

Public Health Reports

Treasury Department, United States Marine-Hospital Service. Published in accordance with act of Congress approved February 15, 1893.

VOL. XIV. WASHINGTON, D. C., DECEMBER 29, 1899. No. 52.

UNITED STATES.

[Reports to the Surgeon-General United States Marine-Hospital Service.]

Yellow fever in Miami, Fla., from October 17 to December 19, 1899.

MIAMI, FLA., *December 20, 1899.*

SIR: Replying to your telegram of yesterday transmitted from the Jacksonville office of the board, you are informed that from October 17 to December 19 inclusive, there have been reported to me 204 cases of yellow fever with 14 deaths. From November 22 the date of query to December 19 inclusive, there have been 59 cases with 6 deaths. There are at present writing under treatment, 9 cases.

Respectfully,

JOSEPH Y. PORTER,
State Health Officer of Florida.

Yellow fever in the United States as reported to the Surgeon-General United States Marine-Hospital Service from August 31 to December 29, 1899.

REPORTS FROM THE MEXICAN BORDER.

El Paso, Tex., December 17, 1899.—I have the honor to report the following work for the week ended December 16, 1899: Inspection Mexican Central Railway passengers, 154; inspection at international bridge and giving certificates of successful vaccination, 54; inspection of immigrants, 33; disinfection of baggage and household goods, 11; vaccination, 16.

Respectfully,

E. ALEXANDER,
Sanitary Inspector, U. S. M. H. S.

Laredo, Tex., December 19, 1899.—I have the honor to submit the following report for week ended December 16, 1899: All passengers on train from Mexico inspected and allowed entry. Fifteen immigrants inspected and allowed entry. Seven persons vaccinated, including indigent third-class passengers and immigrants.

Respectfully,

H. J. HAMILTON,
Acting Assistant Surgeon, U. S. M. H. S.

Smallpox in Cairo, Ill.

CAIRO, ILL., *December 20, 1899.*

SIR: I have the honor to report the presence of 12 cases of smallpox under treatment at the pesthouse of this city. None of the cases can be traced to the river, but, on the contrary, seem to have originated from a resort within the city. Most of the cases are of a mild form, and the majority of the patients are negroes.

The wharf master has been requested to post notice that all seamen presenting themselves at the office of this hospital may be vaccinated.

With your approval and advice I will visit the pesthouse, under proper precautions, to observe clinical aspects of the disease.

Respectfully,

JOHN MILTON HOLT,
Assistant Surgeon, U. S. M. H. S., In Command.

Case of smallpox at Leadville, Colo.

DENVER, COLO., *December 14, 1899.*

SIR: A case of smallpox is reported at Leadville, Colo., having developed December 5. Patient well quarantined.

Respectfully,

G. E. TYLER,
Secretary.

Smallpox in Norfolk and vicinity.

NORFOLK, VA., *December 16, 1899.*

SIR: I have the honor to state that the smallpox situation at this port is becoming more serious. So far I have had no reply to my letter of inquiry from the health commissioner of this city, although I was told by the commissioner and the president of the board of health verbally, that they declined to give the information because there was more smallpox in other towns in the vicinity which were not reporting it, and it would be an injustice to this city to make a report under those circumstances. I see from the papers that Portsmouth has ordered a general vaccination and appointed a physician to take charge of all smallpox cases. So far no report has been received from the health officer of Norfolk County.

Respectfully,

EDW. E. FEILD,
Acting Assistant Surgeon, U. S. M. H. S.

*Smallpox in Springfield, Mo.*SPRINGFIELD, MO., *December 20, 1899.*

SIR: Answering your circular letter (G. T. V.) in regard to smallpox, the first case appeared last summer, and the doctor in charge pronounced it chicken pox. Not much attention was paid to it until the middle of August, when we had 2 more cases, then the doctors were divided—they called it everything: "Porto Rico itch," "Cuba measles," "Manila scab," and smallpox; however, we quarantined it and treated it as smallpox. By September 28 we had 27 cases, all colored patients. Then we moved them all outside the city to a pest camp, where we had erected two houses 20 by 50 feet, each house divided into two wards; one house for whites and one for blacks. We also put up 30 tents and put floors and stoves in each tent. Up to date they seem to prefer the tents to the houses. We have removed to these, with two or three exceptions, every case.

Up to date we have had 195 colored and 155 white patients. Of these we have had 4 deaths—1 white and 2 colored men, and 1 three-weeks' old infant.

Respectfully,

JNO. F. CUNNINGHAM,
*Health Officer.**Smallpox in Washington, D. C.*WASHINGTON, D. C., *December 22, 1899.*

SIR: I have the honor to report the occurrence of 2 new cases of smallpox since the date of my last letter. There are, therefore, in this District to-day 6 cases of smallpox, all in the hospital.

Respectfully,

H. C. MCLEAN,
*Acting Health Officer.**Smallpox in the United States as reported to the Surgeon-General United States Marine-Hospital Service, June 30 to December 29, 1899.*

[For reports received from January 1 to June 30, 1899, see PUBLIC HEALTH REPORTS for June 30.]

Current quarantine measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, November 22, 1899.

PLAGUE.

