# Writing for *Public Health Reports*

We welcome contributions that help us meet the information needs of public health professionals by describing important scientific and programmatic developments; new technologies; relevant policy issues; and current scientific debates.

In general, the journal conforms to *Uniform*

*Requirements for Manuscripts Submitted to Biomedical Journals* (Public Health Rep 1997;112:253-63), available on-line at [www.icmje.org/index.html](http://www.icmje.org/index.html).

Submit manuscripts to: Public Health Reports, JFK Federal Building, Room 1855, Boston MA 02203; tel. 617-565-1440.

## Contributions and Their Length

*Letters to the Editor.* We welcome and encourage letters; brevity is a virtue.

*News and Notes:* These are brief news items and announcements, used and rewritten at the discretion of the editors. *500-word maximum.*

*Feature articles:* Features, often solicited, present the current status of a subject area and implications for policy, practice, or future research. Include a 150-word unstructured synopsis.

*Research articles:* We seek to publish research that is fully developed and original. To avoid redundant publishing, we do not accept preliminary reports or reports of studies that are only incrementally different from previously published research. Include a structured synopsis (Objectives, Methods, Results, Conclusions) of up to 250 words.

*Practice articles:* We publish articles describing innovative public health programs and initiatives, their current status, and documented outcomes. Include a 150-word unstructured synopsis.

*Viewpoints and Commentaries:* These are short opinion pieces, often solicited, addressing contemporary public health issues. *Commentaries* are written in response to *Feature, Practice,* or *Research* articles.

*Departments:* *Overseas Observer, Public Health and the Law, Information Technology, Public Health Chronicles, Book and Film Reviews.* We welcome letters of inquiry proposing article ideas.

## Conflicts of Interest

Full disclosure and avoiding the appearance of a conflict are our guiding principles. If any financial influence or other

conflict of interest *might* have biased your work, you are obliged to disclose it to us—even if you are confident that no bias intervened. Please let us decide what should be disclosed to our readers. Similarly, you must disclose any similar or related work submitted or published elsewhere.

## Cover Letter

When submitting your manuscript, include a statement that the material has not been published nor is being considered for publication elsewhere. Please submit three copies of the text (double-spaced), tables, and figures.

## Acknowledgment of Receipt

We acknowledge each submission when it arrives.

## Peer Review

After an initial reading by our editors, we select promising contributions for peer review; these are sent to two or more external reviewers.

## The Manuscript

Here's what your manuscript should look like:

*Title Page.* (a) title (short and descriptive); (b) full names of all authors, including their graduate degrees; (c) all authors' institutional affiliations and job titles during the course of the research (and current affiliations and titles if different); (d) name, street address, telephone number, and fax number and e-mail address of corresponding author; (e) word count of the text (inclusive of references) and the number of charts/figures.

*Synopsis:* The abstract is your work's face to the world, as published in various medical indexes; a good abstract

promotes readership. Synopses of *Feature* and *Practice* articles should be a maximum of 150 words without abbreviations, symbols, or references to tables or graphs. Structured synopses of *Research* articles (*250-word maximum*) should contain four parts labeled *Objectives, Methods, Results,* and *Conclusions.* Below the abstract provide up to 10 key words (use Medical Subject Headings from *Index Medicus*).

*Text.* In writing for *PHR*, keep in mind that public health is an extremely broad field and most readers will be in parts of the field other than your own. Your introduction or lead is particularly important. Please define terms that are not universally understood and avoid the use of jargon.

*Research articles* should be divided into four sections: *Introduction, Methods, Results, Discussion.* In the *Methods* section, use active, not passive, voice and tell readers "who, what, when, where, and why." Provide a full explanation in the *Methods* section of how you arrived at each finding reported in the *Results* section.

*References.* Please consult the *Uniform Requirements* and recent issues of the journal. Citations of personal conversations or unpublished material should appear in the text. *PHR* does not use substantive footnotes.

## Copyright

Authors assign copyright to the Association of Schools of Public Health. Authors may use their own material in other publications provided *PHR* is acknowledged as the original place of publication and Oxford University Press is notified in writing and in advance.
