# ublic Health Reports

Treasury Department, United States Marine-Hospital Service. Published in accordance with act of Congress approved February 15, 1893.

Vol. XIII.

WASHINGTON, D. C., JUNE 24, 1898.

No. 25.

# UNITED STATES.

[Reports to the Supervising Surgeon-General United States Marine-Hospital Service.]

Yellow fever in Mississippi.

(Continuation of report from June 16, contained in the preceding issue.)

June 17: No new cases. Known foci reduced to four in number. Cleaning of town progressing well. Isolation of cases and foci reported to be satisfactory. Daily house-to-house inspection begun in order to see that no one leaves the town and also in order to see all sick. Inspection of localities on railroad south of Hattiesburg nearly completed; no cases of yellow fever at any of them. Persons from clean-i. e., uninfected—coast towns will be passed to New Orleans and Mobile.

June 18: Conditions unchanged; no new cases; disinfection thorough, and house-to-house inspection and quarantine efficient. The inspection of localities along the Gulf and Ship Island Railroad from Hattiesburg south has been completed, with the result that no cases of yellow fever were found outside of McHenry.

June 19: No new cases reported. Surgeon Murray proceeded to Eucutta, Miss., to assist Dr. Gant in house-to-house inspection.

June 20: Two new cases reported in an old nondisinfected focus.

June 21: One new case at McHenry in a previously suspected focus.

June 22: One doubtful case reported at Perkinston; cabin and contents burned.

One case at Eucutta, Miss., convalescing, under guard, and no spread of the disease is probable.

June 23: The case at Eucutta traced to a family which mov ed from

60 633 June 24, 1898 634

McHenry the latter part of May; all other fevers in Eucutta positively pronounced not yellow fever.

One new case in McHenry, a negro, traced to original focus, and one other in a previous focus.

One case of yellow fever at Angel Island quarantine station.

ANGEL ISLAND, CAL., June 18, 1898.

Steamer Newport, from Panama, brings a case of yellow fever. Autopsy by Mathewson and myself confirms the diagnosis.

ROSENAU,
Passed Assistant Surgeon, U. S. M. H. S.

# Smallpox in Alabama and Mississippi.

MOBILE, ALA., June 15, 1898.

SIR: I have the honor to report that since Surgeon Murray's letter of the 4th instant 2 patients, both colored, suffering from smallpox have been admitted to the county hospital from this city. One case has been admitted from Whistler. There are at present 6 cases in the county hospital.

Dr. Fonde, Louisville and Nashville Railroad smallpox inspector, reports quite a number of cases in the country, on the line of Louisville and Nashville Railroad, between here and Montgomery.

I am, very respectfully, your obedient servant,

JOHN F. ANDERSON, Assistant Surgeon, U. S. M. H. S.

MOBILE, ALA., June 15, 1898.

SIR: I have the honor to report, in addition to the report of Assistant Surgeon Anderson of this date, that a soldier of the First Alabama Volunteers developed smallpox on the 10th instant, and was sent to the county hospital. This case is traced to the first case reported.

Since my last report, 4 cases have been reported at Hattiesburg, Miss.; 3 new cases at Laurel, Miss.; several cases at Prairie, Miss., and a few at West Point, Miss. In all, about 100 cases have occurred near Shubuta, Miss. There are rumors of cases at Meridian, Miss. One new case has been admitted to the camp at Hurricane Bayou, Ala.

I am, very respectfully, your obedient servant,

R. D. MURRAY, Surgeon, U. S. M. H. S.

# Smallpox at Statesville, N. C.

WILMINGTON, N. C., June 16, 1898.

