

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General United States Marine-Hospital Service.]

Smallpox in Juneau, Alaska.

JUNEAU, ALASKA, May 25, 1901.

SIR: During the past twenty-four hours 5 cases of smallpox have broken out among the Indians at Douglass City, 3 mild and 2 confluent cases.

At the request of the surgeons aboard the Coast Survey cutters *Patterson* and *McArthur* now at this port, I have furnished them 100 vaccine tubes, and they will vaccinate their entire crews.

Respectfully,

SAMUEL C. LEONHARDT,
Acting Assistant Surgeon, U. S. M. H. S.

Smallpox in Washington, D. C.

WASHINGTON, D. C., June 1, 1901.

SIR: A case of smallpox in this District was reported to the health department on the 30th instant. The patient had but recently come from New York City and presumably contracted the disease there. She was, of course, promptly removed to the smallpox hospital and all necessary precautions taken.

Respectfully,

WM. C. WOODWARD,
Health Officer.

Smallpox in Carthage, Mo.

CARTHAGE, MO., June 4, 1901.

SIR: It may be of interest to some to know how general our recent epidemic of smallpox has been.

Since January 1, 1900, I have had 167 cases under observation in this city of 12,000 inhabitants, and within 10 miles of this place throughout the farming settlements.

Among the above cases there have been 7 complete confluent, with 2 deaths, 1 a child aged 11 days, whose mother showed the first eruption the day it was born. The other was a minister aged 50 years, who appeared free from all vicious habits. About one-half of the remainder were semiconfluent. The other half were distinct, ranging down to one or no papules.

* * * * *

Respectfully,

AUG. RHODES,
Health Commissioner of Carthage.

Smallpox in St. Louis, Mo.

ST. LOUIS, MO., June 3, 1901.

SIR: I have the honor to state that there were 32 new cases of smallpox and no deaths reported in this city for the week ended June 2, 1901.

Respectfully,

WM. G. STIMPSON,
*Passed Assistant Surgeon, U. S. M. H. S., In Command.**Smallpox in Cleveland, Ohio.*

CLEVELAND, OHIO, May 23, 1901.

SIR: I have the honor to acknowledge receipt of Bureau letter (W. P. W.) (H. D. G.), requesting information in regard to the smallpox epidemic in this city. Last Monday night I attended a meeting held in the office of the health officer of the city, at which were present the president and secretary of the State board of health and 2 other members of the board, also the mayor of the city and president of the council and the health officer. The situation was discussed and measures taken to use every effort to suppress the epidemic. A new pest-house has been bought and will be surrounded by a barbed-wire fence, with guards around it day and night, and a room is being built for formaldehyd disinfection of patients' clothes. I held an interview with the health officer to-day, and he assured me that all measures agreed upon at the conference were being carried into effect as rapidly as possible. Dr. Probst, secretary of the State board of health, remains here to assist the health officer. I have offered my services whenever needed. To-day's report at the health office shows a total of 107 known cases of smallpox in the city; 50 are in the old isolation hospital, 23 in the new one, and 34 are quarantined in their homes, comprising 22 different dwelling houses.

It is possible that there are 100 cases in the city unknown to the health office. Hereafter patients will not be discharged from the hospital until all scaling is ended; their clothes will be disinfected, and a bichloride bath given. A house-to-house inspection is being made in the twenty-fourth ward, where the disease is most prevalent, and the people vaccinated. All school children also are to be vaccinated. I am informed that there is no city ordinance making vaccination compulsory. The literature published by the Bureau was handed to the health officer. Last Tuesday morning Dr. Smith was put on duty at the river custom-house with instructions to vaccinate all crews of vessels that would consent. Most of the masters have refused to have this done, and as the certificate of vaccination is not required for entrance of vessels from Cleveland at the other lake ports, this office knows of no way to compel them to have it done. It is thought that if the other ports demand such certificates the work will be very much simplified. I shall interview the manager of the Cleveland and Buffalo line of passenger boats this afternoon, and think they will have their crews vaccinated. A letter was sent to the Lake Carriers Association requesting that they instruct the masters of their vessels to have the crews vaccinated before leaving the port. Its receipt has been acknowledged, but no report of any action has been sent me. If there is any other method of enforcing vaccination among the crews than that mentioned above, the Bureau is respectfully requested to furnish this office with the law.

Respectfully,

W. J. PERTUS,
Surgeon, U. S. M. H. S.

Arrival at Reedy Island Quarantine of vessels from West Indian ports.

REEDY ISLAND QUARANTINE,
via Port Penn, Del., June 2, 1901.

SIR: Through the medical officer in command of national quarantine service on Delaware Bay and River, I have the honor to report the arrival at this station of the following vessels: May 28, Norwegian steamship *Vigsnæs*, from Gibara via Sama, with fruit; no passengers; bill of health signed by Acting Asst. Surg. S. Gomez. May 29, Norwegian steamship *Peter Jebsen*, from Tampico via Manzanillo, Santiago, and Guantanamo, with sugar; no passengers; Tampico bill of health signed by Neil E. Pressley, consul; Manzanillo bill of health signed by Acting Asst. Surg. R. de Socarras; Santiago bill of health signed by Assistant Surgeon Von Ezdorf; Guantanamo bill of health signed by Acting Asst. Surg. Luis Espin. June 1, American steamship *Maverick* and S. O. Co. barge 58, from Havana, with molasses; no passengers; bill of health signed by Surgeon Glennan.

Respectfully,

T. F. RICHARDSON,
Assistant Surgeon, U. S. M. H. S., In Command.

Arrival at Baltimore of vessels from West Indian and South American ports.

BALTIMORE, MD., June 1, 1901.

SIR: I have to report the following arrivals at this port from the ports named for the week ended to-day: May 28, Norwegian steamship *Yumuri*, from Banes, with fruit; British steamship *Trunkby*, from Daiquiri, with ore. May 29, Italian bark *Beech Holm*, from Iquique, with nitrate of soda. May 31, American bark *Glad Tidings*, from Rio de Janeiro, with coffee. June 1, British steamship *Grayfield*, from Daiquiri, with ore; British steamship *Aldborough*, from Santiago de Cuba, with ore.

Respectfully,

WM. F. STONE,
Collector.

Arrival at Baltimore of vessels from South American and West Indian ports.

BALTIMORE, MD., June 8, 1901.

SIR: I have to report the arrival of the following vessels at this port from the ports named for the week ended to-day: June 3, American schooner *Adelia T. Carleton*, from San Andres, Colombia, with fruit; Norwegian steamship *Bjorvin*, from Junni, Peru, with nitrate of soda; June 4, British steamship *Drumgorth*, from Daiquiri, Cuba, with ore; June 6, Norwegian steamship *Iberia*, from Banes, Cuba, with ore; June 7, Norwegian steamship *Frey*, from Santiago de Cuba, with ore; Norwegian steamship *Tyr*, from Daiquiri, Cuba, with ore.

Respectfully,

WM. F. STONE,
Collector.

Reports from the Mexican border.

g Disinfected 299 pieces Pullman linen and 1 trunk from Vera Cruz.

LEA HUME,

Sanitary Inspector, U. S. M. H. S.

El Paso, Tex., June 1, 1901—Inspection service.—I have the honor to submit herewith summary of work at this station for the week ended June 1, 1901: Inspection Mexican Central Railroad passengers, 166; inspection (special) of passengers from City of Mexico, 32; inspection Rio Grande and Pacific Railroad passengers, 35; inspection of immigrants, 92; disinfection baggage, clothing, bedding, etc., 70 pieces; disinfection soiled linen imported from Mexico for laundry, 415 pieces; disinfection soiled Pullman linen, 3,108 pieces; vaccination of immigrants and children, 18. Detained 4 passengers from Vera Cruz four days and disinfected their baggage.

E. ALEXANDER,

Acting Assistant Surgeon, U. S. M. H. S.