GERMAN EMPIRE.—By circular letter of November 20, 1899, the imperial chancellor instructs the governments of the confederated maritime states to hold arrivals from the Mediterranean ports of the north coast of Africa, and from the ports of Lorenzo Marques, Mozambique, Madagascar, and the Masparene Island group (Mauritius, Réunion), subject to sanitary police control, as a preventive measure against the importation of plague.

BELGIUM.—The conditions of articles 1 to 4, of the royal order of April 5, 1897, in regard to measures for protection against the importation of bubonic plague into Belgium are, by direction of the minister of agriculture, dated November 27, 1899, put in force against arrivals from the plague-infected territories of Paraguay, Madagascar, and Mozambique. Such arrivals shall be treated at the quarantine stations of the Scheldt at the ports of Ostend and Newport, and at Salzache according to the requirements of Chapters I, III, and IV, of the Venetian International Convention of March 19, 1899.

SPAIN.—By royal order of November 16, 1899, strict quarantine is imposed against vessels which left Kobe, Japan, on or after October 31, 1899. Ports within 165 km. of Kobe are declared suspect.

BULGARIA.—Under date of November 13, 1899, the Government removed quarantine against ports of the Red Sea, and declared the city of Santos in Brazil infected. On November 16 it declared the city of Algiers and the city of Trieste plague suspect from November 9.

GREECE.—Quarantine against Trieste was suspended, November 21, 1899.

EGYPT.—The standing commission of the international council of health resolved, November 15, to apply the plague regulations to arrivals from Tamatave and Antsirane, in Madagascar.

STRAITS SETTLEMENTS.—According to advices of October 24, 1899, quarantine against Hongkong is suspended.

JAPAN.—By proclamation of the minister of the interior, Niuchwang, in China, is declared plague infected. Vessels arriving thence, either directly or indirectly, are subject, after October 12, to sanitary police inspection at the ports of Yokohama, Kobe, Nagasaki, Kuchinotsu, Isugahara, Yokkaichi, and Taketoyo; and when the sanitary officials judge disinfection to be necessary, they shall be discharged to repair to the nearest quarantine station.

ARGENTINA.—As the result of a conference between the sanitary officials of Argentina and Uruguay, the port of Santos has been declared infected and other Brazilian ports suspect, and quarantine measures are declared in force against arrivals from Brazilian ports.

CHOLERA.

BULGARIA.—On November 16 the Government declared the vilayet of Bagdad to be cholera infected from November 4.

SMALLPOX.

DENMARK.—By proclamation of November 21 the Government, on account of the prevalence of chicken pox in Hull, declared sanitary police inspection in force against arrivals from Hull.

CHINA.

Further concerning plague in Ninchwang.

PEKING, CHINA, November 2, 1899.

SIR: Referring to my dispatch No. 266, dated October 10 last, in reference to the plague at Ninchwang, I have the honor to report that while the danger may not be entirely over, the disease is believed to be abating, and that the measures taken by the taotai, in cooperation with the foreign consuls, towards improvement in sanitary conditions, care of sick, disposition of the dead, and disinfection of infected houses, ought, in the course of the winter, to entirely stamp out the disease and very materially lessen the chances of another epidemic in the spring.

A copy of "The memorandum of agreement between the consuls and taotai," showing in detail what is being done by the sanitary board, is inclosed herewith.

It is also reported that the sum of 30,000 taels has been placed at the disposition of the board. Of this amount, 10,000 taels were granted by the Chinese Government; 16,000 taels were subscribed by the Chinese Eastern Railway, and the balance by the foreign residents there.

Respectfully,
Hon. SECRETARY OF STATE.

E. H. CONGER.

[Inclosure—In dispatch No. 270.]

Memorandum of agreement between the consuls and the taotai.

NIUCHWANG, CHINA, October 6, 1899.

1. The consular body have appointed a sanitary board to stamp out the plague.
2. The town must be treated as a whole, not separately. A large sum will be contributed by consuls and others for the purpose, and the grant of 10,000 taels mentioned by the yamen should be forthwith handed over to the sanitary board.
3. Streets and drains must be cleaned.
4. Exports of coffins by river or land must be prohibited. They must be buried together in an efficient manner in a remote place outside the wall, and coffins now inefficiently buried must be reburied. Graves should now be dug for facility of burial in winter, and soldiers might be employed for the purpose.
5. Japanese doctors will be employed and take charge of city wards. Hospitals for Chinese and foreigners with Chinese and foreign medical staff shall be created outside the walls. Medicine and food shall be provided, and coffins for the poor.
6. Plague patients shall be taken to the hospital, if willing, but otherwise shall not be moved from their houses. Infected houses shall be disinfected, and compensation made to the poor.
7. As plague is most infectious and deadly, and only the above measures will root it out.
8. The above shall be notified to the people by a proclamation to be issued by the taotai, and soldiers shall be stationed at the gates of the town to prevent coffins being secretly carried out or brought into the town, and to prevent burials inside the walls.

*Reports from Hongkong.*HONGKONG, *November 15, 1899.*

SIR: I have the honor to transmit herewith my weekly report of vessels inspected at Hongkong, and to respectfully state that there were no cases of plague during the week ended November 11, 1899, and that 1 death from smallpox has been reported.

Respectfully,

J. C. PERRY,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

Report of vessels inspected at Hongkong, China, for week ended November 11, 1899.

