Public Health Reports

Treasury Department, United States Marine-Hospital Service. Published in accordance with act of Congress approved February 15, 1893.

Vol. XII.

WASHINGTON, D. C., NOVEMBER 26, 1897.

No. 48.

UNITED STATES.

Yellow fever in the South.

[Continuing the account of yellow fever in the South from November 18.]

November 18: A fatal case of yellow fever reported at Fort Barancas, Fla., eight miles from Pensacola.

November 21: State Health Officer Sanders, of Alabama, wires that all quarantines are removed.

November 24: The Florida State health authorities still requiring disinfection of merchandise from Mobile and New Orleans. Surgeon Murray is authorized to supervise such disinfection at Mobile.

In response to a request of Mayor Randolph, Acting Assistant Surgeon Geddings ordered to Greensboro, Ala., to supervise postepidemic disinfection.

November 25: The issuance of public bulletins by the Louisiana State board of health discontinued, and all house quarantines in New Orleans removed.

End of yellow fever at Pensacola, Fla.

[Telegram.]

PENSACOLA, FLA., November 22, 1897.

No further manifestation disease at Pensacola, and nine days since Goldberg died; 14 since first taken sick; none who were exposed during sickness have been or are now sick from any cause; house to house inspection completed Saturday noon; shows no suspicious fever here. Barrancas has now 3 cases; advised moving entire command into camp 2 miles from post, which has been done.

Jos. Y. Porter, State Health Officer.

110 (1281)

November 26, 1897 1282

Supplement to sanitary restrictions on freights entering Florida.

EXECUTIVE OFFICE, STATE BOARD OF HEALTH OF FLORIDA, Pensacola, Fla., November 18, 1897.

INSPECTION AND DISINFECTION OF FREIGHT AND EXPRESS.

To all sanitary agents, sanitary patrolmen,

and guards of the State board of health of Florida:

The sanitary restrictions on freights entering the State of Florida from the West and Northwest in instructions dated the 26th of September and 10th of November, 1897, are hereby supplemented by the following order:

Freight and express matter of the following classification will be permitted to enter Florida without disinfection from districts which are or

have been infected with yellow fever, viz:

Class 1. All new and dry material unpacked, such as lumber, machinery, brick, bar and sheet iron, tin, steel, agricultural implements, iron ties, staves, saddlery, wagons, hardware without packing, lime, and freight of like character, such being incapable of conveying infection.

Class 2. All goods in original wooden or metal packages not broken or opened in the infected districts, do not require disinfection except outside of container.

Class 3. Live stock in clean cars, unattended by persons from yellow fever infected districts, and birds and fowls in clean coops and cages are

admitted without detention.

Freight and express of all other description must be disinfected, and all containers and empty freight cars, passenger and Pullman coaches from the yellow fever infected districts must be submitted to disinfection by formaldehyd process, and all articles not in the above classes where they have been exposed to infection by yellow fever, must be disinfected before shipment, and the sufficiency of such disinfection shall be certified to by an officer of the U.S. Marine-Hospital Service or such other agent of the State board of health of Florida, duly appointed for this purpose.

No cotton or woolen goods, clothing or blankets, not new, or household goods, shall be brought into the State of Florida from the yellow

fever infected districts.

All certificates of inspection and also of disinfection shall be written across the way bill for each car, dated and signed. Each car shall also be lead sealed at initial point of departure, and *red labeled*, inspected, disinfected, and passed, with date and signature of inspector, otherwise the car or cars will be refused entry to Florida.

JOSEPH Y. PORTER, State Health Officer of Florida.

[Reports to the Supervising Surgeon-General United States Marine-Hospital Service.]

Smallpox in Atlanta.

ATLANTA, GA., November 17, 1897.

SIR: I have the honor to report the following as the record of small-pox since my last report: Total number of cases on hand last report, 57; total number of new cases since last report, 18; total number of cases

now, 75; total number discharged recovered, 11; total number deaths, 1; total number of cases in hospital to-day, 63; total number of cases in

quarantine suspects to-day, 21.

I have also to report that in obedience to your telegram the disinfection station in this city has been discontinued, and all property pertaining thereto has been shipped according to your directions to care of Keeper Scales, Camp Fontainebleau, Miss. I shall proceed to Washington as soon as practicable, therefore this is the last report I shall render in connection with the work of disinfection at Atlanta, Ga.