Laredo, Tex., May 29, 1901—Inspection service.—I have the honor to submit the following report for the week ended May 25, 1901: Number of trains entering from Mexico inspected, 14; number of persons inspected on trains entering from Mexico, 412; immigrants inspected, 14; immigrants vaccinated, 6. May 19, detained 1 person seven days out from Vera Cruz, Mexico, originally from Tehuantepec Peninsula, Mexico. Refused entry to 1 Italian third-class immigrant from Mexico City until completed twenty days out from Mexico City. Disinfected all clothing of Italian before returning to Mexico until he completed his time of exclusion. Disinfected 1 trunk and bundle of clothes of person from Vera Cruz and Tehuantepec Peninsula. Disinfected 3,536 pieces Pullman Company linen from Mexico.

Laredo, Tex., June 4, 1901—Inspection service.—I have the honor to submit the following inspection report for week ended June 1, 1901: Number of passenger trains entering from Mexico inspected, 14; number of persons on passenger trains entering from Mexico inspected and passed, 410; immigrants inspected, 25; immigrants vaccinated, 14. May 27, refused entry to 1 Italian third class immigrant from Mexico City; baggage disinfected, consisting of 1 old valise, full of filthy clothing; will allow entry in a few days, if he is still in a healthy condition. Pullman linen from Mexico disinfected during week reported 3,789 pieces.

H. J. HAMILTON,

Acting Assistant Surgeon, U. S. M. H. S.

Statistical reports of States and cities of the United States—Yearly and monthly.

GEORGIA—Columbus.—Month of May, 1901. Estimated population, 19,303—white, 10,276; colored, 9,027. Total number of deaths, 37—white, 22; colored, 15—including 1 from phthisis pulmonalis.

Macon.—Month of May, 1901. Estimated population, 28,000—white, 15,000; colored, 13,000. Total number of deaths, 40—white, 16; colored, 24—including whooping cough, 1, and 7 from phthisis pulmonalis.

INDIANA—Muncie.—Month of May, 1901. Census population, 20,942. One death from tuberculosis.

MARYLAND—Cumberland.—Month of May, 1901. Estimated population, 12,727. Total number of deaths, 16, including enteric fever, 2, and 2 from tuberculosis.

MASSACHUSETTS—Newton.—Month of May, 1901. Census population, 33,587. Total number of deaths, 34, including diphtheria, 1; scarlet fever, 1, and 3 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended June 1, 1901, from 98 observers indicate that diphtheria, dysentery, measles, and whooping cough were more prevalent and erysipelas and intermittent fever less prevalent than in the preceding week. Cerebro-spinal meningitis was reported present at 2, whooping cough at 20, enteric fever at 28, diphtheria at 31, scarlet fever at 69, phthisis pulmonalis at 200, and smallpox at 70 places.

MINNESOTA—Winona.—Month of May, 1901. Estimated population, 20,000. Total number of deaths, 23, including 1 from scarlet fever.

NEW JERSEY—Passaic.—Two weeks ended May 25, 1901. Census population, 27,777. Total number of deaths, 17. No deaths from contagious diseases.

Paterson.—Month of April, 1901. Census population, 105,171. Total number of deaths, 140, including diphtheria, 7; scarlet fever, 1, and 13 from tuberculosis.

NEW YORK.—Reports to the State board of health, Albany, for the month of April, 1901, from 156 cities, towns, and villages having an aggregate estimated population of 7,263,000, show a total of 11,035 deaths, including diphtheria, 273; enteric fever, 110; measles, 109; scarlet fever, 219; whooping cough, 78; smallpox, 42, and 1,296 from phthisis pulmonalis.

NORTH CAROLINA.—Summary of mortuary reports for the month of April 1901, from 24 towns having an aggregate population of 124,961—white, 77,594; colored, 47,367—show a total of 164 deaths—white, 77; colored, 87—including measles, 1; whooping cough, 1, and 24 from phthisis pulmonalis.

OHIO—East Liverpool.—Month of May, 1901. Estimated population, 16,486. Total number of deaths, 14, including enteric fever, 2; whooping cough, 1, and 1 from phthisis pulmonalis.

Zanesville.—Month of May, 1901. Estimated population, 23,500. Total number of deaths, 23, including enteric fever, 3, and 4 from tuberculosis.

PENNSYLVANIA—York.—Month of May, 1901. Estimated population, 35,000. Total number of deaths, 39, including diphtheria, 1, and 5 from tuberculosis.

VIRGINIA—Roanoke.—Month of May, 1901. Census population, 21,495. Total number of deaths, 33, including diphtheria, 1, and 4 from enteric fever.

Total deaths to date, April 5, 1901	181	69	37	11	96	55	48	3

Respectfully,
The DEPUTY CONSUL-GENERAL FOR THE UNITED STATES.

Assistant Under Colonial Secretary.

Report from Sierra Leone—Quarantine against Cape Town.

WASHINGTON, D. C., May 31, 1901.

SIR: I have the honor to inclose for the information of the U. S. Marine-Hospital Service, copy of a dispatch from the consul at Sierra Leone, transmitting a notice of a quarantine at that port against Cape Colony.

Respectfully,

JOHN HAY.

HON. SECRETARY OF THE TREASURY.

[Inclosure.]

SIERRA LEONE, April 19, 1901.

SIR: I have to report that Sierra Leone has quarantined against Cape Colony, in South Africa, on account of the prevalence there of bubonic plague.

Government notice of which, under date of the 12th instant, herewith inclosed.

Respectfully,

JOHN T. WILLIAMS,

United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

[Inclosure.]

*Quarantine.*FREETOWN, SIERRA LEONE, *April 12, 1901.*

Whereas it appears to the governor-in-council that bubonic plague prevails at Cape Colony in South Africa:

It is hereby declared that Cape Colony aforesaid is an infected place within the meaning of Section VI of The Quarantine Ordinance, 1882.

And notice is hereby given that all vessels arriving at any port in this colony from the aforementioned place or any place in free communication therewith will be placed in quarantine.

By his excellency's command,

J. C. GOBE,
Colonial Secretary.

BRITISH HONDURAS.

Report from Belize—Fruit port.

BELIZE, BRITISH HONDURAS, *May 26, 1901.*

SIR: I have the honor to submit report for week ended May 25, 1901. The following vessels have cleared from this port:

Date.	Vessel.	Master.	Number of crew.	Destination.	Number of passengers from Belize.	Number of passengers in transit.	Total number of passengers.	Number of pieces baggage disinfected.
May 21	Ss. Mira.....	Vincent	35	New Orleans..	0	0	0	0
May 24	Ss. S. Oteri.....	De Luca.....	35	do.....	3	27	30	11
May 25	Ss. Managua	Gundersen....	17	Mobile.....	0	0	0	0
Do ...	Ss. Bergenserien	Klausen.....	16	New Orleans..	0	0	0	0

The sanitary conditions of this port and the adjacent country are good. Nine deaths during the week, as follows: One from chronic Bright's disease, 1 from incomplete cardiac development, 1 from bronchitis, 1 from malarial cachexia, 1 from senile debility, 1 from syncope due to chronic pernicious anæmia, 1 from malarial fever, and 2 from natural causes. Inclosed find triplicate of certificates issued to vessels and duplicate of certificates issued to passengers.

Respectfully,

J. GREY THOMAS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CANADA.

Inspection of immigrants at Quebec during the week ended June 1, 1901.

QUEBEC, CANADA, *June 1, 1901.*

SIR: I have the honor to report that for the week ended June 1, there were inspected, 535 immigrants; passed, 531; cause of detention—hernia, 3; favus, 1.

Respectfully,

VICTOR G. HEISER,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CHINA.

*Report from Hongkong—Plague and smallpox.*HONGKONG, CHINA, *April 29, 1901.*

SIR: I have the honor to transmit herewith the report of inspection work at this station for the week ended April 27, 1901:

Fourteen vessels were inspected during the week, 1,215 individuals were bathed and 1,989 pieces of baggage were disinfected by steam.