Date.	Name of vessel.	Destination.	Number of crew.	Number of cabin passengers.	Number of steerage passengers.	Number rejected.
Nov. 7	Br. ss. Yuen Sang.....	Manila, P. I.....	68	12	145	5
Nov. 10	Br. ss. Diamante.....	do.....	85	50	25	0
Nov. 11	U. S. bk. May Flint.....	Port Townsend, Wash.	30	0	0	0

HONGKONG, *November 21, 1899.*

SIR: I have the honor to transmit herewith weekly report of inspection at Hongkong for the period ended November 18, 1899. There was 1 case of plague, which developed in Hongkong, and this tends to show that the disease is simply in temporary abeyance.

A telegram received in Hongkong to-day states that there have been three or four cases of plague in Kobe, Japan. I have no other information, but no doubt the Bureau has been informed of the presence of the disease in that city.

Respectfully,

J. C. PERRY,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

COLOMBIA.

Yellow fever at Panama.

PANAMA, December 5, 1899.

SIR: I have the honor to say that some three hundred and fifty soldiers were landed here four days ago, and that among them were some four or five who were sick and who are pronounced to have had yellow fever. They were en route from Buenaventura to Cartagena, but owing to the sickness among them no ship will convey them to that place, and it is likely that they will remain in Panama for some time. Since their arrival here there have been some fifteen cases of fever among them, with 5 deaths. It is not believed that it will spread in the city.

Respectfully,

H. A. GUDGER,
United States Consul-General.

Hon. ASSISTANT SECRETARY OF STATE.

CUBA.

Report from Cienfuegos, Casilda, and Santa Cruz del Sur.

CIENFUEGOS, CUBA, December 18, 1899.

SIR: I have the honor to report that during the week ended December 16, 18 deaths have occurred in this city, 4 of which were in the civil hospital, 2 from malaria, 3 from intestinal diseases, and 4 from tuberculosis. No contagious diseases reported. Death rate for the week, 23.46.

During the week 4 foreign vessels have arrived at this port. Bills of health have been issued to 5 foreign vessels. Twenty-eight Spanish immigrants arrived and were inspected December 12 on the steamship *Miguel Jover*.

Casilda.—Dr. Alejandro Cantero reports 5 deaths in the city of Trinidad; 3 from intestinal diseases, and 1 from tuberculosis. No contagious diseases reported. No foreign vessels at this port during the week.

Santa Cruz del Sur.—Dr. Juan R. Xiques reports 1 death during the week, from tuberculosis. No contagious diseases reported. One foreign vessel inspected at this port during the week.

Respectfully,

J. M. LINDSLEY,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.**Report from Havana.*

HAVANA, CUBA, December 20, 1899.

SIR: I have the honor to submit the following sanitary report for the week ended December 16, 1899:

Eight new cases of yellow fever were reported, and 9 deaths have occurred during the week, showing a decided increase in the mortality. There were 13 cases of yellow fever under treatment on the 16th instant. The weather has been cool and pleasant.

The total number of deaths from all causes during the period covered by this report was 146, which gives a death rate of 34.50 per thousand, estimating the population of the city at 220,000.

During the week the barge *Protector* disinfected 90 trunks, 79 valises, and 28 parcels—in all, 197 pieces.

The usual mortality table for the week is appended.

Respectfully,

G. M. GUITÉRAS,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

[Inclosure No. 1.]

Passed Assistant Surgeon, U. S. M. H. S.

Reports from Matanzas, Cardenas, and Isabela de Sagua.

MATANZAS, CUBA, December 20, 1899.

SIR: I have the honor to submit herewith the following sanitary report of the quarantine district under my command for the week ended December 16, 1899:

Matanzas.—Twenty-one deaths occurred in the city of Matanzas during the period covered by this report showing a mortality of 27.41 per thousand. The principal causes of deaths were as follows: Enteritis, 7; tuberculosis, 5; heart diseases, 2; cerebral congestion, 2; other causes, 5. The following case of an infectious character was reported: Typhoid fever, 1. Six vessels were inspected on arrival; 4 of these were foreign and 2 were coasting vessels. Six bills of health were issued to foreign vessels and two certificates of inspection to coasting vessels. Eighteen health certificates were issued, 12 to persons leaving the island via Havana. Fourteen pieces of baggage were disinfected and 6 inspected and passed.

Cardenas.—Act. Asst. Surg. Enrique Saez reports that 16 deaths occurred in Cardenas during the week, all from general diseases. No cases of a particularly infectious or contagious character were reported. Sixteen vessels were inspected on arrival; 4 of these were foreign and 12 coasting vessels. Four bills of health were issued to foreign vessels.

Isabela de Sagua.—Act. Asst. Surg. Pedro Garcia Riera reports that

2 bills of health were issued to foreign vessels during the week ; no sanitary report has been received.

Cuibarien.—No report has been received in time.

Respectfully,

FELIX GARCIA,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Reports from Santiago, Guantanamo, Manzanillo, and Daiquiri.

