Cover: Old Faithful, a geyser in Yellowstone National Park, Wyoming, is probably the most famous example in the United States of geothermal energy. The shortage of fossil fuels poses new problems for health facilities and also for manufacturers of medical supplies. Three papers in this issue focus on these problems and offer possible solutions, such as the use of geothermal energy and heat recovery from solid waste Incineration.

plication to the minimum extent necessary to make a regulatory scheme work. 628 F.2d at 1054.

After reviewing the statutory framework giving rise to this lawsuit and the legislative history of the Planning Act, the Eighth Circuit Court held that an implied immunity from the antitrust laws did exist in this case. The Court reasoned that if the voluntary cooperation of Blue Cross of Kansas City with MAHSA's plan was deemed to be an antitrust violation, then a major provision of the Planning Act would be without legal effect. 628 F.2d at 1054. In view of legislative history to the contrary, the Court reasoned that it was unlikely that the Congress intended such a result. 628 F.2d at 1056-57.

#### CONCERN ABOUT SUITS

In essence, the Eighth Circuit Court's decision indicates that voluntary private action within the scope of the Planning Act (that is, planning activities not under the direct mandate of a Federal or State agency), such as the reliance of a third party payor on a regional health systems plan, may be undertaken free of antitrust limitations. This ruling comes at a time of increased concern and confusion about antitrust challenges to health planning.

Two other cases involving health planning and the doctrine of implied immunity are currently pending in the Federal courts. In one, Huron Valley Hospital, Inc. v. City of Pontiac, 477 F. Supp. 1301 (E.D. Mich. 1979), appeal docketed, No. 79-1265 (6th Cir. May 16, 1979), the antitrust action was dismissed on grounds that the doctrine of implied immunity and other legal theories insulated the health planning at issue. The other case, North Carolina v. P.T.A. Asheville, Inc., Civ. No. A-C-80-29 (W.D. N.C., filed Feb. 22, 1980), was an antitrust challenge to the defendant's efforts to acquire two hospitals, an acquisition subject to approval of the State Health Planning and Development Agency.

On January 26, 1981, the Supreme Court agreed to review the Eighth Circuit Court's decision. The justices are expected to hear arguments in April 1981.

—PETER A. PAVARINI, Attorney Advisor, Office of the General Counsel, Department of Health and Human Services.

## education notes

Occupational health courses. The Rocky Mountain Center for Occupational and Environmental Health, University of Utah, Salt Lake City, has announced that the following courses will be held in 1981: Occupational Safety and Health in Mining Industry, June 15-19; Occupational Safety and Health Law (for occupational health professionals, industrial hygienists, attorneys, physicians, and so forth), June 22-26; Occupational Health Nursing, June 22-26; Advanced Occupational Respiratory Protection, July 13-17 and October 26-30; and Industrial Hygiene Chemistry (NIOSH-National Institute of Occupational Safety and Health—No. 590), Aug. 3-7 and November 16-20.

For further information, contact Katharine C. Blosch, Director, C.E., Rocky Mountain Center for Occupational and Environmental Health, Bldg. 112, University of Utah, Salt Lake City, Utah 84112, telephone (801) 581-5710.

Course in maternal and child nutrition. The Department of Nutrition, Case Western Reserve University, Cleveland, Ohio, will offer the Fourth Annual Intensive Course in Maternal and Child Nutrition, June 14–19, 1981. Entitled "1981 Nutrition and the Quality of Life," the course will include these topics: new advances in nutrition science; techniques in nutrition assessment; and the physiology, growth, and feeding of children. The annual Helen Hunscher lecture will feature Alex Roche, MD, Fels Research Institute, known for his

work on the growth of children. Continuing education hours have been applied for.

For further information, contact Karen M. Fiedler, PhD, M & C 1981, Department of Nutrition, Case Western Reserve University, Cleveland, Ohio 44106, telephone (216) 368–2440.

Workshop on drug and alcohol use. The 23rd Annual Workshop on Drug and Alcohol Use will be held June 2-16, 1981, at Indiana University, Bloomington. Three hours of graduate credit, continuing education units, and noncredit enrollment are available. For further information, contact Dr. Ruth C. Engs, HPER 116, Health and Safety Education, Indiana University, Bloomington, Ind. 47505, telephone (812) 337-9581.