Sixty-five cases of plague and 55 deaths were reported to the medical officer of health during the week. This is a marked increase over the number reported last week. The number of cases thus far this year far out numbers those reported during the first four months of last year.

The weather is warm, very damp, and there have been several heavy rainfalls, conditions presumably favoring the development of an epidemic. Seven cases of smallpox and 5 deaths were reported during the week.

The U. S. army transport *Meade* is at present held in quarantine and undergoing disinfection under the supervision of the health officer of the port because of smallpox having developed in the person of a Porto Rican fireman. This man shows evidence of recent vaccination and the surgeon of the transport states it was done after leaving San Francisco on the last voyage to Manila. The steamer arrived at Manila about April 20, left again for Hongkong April 23, and arrived here April 26. The man was removed to the hospital for infectious diseases April 28.

Respectfully,

JOHN W. KERR,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

COLOMBIA.

*Report from Bocas del Toro—Fruit port.*BOCAS DEL TORO, COLOMBIA, *May 28, 1901.*

SIR: I have the honor to transmit herewith the following report of the transactions at this port for the week ended Tuesday, May 28, 1901, inclusive:

The following vessels have cleared from this port during the week, and I inclose herewith the triplicate certificates for same: May 22, Norwegian steamship *Jamaica*, Petersen, master; crew, 17; no passengers; for Mobile, Ala.; Norwegian steamship *Colombia*, Hertzberg, master; crew, 17; no passengers; for Mobile, Ala.; Norwegian steamship *Simon Dumois*, Nieuwjaar, master; crew, 15; no passengers; for Mobile, Ala. May 25, Norwegian steamship *Kitty*, Mortinsen, master; crew, 20, including ship's surgeon, R. W. O'Donnell; no passengers; for New Orleans, La.

* * * * *

The health conditions at this port are very satisfactory at this time.

* * * * *

Respectfully,

PAUL OSTERHOUT,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CUBA.

Report from Havana.

HAVANA, CUBA, June 4, 1901.

SIR: I have the honor to submit the following report of the transactions at this station for the week ended June 1, 1901:

There have been no cases and no deaths from yellow fever reported during the week. During the month of May there were 5 cases of fever reported, with no deaths, 1 of the above cases being that of a seaman removed from the steamship *Matanzas* on her arrival here from Tampico; therefore, there were only 4 cases in the city during the month. This report of the month tallies with that of May, 1900, in which there were the same number of cases and no deaths.

Acting Assistant Surgeon Menocal, in charge of the Triscornia immigration and detention camp, reports that no immigrants or third-class passengers were examined by him for passage to any port in the island of Cuba during the week. He reports the following transactions at his station during the month of April: Fifty-two immigrants remaining over from month of March; 611 immigrants, nonimmunes, taken to detention station; 240 immigrants, immunes or who had already obtained employment in the city, were discharged from steamers; 851 immigrants represent total arrivals for month; 387 immigrants were discharged from station to Havana; 227 immigrants discharged from station to the country; 49 immigrants remained in station from month of April. There were no cases of sickness during the month.

I inclose herewith the usual mortuary and other statistics for the week.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.,

Chief Quarantine Officer for the Island of Cuba.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

Summary of transactions at Havana for week ended June 1, 1901.

PASSENGER DEPARTMENT.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report of immigrants inspected at the port of Havana, Cuba, during the month of May, 1901.

Total number of immigrants inspected, 1,321; number passed, 1,314; number certified for deportation on account of dangerous contagious or loathsome diseases, or for other physical causes, 7.

Disposition of immigrants certified for deportation.—Number cases pending at beginning of month, none; number cases certified for deportation during month, 7; total to be accounted for, 7.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Cienfuegos, Casilda, and Santa Cruz del Sur.

CIENFUEGOS, CUBA, June 3, 1901.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to transmit the following report for the district under my command for the period from May 26 to June 1, 1901, inclusive:

Eighteen deaths have occurred in this city, 3 of which occurred in the civil hospital. Death rate per 1,000 inhabitants, 23.46. The following shows causes of death: Sclerosis, arterial, 3; cachexia, 2; tuberculosis, 2; enteritis, 1; septicaemia, 1; broncho-pneumonia, 1; meningitis, 1; pneumonia, 1; bronchitis, 1; tetanus, infantile, 1; endocarditis, septicaemic, 1; eclampsia, 1; paludism, 1; erysipelas, 1. Seven vessels inspected and passed, granted pratique. Fifteen bills of health issued vessels leaving Cienfuegos. Forty-seven health certificates issued passengers leaving Cienfuegos. Sixty-eight pieces baggage, leaving Cienfuegos, inspected and passed. Three pieces baggage, destination Santiago and Manzanillo, from Havana, labelled to be disinfected at arrival at destination.

Casilda.—Acting Asst. Surg. Alejandro Cantero reports 6 deaths in the city of Trinidad during week. No contagious diseases reported. Eleven vessels inspected and passed, granted pratique. Twelve bills of health issued vessels leaving Casilda.

Santa Cruz del Sur.—Acting Asst. Surg. Juan R. Xiques reports no deaths at that port during the week. No contagious diseases reported. Six vessels inspected and passed and granted pratique. Five vessels leaving that port were issued bills of health.

The following is a recapitulation of reports from this station and sub-stations during the month of May, 1901: Eighty-seven deaths occurred in this city; 16 of these occurred in the civil hospital, in this city. Forty-two vessels were inspected, passed, and granted pratique. One thousand five hundred and forty members of crews of vessels were inspected; 645 passengers were inspected; 1 alien steerage passenger was inspected and allowed to land. Seventy-eight bills of health were issued to vessels leaving Cienfuegos. Four hundred and eighty-five health certificates were issued to passengers leaving Cienfuegos. Three hundred and forty pieces of baggage leaving Cienfuegos were inspected and passed. Two hundred and fifty-seven pieces of baggage were disinfected. Fifty-three pieces of baggage from Havana—destination Santiago and Manzanillo—labeled to be disinfected upon arrival. Two vessels were disinfected previous to departure for United States.

Casilda.—Acting Asst. Surg. Alejandro Cantero reports 21 deaths in the city of Trinidad. No contagious diseases. Forty-eight vessels were inspected and passed. Forty-four bills of health were issued.

Santa Cruz del Sur.—Acting Asst. Surg. Juan R. Xiques reports: No deaths have occurred in this port. No contagious diseases. Twenty-six vessels were inspected and passed. Twenty-five bills of health were issued.

Respectfully,

T. D. BERRY,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report of immigrants inspected at the port of Cienfuegos, Cuba, during the month of May, 1901.

Total number of immigrants inspected, 1; number passed, 1.

T. D. BERRY,
Assistant Surgeon, U. S. M. H. S.

Reports from Matanzas, Cardenas, and Isabela de Sagua.

MATANZAS, CUBA, May 28, 1901.

SIR: I have the honor to submit herewith the following sanitary report of the quarantine district under my command for the week ended May 25, 1901:

Matanzas.—Twenty-four deaths occurred in the city of Matanzas during the period covered by this report, showing a mortality of 27.65 per 1,000. The principal causes of deaths were as follows: Tuberculosis, 6; enteritis, 5; heart disease, 2; tetanus, 2; bacilosis, 2; atresia, 2; malarial fever, 1; other causes, 4. The following cases of infectious or contagious character were reported: Typhoid fever, 2; diphtheria, 1. Eight vessels were inspected and passed on arrival. Seven bills of health were issued to vessels leaving this port. One hundred and thirteen health certificates were issued to persons leaving the island during the week. Sixty-four pieces of baggage were inspected and passed and 14 pieces disinfected. The American steamship *Excelsior* bound for New Orleans, La., was disinfected May 25, 1901.