SANTIAGO DE CUBA, *December 13, 1899.*

• SIR: I have the honor to make the following report of the sanitary condition of the fourth district of the island of Cuba for the week ended December 9, 1899 :

Santiago.—During this period there were 21 deaths, a decrease of 4 from the preceding week. The following are the principal causes of death: Leprosy, 1; tuberculosis, 3; tetanus, 1; malarial fevers, 6; intestinal diseases, 1; pneumonia, 1; heart diseases, 3; other causes, 5; total, 21. Population, 34,000; mortality, 32.12.

The case of leprosy was found dead in the house in which yellow fever was first reported this year. The place was taken charge of by the civil authorities.

Two cases of yellow fever were removed to the hospital during this period, 1 mild, the other severe, the latter dying on December 10; the first a man of good habits, the latter a man addicted to drink.

Malarial fever this week claimed 6, 4 of which were under 13 years of age.

The weather is delightfully cool at night, the temperature going down as low as 69° F.

Guantanamo.—There were 5 deaths reported this week, the following being the causes: Tuberculosis, 2; malaria, 2; tetanus, 1. No contagious diseases are reported.

Act. Asst. Surg. H. S. Caminero, who has represented the Service at this station, has been recalled to Santiago, this station not being considered important during the dry season.

Manzanillo.—There were 6 deaths during this period, the following being the principal causes of death: Pneumonia, 1; cancer, 1; tetanus, 1; meningitis, 1; other causes, 2; total, 6. The city still remains free from fever, and is very healthy.

Daiquiri.—Nothing of interest reported.

Respectfully,

HERMAN B. PARKER,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

DOMINION OF CANADA.

Reports of smallpox in Ontario.

TORONTO, December 12, 1899.

SIR: In compliance with the resolutions adopted at the conference of State and provincial boards of health, held at Toronto, October 6, 1886, respecting interstate notification of contagious diseases, I beg to make the following statement regarding the prevalence of smallpox in Ontario at the present time:

Municipality.	County.	Date of outbreak.	Houses infected.	Houses at present infected.	Died.	Recovered.	Total cases.	Still sick.
Maidstone.....	Essex.....	Nov. 1	0	22
Belle River.....	do.....	do	0	2
Rochester.....	do.....	Nov. 2	0	70
Tilbury, W.....	do.....	Oct. 30	0	31

Total houses free of disease since outbreak, 16; cases recovered, 62, leaving 122 cases in 33 houses under quarantine.

Respectfully,

PETER H. BRYCE,
Secretary.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Smallpox in the Province of Quebec.

MONTREAL, December 20, 1899.

The present status of the smallpox outbreak in this province is as follows:

Municipality.	County.	Population.	Date of outbreak.	New cases since last report. (a)	Total cases since outbreak.	Died.	Recovered.	Still sick.	Houses infected since outbreak.	Houses still infected.
St. Philippe de Néri.....	Kamouraska.....	1,049	Aug. 18	0	2	0	2	0	1	0
Mont-Carmel.....do.....	1,075	Sept. 5	17	189	0	154	35	48	14
St. Paschal.....do.....	3,109	Oct. 15	4	24	0	20	4	4	2
Ste. Hélène.....do.....	1,515	Nov. 15	0	3	0	1	2	1	1
St. Germain.....do.....	600do.....	0	18	0	10	3	2	2
Amqui.....	Matane.....	500 (?)	Dec. 16	2	2	2	1	1

a Date of last report, December 12.

The Amqui outbreak was expected, and the local authorities had been notified accordingly. Its origin is as follows: One of the now infected household, while traveling, slept one night, December 1, at Mont-Carmel, in a house in which two days later smallpox developed.

The new cases in Mont-Carmel are all in previously infected houses.

In St. Paschal, an unreliable guard is responsible for the infection of a new house.

Respectfully,

ELZÉAR PELLETIER,
Secretary Board of Health of the Province of Quebec.

FRANCE.

Report from Marseilles.

MARSEILLES, FRANCE, December 12, 1899.

SIR: In further compliance with Bureau order of the 14th ultimo, I have the honor to submit the following report of my visit to this city made with a view of learning the present status of the emigrant traffic from and through Marseilles, and also with special reference to the danger of the introduction of the plague into the United States through this port:

As reported by cablegram, I arrived the 7th instant, but owing to a severe cold contracted while in Southampton, and aggravated by the inclement weather met with in crossing the Channel, I was able to accomplish but little beyond conferring with the United States consul, Mr. Skinner, before the 9th instant.

I have found it extremely difficult to obtain anything like bottom facts—that is, information to one's satisfaction in the matter of my mission here, and to ascertain these only partly appears to require no end of time.

Marseilles has a population approaching close a half million of people, and in commercial importance ranks high among the maritime cities of the world. No less than 14 regular French steamship lines are attached to it, while 22 foreign lines have regular sailings from it, which places it in direct communication with all the principal sea-ports. The city is dependent almost entirely upon its maritime commerce, as the local manufacturing and other interests are of minor

importance, except the tourist travel, which during certain seasons of the year reaches large proportions. But 2 steamship lines operate between here and American ports—one, the Anchor Line, which, owing to the existing laws requiring emigrants to be carried under the French flag, does not handle any of this class of people, while the other, the Compagnie Française de Navigation à Vapeur, or popularly known as the Cyprien Fabre Line, sailing by way of Genoa, carries all emigrants taking trans-Atlantic passages from this port. This traffic is, however, relatively light as compared to some other ports visited, for only 191 people of this class were handled throughout the year 1898, and but 111 from January 1 of this year. These are principally Cyprians and Sicilians, who, I am informed, have practically no baggage or luggage, their entire personal effects being often contained in 1 large handkerchief.