SIR: I have the honor to report that in obedience to telegraphic instructions, Surgeon-General's Office, dated June 9, 1898, I proceeded to Statesville, N. C., for the purpose of investigating supposed cases of smallpox and conferring with the authorities as to the best means for its suppression. I arrived on the morning of June 11, and was met by the mayor and County Physician Long. Accompanied by County Physician Long, I saw all of the 11 cases, all of which proved to be smallpox. Of this number, 8 were about recovered, 1 was in the third week of the eruption, 1 in the eighth day of the eruption, and 1 in the second day of the eruption. These were all the cases that had occurred in the

635 June 24, 1898

city; they were confined to negroes, and there had been no deaths. They were all isolated and quarantined, and all known suspects had been vaccinated. Just before I left the city 2 more cases were reported to have been discovered, but I did not see them. At Dr. Long's request, I drove with him 11 miles in the country to see a case that was about 5 miles from Mooresville, and found that this case was also smallpox. It was in the person of a negro child, and was in the tenth day of the eruption. On my return to Statesville I met the mayor and board of aldermen in special session and reported the results of my investigation. I advised with them as to the measures necessary to suppress the disease, and the board of aldermen authorized the board of health to put Vaccination was proceeding in a satisfactory them into execution. manner; a smallpox hospital and a detention hospital were established, and other necessary measures were adopted, and I think that in a short time the authorities will have the disease under control. Smallpox has been known to exist in and around Statesville for the past five weeks, and has doubtless existed for a longer time in Iredell County. The mayor of Statesville thought that he could trace the infection to the case of Harvey Perkins, a negro, who broke out with the disease at Neal's Railroad Camp in February last, and who finally made his way to Charlotte, N. C., and died in the smallpox hospital at that place. mentioned this case in my report at Charlotte in February last. disease was probably brought into Statesville by an itinerant negro preacher named Smoot, who thinks that he contracted it at some house where he slept while traveling through the country. The disease is doubtless widely scattered throughout that section of the country, and will doubtless be heard from at other places in the course of time. The type of the disease is still mild, though the confluent cases are becoming more numerous.

Respectfully, yours,

C. P. WERTENBAKER,

Passed Assistant Surgeon, U. S. M. H. S.

Smallpox reported near Lincoln, N. Mex.

Under date of the 11th instant, the United States sanitary inspector at El Paso, Tex., reports that there are 30 cases of smallpox in the vicinity of Lincoln, N. Mex., a town about one hundred miles from that city in a northeasterly direction.

Three cases of smallpox at El Paso, Tex.

EL PASO, TEX., June 11, 1898.

SIR: I have the honor to report that at present there are 3 smallpox patients confined at the pesthouse here. Two of the patients are white and 1 colored. All necessary precautions have been taken.

I have the honor to be, very respectfully,

E. ALEXANDER, Sanitary Inspector, U. S. M. H. S. 636

June 24, 1898

Smallpox in the United States as reported to the Supervising Surgeon-General United States

Marine-Hospital Service, January 1 to June 23, 1898.

# Reports of States and yearly and monthly reports of cities.

CALIFORNIA.—Los Angeles.—Month of May, 1898. Estimated population, 103,000. Total number of deaths, 142, including diphtheria, 5; enteric fever, 3; whooping cough, 2, and phthisis pulmonalis, 25.

Oakland.—Month of May, 1898. Estimated population, 75,000. Total number of deaths, 64, including diphtheria, 2; enteric fever, 2, and phthisis pulmonalis, 5.

Sacramento.—Month of May, 1898. Estimated population, 30,000. Total number of deaths, 51, including diphtheria, 1; enteric fever, 6, and phthisis pulmonalis, 2.

San Francisco.—Month of May, 1898. Estimated population, 360,000. Total number of deaths, 553, including diphtheria, 19; enteric fever, 6; scarlet fever, 1; whooping cough, 2, and phthisis pulmonalis, 90.

CONNECTIOUT.—Month of May, 1898. Reports to the State board of health from 168 towns, having an aggregate population of 883,192, show a total of 1,138 deaths, including diphtheria, 19; enteric fever, 6; measles, 10; whooping cough, 18, and phthisis pulmonalis, 125.

ILLINOIS—Chicago.—Month of May, 1898. Estimated population, 1,750,000. Total number of deaths, 2,022, including diphtheria, 29; enteric fever, 67; measles, 8; scarlet fever, 8, and phthisis pulmonalis, 227.