Cardenas.—Acting Asst. Surg. Enrique Saez reports that 9 deaths occurred in Cardenas during the week of the following causes: Tuberculosis, 2; cancer, 1; arterio sclerosis, 1; typhoid fever, 1; enteritis, 1; other causes, 3. No case of infectious or contagious character was reported. Nineteen vessels arrived during the week; 3 of these were inspected and passed and 16 passed without inspection. Twenty bills of health were issued to vessels leaving the port. The death rate during the week was 18.90 per 1,000.

Isabela de Sagua.—Acting Asst. Surg. Pedro Garcia Riera reports that the death rate during the week was 32.47 per 1,000. Ten vessels arrived during the week; 2 of these were inspected and passed and 8 passed without inspection. Eleven bills of health were issued to vessels leaving the port.

Caibarien.—No report has been received.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Report from Matanzas, Cardenas, Isabela de Sagua, and Caibarien.

MATANZAS, CUBA, June 5, 1901.

SIR: I have the honor to submit herewith the following sanitary report of the quarantine district under my command for the week ended June 1, 1901:

Matanzas.—Twenty deaths occurred in the city of Matanzas during the period covered by this report, showing a mortality of 23.04 per 1,000. The principal causes of deaths were as follows: Atresia, 4; heart disease, 3; enteritis, 2; nephritis, 2; septicæmia, 2; diabetes, 1; meningitis, 1; pneumonia, 1; other causes, 4. No case of infectious or contagious character was reported. Three health certificates were issued to persons leaving the island. Two pieces of baggage were disinfected and 1 piece inspected and passed. The American brig *L. F. Munson*, bound for Mobile, Ala., was disinfected May 27, 1901.

I have the honor to submit herewith mortality statistics for the city of Matanzas during the month of May, 1901: Tuberculosis, 15; enteritis, 11; general debility in children under 6 months, 7; heart disease, 8; malarial fever, 4; nephritis, 4; tetanus, infantile, 3; pneumonia, 3; arterio sclerosis, 2; senility, 2; septicæmia, 2; cancer, 2; cerebral hem-

orrhage, 1; meningitis, 1; eclampsia, 1; peritonitis, 1; bronchitis, 1; congenital debility, 1; consumption, 1; diabetes, 1; cerebral congestion, 1; tetanus, traumatic, 1; hemorrhage from umbilical cord, 1; cerebral softening, 1; hydrocephalus, 1. Total, 76. The above mortality indicates a death rate of 20.49 per 1,000.

Cardenas.—Acting Asst. Surg. Enrique Saez reports that 9 deaths occurred in the city of Cardenas during the week, of the following causes: Infectious enteritis, 2; acute enteritis, 2; gastro-enteritis, 1; meningitis, 1; other causes, 3. The death rate during the week was 18.90 per 1,000. No case of infectious or contagious character was reported. Sixteen vessels arrived during the week; 2 of these were inspected and passed and 14 passed without inspection. Nine bills of health were issued to vessels leaving the port.

Isabela de Sagua.—Acting. Asst. Surg. Pedro Garcia Riera reports that the death rate during the week was 23.47 per 1,000. Five vessels were inspected and passed on arrival and 12 passed without inspection. Nine bills of health were issued to vessels leaving the port.

Caibarien.—Acting Asst. Surg. Leoncio Junco reports that during the week ended May 25, 1901, the sanitary condition of the port and town was good. The death rate was 1.34 per 1,000. Five vessels arrived and were passed without inspection. Three bills of health were issued to vessels. During the week ended June 1, 1901, the conditions continued the same as above. The death rate was 1.34 per 1,000. Eight vessels arrived during the week and were passed without inspection. Eight bills of health were issued to vessels leaving the port.

I have the honor to submit herewith regulations issued for the purpose of correcting the bad hygienic conditions of lighters doing business at this port:

1. Lighters must be kept always mechanically clean.
2. The bilges must be pumped out daily and flushed with clean water from time to time.
3. The quarantine officer or his deputy will inspect all lighters at least once a week to see that the above regulations are complied with.
4. Any violation of the above rules or negligence relating thereto on the part of masters of lighters will be at once reported to the captain of the port for his action.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

Reports from Nuevitas, Puerto Padre, Gibara, and Baracoa.

NUEVITAS, CUBA, May 27, 1901.

SIR: I have the honor to submit the following report for the week ended May 25, 1901: Eight vessels arrived at this port and 10 bills of health were issued. There was 1 death, from cerebral hemorrhage. The weather has been very warm, with rain every afternoon. The sanitary condition of the town is good.

Puerto Padre.—Reports show the arrival of 5 vessels, 5 bills of health issued, 1 death, from tetanus, and good sanitary condition.

Gibara.—Reports show the arrival of 10 vessels, the issuance of 8 bills of health, 3 deaths, and good sanitary condition.

Baracoa.—Reports show the arrival of 7 vessels, the issuance of 11 bills of health, 3 deaths, and good sanitary condition. No quarantinable disease is reported at any point in the district.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

Reports from Santiago, Manzanillo, Guantanamo, and Daiquiri—Sanitary conditions.

SANTIAGO DE CUBA, May 20, 1901.

SIR: I have the honor to submit herewith the following report for the week ended May 11, 1901:

Santiago.—During this period there was a total of 26 deaths reported, due to the following causes: Fever, intermittent malarial, 3; diphtheria and croup, 1; tubercle of lungs, 7; tetanus, infantile, 1; organic diseases of the heart, 2; affection of the arteries, 1; bronchitis, acute, 1; broncho-pneumonia, 1; diarrhea and enteritis (under 2 years), 4; diarrhea and enteritis, chronic, 1; Bright's disease, 1; septicæmia, puerperal, 1; congenital debility, 1; ill-defined causes of death, 1. Total, 26. Population, 43,000. Annual rate of mortality, 31.44 per 1,000.

Fourteen vessels were inspected and passed on arrival and 12 bills of health were issued to vessels leaving this port. Fourteen immune and 56 nonimmune certificates were issued to persons leaving this port for the United States. The baggage was treated according to regulations and labeled.

The German steamship *Schleswig*, bound for Mobile, Ala., via Port Antonio, Jamaica, was disinfected May 6, 1901.

Manzanillo.—Acting Asst. Surg. R. de Socarras reports a total of 5 deaths, due to the following causes: Tubercle of lungs, 2; cancer of spleen, 1; cerebral congestion, 1; enteritis, 1. Total, 5. Population, 14,464. Annual rate of mortality, 18.05 per 1,000.

Guantanamo.—Acting Asst. Surg. Luis Espin reports 10 deaths, the causes being as follows: Tubercle of lungs, 2; tetanus, 1; organic diseases of the heart, 1; broncho-pneumonia, 1; pneumonia, 1; poisoning, 1; other causes, 3. Total, 10. Population, 18,000. Annual rate of mortality, 28.88 per 1,000.

Daiquiri.—Nothing of interest reported.

Respectfully,

R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

SANTIAGO DE CUBA, May 25, 1901.

SIR: I have the honor to submit herewith the following report for the week ended May 18, 1901:

Santiago.—There was a total of 22 deaths reported during this period, making the annual rate of mortality 26.6 per 1,000. The causes of deaths were: Fever, intermittent malarial, 2; la grippe, 1; tubercle of lungs, 6; cancer of the kidney, 1; locomotor ataxia, 1; endocarditis, acute, 1; pneumonia, 2; diarrhea and enteritis (under 2 years) 2; diarrhea and enteritis, chronic, 2; Bright's disease, 1; accidental submersion, 1; other causes, 2. Total, 22.

Seven vessels were inspected and passed on arrival and bills of health were issued to 9 vessels leaving this port. Eighteen immune and 31 nonimmune certificates were issued to persons leaving this port for the United States and Porto Rico. The baggage was either disinfected or inspected and passed, in accordance with the quarantine regulations, and labeled accordingly.

The following-named vessels were disinfected: May 13, Norwegian steamship *Banan*, bound for Mobile, Ala., via Port Antonio, Jamaica. May 14, American schooner *Nimbus*, bound for Ship Island, Miss. May 15, the provisional flag steamship *Julia*, bound for San Juan, P. R. May 18, the American schooner *John K. Souther*, bound for Brunswick, Ga.