There is considerable through traffic of third and fourth class (deck) passengers, who arrive here from the East and are generally sent by rail to Havre as a point of embarkation. This number, at a moderate estimate, will reach from 1,200 to 1,300 people annually. The exact figures could not be obtained as no statistics of this travel are obtainable here. These people arrive by the several lines operating from the East and seek the cheap boarding houses, which naturally are located in the old part of the city, and for the same reason the most unsanitary, and there remain until they can "book" either direct by the Cyprien Fabre Line or preferably overland to Havre and thence by the Compagnie General Transatlantique, which handles the vast majority of them.

No boarding houses are maintained by the steamship lines, as the small number would not, or do not, in their opinion justify the necessary outlay, which is not stimulated by the competition prevailing at the other ports inspected.

The steamship lines operating between here and the eastern ports, as Bombay, Calcutta, and like plague-infected places, have on board some of their steamers, portable steam chambers, or so-called "sweating rooms," where clothing, soiled linen, bedding, etc., may be exposed to steam while the vessel is en route, thus diminishing the time of detention at Frioul, the quarantine station for Marseilles. These sweating rooms are operated by officers of the steamer, and the submitting of one's effects to this process is, if deemed necessary, only compulsory as regards the belongings of the crew, while it is altogether optional on the part of all passengers whether they have their effects so treated or not.

I was desirous of ascertaining further about these sweating rooms and their management but was unable to visit the only steamer arriving from Bombay during my stop here, which performed quarantine, discharged its passengers numbering several hundred, and departed, all in the course of a few hours.

Formerly Brindisi was the port of departure and arrival for the Peninsular and Oriental Line of steamers, which are the largest carriers of the Eastern passenger traffic; but, owing to concessions from the French Government, they have practically abandoned Brindisi for Marseilles. The Italian Government, to retain this trade or a portion of it, will send a representative to Port Said to establish, as an offset to this monopoly, "sweating rooms" for the steaming of fabrics, etc., on steamers from the East bound to Brindisi, and thus lessen the time of detention of vessels in quarantine at that port. This plan, it is understood, will become effective on January 1.

Through the kindness of Dr. Antonin Catelin, director of health, I was invited to visit the quarantine station, which is controlled by the French Government, and is located on the island of Frioul, a rocky eminence about 4 miles down the bay from the city. The station is admirably situated for the reception of passengers and the disinfection of vessels, etc. It consists of an isolation station or "lazaretto" for the treatment of infectious diseases, placed at a distance of several hundred yards away from the main reception station, on an elevated plateau, and surrounding all the buildings, which are complete, each in itself, is a high wall of solid masonry; second, of a main reception station for the housing and accommodation of the first, second, and third class passengers, which consists of 2 hotels and a large barracks, all well and comfortably equipped; third, of a small hospital for suspects, and, fourth, across the basin, about one-quarter of a mile wide, a large building for the reception of passengers undergoing quarantine, bathing, and steaming of clothing, bedding, etc. The chambers, 2 in number, are about 4 by 4 by 12 feet, and are unprovided with jackets. The vacuum is obtained by means of pumps. As far as could be learned vessels are not subjected to a gaseous disinfection. The living compartments, closets, etc., if deemed necessary by the quarantine physician, are sprayed with a 5 per cent carbolic acid solution. There appears to be no disinfection of the holds of vessels in the case of yellow fever, cholera, or plague, the 3 diseases quarantined here.

Vessels arriving at Frioul, not given free pratique, are considered under the following three heads: First, indemne; second, suspect; third, infected. A vessel is held as "indemne" which comes from an infected place but has had no cases or deaths of a pestilential disease on board, before sailing, during voyage, or at the time of arrival. A vessel is considered as "suspect" which has had one or many cases, confirmed or suspected, at the time of departure or during the voyage, but having had no new cases of cholera for seven days or yellow fever or pest for nine days. A vessel is considered as "infected" which presents on board one or many cases confirmed or suspected, of a pestilential disease, or which has had on board cholera within less than seven days, or yellow fever or pest within nine days. The treatment differs but slightly according to which of the above-mentioned classes the vessel belongs, and consists of the steaming of the soiled linen, effects in use, fabrics about rooms, and of all objects and baggage which the port sanitary authorities consider as contaminated. I was unable to witness the handling of vessels at the station, as at the time of my visit none were in quarantine, and, therefore, I am unable to express an opinion as to the efficiency of the work done there.

The feeling existing in the city is one of considerable apprehension on account of the plague, owing to the extensive connections with the East and western Mediterranean ports. And indeed the city has for this reason some grounds for fear, as it is the gateway of the continent from the east and south, and has risks to run and opportunities for the importation of the plague during the coming season, unless restrictions more stringent than those which at present appear to be in force are adopted.

There are no shipments of wool or hides from India being made direct from here to the United States, as these articles are forwarded to London and Liverpool for transshipment.