KENTUCKY—Louisville.—Three months ended May 31, 1898. Estimated population, 222,223; white, 182,611; colored, 39,612. Total number of deaths, 759, including diphtheria, 2; enteric fever, 22; whooping cough, 8, and phthisis pulmonalis, 65.

MARYLAND—Baltimore.—Month of May, 1898. Population, 506,398; white, 431,054; colored, 75,344. Total number of deaths, 809; white, 590; colored, 219, including diphtheria, 14; enteric fever, 8; measles, 10; scarlet fever, 8; whooping cough, 5, and phthisis pulmonalis, 98.

Cumberland.—Estimated population, 12,729. Total number of deaths, 12, including phthisis pulmonalis, 2.

MASSACHUSETTS—Fitchburg.—Month of May, 1898. Estimated population, 28,392. Total number of deaths, 29, including diphtheria, 1; whooping cough, 2, and phthisis pulmonalis, 2.

Worcester.—Month of May, 1898. Estimated population, 106,202. Total number of deaths, 176, including diphtheria, 2; scarlet fever, 1; whooping cough 6, and phthisis pulmonalis, 18.

MICHIGAN.—Reports to the State board of health, Lansing, from 80 observers for the week ended June 11 indicate that remittent fever, intermittent fever, phthisis pulmonalis, diarrhea, and tonsillitis increased, and measles and pneumonia decreased in area of prevalence. Phthisis pulmonalis was reported present at 168, measles at 52, diphtheria at 29, scarlet fever at 23, enteric fever at 19, and whooping cough at 19 places.

MINNESOTA—Duluth.—Month of May, 1898. Population, 60,000.

643 June 24, 1898

Total number of deaths, 61, including enteric fever, 1; measles, 4, and phthisis pulmonalis, 4.

Milwaukee.—Month of May, 1898. Estimated population, 275,000. Total deaths, 262, including diphtheria, 1; enteric fever, 6; whooping cough, 4, and phthisis pulmonalis, 31.

Minneapolis.—Month of May, 1898. Estimated population, 225,602. Total number of deaths, 164, including diphtheria, 1; whooping cough, 3, and phthisis pulmonalis, 23.

NEW JERSEY—Hudson County.—Month of May, 1898. Estimated population, 275,126. Total number of deaths, 534, including diphtheria, 17; enteric fever, 2; measles, 3; scarlet fever, 16; whooping cough, 2, and phthisis pulmonalis, 49.

NEW YORK—Yonkers.—Month of May, 1898. Estimated population, 42,000. Total number of deaths, 61, including diphtheria, 5; enteric fever, 1; measles, 2, and phthisis pulmonalis, 8.

OHIO—Cleveland.—Month of May, 1898. Estimated population, 370,000. Total number of deaths, 451, including diphtheria, 5; enteric fever, 10; measles, 2; whooping cough, 1, and phthisis pulmonalis, 18.

Columbus.—Month of May, 1898. Estimated population, 135,000. Total number of deaths, 152, including diphtheria, 1; enteric fever, 5; whooping cough, 4, and phthisis pulmonalis, 16.

PENNSYLVANIA— Williamsport.—Month of May, 1898. Estimated population, 35,000. Total number of deaths, 20, including diphtheria, 1, and phthisis pulmonalis, 5.

RHODE ISLAND—Newport.—Month of May, 1898. Estimated population, 21,500. Total number of deaths, 26, including phthisis pulmonalis, 2.

UTAH—Salt Lake City.—Month of May, 1898. Estimated population, 70,000. Total number of deaths, 44, including diphtheria, 1; scarlet fever, 1; whooping cough, 3, and phthisis pulmonalis, 1.

WASHINGTON—Seattle.—Month of May, 1898. Estimated population, 70,000. Total number of deaths, 59, including diphtheria, 4, and phthisis pulmonalis, 4.

Tacoma—Month of May, 1898. Population, 50,000. Total number of deaths, 24, including phthisis pulmonalis, 2.

# Current quarantine measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, June 2, 1898.]

MALTA.—By order of the local government, May 14, the proclamation of January 7, 1898, has been amended so as to read that arrivals from Egypt which have a physician on board shall be subject to a ten days' quarantine, dating from time of departure, either in the open sea

or in the Roads of Comino, before they can be treated similarly to

arrivals from Bombay.

