PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General United States Marine-Hospital Service.]

Smallpox in Georgia.

In response to a telegram from the governor of Georgia, Asst. Surg. W. C. Hobdy was ordered to proceed to Thomson, Ga., to confer with and advise the local health authorities as to the best methods of preventing the spread of the disease. He reports as follows:

SAVANNAH, GA., June 1, 1901.

SIR: I have the honor to make the following brief report concerning the epidemic of smallpox at Thomson, Ga. The epidemic began not at this place but in a rural community near a small village called Dearing, about 9 miles east of Thomson, and has the following history: On or about January 1, 1901, a young negro man of this vicinity returned to his home from a tie farm in the southern part of Georgia. He was ill at the time. Four days later he broke out with an eruption called "negro mange" or "elephant itch." His home was within 200 yards of a negro schoolhouse, and three or four of his younger brothers and sisters attended school there. They next succumbed to the same disease, the school teacher quickly followed, and the disease soon spread to the homes of every family represented in the school.

Four pregnant women were attacked, 1 white, 3 colored. All of the latter aborted and all died. The authorities at Thomson were skeptical of the above diagnosis, but took no active steps in the matter until eight or ten weeks ago, when 5 cases, all colored, occurred within the city These were promptly recognized and isolated, the suspects detained under guard for observation, and compulsory vaccination practiced among the negroes. No new cases occurred, though thirtyseven days had elapsed since the occurrence of the last case. Men were then sent into the region of the epidemic and all the colored population that could be caught were vaccinated, but the proceeding was met with such bitter opposition on the part of the white element that an outside opinion was asked for before forcing the matter. The health authorities felt this was all the more necessary for the reason that the disease had only recently begun to occur among the whites. On my arrival at Thomson I drove immediately across country to Dearing, where, it was reported, 2 little girls had the disease. Five were found in 1 family, 4 little girls and their father, all suffering with smallpox. Three of the children were just about well, the oldest had progressed to about the fifteenth day, and all had had the disease in a mild form except the father, who was about the tenth day, and had a moderately severe form of the disease with not one symptom wanting. These were the only

recent cases seen, but several were observed, all colored, who were pitted and still had the spots of discoloration left by the pustules.

The physician of the place stated that the cases which he had seen had been of about the same grade of severity as that of the father above mentioned, and estimated the total number at 500, while the health authorities at Thomson think 300 more nearly correct. Later, at a conference with the mayor, health authorities, and physicians, I advised universal vaccination, isolation of cases, detention of suspects, and the necessary disinfection.

W. C. HOBDY, Respectfully, Assistant Surgeon, U.S. M. H.S.

Smallpox on steamship Senator at Port Townsend.

QUARANTINE STATION, Port Townsend, Wash., May 25, 1901.

SIR: Referring to smallpox on the steamship Senator, on the Alaska

run, I have the honor to report the following:

The steamer left Seattle Tuesday night, April 30, 1901. One of the second-class passengers, a girl, was sick on embarking. On Wednesday the rash appeared. The girl was occupying a stateroom apart from the second-class passengers, who were practically steerage, and a certain amount of isolation was maintained from the start. On Thursday the boat arrived at Wrangle, where the case was pronounced smallpox by a local physician. The vessel proceeded to Juneau, where Acting Assistant Surgeon Leonhardt confirmed the diagnosis, isolated the case completely on board with an immune nurse and the father and mother, and remanded the vessel to this station, vaccinating as many of the crew and passengers as he had points, no passengers being permitted to land. The vessel arrived here Wednesday, May 8. The complete personnel was vaccinated, the steerage passengers and crew bathed, and their clothing disinfected. As the cabin passengers had only been exposed on the open deck for a brief period, after vaccination and disinfection of clothing actually worn abroad, they were permitted to depart, and also the deck department of the crew and the firemen. The vessel, after disinfection of infected portions, was released at the same time. The second-class passengers, the officers of the engineer department, who had slept in the rooms adjoining the one occupied by the girl, the steward's department, with the captain, who were more or less exposed to the disease, were detained fourteen days. During the period of detention, 4 more cases occurred among the second-cabin passengers.

It is an interesting fact, from the standpoint of a quarantine officer, that the first case among those detained occurred in a boy who had slept in a room quite removed from the case, and whose only direct exposure, as far as can be learned, was during one meal on Wednesday, May 13. The contraction of the disease after so slight an exposure is rather unusual. The other 3 cases were the father, the mother, and the uncle, which was to be expected from their association with the first

The second-class passengers were discharged to-day with the remaining members of the crew. The original case is convalescent and none from the Senator was very severe.

The isolation of the case on board after its discovery at Wrangle and confirmation at Juneau was very complete, and deserves particular commendation.

Respectfully,

M. H. FOSTER, Assistant Surgeon, U. S. M. H. S.

Smallpox in Los Angeles, Cal.

Los Angeles, Cal., May 22, 1901.

SIR: I have the honor to report that 25 cases of smallpox have developed in this city during the past four weeks, making a total of 50 cases since January 1. The latest outbreak of the disease has been chiefly confined to the Mexican quarter of the city. The type of the disease is now, as heretofore, very mild; in fact, so mild that in many cases a diagnosis would be difficult but for the presence of other cases in direct contact, with undoubted symptoms of smallpox. The experience here is similar to that in other portions of the country where smallpox prevails, in that a diagnosis of smallpox is rarely made by the attending physician, who is not handling cases of smallpox frequently, until the infection has spread to other inmates of the house and neighborhood. Likewise, it has been the experience with the disease in Los Angeles that only those who are not vaccinated, or were never successfully vaccinated, take smallpox. In spite of this universal experience, there seems to be the same indifference to the necessity of vaccination that is remarked elsewhere.