I note from the Atlas, a paper published in Algiers and dated the 3d instant, that the Hamburg-American Liner *Fürst Bismarck*, which was to have landed there, proceeded direct from Gibraltar to Naples with-

out stopping at Algiers. The cause of this was the establishment of quarantine in Greece and Turkey against arrivals from Algiers and the fear of the company to see the same regulations enforced at any moment in Italy. The article further stated that an official contradiction (clipping inclosed from Paris) had been forwarded by all consuls to their respective governments concerning the nonexistence of the plague in Algeria. Rumors are extant here to some extent, in this connection, both pro and con.

As was cabled you yesterday, smallpox is epidemic in Marseilles. During the month of October there were 30 cases admitted to the hospitals, with 9 deaths. During November 500 cases were admitted to the hospitals, with 100 deaths. Vaccination, while offered free of charge and urged by the sanitary authorities, is not compulsory except in the schools. As the cases reported include only those admitted to the hospitals, it is impossible to arrive at any definite conclusion as to the extent of the epidemic, but it is safe to state that the number of cases in the city would considerably increase the figures above given.

The most dangerous part of the city, that known as the Old Port, is surrounded by a cordon; but on making a tour of observation through this section to learn something of the appearance of things, which need only to be seen to be appreciated, I was unmolested and did not see soldiers or police on guard duty.

The consul is requiring a disinfection of all rags shipped from here to the United States.

It is exceedingly important as a matter of precaution, as well as for other purposes, that a regular officer of the Service be sent here, for not only is Marseilles threatened with an invasion by the plague sooner or later, but as a point from which to collect reports relative to the existence of plague at other places, there is none better located for the purpose than Marseilles, owing to its numerous communications with a large number of ports, and it is recommended that an officer be detailed for duty here as early as practicable.

I depart to-morrow for Barcelona.

Respectfully,

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

J. A. NYDEGGER,
Passed Assistant Surgeon, U. S. M. H. S.

GIBALTAR.

Steamship Berenice with cases of plague.—Sanitary precautions.

GIBALTAR, November 28, 1899.

On the morning of the 24th instant the Austro-Hungarian steamship *Berenice* arrived off this port from Santos, Rio de Janeiro, and Praya, after a passage of thirty-five days, loaded with a general cargo, bound for Trieste, Austria. Her crew was composed of 41 individuals. She had also on board 5 passengers.

During the passage 3 of the crew and 1 passenger died from "bubonic plague." The last fatal case occurred on the 17th instant, previous to the *Berenice* reaching Praya. The bodies were committed to the sea without delay.

The Gibraltar sanitary and port authorities prohibited the *Berenice* from entering this port, and, as she was in want of fuel she kept lying, off and on, outside the entrance of this bay and cruising in the straits

until arrangements were made on shore for supplying her with 80 tons of coal, which were accomplished through the owner's agents here, by purchasing an old hulk, which they loaded with the coal, provisions, and water.

The hulk was then so placed in a position as to drift alongside of the *Berenice*. Nobody from the shore was on board of the hulk at the time the Austro-Hungarian steamer took her alongside, and after taking in the coal, etc., out of the hulk with her own crew, she proceeded to sea on the 26th instant with the empty hulk in tow, the intention being to sink or destroy the hulk on her way up the Mediterranean, if circumstances should so require.

Respectfully,

HORATIO J. SPRAGUE,
United States Consul.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

JAPAN.

*Plague in Kobe held in check.*YOKOHAMA, JAPAN, *November 30, 1899.*

SIR: I have the honor to inform you that the outbreak of plague in and about Kobe, either by the very active measures taken by the Japanese authorities, or by the increasing coldness of the weather, is being held in check. Up to this evening there have been diagnosed unmistakably 11 cases in all, of which 10 are dead.

Cases of suspected pest are reported from several other localities, generally of people who have come from Kobe or Osaka, but, so far, none of these appear to have been unquestionable, nor have they, in a single instance, initiated any local outbreak.

I am compelled to report briefly by this mail, but more detailed accounts will follow by the steamer sailing December 2.

Respectfully,

STUART ELDRIDGE, M. D.,
Acting Assistant Surgeon, U. S. M. H. S.,
Sanitary Inspector, Yokohama.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

*Quarantine regulations applied to emigrants for the United States at Yokohama.*YOKOHAMA, JAPAN, *November 22, 1899.*

SIR: I have the honor to report that in view of the outbreak of bubonic plague at Kobe (Hiogo) it has been considered expedient to take unusual precautions at this port to prevent disease reaching the United States, and that Dr. Eldridge, United States sanitary inspector, has, with my approval, issued a circular to the various steamship agents here, notifying the enforcement of Article IX of the Quarantine Regulations, relating to the segregation and detention of emigrants. A copy of the circular is herewith inclosed.

Respectfully,

JOHN F. GOWEY,
Consul-General.

Hon. ASSISTANT SECRETARY OF STATE.

[Circular—Inclosure.]

SANITARY INSPECTOR FOR UNITED STATES.
Yokohama, Japan, *November 22, 1899.*

Attention is called to the following portions of the Quarantine Laws and Regulations of the United States.

Art. V. When practicable passengers should not ship from an infected port. Steerage passengers coming from cholera-infected districts must be detained for five days in suitable houses or barracks, located where there is no danger from infection, and all baggage disinfected as hereinafter provided; the said period of five days to begin only after the bathing of the passengers, disinfection of all their baggage and apparel, removal of all food brought with them, and isolation from others not so treated.