Graduate Summer Session in Epidemiology. The 1981 graduate summer session in epidemiology, sponsored by the Epidemiology Section of the American Public Health Association, the Association of Teachers of Preventive Medicine, and the American College of Preventive Medicine, will be presented at the University of Minnesota in Minneapolis through the School of Public Health, Health Sciences Center, and the Nolte Center for Continuing Education during the 3-week period June 21 to July 11, 1981.

These summer graduate sessions are designed primarily for teachers in medical schools, but postdoctoral fellows, graduate students, and residents in departments of preventive medicine and other medical school departments may qualify. Similarily teachers, postdoctoral fellows, and graduate students in schools of public health, dentistry, and veterinary medicine are eligible, as are qualified personnel of Federal, State, and local health agencies. The course is accredited (category I) for the American Medical Association Physicians Recognition Award.

In general, the summer sessions in 1981 will follow the pattern previously established. In addition to the two basic courses in Fundamentals of Epidemiology and Fundamentals of Biostatistics, several of the previously presented courses will be offered. These include Epidemiology of Infectious Diseases, Surveillance and Control of Communicable Diseases, Hospital Epidemiology and Infection Control, Epidemiology of Cancer, Epidemiology of Cardiovascular Disease, Advanced Statistical Methods in Epidemiology, Occupational Epidemiology, Clinical Trials—Design, Operation and Analysis, and the Epidemiology of Injuries. A new course on environmental epidemiology also will be offered.

A total of 1,881 students have attended the prior 15 summer sessions. Five hundred and fifty-eight students came from medical schools and, of these, 236 were from departments of preventive medicine. Departments of anatomy, biophysics, computer sciences, dermatology, epidemiology, family medicine, medical statistics, medicine, microbiology, neurology, obstetrics-gynecology, pathology, pediatrics, and psychiatry have also been represented. In addition, schools of public health, colleges of veterinary medicine, and schools of dentistry have sent postgraduate students or faculty.

Tuition for the 3-week session will be \$500. Special rates for food and lodging in dormitories have been arranged. Grants for tuition may become available, but prospective registrants should explore other sources of funding as soon as possible.

The course will be limited to 300 students, and special limits will be set on certain courses. The application deadline is May 1, 1981. A \$50 deposit, credited to tuition, should accompany applications and will constitute evidence of intent to attend. Refund of the deposit will be made if the application is not accepted or if the applicant's plans change before May 1, 1981.

Further information and application forms for the 1981 session may be obtained from Dr. Leonard M. Schuman, Director, Graduate Summer Session in Epidemiology, University of Minnesota School of Public Health, 1–117 Health Sciences Unit A, 515 Delaware St., SE, Minneapolis, Minn. 55455.

1981 Health Executives Development Program. Applications are being accepted for the 24th annual Health Executives Development Program, to be offered on the Ithaca campus of Cornell University June 15–25, 1981. Approximately 30 speakers will discuss the latest trends and issues in health policy, planning, regulation, and management. A variety of points of view will be presented to stimulate each participant to seek fresh approaches to health services problems and to lay the groundwork for continuing self-development.

The program is open to hospital administrators; Federal, State and regional health planners and regulators; clinical and medical directors; and executives of voluntary and government health care organizations from the United States, Canada, and overseas. For further information and applications, contact Health Executives Development Program, Malott Hall, Cornell University, Ithaca, N.Y. 14853, telephone (607) 256-4686.

Courses for professionals responsible for occupational health and safety. The Midwest Center for Occupational Health and Safety, an educational resource center sponsored by the National Institute of Occupational Safety and Health (NIOSH), is offering the following courses in the period May-December 1981 for professionals charged with responsibility for occupational health and safety.