Very respectfully, HENRY W. SAWTELLE,

Surgeon, U. S. M. H. S.

Death of second case of typhus fever in San Francisco.

SAN FRANCISCO, CAL., November 12, 1897.

SIR: Referring to letter of this office of October 30, 1897, reporting 2 cases of typhus in this city, I have the honor to report the death on the 10th instant of the second case, who was the (male) nurse of the initial case reported. No other cases are known to exist in this vicinity.

Very respectfully, your obedient servant,

JAMES M. GASSAWAY, Surgeon, U. S. M. H. S., in Command.

Yellow fever in the United States as reported to the Supervising Surgeon-General United States Marine-Hospital Service to November 24, 1897. (a)

BRAZIL.

Sanitary reports from Rio.

RIO DE JANEIRO, October 18, 1897.

SIR: I have the honor to transmit report for the week ended October 16, 1897:

There were 3 deaths from accesso pernicioso, an increase of 1; 3 from smallpox, none in the foregoing week; 4 from enteric fever, an increase of 3; 1 from diphtheria, none in the foregoing week; 3 from measles,

1299 November 26, 1897

an increase of 2; 56 from tuberculosis, an increase of 1, and 269 from all causes, an increase of 20.

Yellow fever.—As yet we are free from this disease. A telegram here states that Sanarelli has discovered the serum prophylactic against this disease. When anything definite is known here, I will report it.

Smallpox.—With the return of soldier's from the quasi war in Bahia, this disease is beginning to appear more frequently. A notice from Bahia, this morning, states that in the last three days 384 new cases have appeared. The authorities here are using great exertions to prevent the spread of the disease by means of vaccination, and revaccination, and domiciliary visits, and isolation, when cases occur.

Since last report the following named ships have been inspected or received bills of health from this office: October 11, bark Alice, American, for Barbados, West Indies; ship Canada, British, for Norfolk, Va. October 13, steamship Denmore, British, for St. Lucia, West Indies; steamship Sirius, British, for New York. October 15, bark Fjord, Norwegian, for Pensacola, Fla. October 16, steamship Asti, German, for New York; bark Atlantic, Portuguese, for New Orleans; bark Amy, American, for Baltimore. October 18, bark Sumarlie, Norwegian, for Pensacola, Fla.

Respectfully, yours,

R. CLEARY, M. D.

Sanitary Inspector, U.S. M. H.S.

The SUPERVISING SURGEON GENERAL, U. S. Marine-Hospital Service.

RIO DE JANEIRO, October 25, 1897.

SIR: I have the honor to transmit the report for the week ended October 23, 1897:

There were 9 deaths from accesso pernicioso, an increase of 6; none from smallpox, 3 in the foregoing week; 2 from beriberi, an increase of 2; 1 from enteric fever, a decrease of 3; 1 from measles, a decrease of 2; 52 from tuberculosis, a decrease of 4; none from diphtheria, 1 in the foregoing week, and 271 from all causes, an increase of 2.

Yellow fever.—Is still off the list, an unusual fact at this time of the

year.

Smallpox.—The cases of smallpox are mostly introduced from Bahia by the returning military. We may look for an epidemic of this disease here, as thousands of soldiers will be returning now, unless the measures taken by the health authorities shall prove effective. The vaccination officer tells me that he will require every man to be vaccinated before disembarking. He said nothing about disinfecting their clothes. Since last report variola is reported at Sao Paulo, there being "various cases."

The following-named ships have been inspected or received bills of health from this office: October 19, steamship *Vedra*, British, for Hampton Roads, Va. October 21, steamship *Coleridge*, British, for New York; bark *Inglewood*, British, for New York; bark *Arizona*, British, for Ship Island, Miss.; bark *Lofthus*, Norwegian, for Pensacola, Fla. October 22, bark *Rockhurst*, British, for Coosaw, S. C. October 23, steamship *King Bleddyn*, British, from Santos for New York.

Respectfully, yours,

R. CLEARY, M. D.,

Sanitary Inspector, U. S. M. H. S.

The SUPERVISING SURGEON-GENERAL,

U. S. Marine-Hospital Service.

CANADA.

Smallpox in the Province of Montreal.

MONTREAL, November 19, 1897.