EGYPT.—On account of the occurrence of plague cases at Suez, the International Council of Health resolved to suspend the permission granted vessels which had touched at Djiddah, provided they had remained there no more than twenty-four hours, to unload passengers and cargo in quarantine in the outer harbor.

Inasmuch as the plague patient taken from the Meballah has been

isolated, clean bills are now given to vessels.

BRITISH INDIA.—According to official advices of May 1, in consequence of the outbreak of plague at Calcutta arrivals from that port must undergo an inspection conducted according to the requirements of the Venice sanitary convention. The same conditions apply to vessels arriving from Madras, Rangoon, and Aden.

## BARBADOS.

# Quarantine proclamation and information.

BARBADOS, May 28, 1898.

SIR: The following communications from the quarantine board of Trinidad were received by me on the 16th instant per steamship Speroid, but too late for circulation by the mail which left here that day

From secretary quarantine authority, Trinidad, to clerk quarantine board, Barbados.

MAY 5, 1898.

The Dutch and French steamers communicate with Puerto Cabello and Laguayra, and there is frequent communication by other steamers. There is also communication by rail and road between these places, and by rail between Valencia and Caracas.

MAY 6, 1898.

I have the honor to inform you that on the recommendation of the quarantine authority his excellency the acting governor has been pleased to declare Venezuela to be an infected place within the meaning of section 5 of ordinance 18 of 1893.

Quarantine is now in force here against Bahia, Cuba, La Guayra, Para, Puerto Cabello, Rio Janeiro, Santos, and Valencia.

My board have information that glanders and farcy are prevalent among horses, etc., at Puerto Rico.

I have the honor to be, sir, your obedient servant,

JAS. SANDERSON, Clerk, Quarantine Board.

The Supervising Surgeon-General, U. S. Marine-Hospital Service.

### CHINA.

# Outbreak of plague at Amoy.

DEPARTMENT OF STATE, Washington, June 14, 1898.

SIE: I have the honor to inform you that our consul at Amoy, China, reported on the 11th instant an outbreak of the plague at that place.

Respectfully, yours.

WILLIAM R. DAY, Secretary.

Hon. SECRETARY OF THE TREASURY.

# COSTA RICA.

# Yellow fever reported at Port Limon.

MOBILE, ALA., June 15, 1898.

SIR: I am in receipt of a telegram from the president of the Louisiana board of health as follows:

June 15, 1898.

"Dr. Carson, medical officer at Port Limon, Costa Rica, cables yellow fever there."

I am, most respectfully,

T. S. SCALES, M. D., Health Officer.

### JAMAICA.

# Sanitary report from Kingston.

KINGSTON, JAMAICA, June 2, 1898.

SIR: I have the honor to inform you that the sanitary condition of the city and harbor of Kingston is most excellent at present. are no contagious or infectious diseases prevalent, excepting a few cases of typhoid (from 3 to 5 weekly), and these seem to me to be more of a malarial character (typhomalaria) than anything else. Malarial feyers are very common.

The continuous arrival of vessels bringing Cuban refugees in large numbers from different Cuban ports, where yellow fever prevails more or less, make the board of health very careful about allowing vessels to free pratique unless thoroughly convinced after several days' quarantine that all danger of introducing yellow fever, smallpox, etc., is completely passed. Baggage is often fumigated when only observation of vessel and crew for a few hours is established.

Vessels leaving for the United States are inspected by me, and their bills of health delivered on board when I find their sanitary condition satisfactory.

Respectfully,

Dr. H. S. Caminero, Sanitary Inspector, U.S. M. H. S.

The Supervising-Surgeon General, U. S. Marine-Hospital Service.

### JAPAN.

Report of infectious diseases in Japan—Extension of the epidemic of plague in Formosa.

YOKOHAMA, JAPAN, May 20, 1898.

SIR: I have the honor to forward herewith my regular report of infectious disease in Japan for the period from April 29 to May 19, current year.

