PUBLIC HEALTH REPORTS, published by the Public Health Service, welcomes from any source contributions of value to public health, disease prevention, health promotion, medical care, and community medicine.

We are particularly interested in publishing scientific papers concerned with the delivery of health services and with the many facets of health care, as well as technical reports documenting studies and research efforts. We also seek papers on new programs, new projects, and new ideas, even when they are experimental in nature. We want to record the current happenings in the health field.

Manuscript form. To facilitate review, authors should submit four copies of their manuscripts. All copy, including references, should be typed double spaced. Each chart and table should be placed on a separate sheet of paper. References should follow the style used by the journal; "et al." should be used only if there are more than four authors. Footnotes should be worked into the text. Authors' affiliation should appear on a separate sheet. Authors are expected to recognize scientific contributions by those who have assisted them only if such contributions warrant mention in the author identification space or in the text. Journal policy does not allow publication of separate "acknowledgements." Black and white photos and charts that illustrate papers are welcome.

More detailed instructions, including examples of our reference style and information on the preparation of a synopsis, will be supplied on request.

Manuscript review. Most manuscripts submitted for publication are reviewed by technical experts in the Public Health Service as well as experts not associated with the Service. Authors are given the opportunity to consider reviewers' comments or suggestions. They also receive edited typescripts for approval. Authors are responsible for the accuracy and validity of all material, including tables, charts, and references.

Manuscripts are reviewed with the understanding that they have not been submitted for publication elsewhere. Appropriate information should be supplied if a paper has been presented at or prepared for a meeting.

Tearsheets. In lieu of reprints, senior authors are provided with 100 to 150 sets of tearsheets after publication. Associate authors receive 10 to 50 sets each.

Secondary publication and indexing. Secondary publication of articles is provided in various abstracting journals (Abstracts for Social Workers, Current Literature in Family Planning). Articles are indexed in the annual Cumulated Index Medicus and monthly Index Medicus (National Library of Medicine), Engineering Index, Hospital Literature Index (American Hospital Association), Cumulative Index to Nursing and Allied Health Literature, American Statistics Index, and Medical Socioeconomic Research Sources (MEDSOC), as well as in the Institute for Scientific Information's Current Contents (Social and Behavioral Sciences, Life Sciences, and Physical & Chemical Sciences), Social Sciences Citation Index, Bibliographic Index of Health Education Periodicals, and Science Citation Index.

EDUCATION NOTES

Comprehensive Industrial Hygiene Review. The Midwest Center for Occupational Health and Safety will offer a comprehensive review of industrial hygiene March 18–22 and August 12–26, 1985. Topics in the 5-day course will include sampling and analytical procedures for gases, vapors, and particulates; operating principles of laboratory instruments; respiratory protection; ventilation; calculations (sampling statistics and use of threshold limit values); and citation procedures of the Occupational Safety and Health Administration. Heat stress, air pollution, ionizing and non-ionizing radiation, noise, toxicology, and ergonomics will also be covered. Several industrial processes will be reviewed.

Testing will be used as a guide to individual learning during the course. Self-study materials will augment formal presentations and learning tests. Extensive course materials will be disseminated.

Tuition for the course is \$600 per person and includes luncheons and refreshments. Continuing education credits will be awarded.

For further information, write or call Ruth McIntyre, Midwest Center for Oc-

cupational Health and Safety, St. Paul-Ramsey Medical Center, 640 Jackson St., St. Paul, MN 55101 (612:221-3980).

Current Concepts in Cardiopulmonary and Occupational Medicine. The current state-of-the-art in common clinical problems for practicing primary care physicians will be explored at this annual pulmonary medicine program March 28–30, 1985, in St. Paul, MN. Content will focus on specific examples of industrially related diseases in the midwest and the medical aspects of recognition and control of workplace health hazards leading to cardiopulmonary disease. The Saturday session will stress practical problems in occupational medicine from the viewpoint of the primary care physician.

Persons who complete the course will be eligible for the American Medical Association's category I credit for physicians and prescribed credit from the American Academy of Family Physicians. The fee is \$225. Registration is open to all physicians eligible for licensure in the United States and Canada.

Sponsors of the course are the St. Paul-Ramsey Medical Center, the American

Lung Association of Minnesota, the Ramsey County Lung Association, the Midwest Center for Occupational Health and Safety, and the University of Minnesota Medical School.

To obtain more information, contact Ruth McIntyre, Associate Director, Continuing Medical Education, St. Paul-Ramsey Medical Center, 640 Jackson St., St. Paul, MN 55101 (612: 221-3980).

Rocky Mountain Comprehensive Review of Industrial Hygiene. The field of industrial hygiene will be comprehensively reviewed in courses March 11–15 and August 5–9, 1985, in Salt Lake City. The courses will be given by the Rocky Mountain Center for Environmental Health at the University of Utah, an educational resource center sponsored by the National Institute for Occupational Safety and Health. Intended for practicing experienced industrial hygienists, the 5-day course has a tuition of \$600.

For further information, write RMCOEH/C.E., Ms. K. Blossch, Bldg. 512, University of Utah, Salt Lake City, UT 84112 (801: 581-5710).