The present status of smallpox in this Province is as follows:

Municipality.	County.	Population.	Date of out- break.	New cases since last report.	Total cases since outbreak.	Died.	Recovered.	Still sick.	Houses infected since outbreak.	Houses still infected.
Montreal City Westmount Ste. Cunégonde	Hochelagado	240, 000 6, 000 8, 000	July 2 July 26 Aug. 27	a1 0 0	20 5 1	10 1	8 4 1	2 0 0	14 2 1	60 0 60

aThis case occurred in the convent referred to in my last report the day after said report was issued. As the convent was quarantined, and that therefore this new case meant no further spread of contagion, the formality of reporting it to you immediately was dispensed with.

b Except the isolation hospital.

No new cases since November 6.

Yours, respectfully,

ELZÉAR PELLETIER.

Secretary Board of Health of the Province of Quebec.

CUBA.

Smallpox and yellow fever in Cuban seaports.

November 17: The United States consul at Cardenas reports that during the week ended November 13 there were in that city no deaths from yellow fever and no deaths from smallpox.

November 15: The United States consul at Cienfuegos reports that during the week ended November 18 there were in that city no deaths from yellow fever and no deaths from smallpox.

November 20: The United States sanitary inspector at Habana reports that during the week ended November 11 there were in that city 11 deaths from yellow fever and 2 deaths from smallpox.

November 12: The United States consul at Mantanzas reports that during the week ended November 10 there were in that city 2 deaths from yellow fever.

November 20: The United States sanitary inspector at Habana reports that during the week ended November 18 there were in the city of Regla 13 deaths from yellow fever.

November 15: The United States consul at Sagua la Grande reports that during the week ended November 13 there were in that city 24 cases of yellow fever and 30 cases and 5 deaths from smallpox.

DANISH WEST INDIES.

Danish West Indies quarantine against Jamaica on account of yellow fever.

DEPARTMENT OF STATE,
Washington, November 18, 1897.

SIR: I have the honor, by direction of the Secretary of State, to inclose herewith for your information a copy of a notice from the Danish

Government of quarantine in the Danish West Indies on arrivals from Jamaica, which was communicated by our minister to Denmark, with his dispatch No. 186 of the 3d instant.

Respectfully, yours,

WILLIAM R. DAY,

Assistant Secretary.

Hon. SECRETARY OF THE TREASURY.

[Inclosure—Translation.]

The minister of foreign affairs has the honor to present his compliments to the legation of the United States of America and to notify it that the Government of the Danish Antilles, in consequence of the existence of yellow fever in the Island of Jamaica, has established a quarantine of five days, and, in case of necessity, with disinfection of travelers' baggage, against ships arriving from that island.

COPENHAGEN, November 2, 1897.

Sanitary report from Habana.

HABANA, CUBA, November 20, 1897.

SIR: The following report for the week ended Thursday, November 18, is respectfully submitted:

The sanitary conditions of the city of Habana continue to grow worse

and the death rate is again increasing rapidly.

It may be truly said that there is absolutely no attention paid to sanitation, and the entire disregard of personal cleanliness becomes

more apparent every day.

The supply of fresh meat is again short, the fleet of vessels engaged in the trade between Florida and this port being unable to continue the business on account of the heavy storms which have swept over the Gulf of Mexico for the past ten days, these vessels being small steamers, schooners, and barges. The only cattle brought here during the period mentioned were from Texas and Mexico, and less than 1,000 head were brought, when the supply should have been 3,000. All food stuffs are now beyond the reach of the poor, and this condition of affairs is demonstrated in the mortality table in this report, although the number of deaths from starvation, as stated there, is but one-tenth of the actual number of deaths occurring from that cause.

I believe it to be my duty to state at this time that if this condition of affairs continues to exist during the coming winter and spring this city will become still a greater menace to the health of the United States. The people as a whole now present every evidence of bad physical conditions; the anamic condition of the children is startling, and their abject indifference to their bad sanitary environments doubly

insures their mortality.

I estimate that there are about 300 cases of yellow fever in this city and in Regla. There were 24 deaths from that cause during the week, and but 2 of that number occurred among the civilians; the others in military hospitals. The deaths from enteric, malarial, and the so-called pernicious fevers show a marked increase over the preceding week.

There were 2 deaths from smallpox; both of these deaths occurred

among natives.

The deaths from intestinal diseases are about one-third of the total deaths, but nearly half of those occurring from enteritis are from starva-

tion pure and simple.