Manzanillo.—Acting Asst. Surg. R. de Socarras reports 6 deaths, due to the following causes: Fever, intermittent malarial, 2; tubercle of lungs, 1; pericarditis, 1; diarrhea and enteritis, chronic, 1; nephritis, 1. Total, 6. Population, 14,464. Annual rate of mortality, 21.57 per 1,000.

Guantanamo.—Acting Asst. Surg. Luis Espin reports 11 deaths, due to the following causes: Tubercle of lungs, 1; broncho-pneumonia, 1; pneumonia, 1; diarrhea and enteritis (under 2 years), 1; diarrhea and enteritis, 4; cirrhosis of the liver, 1; affections of the bones (nontuberculous), 1; other causes, 1. Total, 11. Population, 18,000. Annual rate of mortality, 31.77 per 1,000.

Daquiri.—Nothing of interest reported.

Respectfully,

R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

SANTIAGO DE CUBA, May 31, 1901.

SIR: I have the honor to submit herewith the following report for the week ended May 25, 1901:

Santiago.—During this period there was a total of 14 deaths reported, making the annual rate of mortality 16.9 per 1,000. The causes of death were the following: Fever, intermittent malaria, 2; tubercle of lungs, 1; endocarditis, acute, 1; organic diseases of the heart, 2; pneumonia, 3; diarrhea and enteritis (under 2 years), 2; cirrhosis of the liver, 1; nephritis, acute, 1; Bright's disease, 1. Total, 14.

Thirteen vessels were inspected and passed on arrival and 2 vessels were passed without inspection. Nine bills of health were issued to vessels leaving this port. Eleven immune and 23 nonimmune certificates were issued to passengers leaving this port for the United States and Porto Rico. The baggage of these persons was either disinfected or inspected and passed in accordance with the quarantine regulations and labeled accordingly.

Two vessels were disinfected May 21, 1901, the Norwegian steamship *Kong Frode*, prior to sailing for Mobile, Ala., via Port Antonio, Jamaica, and May 25, 1901, the provisional flag steamship *Maria Herrera*, prior to sailing for Porto Rico.

Manzanillo.—Acting Asst. Surg. R. de Socarras reports 10 deaths, due to the following causes: Typhoid fever, 1; tubercle of lungs, 1; meningitis, simple, 3; cerebral congestion and hemorrhage, 1; pneumonia, 2; diarrhea and enteritis (under 2 years), 2. Total, 10. Population, 14,464. Annual rate of mortality, 35.95 per 1,000.

Guantanamo.—Acting Asst. Surg. Luis Espin reports 10 deaths, due to the following causes: Fever, intermittent malarial, 2; la grippe, 1; tubercle of lungs, 1; cancer of the uterus, 1; broncho-pneumonia, 2; pneumonia, 1; diarrhea and enteritis, chronic, 2. Total, 10. Population, 18,000. Annual rate of mortality, 28.88 per 1,000.

Daiquiri.—Acting Asst. Surg. Juan J. de Jongh reports 1 death, due to tubercle of lungs.

Respectfully,

ENGLAND.

Report from Liverpool—Immigrant inspection service.

LIVERPOOL, ENGLAND, *May 21, 1901.*

SIR: I have the honor to make the usual report for the week ended May 18, 1901: During the week I inspected the passengers of 3 ships

bound to Canadian ports, with a total of 725 passengers. I advised the rejection of 3 persons for trachoma, 4 for favus, and 1 for Pott's disease. The situation in regard to rejected persons remains about the same as in my report of May 2, 1901, to the immigration service.

Respectfully,

JOHN F. ANDERSON,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from London—Plague, smallpox, and typhus.

LONDON, ENGLAND, *May 25, 1901.*

SIR: I have the honor to report that the general health of London and England remains satisfactory. One death from smallpox is reported from Liverpool for the week ended May 18. For the same period there was in London 1 case of typhus fever under treatment. The number of deaths in London attributed to influenza was 16 as against 29, 19, and 17 in the preceding three weeks.

The quarterly return of the registrar-general for England and Wales for the quarter ended March 30 has just been issued, and contains for the first time a table of infectious diseases reported from certain of the large towns. A few of the larger towns, however, will not authorize the publication of these figures. This report shows that during this quarter there were at least 76 cases of smallpox, the largest number being 24 in Bradford and 23 in Newcastle. Further, 62 cases of typhus fever are reported, 38 occurring in Manchester, and of the remainder 10 were in London, 9 in Cardiff, and 5 in Liverpool.

Smallpox continues to subside in Glasgow, and 3 deaths are reported from that disease during the week ended May 18. A few cases are reported from other Scotch towns.

The plague report from Cape Town continues encouraging, the number of cases reported being much less than formerly. The lay press reports during the past week that 4 cases of plague have occurred at Port Elizabeth. One case of plague occurred in Mauritius during the week ended May 16.

Respectfully,

A. R. THOMAS,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

GERMANY.

Report from Berlin—Plague in various places—Cholera in India.

BERLIN, GERMANY, *May 27, 1901.*

SIR: I have the honor to submit the following information regarding the plague and cholera, obtained from the imperial health office in Berlin:

Plague.

TURKEY.—In Bagdad, on May 6, a 30-year-old Kurdish woman, the wife of a dealer in old clothes, died of a disease which showed all the symptoms of the plague. All persons who had been in contact with the woman were placed under strict medical observation. By the orders of the supreme sanitary council in Constantinople, 2 temporary hospitals have been erected in Bagdad for the accommodation of those accompanying the passing caravans, and in which the travelers have to

submit to five days' quarantine. The effects of the travelers are there subjected to a chemical disinfection and then daily exposed to the rays of the sun. Ships which have to leave Bagdad for the South have to undergo five days' quarantine in Gavarah. Cavalry patrols are to keep watch over the country between Bagdad and the hospitals, in order to turn back any fugitives. Official doctors and military physicians are to be sent into the neighboring villages of Bagdad in order to supervise the sanitary condition of the population. The duty of reporting every fresh case of plague will be strictly enforced.

A suspected case of plague was discovered on board an Italian steamer arrived at Smyrna on May 15 from Constantinople, after the persons on the ship had already had intercourse with those on land. The ship with the patient on board was put in quarantine at Klazomenä, but was released again on May 17 because the bacteriological examination had not confirmed the suspicion of plague.

EGYPT.—On May 5 the corpse of a 6-year-old girl, who had apparently died of the plague, was brought to the Government hospital at Alexandria from the part of the city known as Tombgieh. The bacteriological examination confirmed the suspicion that the plague was the cause of death, and the necessary precautions were taken accordingly.

Outgoing vessels have been ordered to enter on the ships' papers corresponding remarks, and must undergo medical inspection and disinfection.

BRITISH EAST INDIA.—During the week ended April 19 there occurred in the Presidency of Bombay 1,646 fresh cases and 1,360 deaths of plague—that is to say, 301 cases and 272 deaths less than during the foregoing week. In Karachi, however, a decline of the disease is not to be noted. From this port during the last week there were 236 fresh cases and 210 deaths of plague reported. In the city of Bombay, during the week ended April 20, there were reported 704 fresh cases (67 less than during the previous week), and 563 deaths proved to be due to plague. In addition, of the total 1,514 deaths in the city, 428 were designated as suspected plague.

MAURITIUS.—During the period between March 8 and April 4, 8 fresh plague cases and 7 deaths occurred in the island.

CAPE COLONY.—In the course of the week ended April 20, 64 patients were taken to the plague hospital in Cape Town, among them being 18 Europeans. After 33 plague patients had died and 29 discharged as cured, there were on April 20 still 118 plague patients under treatment, among them being 44 Europeans. As suspicious cases during the same period, 9 patients were under observation, afterwards in 2 cases in the course of the week, plague had been diagnosticated. In the contact camps on April 20 there were 964 persons under observation, among them being 247 Europeans. Two of these persons died during the last week and 2 others developed the plague.