Respectfully,

HILL HASTINGS, Assistant Surgeon, U. S. M. H. S.

Smallpox in San Francisco.

SAN FRANCISCO, CAL., May 23, 1901.

SIR: I have the honor to report a case of smallpox in the person of a young adult male, aged 22 years; nativity, England; who applied for relief at this hospital May 22, 1901. He presented a discharge certificate from the U. S. Army transport *Thomas*, showing service from December 15, 1900, to April 18, 1901, since which period he has been living ashore at a sailors' boarding house.

In compliance with the municipal law, the board of health was immediately notified. They removed the patient promptly to the city pesthouse after their expert had confirmed our diagnosis. The offices visited by the patient at this station were disinfected and those who had come in contact with him vaccinated. No spread of the disease from this case is anticipated. It is of interest that the patient stated he was vaccinated some months ago for the first time, but a careful inspection failed to discover a scar.

Respectfully,

JAMES M. GASSAWAY, Surgeon, U. S. M. H. S., In Command.

Smallpox in St. Louis, Mo.

ST. LOUIS, Mo., May 27, 1901.

SIR: I have the honor to state that there were 27 new cases of small-pox and no deaths reported in this city for the week ended May 26, 1901.

Respectfully, Wm. G. STIMPSON,

Passed Assistant Surgeon, U. S. M. H. S., In Command.

Smallpox in Aberdeen, Wash.

HOQUIAM, WASH., May 21, 1901.

SIR: I have the honor of reporting the appearance of smallpox in a mild form in our neighboring city Aberdeen. Four cases now in pesthouse, and 18 persons quarantined in their homes. The health officer of Aberdeen informs me this morning that there would be no trouble as to the further spreading of the disease, as they had the infected locality thoroughly quarantined and were using great caution to prevent any further infection.

Respectfully,

T. C. FRARY,

Acting Assistant Surgeon, U.S. M. H.S.

Smallpox in Rhode Island.

PROVIDENCE, R. I., May 29, 1901.

SIR: In accordance with the resolutions adopted by the national conference of State and provincial boards of health, it becomes my duty to inform you that 11 new cases of smallpox exist in this State, 9 cases of which are in 1 family. Those affected are all employees of the cotton mills. The origin of the disease is unknown.

Respectfully,

GARDNER T. SWARTS, Secretary State Board of Health.

Arrival at Reedy Island Quarantine of vessels from Mexican and West Indian ports.

REEDY ISLAND QUARANTINE, via Port Penn, Del., May 26, 1901.

SIR: Through the medical officer in command of national quarantine service on Delaware River and Bay I have the honor to report the arrival at this station of the following vessels: May 21, 1901, Norwegian steamship Alfred Dunois, from Gibara, with fruit; no passengers; bill of health signed by Acting Asst. Surg. S. Gomez; British steamship Georgian Prince, from Havana, with molasses; no passengers; bill of health signed by Surgeon Glennan. May 22, 1901, Danish steamship Tyr, from Banes, with fruit; no passengers; bill of health signed by Acting Asst. Surg. Benjaminde Zayas. May 23, 1901, British steamship Manar, from Santiago, with ore; no passengers; bill of health signed by Assistant Surgeon Von Ezdorf. May 24, 1901, American schooner W. R. Chester, from Baracoa, with fruit; no passengers; bill of health signed by Acting Asst. Surg. Lores Llorens.

Respectfully, T. F. RICHARDSON,
Assistant Surgeon, U. S. M. H. S., In Command.

Statistical reports of States and cities of the United States-Yearly and monthly.

Iowa—Dubuque.—Month of April, 1901. Census population, 36,297. Total number of deaths, 37, including enteric fever, 1; scarlet fever, 1; whooping cough, 1, and 3 from tuberculosis.

MASSACHUSETTS—Fitchburg.—Month of April, 1901. Census population, 31,531. Total number of deaths, 34, including smallpox, 1, and 2 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended May 25, 1901, from 91 observers, indicate that inflammation of bowels, cholera morbus, remittent fever, and scarlet fever were more prevalent and intermittent fever and smallpox less prevalent than in the preceding week. Cerebro-spinal meningitis was reported present at 4, whooping cough at 19, diphtheria at 17, enteric fever at 31, measles at 34, scarlet fever at 70, phthisis pulmonalis at 127, and smallpox at 176 places.

OHIO—Cleveland.—Month of April, 1901. Estimated population, 395,000. Total number of deaths, 493, including diphtheria, 7; enteric fever, 14; scarlet fever, 3; whooping cough, 1; smallpox, 6, and 41 from tuberculosis.

Columbus.—Month of April, 1901. Estimated population, 140,000. Total number of deaths, 130, including scarlet fever, 6; whooping cough, 2, and 24 from tuberculosis.

Toledo.—Month of April, 1901. Estimated population, 150,000. Total number of deaths, 149, including diphtheria, 5; enteric fever, 5; scarlet fever, 1, and 17 from tuberculosis.

Washington—Seattle.—Month of March, 1901. Estimated population, 90,000. Total number of deaths, 74, including diphtheria, 1; measles, 1, and 10 from tuberculosis.