The sudden and great increase in the severity of the plague epidemic in Formosa, confined almost exclusively to Taipeh, Tainan, and Taiwan, all shipping ports, is certainly alarming.

I am, sir, very respectfully, your obedient servant, STUART ELDRIDGE, M. D., Sanitary Inspector, U.S. M. H. S.

[Inclosure.]

Report of infectious disease in Japan from April 29 to May 19, 1898.

# SAN SALVADOR.

Yellow fever reported at San Salvador.

[Telegram.]

SAN SALVADOR, June 17, 1898.

DEPARTMENT OF STATE, Washington: Yellow fever.—JENKINS, United States Consul.

655 June 24, 1898

### VENEZUELA.

Smallpox in Valencia, Puerto Cabello, and Caracas.

DEPARTMENT OF STATE, Washington, D. C., June 18, 1898.

SIR: I have the honor to quote for your information the following extract from dispatch No. 1146 of the 7th ultimo from our consul at Maracaibo:

"Smallpox is spreading in Valencia, Puerto Cabello, and by latest news also in Caracas. Should this terrible disease reach Maracaibo there is no doubt that, with the filthy condition of the city and the absence of sanitary precaution, a great many of our poorer classes will fall victims to the scourge."

Respectfully, yours,

WILLIAM R. DAY, Secretary.

Hon. SECRETARY OF THE TREASURY.

### STATISTICAL REPORTS.

BAHAMAS—Dunmore Town.—Two weeks ended June 3, 1898. Estimated population, 1,472. No deaths.

Governors Harbor.—Two weeks ended June 4, 1898. Estimated population, 1,500. No deaths.

Green Turtle Cay.—Two weeks ended June 3, 1898. Estimated population, 3,900. No deaths.

Nassau.—Two weeks ended June 4, 1898. Estimated population, 11,000. Total number of deaths not reported. One death from enteric fever.

COLUMBIA—Republic of Carthagena.—Month of May, 1898. Estimated population, 25,000. Total number of deaths, 41.

Panama.—Twenty days ending June 10, 1898. Estimated population, 16,000. No deaths from contagious diseases.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns in England and Wales during the week ended June 4 correspond to an annual rate of 16.8 a thousand of the aggregate population, which is estimated at 11,218,378. The highest rate was recorded in Sunderland, viz, 24.6, and the lowest in Derby, viz, 9.9.

London.—One thousand three hundred and ninety-two deaths were registered during the week, including measles, 66; scarlet fever, 17; diphtheria, 30; whooping cough, 45; enteric fever, 3, and diarrhea and dysentery, 17. The deaths from all causes correspond to an annual rate of 16.1 a thousand. In greater London 1,789 deaths were registered, corresponding to an annual rate of 14.6 a thousand of the population. In the "outer ring" the deaths included 10 from measles, 10 from diphtheria, 3 from scarlet fever, and 13 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended June 4 in the 23 principal town districts of Ireland was 20.9 a thousand of the population. The lowest rate was recorded in Carrickfergus, viz, 7.3, and the highest in Porta-

June 24, 1888 656

down, viz, 30.9 a thousand. In Dublin and suburbs 132 deaths were registered, including enteric fever, 2; whooping cough, 5, and scarlet fever, 1.

Scotland.—The deaths registered in 8 principal towns during the week ended June 4 correspond to an annual rate of 23.0 a thousand of the population, which is estimated at 1,568,536. The lowest mortality was recorded in Perth, viz, 18.7, and the highest in Greenock, viz, 27.2 a thousand. The aggregate number of deaths registered from all causes was 694, including measles, 34; scarlet fever, 4; diphtheria, 2, and whooping cough, 43.

GUIANA, DUTCH—Parimaribo.—Month of April, 1898. Estimated population, 30,535. Total number of deaths, 67. No deaths from contagious diseases.

INDIA—Singapore.—Month of April, 1898. Estimated population, 97,111. Total number of deaths, 536, including cholera, 1; beriberi, 61; smallpox, 3, and phthisis pulmonalis, 102.

NICARAGUA—San Juan del Norte.—Month of May, 1898. Estimated population, 1,156. Total number of deaths, 4.
