred corpses were buried.

The above mentioned commission has not visited the other Armenian

cemeteries of Constantinople, as that, for instance, of Yed-Kuléh, Has Kioi, and other places where the massacred people have been buried. In yesterday's sitting of the sanitary commission, the question whether the prison will not endanger the public health of the capital was discussed. It has been said, for instance, that the arrested Armenians are so many and so thronged in the prisons that the poor prisoners are obliged to stay on foot all the time they are in prison, being unable to lie down on account of lack of room. I will be able to state the sanitary condition of the prisons after the commission presents its report. If what has been said is true, such a condition may cause the outbreak of infectious diseases. There are already several cases of typhoid fever, but every year at this season this disease exists. What a physician can see now are frightened patients suffering from the consequences of what they saw during the massacres of the 26th and 28th of last August, when all along the streets of Galata, men armed with cudgels were striking living

men or dead bodies—a dreadful and terrific sight.

999 October 23, 1896

The sanitary news from the provinces is good. In Egypt cholera is abating, and it is to be hoped that very soon quarantine will be diminished and after a few weeks abolished. The Bulgarian Government has ordered the passengers entering Bulgaria through Mustafa Pasha and Cassova not to submit to vaccination (see my report No. 156). I forward a copy of the communication in French. I have also the honor to forward a copy printed in French with plans of the rapport de la commission des lazarets.

SPIRIDION C. ZAVITZIANO.

#### STATISTICAL REPORTS.

British Columbia—Victoria.—Three months ended September 30, 1896. Estimated population, 7,000. Total deaths, 71. No deaths reported from contagious diseases.

CUBA—Manzanillo.—Two weeks ended September 30, 1896. Estimated population, 14,000. Total deaths, 24, including scarlet fever, 3, and 6 from enteric fever.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns of England and Wales during the week ended October 3, correspond to an annual rate of 15.7 a thousand of the aggregate population, which is estimated at 10,846,971. The highest rate was recorded in Bolton, viz, 20.8, and the lowest in Leicester and Brighton, viz, 10.0 a thousand.

London.—One thousand two hundred and seventy-six deaths were registered during the week, including measles, 7; scarlet fever, 27; diphtheria, 69; whooping cough, 9; enteric fever, 13, and diarrhea and dysentery, 9. The deaths from all causes correspond to an annual rate of 15.0 a thousand. In greater London 1,647 deaths were registered, corresponding to an annual rate of 13.9 a thousand of the population. In the "outer ring" the deaths included 14 from diphtheria, 3 from scarlet fever, and 9 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended October 3 in the 16 principal town districts of Ireland was 20.0 a thousand of the population. The lowest rate was recorded in Newry, viz, 8.1, and the highest in Drogheda, viz, 30.7 a thousand. In Dublin and suburbs 135 deaths were registered, including scarlet fever, 3; enteric fever, 6, and whooping cough, 1.

Scotland.—The deaths registered in 8 principal towns during the week ended October 3 correspond to an annual rate of 17.2 a thousand of the population, which is estimated at 1,518,347. The lowest mortality was recorded in Edinburgh, viz, 14.9, and the highest in Greenock, viz, 20.2 a thousand. The aggregate number of deaths registered from all causes was 503, including measles, 10; scarlet fever, 6; diphtheria, 9, and whooping cough, 9.

JAMAICA—Kingston.—Month of September, 1896. Estimated population, 34, 314. Total deaths, 78, including enteric fever, 4, and phthisis pulmonalis, 5.