Month of April, 1901. Total number of deaths, 77, including enteric fever, 2; scarlet fever, 2, and 6 from tuberculosis.

WISCONSIN—*Milwaukee*.—Month of April, 1901. Estimated population, 295,000. Total number of deaths, 323, including diphtheria, 9; enteric fever, 5; scarlet fever, 1, and 42 from tuberculosis.

Respectfully,

Assistant Under Colonial Secretary.

The DEPUTY CONSUL-GENERAL FOR THE UNITED STATES.

BRAZIL.

Rio de Janeiro-Yellow fever and smallpox.

RIO DE JANEIRO, BRAZIL, April 26, 1901.

SIR: I have the honor to transmit the official sanitary report for April 1 to April 15, inclusive.

There were 603 deaths from all causes, being at the rate of 40.20 per diem and corresponding to an annual death rate of 18.58 per 1,000 against 35.37 and 16.23 per 1,000 during the foregoing fortnight.

The number of deaths in regard to infectious and contagious diseases was as follows: Tuberculosis, 101 against 125; yellow fever, 31 against 42; smallpox, 5 against 9; beriberi, 6 against 5; influenza, 6 against 0; typhoid fever, 1 against 4; dysentery, 3 against 6; scarlet fever, 0 against 1; malarial fevers, 46 against 44.

There were 631 births—that is, an average of 42.06 per diem, corre-

sponding to an annual birth rate of 19.36 per 1,000.

Respectfully, W. HAVELBURG,

Acting Assistant Surgeon, U.S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

BRITISH HONDURAS.

Report from Belize—Fruit port.

BELIZE, BRITISH HONDURAS, May 19, 1901.

SIR: I have the honor to submit report for week ended May 18, 1901. The following vessels have cleared from this port:

Date.	Vessel.	Master.	Number of crew.	Destination.	Number of pas- sengers from Belize.	Number of pas- sengers in tran- sit.		Number of pieces baggage disin- fected.
May 17	Ss. Anselm		39	New Orleans .	5	6	11	13
May 18	Ss. Esther		19	do	0	0	0	0

The sanitary conditions of this port and the adjacent country are good. Eight deaths during the week, as follows: One from acute myelitis; 1 from acute enteritis; 1 from umbilical hemorrhage; 1 from chronic dysentery; 1 from splenitis; 1 from heart failure; 1 from tetanus, and 1 from broncho-pneumonia.

Inclosed find triplicate of certificates issued to vessels and duplicates of certificates issued to passengers.

Respectfully,

J. GREY THOMAS,

Acting Assistant Surgeon, U.S. M. H. S.

The SURGEON-GENERAL,

U. S Marine-Hospital Service.

CANADA.

Inspection of immigrants at Quebec.

QUEBEC, CANADA, May 25, 1901.

SIR: I have the honor to report that for the week ended May 25 there were inspected 388 steerage passengers; passed, 378; cause of detention, hernia, 8; trachoma, 2; favus, 2.

Respectfully,

VICTOR G. HEISER, Assistant Surgeon, U. S. M. H. S.

The Surgeon-General, U. S. Marine-Hospital Service.

COLOMBIA.

Report from Bocas del Toro—Fruit port.

BOCAS DEL TORO, COLOMBIA, May 22, 1901.

SIR: I have the honor to submit herewith the following report of the transactions at this station for the week ended May 21, 1901, inclusive: The following vessels have cleared from this port during the week: May 15, Norwegian steamship John Wilson, Hansen, master; crew, 17; no passengers; for Mobile, Ala. May 17, Norwegian steamship Bodo, Johannesen, master; crew, 16; no passengers; for Mobile, Ala. May 18, Norwegian steamship Harald, Halvorsen, master; crew, 17; no passengers; for Mobile, Ala. May 19, Norwegian steamship Banes, Tronstad, master; crew, 16; no passengers; for Mobile, Ala.

The health of this place and the surrounding subports in the lagoons

is good.

Respectfully,

PAUL OSTERHOUT,

Acting Assistant Surgeon, U.S. M. H.S.

The Surgeon-General,

U. S. Marine-Hospital Service.

Report from Panama—Good rains and improved water supply.

PANAMA, COLOMBIA, May 9, 1901.

SIR: I have the honor to write that since my dispatch No. 168, of April 29, there have occurred excellent rains in and around Panama and the water supply is now very good. However, as I mentioned in the above-named dispatch, up to the 2d instant conditions had a very serious aspect and the rains of late have been the means of averting an impending water famine.

Respectfully,

FRANCIS GUDGER, Vice Consul-General.

Hon. Assistant Secretary of State.

COSTA RICA.

Report from Port Limon-Fruit port-Yellow fever in Liberia.

PORT LIMON, COSTA RICA, May 25, 1901.

SIR: I have the honor to submit this, my weekly report. The following 6 ships have been inspected and cleared for New Orleans: May 17, steamship *Hispania*, crew, 22. May 18, steamship *Stillwater*, crew, 32. May 23, steamship *Beverly*, crew, 39. May 24, steam tug *Wilmot*, hav-

June 7, 1901 1287

ing in tow the barge Atlas, the former with crew, 25, the latter crew, 12. May 25, steamship Holstein, crew, 21.

None carried passengers, and triplicates of certificates given their masters are herewith inclosed. May 20, cleared, steamship Athos, for

New York with 6 passengers.