Port Elizabeth has been officially declared to be infected with the plague, although since May 15 only 2 cases have been diagnosticated there.

QUEENSLAND.—During the week from March 31 to April 6, 2 fresh cases and 1 death of plague are alleged to have occurred at Brisbane. No further official weekly bulletins concerning the plague have been published, however, up to April 6.

WEST AUSTRALIA.—From March 23 to April 6, according to the weekly bulletins of the central sanitary authorities at Perth, 1 fresh case and 1 death of plague have occurred in the colony. On April 6, 11 plague patients were still under treatment. In Perth, since March

21, after out of 10 plague patients 3 had died, no new cases of plague have occurred. Up to April 4, 4 additional plague patients had recovered, viz, in Subiaco (on March 19 and 21), Freemantle (on March 23), and Claremont (on March 25). These last 4 patients had all resided in the infected quarter of Perth. From March 2 to April 6 the total number of persons isolated because of suspected contagion amounted to 71. Among these no plague case occurred.

Cholera.

BRITISH EAST INDIA.—In Calcutta during the period from April 7 to April 13, 60 persons died of cholera.

Respectfully,

FRANK A. MASON,
United States Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

GREECE.

Report from Athens—Quarantine on vessels from Constantinople.

WASHINGTON, D. C., May 31, 1901.

SIR: I have the honor to inclose herewith, for your information on the subject, copy of dispatch No. 99, dated May 4, 1901, from the consul of the United States at Athens, Greece, reporting the recent issuance of a royal decree affecting the quarantine regulations of Greece.

Respectfully,

JOHN HAY.

HON. SECRETARY OF THE TREASURY.

[Inclosure.]

ATHENS, GREECE, May 4, 1901.

SIR: In the absence of Minister Francis, I have the honor to advise you that under a royal decree issued yesterday by the Greek Government, any vessel leaving Constantinople after April 30, 1901, will be subjected to an effective quarantine of ten days, with disinfection of the vessel, crew, and passengers, at the quarantine station at the island of Delos, Greece, before being permitted to enter any Greek port.

The importation of any and all kinds of merchandise from Constantinople is prohibited.

Vessels arriving from uncontaminated ports of the Black Sea and its tributaries will only be subjected to a strict sanitary visit, provided they do not communicate with Constantinople en route.

Respectfully,

DANIEL E. MCGINLEY,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

GUATEMALA.

Report from Livingston—Fruit port.

LIVINGSTON, GUATEMALA, May 29, 1901.

SIR: I have the honor to report quarantine work during week ended May 25. Health of this port and adjacent country has been good, only one death, cause, tuberculosis, adult, native. Steamship *Esther*, master, Stevenson; crew, 19; all men well; left for New Orleans 17th instant, via Belize, with fruit. May 25, inspected steamship *Numidia*, German; Captain Von Hoft, master; crew, 37; arrived May 18, left May 25, with coffee for Hamburg via Galveston; 15 passengers in transit; crew and passengers were all well and in good sanitary condition. Inclosed United States Marine-Hospital reports for steamship *Esther*.

Respectfully,

W. K. FORT,
Acting Assistant Surgeon U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

HONDURAS.

*Report from La Ceiba—Fruit port.*LA CEIBA, HONDURAS, *May 28, 1901.*

SIR: I have the honor to submit my report of the transactions at this station for the week ended May 25, 1901, and inclose copies of certificates issued:

Three vessels were inspected and cleared for the United States. May 20, steamship *Breifond*, Bellersen, master; crew, 14; destination, New Orleans, La. May 23, steamship *Alliance*, Neilsen, master; crew, 15; destination, Mobile, Ala. Steamship *Ely*, Corning, master; crew, 20; destination, New Orleans, La.

The health of La Ceiba and adjacent country continues good.

Respectfully,

R. H. PETERS,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

*Report from Puerto Cortez—Fruit port.*PUERTO CORTEZ, HONDURAS, *May 28, 1901.*

SIR: I have the honor to submit herewith my report for the week ended May 28. The health conditions of the port continue excellent, nothing in the way of infectious or contagious diseases existing. One death reported, male, adult, American, railroad accident. Inclosed is list of vessels inspected. The work of disinfection has been extensive here for the past few weeks.

Respectfully,

SAMUEL HARRIS BACKUS,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

[Inclosure.]

ITALY.

*Report from Naples—Precautions taken to prevent smallpox among emigrants.*NAPLES, ITALY, *May 20, 1901.*

SIR: Confirming my cablegram of May 18, 1901, I have the honor to report that, as directed in Bureau telegram, dated May 16, 1901, I had conferences, next day, with representatives of the following steamship companies: The Anchor Line, the Hamburg-American Line, the North German Lloyd, the Prince Line, the Veloce, the Navigazione Generale Italiano, and the Fabre Line. The representatives of these companies

expressed a readiness to cooperate in any practicable measures to lessen the chances of smallpox appearing on steamships during the passage to New York. They agreed to furnish the medical assistance and the virus for vaccination of all steerage passengers whether from infected or non-infected places. Only a small proportion of emigrants sailing from those ports are from Naples. Some go aboard without stopping ashore. Few remain more than one day awaiting departure. The steamship people consider it impracticable ordinarily to vaccinate emigrants before they present themselves for embarkation, but are willing to aid in the earliest possible vaccination. This can probably be arranged in the case of emigrants who come from Sicily by a coast line, and also in certain other cases.

The houses in which emigrants are lodged in Naples are not under control of the steamship companies. Arrangements are pending for the erection of large barracks for emigrants assembled here. But the houses will not be ready for occupation for several months at least. I have made an inspection of the houses where emigrants are lodged. No cases of sickness in any way resembling smallpox were found in the tenements. These houses are licensed by the municipality. All cases of sickness of any gravity are removed at once to the hospital. The municipal records show that no case of smallpox has been reported from any emigrant tenement during the present prevalence of the disease. I have been assured by the municipal health authorities that in the event of cases of smallpox occurring in emigrant tenements, the houses will be adequately disinfected and all movable articles taken to the municipal disinfecting plant for treatment. It is planned to learn as far as possible before the sailing of each vessel the condition of places where emigrants stopping in Naples are lodged, and to visit the houses with a view to preventing the embarkment of persons who have been exposed to infection. As has been the practice all along, bedding, baggage, and other effects of emigrants that are at all doubtful are disinfected before being put aboard. The disinfection is done under my supervision. Inspected and disinfected articles are labeled accordingly. As far as possible, emigrants' effects are being brought directly to the wharf instead of being carried to the stopping places at Naples. An inspection is being made of every ship to see that there is an ample supply of disinfectants as well as other necessary drugs, and that the hospital is well equipped and the space sufficient. Medical officers who accompany the vessels are carefully impressed with the necessity for keeping a careful lookout for developing cases of smallpox, and of practicing isolation, disinfection, and revaccination whenever required. In addition, there is, before going aboard, a personal medical examination of every emigrant, an examination of passports, and a cross-examination when necessary to determine the recent whereabouts of emigrants.

With all these precautions, however, considering how widespread smallpox is in Southern Italy, it is likely to happen that persons too far advanced in the stage of incubation of smallpox to be protected by vaccination will succeed in passing all barriers and develop the disease on the passage to New York. The emigration from this port to New York, in the month of April alone, was 22,147 souls. The period of detention, grouping, and observation which alone could positively preclude the occurrence of cases on board would, if properly practiced, practically amount to a suspension of emigration for a time from Southern Italy.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Naples—Smallpox and typhus.

NAPLES, ITALY, May 27, 1901.