Art. IX. At all foreign ports or places infected, or suspected of being infected with plague, the United States Quarantine Regulations of 1894, relating to cholera shall be observed with regard to vessels and cargoes bound to the United States. Passengers and crews of said vessels who have been exposed to the infection, or are liable to convey the disease, shall be detained a period of not less than *fifteen* days from the last possible exposure to infection, under the same regulations as those relating to cholera.

All concerned are hereby notified that passengers traversing an infected district, *e. g.*, Kobe at the present time, are considered as coming from an infected locality, and the

regulations will therefore apply equally to passengers coming from the southern provinces by rail to Yokohama, and those embarking on shipboard at Kobe or other infected port in that neighborhood.

In view of the facts that Hawaii is now part of the territory of the United States, and that its sanitary laws correspond in every respect to those of the latter country and are still in force, the foregoing will apply to passengers on ships bound only to Hawaiian ports as well as those on vessels touching there on the voyage to the United States.

RICHARD ELDRIDGE, M. D.,
Sanitary Inspector, U. S. M. H. S.

Concurred in.

K. ROKKAKU, M. D.,
Sanitary Inspector for Hawaii.

Approved:

JOHN F. GOWEY,
Consul-General of the United States.

PORTUGAL.

Plague in Masan.

[Cablegram.]

CADIZ, SPAIN, *December 25, 1899.*

Plague is now present in Masan, Portugal.

NYDEGGER,
Passed Assistant Surgeon.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

SPAIN.

Reports from Barcelona.

BARCELONA, *December 2, 1899.*

SIR: I have the honor to make the following report of the transactions of this office for the week ended December 2, 1899:

On December 2 the steamship *Juan Forgar* from Barcelona to Havana, Cuba, was inspected. Nineteen cabin and 30 steerage passengers were inspected and passed; 59 pieces of baggage inspected and labeled. This ship was in a fair sanitary condition. I directed some changes in regard to water-closet and hospital to make them conform to United States navigation laws.

On December 2 the steamship *Alicante* from Liverpool and Spanish ports was given a supplemental bill of health. She carried from this port 17 cabin and 20 steerage passengers. All inspected and passed by me. I have not been able as yet to obtain any reliable statistics of the mortality of this city.

I inclose a copy of a circular which was sent to the steamship companies of this port.

Respectfully,

JOHN F. ANDERSON,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure—Translated.]

BARCELONA, *November 30, 1899.*

GENTLEMEN: I have the honor to inform you that from this date the following measures will be put in force, in compliance with the sanitary regulations of the United States:

Vessels.—Every vessel which leaves this port for ports of the United States, Cuba, and Porto Rico, shall be inspected on the day of departure, by daylight, and previous

to departure, by Asst. Surg. John Anderson, of the Marine-Hospital Service, detailed to this consulate-general.

Passengers.—Passengers of the first and second class shall be examined immediately before the departure of the vessel. Passengers of the third class shall all be examined by Dr. Anderson before embarkation on the wharf or place designated by the company, at which place the baggage of the emigrants shall also be inspected. Before embarkation, each emigrant shall present to Dr. Anderson his personal certificate or other document attesting his previous domicile; without presentation of said certificate the emigrant will not receive his card of inspection.

BARCELONA, SPAIN, *December 5, 1899.*

SIR: I have the honor to report that for the week ended December 25, 1899, the following ship was inspected: On November 25, 1899, the steamship *Montserrat*, of the Compania Transatlantica, bound with passengers for ports in Cuba and Porto Rico. There were 62 cabin and 39 steerage passengers. Forty-four pieces of steerage baggage were inspected and labeled.

Respectfully,

JULIUS G. LAY,
Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

BARCELONA, SPAIN, *December 11, 1899.*

SIR: I have the honor to transmit under same cover the weekly abstract of bills of health for the week ended December 9, 1899.

The steamship *J. Jover Sena*, to New Orleans via Cuban ports, was inspected on December 7. Forty-four cabin and 94 steerage passengers were inspected and passed. This steamship carried 32 Syrians and Armenians, whom I subjected to a very close examination, especially for favus and trachoma, but passed all; 102 pieces of large and small baggage were inspected and labeled.

On the 7th the steamship *Conde Wifredo*, from Genoa via Barcelona and Cuban and Porto Rican ports to New Orleans was inspected and given a supplemental bill of health. Thirteen cabin and 9 steerage passengers were inspected and passed; 8 pieces of large and small baggage were inspected and labeled. This steamship was the dirtiest I have seen for many a day; I made them clean up, and when she finally sailed, she was in a fair condition. The passengers carried from this port are a fine class, physically, chiefly men, from 30 to 45 years of age; most of them have a considerable amount of money; but for the few Syrians and Armenians I would rate them first class.

All of these steamships stop at other Spanish ports and at the Canaries, and, I understand, take on more passengers for Cuba and Porto Rico. When they leave here they are in from fair to good condition, but I fear far from that when they arrive at their destination. I particularly desire to invite the attention of the Bureau to the fact of passengers being taken on *after leaving here*, as at Valencia, Malaga, Alicante, and the Canaries, and the possibility of diseased or disease-bearing persons being in the number.