Five deaths were reported in Port Limon for the week ended May 19, 1901, viz, 1 American, white male adult, of abscess of liver; 1 negro child, congestion of the brain; 1 negro infant, cholera infantum; 1 negro adult male, inanition; 1 native of Colombia, male, hepatitis.

The general health of the port and immediate vicinity is fairly good,

and I know of no quarantinable disease here present.

The disinfecting steam apparatus belonging to the United Fruit Company, of the Kinyoun-Francis pattern, has been put in readiness for serv-I am still using formaldehyd on the laborers' clothing, awaiting directions from the Bureau.

No passengers are now being taken by the fruit companies for southern ports of the United States. An official report to the Costa Rican national authorities, by an expert physician of their selection, tells of the prevalence of yellow fever at Liberia, a city of about 6,000 inhabitants, in the Pacific coast province of Guanacaste, Costa Rica. Liberia is not far from the Pacific coast and while somewhat elevated is in what is known as the "hot lands."

Communication between Liberia and San José, the western terminus of the railroad from Port Limon is, fortunately, limited and difficult. D. W. GOODMAN,

Respectfully,

Acting Assistant Surgeon, U.S. M. H.S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

CUBA.

Reports from Cienfuegos, Casilda, and Santa Cruz del Sur.

CIENFUEGOS, CUBA, May 27, 1901.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit the following report for the district under my command, for the period from May 19 to May 25, 1901, inclusive: Sixteen No contagious diseases reported. deaths have occurred in this city. Death rate per 1,000 inhabitants, 20.85.

The following shows cause of death, and of the total number, 5 occurred in the civic hospital, this city: Mitral insufficiency, 3; old age, 2; tuberculosis, 2; enteritis, 2; erysipelas, 1; tetanus, traumatic, 1; paludism, 1; wounds, 1; embolism, 1; heart disease, 1; sclerosis,

arterial, 1.

Nine vessels have been inspected and passed, granted pratique; 14 bills of health issued vessels leaving Cienfuegos; 1 alien steerage passenger inspected and allowed to land; 181 health certificates issued passengers leaving Cienfuegos; 65 pieces of baggage leaving Cienfuegos, inspected and passed; 149 pieces of baggage disinfected previous to embarkation; 10 pieces of baggage, destination Manzanillo and Santiago, from Havana, labeled to be disinfected at port of destination; steamship Miguel M. Pinillo disinfected previous to departure for New Orleans.

Casilda.—Acting Asst. Surg. Alejandro Cantero reports 4 deaths in the city of Trinidad during the week. No contagious diseases reported. Health of city excellent. Nine vessels inspected and passed; 7 bills of

health issued vessels leaving Casilda.

Santa Cruz del Sur.—Acting Asst. Surg. Juan R. Xiques reports no deaths in that port during the week. No contagious diseases reported. Health of vicinity excellent. Five vessels inspected and passed; 4 bills of health issued vessels leaving that port.

Respectfully,

E. F. McConnell,

Acting Assistant Surgeon, U. S. M. H. S., In Temporary Charge.

The Surgeon-General,

U. S. Marine-Hospital Service.

Inspection of immigrants at Cienfuegos during week ended May 25, 1901.

CIENFUEGOS, CUBA, May 27, 1901.

SIR: I herewith submit report of alien steerage passengers at this port during the week ended May 25, 1901: May 19, steamship *Miguel M. Pinillo*, from Barcelona, with 1 immigrant.

Respectfully,

E. F. McConnell,

Acting Assistant Surgeon, U.S. M. H. S., In Temporary Charge.

The Surgeon-General,

Reports from Matanzas, Cardenas, Isabela de Sagua, and Caibarien.

MATANZAS, CUBA, May 21, 1901.

SIR: I have the honor to submit herewith the following sanitary report of the quarantine district under my command for the week ended May 18, 1901:

Matanzas.—Ten deaths occurred in the city of Matanzas during the period covered by this report, showing a mortality of 11.52 per 1,000. The principal causes of deaths were as follows: Tuberculosis, 3; malarial fever, 2; enteritis, 1; heart disease, 1; tetanus, infantile, 1; senil-

ity, 1; nephritis, 1. No case of disease of an infectious or contagious character was reported during the week. Ten vessels arrived during the week; 9 of these were inspected and passed and 1 passed without inspection. Nine bills of health were issued to vessels leaving this port. Forty-six health certificates were issued to persons leaving the island. Twenty pieces of baggage were inspected and passed. By the request of the chief surgeon of the San Nicolas Hospital, 2 bundles of bedding were disinfected. The American schooner Wave, bound for Key West, Fla., and the Spanish steamship Santanderino, bound for New Orleans, were disinfected at this port on May 14 and 18, respectively.

Cardenas.—Acting Asst. Surg. Enrique Saez reports that 7 deaths occurred in Cardenas during the week, from the following causes: Cerebral apoplexy, 2; heart disease, 1; dysentery, 1; meningitis, 1; tetanus, infantile, 1; Bright's disease, 1. No case of disease of an infectious or contagious character was reported. The death rate during the week was 14.70 per 1,000. Thirteen vessels arrived during the week, 8 of these were inspected and passed and 5 passed without inspection.

Twelve bills of health were issued during the week.

Isabela de Sagua.—Acting Asst. Surg. Pedro Garcia Riera reports that 2 vessels were inspected and passed on arrival and 8 passed without inspection. Thirteen bills of health were issued to vessels leaving the

port.