Your attention is invited to the total deaths and annual ratio per 1,000. I would also state that this total is only approximately correct. I believe I now get about 90 per cent of the occurring deaths.

While I have received no official notice from the State board of health of Florida of their extension of the close quarantine season, I have worked on that line and will continue to do so until I have received notice of their abandonment of the summer regulations.

Very respectfully,

W. F. BRUNNER, Sanitary Inspector, U. S. M. H. S.

The SUPERVISING SURGEON-GENERAL,

U. S. Marine-Hospital Service.

a No report.

UNITED STATES OF COLOMBIA.

No yellow fever in Panama.

PANAMA, November 13, 1897.

SIR: This city is entirely clear of yellow fever, and is in a good, healthy condition.

H. A. GUDGER, United States Consul.

Hon. SECRETARY OF THE TREASURY.

STATISTICAL REPORTS.

ARABIA—Aden.—Two weeks ended October 2, 1897. Estimated population, 38,584. Total deaths not reported. The deaths included 13 from smallpox.

AUSTRALIA—Brisbane.—Month of July, 1897. Estimated population, 100,913. Total deaths, 58, including enteric fever, 1, and scarlet fever, 1.

Month of August, 1897. Total deaths, 63, including enteric fever, 3: dengue fever, 1, and diphtheria, 1.

New South Wales—Newcastle.—Two months ended September 30, 1897. Estimated population, 15,331. Total deaths, 38. Causes of deaths not reported.

Sydney.—Month of September, 1897. Estimated population, 410,-000. Total deaths, 349, including enteric fever, 1, and diphtheria, 7.

BERMUDA.—Two weeks ended November 5, 1897. Estimated population, 15,013. Total deaths, 3. No deaths reported from contagious diseases.

FRANCE—Nantes.—Month of October, 1897. Estimated population, 125,757. Total deaths, 177, including 34 from phthisis pulmonalis.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns in England and Wales during the week ended November 6 correspond to an annual rate of 18.1 a thousand of the aggregate population, which is estimated at 10,992,524. The highest rate was recorded in Liverpool, viz, 23.4, and the lowest in Croydon, viz, 11.2.

London.—One thousand five hundred and eighty-six deaths were registered during the week, including measles, 74; scarlet fever, 20; diphtheria, 59; whooping cough, 19; enteric fever, 24, and diarrhea and dysentery, 20. The deaths from all causes correspond to an annual rate of 18.5 a thousand. In greater London 2,002 deaths were registered, corresponding to an annual rate of 16.6 a thousand of the population. In the "outer ring" the deaths included 17 from diphtheria, 6 from measles, 4 from scarlet fever, and 4 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended November 6 in the 23 principal town districts of Ireland was 20.9 a thousand of the population. The lowest rate was recorded in Armagh, viz, 0.0, and the highest in Sligo, viz, 50.8 a thousand. In Dublin and suburbs 190 deaths were registered, including enteric fever, 8; diphtheria, 2, and whooping cough, 1.

Scotland.—The deaths registered in 8 principal towns during the week ended October 30 correspond to an annual rate of 19.9 a thousand of the population, which is estimated at 1,549,907. The lowest mortality was recorded in Perth, viz, 13.6, and the highest in Dundee, viz, 24.2 a thousand. The aggregate number of deaths registered from all causes was 593, including measles, 8; scarlet fever, 12; diphtheria, 3, and whooping cough, 15.

The deaths registered in 8 principal towns during the week ended November 6 correspond to an annual rate of 18.8 a thousand of the population, which is estimated at 1,549,907. The lowest mortality was recorded in Leith, viz, 10.4, and the highest in Greenock, viz, 26.2 a thousand. The aggregate number of deaths registered from all causes was 560, including scarlet fever, 18; diphtheria, 5; measles, 12, and whooping cough, 16.

JAMAICA.—Week ended October 30, 1897. Estimated population, 694,865. Total number of deaths not reported. The deaths included 1 from yellow fever.

MEXICO—Tampico.—Two weeks ended November 14, 1897. Estimated population, 12,000. Total deaths, 96. Deaths from contagious diseases not reported.

SPAIN—Barcelona.—Month of August, 1897. Estimated population, 440,000. Total deaths, 346, including smallpox, 9; enteric fever, 54; phthisis pulmonalis, 123, and diphtheria, 21.