SIR: I have the honor to report that for the week ended May 26, 1901, the following ships were inspected: May 22, the steamship *Isola di Levanzo*, bound with passengers and cargo for New York. There were inspected and passed 842 steerage passengers and 40 pieces of large baggage. One thousand four hundred and thirty-three pieces of baggage were disinfected by steam. The steamship *Manilla*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 1,048 steerage passengers and 230 pieces of large baggage. One thousand four hundred and thirty-five pieces of baggage were disinfected by steam. May 23, the steamship *Tartar Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 941 steerage passengers and 64 pieces of large baggage. One thousand and eighty-four pieces of baggage were disinfected by steam. May 24, the steamship *Scotia*, of the Hamburg-American Line, bound with passengers and cargo for New York. There were inspected and passed 492 steerage passengers and 43 pieces of large baggage. Seven hundred and sixty-four pieces of baggage were disinfected by steam. May 25, the steamship *Karamania*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 641 steerage passengers and 36 pieces of large baggage. Nine hundred and seventy-two pieces of baggage were disinfected by steam.

Smallpox.

There were officially reported at Naples, during the week ended May 26, 1901, 161 cases of smallpox and 28 deaths. None of these cases occurred in any of the houses occupied by emigrants awaiting embarkment at Naples. All steerage passengers have been vaccinated before going aboard. This has necessitated much labor and close supervision. The captain of the port, who had not heretofore objected to such vaccinations as it was seen fit to make at the time of the emigrant examination before going on board ship, would not permit the vaccination of large numbers of steerage passengers at the Capitaneria which is a spacious structure under control of the navy, where the emigrant examinations are conducted in connection with the examinations made by the Italian commission. It was therefore necessary for the steamship companies to fit out for the purpose a small building in the neighborhood, and here vaccination of all steerage passengers is made under my supervision by physicians employed by the steamship companies.

All baggage and emigrant effects from Naples and from other places where smallpox prevails are being disinfected. During the week ended May 26, 1901, there was a total of 185 pieces of large and 5,503 pieces of small baggage disinfected before being put on board ship. The total number of steerage passengers inspected for the same week was 3,964.

Typhus.

For the week ended May 26, 1901, 5 cases of typhus fever were reported at Naples, 1 coming from Caivano. No cases occurred in the neighborhood of emigrant tenements.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

JAPAN.

Report from Yokohama—Plague and smallpox.

YOKOHAMA, JAPAN, May 11, 1901.

SIR: I have the honor to report that no further case of plague has occurred in Japan proper since the date of my letter of May 4, and this, despite the arrival from Formosa of 2 cases of the malady at the port of Kobe upon the 5th instant, per steamships *Tainan Maru*, from Kelung, and *Ohiyoda Maru*, from Tainan. Both vessels are at present in quarantine.

One undoubted and one suspicious case of smallpox were removed from the U. S. transport *Indiana*, at Nagasaki, on May 6, and some three instances of the same disease are reported to have been met with in Tokyo within a few days.

Respectfully,

STUART ELDRIDGE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

*U. S. Marine-Hospital Service.**Plague increasing in Formosa.*

YOKOHAMA, JAPAN, May 19, 1901.

SIR: I have the honor to inform you that since my last report of May 11 no case of plague has been met with in Japan proper. The double importation of this disease from Formosa to Kobe, May 6, already reported to you, has been followed by no further infection. The epidemic seems to be increasing in Formosa, as the governor-general of that island is reported to have telegraphed, two days ago, to the sanitary authorities that the pest is virulent in many districts. Since the beginning of the year the same official gives the total number of detected cases as 1,605, and the new cases in the week immediately preceding his dispatch as 552.

A severe outbreak of trachoma is returned as prevailing in Shidzuoka and its neighborhood.

Respectfully,

STUART ELDRIDGE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

MEXICO.

Report from Progreso—Health conditions good.

PROGRESO, MEXICO, May 26, 1901.

SIR: I have the honor to make the following report for the week ended May 25, 1901:

There were no cases nor deaths from contagious diseases reported, and only 6 deaths reported from all causes.

On the steamship *Havana*, bound from Vera Cruz to New York via this port and Havana, a case of measles developed in a child after leaving Vera Cruz. The case was isolated in the female steerage compartment of the vessel, and the facts of the case set forth in the supplemental bill of health.

The smallpox epidemic in Merida grows progressively better, and the

small mortality from that disease can be accredited to the suburbs and adjacent villages, and not to the city proper.

The health condition in the shipping continues excellent.

Respectfully,

S. H. HODGSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Report from Vera Cruz—One death from yellow fever.

VERA CRUZ, MEXICO, May 27, 1901.

SIR: I have the honor to submit the following report of the transactions at this station during the week ended May 25, 1901:

One death from yellow fever occurred on the 21st, and during the week there were 2 deaths from pernicious malaria.

The weather has been extremely hot, the temperature averaging 90 degrees in this office.

The New Ward Line steamer *Esperanza* sailed from here on the 24th with 85 passengers; nearly all of her steerage passengers were returning Italian laborers from City of Mexico and Coatzacoalcas.

The second officer of the vessel was taken sick on the night of arrival with a chill, followed by fever. I was called to see him on the following morning and found him suffering from malaria. His last voyage had been to Tampico.

During the last week 7 vessels were inspected and given bills of health and 85 passengers were given certificates of health. I inclose the weekly mortality report.

Respectfully,

D. E. DUDLEY,

Acting Assistant Surgeon, U. S. M. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

[Inclosure.]

Dysentery	3	Tuberculosis	8
Malaria.....	1	Smallpox.....	1
Pernicious fever.....	1	From all causes.....	32

NICARAGUA.

Report from Bluefields—Fruit port.

BLUEFIELDS, NICARAGUA, May 23, 1901.

SIR: I have the honor to submit herewith report of transactions at this port for the week ended May 22, 1901.

The following vessels were inspected, receiving United States bills of health with U. S. Marine-Hospital certificates attached thereto: May 17, Norwegian steamship *Alabama*, Gjemre, master; crew, 18; passengers, 3; cargo, fruit; cleared for New Orleans, direct; W. G. Thigpen, marine medical inspector, Louisiana State board of health. May 19, Norwegian steamship *Fulton*, Pettersen, master; crew, 14; passengers, none; cargo, fruit; cleared for New Orleans, direct.

Two triplicates of the certificates issued to vessels, also 3 duplicates of certificates issued to passengers are inclosed herewith. One death occurred in the port of Bluefields on the 19th instant—a colored child,

of which no official return as to the cause of death has been made, but personal inquiry, however, assures me that the death was due to malarial fever, and not in anywise suspicious as resulting from a contagious or infectious disease.

The sanitary condition of the port of Bluefields, as well as the surrounding territory, continues to remain free from contagious or infectious diseases.

The Nicaraguan authorities still maintain quarantine restrictions as to Port Limon, Costa Rica, rumors having reached here as to another outbreak of yellow fever at that port.

Respectfully,

WM. H. CARSON,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Manila—Plague and smallpox.

MANILA, P. I., April 23, 1901.

SIR: I have the honor to report that 27 cases of plague with 16 deaths occurred in Manila during the week ended April 20, 1901. Eighteen Chinese and 9 Filipinos were affected.

During the same period there were 9 cases of smallpox and 200 deaths from all causes.

Respectfully,

J. C. PERRY,
*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Manila—Quarantine transactions.

MANILA, P. I., April 24, 1901.

SIR: I have the honor to hereby submit report of quarantine transactions of outgoing boats for the week ended April 20, 1901, as follows:

Number of vessels inspected.....	71
Number of pieces of baggage disinfected	1,085
Number of crew inspected.....	1,665
Number of passengers inspected.....	1,409
Number of passengers and crew rejected	1
Cause of rejection, smallpox.....	1

FERRIES.

Number of ferryboats inspected	65
Number of passengers inspected	6,653

VACCINATIONS (BOATS ARRIVING).

PORTO RICO.

Report from San Juan—Smallpox on the island.

SAN JUAN, P. R., May 27, 1901.

SIR: I have the honor to report that smallpox disappeared from San Juan on the 10th instant. Since my report of April 9 last there have occurred 24 cases on the island. At present there are 8 cases under treatment. The smallpox hospital at Ponce is to be closed at the end of this month, as it is not anticipated that any new cases will develop there. The disease has been of a uniformly mild type. Only 1 death from smallpox has occurred.