Caibarien.—Acting Asst. Surg. Leoncio Junco reports that the sanitary condition of the port and town is good. The death rate during the week was 1.34 per 1,000. Seven vessels were passed without inspection on arrival. Seven bills of health were issued to vessels during the week.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U.S. M. H. S.

DENMARK.

Sanitary regulations governing vessels entering Danish ports.

WASHINGTON, D. C., May 22, 1901.

SIR: I have the honor to inclose for your information a copy of a dispatch from the minister to Denmark transmitting the text of an order of the ministry of justice relative to sanitary regulations to be observed by vessels entering Danish ports.

Respectfully,

DAVID J. HILL,

Acting Secretary.

Hon. SECRETARY OF THE TREASURY.

[Inclosure.]

COPENHAGEN, May 7, 1901.

SIB: Referring to my unnumbered dispatch of August 29, 1900, transmitting 2 copies of the law of July 2, 1880, as revised, relative to sanitary measures against the introduction of contagious diseases into Denmark, I have the honor to inclose herewith a copy, together with a translation, of an order by the ministry of justice, dated December 18, 1900, containing regulations adopted pursuant to said law.

Respectfully, Hon. SECRETARY OF STATE. LAURITS S. SWENSON.

"DECEMBER 18, 1900.

"Section 1. Steamships in the regular service that arrive from foreign ports or that on the ocean have received persons or goods from such ships are, in case they carry no persons affected with diseases that may be suspected of being contagious, nor corpses of persons having died from such diseases, exempted from giving notice required in accordance with paragraph 1, of the law of July 2, 1880, as revised, provided the captains of such ships at the place of anchorage, before communicating with land, furnish the following written certificate to the custom-house authorities:

'I, the undersigned, captain of ______, coming from _____, hereby certify that there are not on board of my ship any persons affected with a contagious disease or any corpses of persons having died from such a disease.'

[&]quot;REGULATIONS BY DANISH MINISTRY OF JUSTICE, PURSUANT TO LAW OF JULY 2, 1880, AND IN ACCORDANCE WITH SAID MINISTRY'S DECREE OF MAY 14, 1900, REGARDING SANITARY REGULATIONS TO BE OBSERVED BY SHIPS ARRIVING FROM FOREIGN PORTS.—TRANSLATION.

Sec. 2. If persons affected with diseases that may be suspected of being contagious, or if corpses of persons having died from such diseases, are found on board, the ship is permitted, before giving notice, to lie alongside the pier and land the passengers that are well, whereupon the captain must give notice without delay, especially before any

sick person or corpse is landed.
"Sec. 3. The concessions contained in paragraphs 2 and 3 will not be made when the ships in question arrive from or have communicated with places concerning which the notice provided for in chapter 2 of the decree of May 14, 1900, has been published, or when they have come in contact with such ships, or come within the provisions of paragraph 13, second part, or paragraph 26, second part, of the above-mentioned decree.

Sec. 4. Danish men-of-war that have a physician on board are exempted from the

notice provided for in paragraph 1 of the decree of May 14, 1900.

"Such ships are also exempted from the medical examination required in accordance with paragraph 2 of said decree, on condition, however, that the ship's physician furnishes the medical examiner in question the necessary information. The regulations prescribed in consequence of such information shall be reported to the captain. If the ship in question is affected by paragraph 3, as above, the captain shall observe the regulations contained in the decree of May 14, 1900, in as far as they are applicable.

"Sec. 5. Captains of pilot boats, revenue cutters, towboats, fishing boats, and crafts of less than 12 tons, coming from foreign countries, are, when not carrying passengers, exempted from the notice mentioned in paragraph 1 of the decree of May 14, 1900,

until further notice.

"The MINISTRY OF JUSTICE.

"Goos."

ENGLAND.

Reports from London—Smallpox in London, Glasgow, and Belfast—Plague in Cape Town.

LONDON, ENGLAND, May 18, 1901.

SIR: I have the honor to report that the health of London and England remains good. During the week ended May 11, there was 1 death from smallpox in London, and during the same period there was also 1 in Glasgow. The number of cases of smallpox in Glasgow continues to diminish, but a few cases continue to occur. Up to May 14 there had been 5 cases of smallpox with 1 death in Belfast, Ireland.

During the week ended May 11 there were in Cape Town 38 cases of plague with 25 deaths. It is believed that the maximum of the epidemic there has been reached, and that the number of cases will continue to grow less. But there can be no doubt that the infection of Cape Town has been very general. Since the beginning of the out-

break there has been a total of 610 cases and 275 deaths.

Respectfully,

A. R. THOMAS,

Passed Assistant Surgeon, U.S. M. H.S.

The SURGEON-GENERAL,

U.S. Marine-Hospital Service.

Apparent transmission of smallpox by fomites.

LONDON, ENGLAND, May 16, 1901.

SIR: I have the honor to report the following case of apparent transmission of smallpox by formites: This occurred in a Mormon mission at Nottingham, and the only possible source of infection seems to have been through the mails received from Salt Lake City, where smallpox is said to have existed among the Mormons at the time of its outbreak here. The argument is strengthened by the fact that the disease is of the same mild type that has been prevalent in the United States for the past few years.

It was also recently reported in the British Medical Journal that an outbreak of smallpox had occurred in Kalamazoo, Mich., which could

be traced to a letter received from Alaska and written by an infected person.

Respectfully,

A. R. THOMAS,

Passed Assistant Surgeon, U.S. M. H.S.

The Surgeon-General, U. S. Marine-Hospital Service.

GERMANY.