Respectfully,

JOHN F. ANDERSON,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

*Report from Corunna.*CORUNNA, *December 9, 1899.*

SIR: I have the honor to report for the week ended Saturday, December 9, 1899.

The following vessel was inspected and cleared during the week: December 3, steamship *Madriteno*, Lazarraga, master; crew 41; passengers 138, of which 92 taken on here, carefully inspected and passed, with baggage; for Havana.

Contagious diseases in this locality during the week ended Saturday, December 2, 1899: Smallpox, 4 cases reported, and 2 deaths.

Respectfully,

JULIO HARMONY,
United States Consul.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

HAWAIIAN ISLANDS.

Plague in Honolulu.

[Cablegram.]

HONOLULU, H. I., *December 20,*
via Victoria, B. C., December 28, 1899.

There are 2 cases reported plague at Honolulu; 2 deaths December 12. No new cases to December 20. Quarantine against infection raised December 19.

CARMICHAEL, *Surgeon, U. S. M. H. S.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

FOREIGN STATISTICAL REPORTS.

AFRICA—*Cape Town.*—Month of October, 1899. Estimated population, 60,000. Total number of deaths, 197, including diphtheria, 2; enteric fever, 3; measles, 7; scarlet fever, 1; whooping cough, 3, and 37 from phthisis pulmonalis.

AUSTRALIA—*New South Wales—Sydney.*—Month of October, 1899. Estimated population, 426,950. Total number of deaths, 447, including enteric fever, 1; whooping cough, 3, and 47 from phthisis pulmonalis.

AUSTRIA—*Brunn.*—Month of October, 1899. Estimated population, 82,660. Total number of deaths, 200, including diphtheria, 1; enteric fever, 1, and 34 from phthisis pulmonalis.

BAHAMAS—*Dunmore Town.*—Two weeks ended December 8, 1899. Estimated population, 1,472. One death. No contagious diseases.

Governors Harbor.—Two weeks ended December 9, 1899. Estimated population, 1,500. Total number of deaths, 2. No contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended December 7, 1899. Estimated population, 3,900. No deaths and no contagious diseases.

Nassau.—Two weeks ended December 12, 1899. Estimated population, 12,000. Number of deaths not reported. No contagious diseases reported.

CANADA—*Province of Ontario.*—Reports to the Provincial board of health for the month of October, 1899, from 740 localities having an aggregate estimated population of 2,275,000, show a total of 1,940

deaths, including diphtheria, 34; enteric fever, 88; measles, 4; scarlet fever, 8; whooping cough, 7, and 194 from phthisis pulmonalis.

FRANCE—Nice.—Month of November, 1899. Estimated population, 108,227. Total number of deaths, 216, including diphtheria, 2; enteric fever, 6, and 26 from phthisis pulmonalis.

Roubaix.—Month of November, 1899. Estimated population, 127,086. Total number of deaths, 162, including diphtheria, 1; enteric fever, 3; measles, 10, and 1 from whooping cough.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns in England and Wales during the week ended December 2, 1899, correspond to an annual rate of 18.9 a thousand of the aggregate population, which is estimated at 11,404,408. The highest rate was recorded in Hull, viz, 25.2, and the lowest in Croydon, viz, 11.4.

London.—One thousand six hundred and ninety-five deaths were registered during the week, including measles, 43; scarlet fever, 8; diphtheria, 52; whooping cough, 15; enteric fever, 26, and diarrhea and dysentery, 7. The deaths from all causes correspond to an annual rate of 19.4 a thousand. In Greater London 2,203 deaths were registered, corresponding to an annual rate of 17.6 a thousand of the population. In the "outer ring" the deaths included 14 from diphtheria, 13 from measles, and 5 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended December 2, 1899, in the 22 principal town districts of Ireland was 24.9 a thousand of the population, which is estimated at 1,053,188. The lowest rate was recorded in Portadown, viz, 0.0, and the highest in Kilkenny, viz, 37.8 a thousand. In Dublin and suburbs 259 deaths were registered, including diphtheria, 2; enteric fever, 6; measles, 29; 2 from scarlet fever, and 1 from whooping cough.

Scotland.—The deaths registered in 8 principal towns during the week ended December 2, 1899, correspond to an annual rate of 20.5 a thousand of the population, which is estimated at 1,587,414. The lowest mortality was recorded in Leith, viz, 17.5, and the highest in Greenock, viz, 29.0 a thousand. The aggregate number of deaths registered from all causes was 625, including diphtheria, 3; measles, 34; scarlet fever, 6, and whooping cough, 6.

JAMAICA—Kingston.—Month of November, 1899. Estimated population, 34,314. Total number of deaths, 99, including 8 from phthisis pulmonalis.

NORFOLK ISLAND.—Month of September, 1899. Estimated population, 846. One death; no contagious diseases.

Month of October, 1899. One death; no contagious diseases.

SWITZERLAND.—Reports for the two weeks ended November 11, 1899, from 15 cities and towns having an aggregate estimated population of 670,000, show a total of 384 deaths, including diphtheria, 4; enteric fever, 3; scarlet fever, 1; whooping cough, 3, and 48 from phthisis pulmonalis.