Respectfully,

H. S. MATHEWSON,
*Passed Assistant Surgeon, U. S. M. H. S.,
 Chief Quarantine Officer for Porto Rico.*

The SURGEON-GENERAL,
 U. S. Marine-Hospital Service.

Inspection of immigrants at San Juan during the week ended May 25, 1901.

SAN JUAN, P. R., May 27, 1901.

SIR: I submit herewith report of alien steerage passengers arriving at this port during the week ended May 25, 1901:

Date.	Vessel.	Where from.	No. of immigrants.
May 19	Provisional flag steamship Julia	Cuban ports and St. Domingo.....	7
Do....	Spanish steamship Cataluña.....	Havana, Port Limon, Colon, Sabanilla, Puerto Cabello, La Guayra, and Ponce, P. R.	6
	Total		13

Respectfully,

H. S. MATHEWSON,
*Passed Assistant Surgeon, U. S. M. H. S.,
 Chief Quarantine Officer for Porto Rico.*

The SURGEON-GENERAL,
 U. S. Marine-Hospital Service.

SALVADOR.

Report from San Salvador—Epidemic fever in Jucuapa.

SAN SALVADOR, May 9, 1901.

SIR: There is an epidemic fever in Jucuapa. It is reported to be yellow fever, and that the death rate is 15 a day. Nothing can be obtained from official sources beyond the fact that the conditions at that point are of an alarming character. Medical assistance has been asked for and sent.

Jucuapa is the second city of importance in the Department of Usulután, having an estimated population of 5,000 inhabitants. Its elevation is about 1,500 feet above sea level, and heretofore has been considered as a very healthy location. It is about 80 miles south of San Salvador and on the main road from this city to San Miguel. There is considerable traveling done between these two points.

Respectfully,

JOHN JENKINS,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

ST. HELENA.

Quarantine against plague in South Africa.

PROCLAMATION.

By his excellency Lieut. Col. T. J. P. Evans, Royal Marine Light Infantry, senior officer in command of His Majesty's troops in the colony of St. Helena, acting governor of said island.

Whereas the disease known as oriental or bubonic plague exists at the Cape of Good Hope, and it is expedient to prevent the introduction of the said plague:

Now, therefore, by virtue of the powers in me vested, I hereby order that during the prevalence of plague in South Africa, *no person coming from ANY port in South Africa south of latitude 25° shall be permitted to land* in St. Helena, and it is further ordered that no licensed trader or bumboatman shall be permitted to board or go alongside any passing vessel from the aforesaid places.

Any person contravening any of the foregoing restrictions shall be liable to the penalties laid down in Her Majesty's order in council dated July 11, 1839.

This proclamation shall come into operation on May 8, 1901.

Given under my hand and the public seal of the island of St. Helena May 3, 1901.

T. J. P. EVANS,
Acting Governor.

By command of his excellency the acting governor in council.

ROBT. R. BRUCE,
For Colonial Secretary.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AUSTRALIA—*New South Wales—Sydney.*—Month of March, 1901. Estimated population, 386,400. Total number of deaths, 466, including diphtheria, 8; enteric fever, 6; whooping cough, 1; plague, 1, and 44 from tuberculosis.

AUSTRIA—*Brunn.*—Month of February, 1901. Estimated population, 95,342. Total number of deaths, 159, including diphtheria, 1; measles, 2, and 46 from tuberculosis.

Month of March, 1901. Total number of deaths, 143, including diphtheria, 1; enteric fever, 1; measles, 2, and 30 from tuberculosis.

BAHAMAS—*Dunmore Town.*—Two weeks ended May 24, 1901. Estimated population, 1,472. One death. No contagious diseases.

Governors Harbor.—Two weeks ended May 25, 1901. Estimated population, 1,375. No deaths and no contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended May 23, 1901. Estimated population, 3,900. No deaths and no contagious diseases reported.

Nassau.—Two weeks ended May 27, 1901. Estimated population, 12,000. No deaths and no contagious diseases reported.

BRAZIL—Pernambuco.—Two weeks ended April 15, 1901. Estimated population, 200,000. Total number of deaths not reported. Two deaths from measles, 7 from yellow fever, 2 from leprosy, 27 from small-pox, and 40 from tuberculosis reported.

CANADA—Quebec—Sherbrooke.—Month of May, 1901. Estimated population, 11,100. Total number of deaths, 19. No contagious disease.

CUBA—Santiago.—Month of April, 1901. Estimated population, 45,000. Total number of deaths, 80, including diphtheria, 1; enteric fever, 1, and 16 from tuberculosis.

FRANCE—Nice.—Month of April, 1901. Estimated population, 108,227. Total number of deaths, 226, including diphtheria, 3; measles, 7, and 46 from tuberculosis.

St. Etienne.—Two weeks ended April 30, 1901. Estimated population, 146,030. Total number of deaths, 109, including diphtheria, 1; enteric fever, 2, and 11 from tuberculosis.

GERMANY—Freiburg.—Three months ended March 31, 1901. Estimated population, 65,000. Total number of deaths, 376, including diphtheria, 6; enteric fever, 1; measles, 9, and 47 from phthisis pulmonalis.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns in England and Wales during the week ended May 18, 1901, correspond to an annual rate of 16.8 per 1,000 of the aggregate population, which is estimated at 11,463,187. The highest rate was recorded in Preston, viz, 22.1, and the lowest in Croydon, viz, 8.9.

Bradford.—Two weeks ended May 18, 1901. Estimated population, 279,809. Total number of deaths, 186, including scarlet fever, 2; whooping cough, 15, and 15 from phthisis pulmonalis.

London.—One thousand three hundred and seventy-five deaths were registered during the week, including measles, 33; scarlet fever, 14; diphtheria, 14; whooping cough, 48; enteric fever, 4, and diarrhea and dysentery, 16. The deaths from all causes correspond to an annual rate of 15.8 per 1,000. In Greater London 1,835 deaths were registered, corresponding to an annual rate of 14.5 per 1,000 of the population. In the "outer ring" the deaths included 9 from diphtheria, 15 from measles, and 21 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended May 18, 1901, in the 22 principal town districts of Ireland was 23.2 per 1,000 of the population, which is estimated at 1,058,722. The lowest rate was recorded in Clonmel, viz, 0.0, and the highest in Limerick, viz, 47.7 per 1,000. In Dublin and suburbs 187 deaths were registered, including enteric fever, 1, and 8 from whooping cough.

Scotland.—The deaths registered in 8 principal towns during the week ended May 18, 1901, correspond to an annual rate of 20.2 per 1,000 of the population, which is estimated at 1,630,155. The lowest mortality was recorded in Dundee, viz, 16.0, and the highest in Perth, viz, 23.5

per 1,000. The aggregate number of deaths registered from all causes was 633, including diphtheria, 6; measles, 15; scarlet fever, 2; smallpox, 3, and 41 from whooping cough.

MALTA.—Week ended May 11, 1901. Estimated population, 181,698. Total number of deaths, 88, including diphtheria, 2; enteric fever, 1, and 1 from smallpox.

Week ended May 18, 1901. Total number of deaths, 68. No deaths from contagious diseases.

PHILIPPINE ISLANDS—Manila.—Month of February, 1901. Estimated population, 300,000. Total number of deaths, 689, including enteric fever, 12; smallpox, 1; leprosy, 1; beriberi, 35; plague, 20, and 80 from tuberculosis.

Month of March, 1901. Estimated population, 300,000. Total number of deaths, 885, including enteric fever, 11; measles, 2; plague, 51, and 101 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, December 28, 1900, to June 14, 1901.

[Reports received by the Surgeon-General United States Marine-Hospital Service from United States consuls through the Department of State and other sources.]

[For reports received from June 29, to December 28, 1900, see PUBLIC HEALTH REPORTS for December 28, 1900.]