Report from Berlin—Plague in various countries—Cholera in British East India.

BERLIN, GERMANY, May 18, 1901.

SIR: I have the honor to submit the following information obtained from the imperial health office:

Plague.

TURKEY.—In Bassora, according to a supplementary communication of April 26, 3 persons have been taken sick with symptoms suspicious of plague, and have been strictly isolated in the hospital. In the house of the first 2 persons dead rats were discovered. The patients had not left Bassora for a long time and had never been in contact with any suspected plague patients. The rooms which these patients had occu-

pied were at once disinfected and closed up.

The man taken sick in Galata on April 30 has been removed to the hospital of Monastir-Aghazi near Kawak at the exit of the Bosphorus to the Black Sea. The 2 houses where the man had stopped were subjected to a thorough disinfection, as well as the drains of the same, and the neighboring district. In the factory in which the sick man had worked, the various goods were all destroyed and steps were taken to kill all the rats in the building. According to a communication of May 2, the investigations regarding this plague case have not led to any definite explanation as to its origin. The treatment with plague serum seems to be having good results.

British East India.—In the Presidency of Bombay, during the week ended April 12, there were 1,947 new plague cases and 1,632 deaths—that is to say, 172 cases and 127 deaths more than in the foregoing week. In Karachi an increase of the disease has again occurred. In the same week 230 fresh plague cases and 209 deaths were reported from that place. In the city of Bombay, during the week ended April 13, 771 new cases and 715 deaths of plague were reported; besides these, of the total 1,762 deaths in the city, a further 492 were entered as

suspected plague.

CAPE COLONY.—In the course of the weeks ended on April 6 and April 13, respectively, there were 62 and 43 patients taken to the plague hospital, Cape Town, namely, 20 and 12 Europeans, 29 and 30 colored people, and 13 and 1 natives. After 31 and 22 plague patients had died and 25 and 34 had been discharged as cured, the number of plague patients still under treatment on April 13 amounted to 116, among these being 40 Europeans. As suspicious, on the same date, 5 persons were under observation, after 10 of those who had been designated as suspicious had, during the course of the two weeks, developed plague symptoms. In the military hospital on April 10 there were 38 plague patients, partly soldiers and partly workmen, under special treatment.

In the contact camps on April 13 there were still 745 persons under observation, as they had been in contact with plague patients. In 8 of

the people so watched, the disease had developed during the two last weeks.

The plague cases among the natives have lately been less numerous, on the whole, and the plan of keeping them apart in the "locations" would seem to have already had good results. On April 10 it is stated that more than 6,000 Kaffirs were accommodated in these "locations."

The quarantine relations of the harbor of Cape Town have been rendered more strict in so far that from April 15 no unvaccinated person is allowed to enter the docks. Furthermore, it has been ordered that troops arriving from other countries shall no longer be landed in Cape Town harbor, but at other ports. The traffic between Cape Town and St. Helena is suspended. On the other hand Cape Town has not been declared as infected, so far as the other ports in South Africa are concerned.

According to a communication of April 17, during the cleaning and disinfection work in almost all the houses in Cape Town in which plague cases have occurred, on taking up the boards a large number of dead rats have been found, which, on being subjected to a bacteriological examination, showed the presence of the plague bacillus. According to a publication of the port authorities 5,446 rats have been killed in the Cape Town docks. In the docks of Port Elizabeth a large number of dead rats, dead from the plague, have been discovered.

QUEENSLAND.—In the week from March 24 to March 30, a case of plague has occurred in the neighborhood of Brisbane.

Cholera.

BRITISH EAST INDIA.—In the period from March 31 to April 6, 68 persons have died of cholera, in Calcutta.

Respectfully,

FRANK H. MASON, Consul-General.

The SURGEON-GENERAL, U. S. Marine-Hospital Service.

Clipping from Berlin Tageblatt translated and forwarded from Consulate-General of the United States.

BERLIN, GERMANY, May 20, 1901.

The children born in Berlin show a considerably lower mortality during the last ten years than those moved here from other parts, whilst the mortality of the population in Berlin shows but a very small deviation from that of the total population. The cause of this is that from the ages of 20 to 60 the mortality of those born outside of Berlin is very much lower, which affects the total results.

HONDURAS.

Report from La Ceiba-Fruit port.

LA CEIBA, HONDURAS, May 22, 1901.

SIR: I have the honor to submit report of the transactions at this station for the week ended May 18, 1901.

Four vessels have been inspected and cleared for the United States: May 16, auxiliary schooner *Marie Cooper*, La Penotiere, master; crew, 6; Tampa, Fla.; Steamship *Dudley*, Andersen, master; crew, 18; Mobile, Ala. May 17, steamship *Usk*, Hurry, master; crew, 20; New

Orleans, La. May 18, steamship *Adria*, Rasmussen, master; crew, 15; Mobile, Ala.

1295

The health and sanitary condition of La Ceiba and adjacent country

continue good.

Respectfully,

R. H. PETERS,

Acting Assistant Surgeon, U.S. M. H. S.

The Surgeon-General,

U. S. Marine-Hospital Service.

Reports from Puerto Cortez-Fruit port.

PUERTO CORTEZ, HONDURAS, May 7, 1901.