Occupational Respiratory Protection (NIOSH 593), May 3-8, 1981, Kansas City, Mo. For persons who have responsibility for any portion of a respirator program. Course will provide the necessary information to initiate or upgrade and supervise a program to comply with requirements of the Occupational Safety and Health Act. Topics include Governing Legislation; Selection; Qualitative and Quantitative Fit Testing; Respiratory Protective Devices; Standard Operating Procedures and Records; Maintenance; Storage and Inspection; and Training. Continuing Education Units will be awarded; also, 1 point from the American Board of Industrial Hygienists toward maintenance of certification. Registration fee \$325.

Recognition of Accident Potential in the Workplace Due to Physical Environmental Factors (NIOSH 511), June 3-5, 1981, Kansas City, Mo. Cosponsored with the Greater Kansas City Area Safety Council. For personnel new to the field of occupational safety. Designed to provide an understanding of the principal physical environmental factors involved in making workplaces hazardous. Course will consist of lectures, augmented by discussion and problem-solving sessions that are intended to increase the knowledge and skills of the program participants. Topics will include The Work Site and Structures; Industrial Machines; Power and Hand Tools; Equipment; Materials and Industrial Processes and Energy. Continuing Education Units will be awarded. Tuition \$160.

Introduction to Radiation Protection, June 17-18, 1981, Kansas City, Mo. Cosponsored with the Mid America Chapter, American Industrial Hygiene Association. For industrial hygienists, health physics technicians, and other professional health personnel. Specialty program includes concepts of ionizing radiation. Didactic lectures are to be supplemented with workshop sessions. Continuing Education Units will be awarded. Tuition \$150.

Recognition of Accident Potential in the Workplace Due to Human Factors (NIOSH 512), to be held September 16-18 in Minnesota. This course will enable the student to identify the principal elements of accident causation and to apply methodology for control. Audience: professionals in the fields of safety, engineering, loss control, personnel, insurance, and others with sufficient background to incorporate this kind of training into their current safety responsibilities. Participants will be able to recognize the human factors that help to predict the occurrence of accidents in the workplace. Course content will include Physiological and Psychological Factors; Motivation and Attitudes; Group Influences on Behavior; Individual Characteristics; Organizational Impact on Work; Man-Machine Interface; Performing a Job Analysis; and Accident Prevention. Continuing Education Units will be awarded. Fee \$160.

The Injured Worker: A Comprehensive Approach to Medical, Legal, and Psychological Management of Disability, Sept. 21–22, 1981, Minneapolis, Minn. Cosponsored with the University of Minnesota and Employers Insurance of Wausau. Participants will acquire a working knowledge of the disability evaluation and compensation systems and learn more effective methods to speed the return of disabled workers to productive activity.

For further information about all these courses and registration, write Ruth K. McIntyre, Director, Continuing Education, Midwest Center for Occupational Health and Safety, 640 Jackson St., St. Paul, Minn. 55101 or call (612) 221-3771.

# ANY 3 FREE

We screen the publications of all health-related Federal Agencies. Then, in each issue of *Public Health Reports*, we offer a selection of titles produced by those agencies. These publications can help you do your job better and they are all FREE. But, supplies are limited and copies are kept no longer than 4 months after publication of this list. So please pick only 3 titles from the following, order publications by number, and order only from current issues of the Journal. Your request will be honored more quickly if you include a self-addressed label.

#### 93. TOTAL ENERGY MANAGEMENT FOR HOSPITALS

Identifies proved techniques for conserving energy and energy dollars in hospitals

### 94. MONTHLY VITAL STATISTICS REPORT: PROVISIONAL STATISTICS

Annual summary for the United States, 1979: births, deaths, marriages, and divorces

### 95. THE SURGEON GENERAL'S WORKSHOP ON MATERNAL AND INFANT DEATHS

Recommendations and findings of participants in workshop held December 14–17, 1980

## 96. THE HEALTH PLANNING PROGRAM: CITIZENS PLANNING FOR LOCAL NEEDS

Legislative background, highlights of the program, health service areas, health systems agencies, State planning and development agencies, national guidelines and priorities, final regulations, and other elements of the program

## 97. MINORITY BIOMEDICAL SUPPORT PROGRAM: A RESEARCH RESOURCES DIRECTORY

Guide to research projects and facilities supported by the program throughout the country; 1980 revision