SIR: I have the honor to report the happenings at this port for the week ended May 7. Health conditions continue good. Certificates for steamers' dispatches inclosed. May 8, steamship 8. Oteri, De Luca; 7 passengers; crew, 35; cargo, tropical fruit; baggage disinfected, 9 pieces; destination, New Orleans. May 10, steamship Bratten, Holm; crew, 15; passengers, none; cargo, tropical fruit; destination, Mobile. May 11, steamship España, Danielson; crew, 14; passengers, 3; cargo, tropical fruit; destination, Mobile, direct; steamship Foxhall, Larsen; crew, 25; passengers, none; cargo, tropical fruit; destination, Mobile, direct. May 12, steamship Dudley, Andersen; crew, 18; passengers, none; cargo, tropical fruit; destination, Mobile via La Ceiba.

Respectfully,

SAMUEL HARRIS BACKUS, Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

PUERTO CORTEZ, HONDURAS, May 21, 1901.

SIR: I have the honor to hereby make my report for the week ended May 21. The health conditions of this port remain excellent. No deaths for the week. List of steamships dispatched from this port

during above time is as follows:

May 15, steamship Stillwater, Galt, American; arrived May 14 from New Orleans; crew, 31; passengers, none; cargo, tropical fruit; all in good sanitary condition; destination, New Orleans via Port Limon. May 15, steamship Anselm, Brown, British; arrived May 14 from New Orleans; crew, 32; passengers, 8; cargo, tropical fruit; number of pieces baggage disinfected, 26; destination, New Orleans via Belize. May 16, steamship Habil, Gudmansen, Norwegian; arrived from New Orleans May 14; crew, 15; passengers, none; cargo, tropical fruit; destination, New Orleans, direct. Proper ship and passenger certificates inclosed.

Respectfully,

SAMUEL HARRIS BACKUS, Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

ITALY.

Report from Naples-Smallpox and typhus.

NAPLES, ITALY, May 20, 1901.

SIR: I have the honor to report that for the week ended May 19, 1901, the following ships were inspected:

On May 15, the steamship Archimede, of the Italian General Naviga-

tion Company, bound with passengers and cargo for New York. There were inspected and passed 872 steerage passengers and 150 pieces of large and 950 pieces of small baggage. Four hundred and twenty-six pieces of baggage were disinfected by steam. On May 15, the steam-ship Britannia, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 654 steerage passengers and 58 pieces of large and 800 pieces of small baggage. Three hundred and sixty pieces of baggage were disinfected by steam. On May 16, the steamship Aller, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 766 steerage passengers and 152 pieces of large and 1,048 pieces of small baggage. Two hundred and eighty-seven pieces of baggage were disinfected by steam.

Smallpox.

There were officially reported in Naples for the week ended May 10, 1901, 114 cases of smallpox, with 25 deaths.

Typhus.

A number of mild cases of typhus fever have been reported at Naples lately. Ten cases are officially recorded for the week ended May 12, 1901, and 9 cases for the week ended May 19, 1901, with no deaths. In February there was a small epidemic of this disease at Succivo and Cesa. In March, a person from Caivano, which is a rural district near Succivo and Cesa, was taken ill with typhus in the Mercato section of Naples. The typhus that has recently occurred in Naples is traceable to this case. The disease has been confined to two narrow streets, known as the Vico Acetillo and the Vico Campagnari. There are no centers of infection in other parts of the city. No case has presented itself up to date in any lodging house or emigrant tenement.

Cases of typhus are also reported to day at St. Angelo dei Lombardi and the immediately surrounding country. Any emigrants from that neighborhood who may present themselves for embarkment will be carefully examined as to their condition and recent whereabouts, and if there is a suspicion of exposure they will not be allowed to embark for at least fourteen days after such exposure, and the disinfection of their baggage, as required by Article \mathbf{V}_2 paragraph 4, quarantine regulations

to be observed at foreign ports and at sea.

Respectfully,

J. M. EAGER,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

MEXICO.

Report from Progreso—Sanitary condition good.

PROGRESO, MEXICO, May 12, 1901.

SIR: I have the honor to make the following report for the week ended May 11, 1901:

Of the 4 deaths that occurred at this port, 1 was from malarial fever,

1 from pneumonia, 1 from enteritis, and 1 from influenza.

The town is free from all infectious and contagious diseases at present, and is liable to remain so unless there is an influx of nonimmune material.

The smallpox in and about Merida grows gradually less every day,

but the disease is being constantly reported as epidemic in the villages further back in the interior.

There is little or no communication between Progress and the interior villages. The passengers from here are as a rule composed of the better class of people, people wealthy enough to travel about for pleasure. Like others of that class they are generally healthy, clean, and take all precautions to prevent sickness, and keep out of quarantine.

Respectfully,

S. H. Hodgson,

Acting Assistant Surgeon, U.S. M. H. S.

The SURGEON GENERAL,

U. S. Marine-Hospital Service.

Report from Tampico-Mortality statistics and clearance of vessels.

TAMPICO, MEXICO, May 29, 1901.

SIR: I have the honor to submit the following report for the week ended May 26. The following is a list of the deaths recorded in this municipality, population, 18,000: Malaria, 1; tuberculosis, 5; pernicious anæmia, 1; diarrhea, 1; stillborn, 1; bronchial pneumonia, 1; enteritis, 1; cerebral hemorrhage, 1; pneumonia, 1; gastric fever, 1.

Total, 14.

The following steamships were cleared: May 20, steamship Bergen, Norwegian; master, Hendricksen; crew, 24; cargo, cattle; for Havana, Cuba. May 24, steamship Seneca, American; master, Smith; crew, 47; cabin passengers, 1; cargo, general and cattle; for New York via Havana, Cuba. May 26, steamship King Gruffyd, British; master, Smith; crew, 28; water ballast; for Sagua la Grande, Cuba, and ports north of Hatteras; steamship Nord, Norwegian; master, Enger; crew, 22; steerage passengers, 4; cargo, cattle; for Havana, Cuba; steamship Atlas, Norwegian; master, Jacobsen; crew, 22; cargo, general and cattle; for New Orleans, La.

Respectfully,

V. B. GREGORY,

Acting Assistant Surgeon, U.S. M. H. S.

The SURGEON GENERAL,

U. S. Marine-Hospital Service.

PORTO RICO.

Report from Ponce.

PONCE, P. R., May 20, 1901.

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended May 18, 1901: Three vessels were inspected, 2 of which were held in quarantine to detain nonimmunes, viz, provisional flag steamship Julia, from Havana, Cuban, and Dominican ports, and the Spanish Cataluña, from Havana, via suspected ports of Central and South America. All transacted their business under supervision and left the same day. Four bills of health were issued.

During the week no new case of smallpox has occurred, 4 recoveries were reported, leaving 3 still under treatment. This epidemic has the

tendency to disappear completely.

W. W. KING,

Assistant Surgeon, U.S. M. H. S.

The SURGEON-GENERAL,

Respectfully,

U. S. Marine-Hospital Service.

H. S. MATHEWSON,

Passed Assistant Surgeon, U. S, M. H. S., Chief Quarantine Officer for Porto Rico.

The Surgeon-General, U. S. Marine-Hospital Service.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—Sierra Leone.—Two weeks ended April 26, 1901. Estimated population, 35,000. Total number of deaths, 32. No contagious or infectious diseases.

BRAZIL—Rio de Janeiro.—Two weeks ended April 15, 1901. Estimated population, 793,000. Total number of deaths, 603, including enteric fever, 1; smallpox, 5; yellow fever, 31; beriberi, 6, and 101 from tuberculosis.

CUBA—Havana.—Month of April, 1901. Census population, 254,444. Total number of deaths, 565, including enteric fever, 10; whooping cough, 1, and 86 from tuberculosis.

FRANCE—Marseilles.—Month of April, 1901. Estimated population, 447,344. Total number of deaths, 878, including diphtheria, 4; scarlet fever, 1, and 9 from smallpox.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns in England and Wales during the week ended May 11, 1901, correspond to an annual rate of 16.5 per 1,000 of the aggregate population, which is estimated at 11,463,187. The highest rate was recorded

in Brighton, viz, 22.3, and the lowest in Croydon, viz, 7.7.

London.—One thousand three hundred and eighty six deaths were registered during the week, including measles, 38; scarlet fever, 17; diphtheria, 23; whooping cough, 45; enteric fever, 7, and diarrhea and dysentery, 9. The deaths from all causes correspond to an annual rate of 15.9 per 1,000. In Greater London 1,816 deaths were registered, corresponding to an annual rate of 14.3 per 1,000 of the population. In the "outer ring" the deaths included 10 from diphtheria, 12 from measles, and 16 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended May 11, 1901, in the 22 principal town districts of Ireland was 22.6 per 1,000 of the population, which is estimated at 1,058,722. The lowest rate was recorded in Carrickfergus, viz, 0.0, and the highest in Galway, viz, 64.2 per 1,000. Dublin and suburbs 189 deaths were registered, including diphtheria, 1; enteric fever, 1; measles, 1; scarlet fever, 2, and 7 from whooping cough.

Scotland.—The deaths registered in 8 principal towns during the week ended May 11, 1901, correspond to an annual rate of 21.2 per 1,000 of the population, which is estimated at 1,630,155. The lowest mortality was recorded in Aberdeen, viz, 12.0, and the highest in Dundee, viz, 22.8 per 1,000. The aggregate number of deaths registered from all causes was 606, including diphtheria, 4; measles, 17; scarlet fever, 8; smallpox, 1, and 49 from whooping cough.

JAPAN—Nagasaki.—Ten days ended April 30, 1901. Estimated population, 131,701. Number of deaths not reported. No infectious or contagious diseases prevailing.

JAVA—Batavia.—Two weeks ended April 13, 1901. Estimated population, 150,000. Number of deaths not reported. No epidemic or contagious diseases.

MALTA.—Week ended March 4, 1901. Estimated population, 181,698. Total number of deaths, 88. No deaths from contagious diseases.

MEXICO—Matamoras.—Two weeks ended May 11, 1901. Estimated population, 18,266. Total number of deaths, 28. No deaths from contagious diseases.

SPAIN—Cadiz.—Month of April, 1901. Estimated population, 67,987. Total number of deaths, 196, including 1 death from enteric fever and 40 deaths from tuberculosis.

Malaga.—Two weeks ended April 30, 1901. Estimated population, 133,000. Total number of deaths, 176, including enteric fever, 1, and 1 from smallpox.

Two weeks ended May 11, 1901. Total number of deaths, 263, including enteric fever, 4, and 2 from smallpox.

St. Helena.—Three weeks ended April 27, 1901. Estimated popu-Total number of deaths, 13, including 2 from enteric lation, 4,270. fever and 2 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, December 28, 1900, to June 7,

[Reports received by the Surgeon-General United States Marine-Hospital Service from United States consuls through the Department of State and other sources.]

[For reports received from June 29, to December 28, 1900, see Public Health Reports for December 28, 1900.]
