

PUBLIC HEALTH REPORTS.

UNITED STATES.

INSECTS AS FACTORS IN THE CONVEYANCE OF DISEASE.

[Department Circular No. 71.]

TREASURY DEPARTMENT,
OFFICE SUPERVISING SURGEON-GENERAL,
MARINE-HOSPITAL SERVICE,
Washington, D. C., June 20, 1901.

To the medical officers of the U. S. Marine-Hospital Service:

Your attention is directed to the importance of insects as factors in the conveyance of disease. There is no longer doubt as to the relation of the mosquito to the malarial diseases and to filariasis. According to Simond, plague is transmitted from the rat to man by the flea. The infection of typhoid fever, and to a certain extent cholera, may be conveyed from the excreta by flies. According to the recent work of the army commission the mosquito plays an important role in the transmission of yellow fever.

You are, therefore, directed to give particular attention to this subject so far as it relates to the work of the Service in quarantine and the prevention of the spread of communicable diseases. You are advised to carefully guard patients suffering with said diseases from the bites or annoyances of the insects above mentioned, and to this end to place mosquito netting over the sick bed. Excreta must be treated in a manner to prevent their becoming food or breeding places for insects. Hospitals where communicable diseases are treated should be thoroughly protected with fly screens at all windows, doors, and other openings, particular attention being paid to the kitchen, dining room, and protection of the food. Should mosquitoes, flies, or other insects gain entrance to the wards they should be at once destroyed.

The best method of killing insects in a large room is by sulphur fumigation. Formaldehyd can not be depended upon, for it frequently fails to kill insects. Pyrethrum powder when burned in an inclosure only stupefies mosquitoes and flies, and when used these insects must be subsequently collected and destroyed.

You are also directed to guard against the breeding of mosquitoes about marine-hospital reservations, quarantine stations, and camps by the methods now in vogue. Collections of water in buckets, barrels, cis-

terns, and the like are favorite places for the breeding of mosquitoes. Such collections should be carefully covered, or, if a cover is not practicable, petroleum should be poured on the surface and replenished from time to time. All collections of stagnant water, pools, ditches, and the like about the reservation should be drained, or, if impracticable, petroleum used as above. Approximately 1 ounce is sufficient in still water for 15 square feet of surface, and ordinarily the application need not be renewed for one month. Concerning the cultivation of certain plants and trees, and other means of exterminating mosquitoes, you are referred to the works of Giles and Howard, which have recently been furnished your station.

As far as ships are concerned, particular attention should be paid to the water tanks, casks, buckets, and other water collections, especially in regions where malaria and yellow fever prevail. In vessels coming from these regions measures as above indicated should be taken with a view to the destruction of possible mosquitoes or their larvæ.

WALTER WYMAN,

Supervising Surgeon-General U. S. M. H. S.

Approved :

O. L. SPAULDING,

Assistant Secretary.

[Reports to the Surgeon-General United States Marine-Hospital Service.]

Smallpox in Key West, Fla.

KEY WEST, FLA., June 5, 1901.

SIR: I have the honor to state that William K. (colored, age 23, born in Florida), an attendant in the port steward's office of the P. & O. Steamship Company, was discovered to be suffering with modified smallpox, this morning, by State Health Officer Porter.

This man has been isolated and the people in the house on Whitehead street, where he has been boarding, will be vaccinated.

There is no present and reasonable clue to the origin of the case.

Respectfully,

R. D. MURRAY,

Surgeon, U. S. M. H. S.

Smallpox in Indiana.

INDIANAPOLIS, IND., June 8, 1901.

SIR: I have the honor to report as follows concerning smallpox in Indiana in May: The disease appeared in 19 counties at 60 different points. Dubois County, 10 cases, 1 death; Madison, 15 cases, 1 death; Lawrence, 12 cases, 1 death; Perry, 10 cases; Howard, 6 cases; Hancock, 4 cases; Clay, 20 cases; Vanderburg, 17 cases; Fulton, 2 cases; Knox, 7 cases; Union, 1 case; Dekalb, 18 cases; Dearborn, 4 cases; Lake, 50 cases; Jefferson, 5 cases; Floyd, 3 cases; Porter, 4 cases; Elkhart, 10 cases; Marion, 24 cases; Switzerland, 10 cases

Respectfully,

J. N. HURTY,

Secretary.

Smallpox prevalent at Sault Ste. Marie, Mich.

CHICAGO, ILL., June 10, 1901.

SIR: I have the honor to report that in view of the prevalence of smallpox at Sault Ste. Marie, Mich., the health authorities of that port, I am informed, refuse to allow crews of vessels to land who have not been recently vaccinated. Therefore, the president of the Lake Superior and Michigan Transportation Company has requested me to vaccinate the crews of the vessels of that line.

I have accordingly detailed a medical officer to perform that duty and request that 200 points of vaccine be sent at once by mail.

Respectfully,

HENRY W. SAWTELLE,

Surgeon, U. S. M. H. S.

Smallpox in St. Louis, Mo.

ST. LOUIS, MO., June 12, 1901.

SIR: I have the honor to state that there were 37 new cases of smallpox and 1 death reported in this city for the week ended June 9, 1901.

Respectfully,

WM. G. STIMPSON,

Passed Assistant Surgeon, U. S. M. H. S., In Command.

Smallpox in Cleveland, Ohio.

CLEVELAND, OHIO, June 10, 1901.

SIR: I have the honor to state that there were 30 new cases of smallpox reported at the health office of this city and no deaths for the week ended Saturday, June 8, 1901.

Respectfully,

W. J. PETTUS,

Surgeon, U. S. M. H. S.

Smallpox in Portland, Oreg.

PORTLAND, OREG., June 5, 1901.

SIR: I have the honor to report that there were 14 cases of smallpox in the city of Portland during the month of May, and 9 cases from June 1 to June 5, inclusive.

Respectfully,

C. H. WHEELER,

Acting Assistant Surgeon, U. S. M. H. S.

Smallpox at Hoquiam, Wash.

HOQUIAM, WASH., June 10, 1901.

SIR: I have the honor to respectfully report the appearance of smallpox at this station. There is but 1 case at the present time. The man came to town from one of the logging camps to consult a physician. I was called to see the case, in company with Dr. Rossiter, and we found the patient sick with genuine variola of a mild discrete form. The board of health of this city, as well as the county board of health, are making an earnest and faithful effort to isolate all cases. Our greatest difficulty is in convincing the people that it is genuine smallpox. I apprehend no serious trouble, as the city authorities are thoroughly aroused as to the importance of using the utmost vigilance in enforcing rigid quarantine rules. We are enforcing vaccination as far as possible.

Respectfully,

T. C. FRARY,

Acting Assistant Surgeon, U. S. M. H. S.

Measures adopted by the State board of health of Colorado to prevent the spread of contagious diseases.

DENVER, COLO., June 3, 1901.

GENTLEMEN: Owing to the wide-spread prevalence of smallpox, scarlet fever, and diphtheria, the Colorado State board of health finds it necessary to call upon you to definitely adopt and publish the regulations sent you herewith.

These regulations have been drawn up by the attorney-general so that they are believed to be in such condition as to stand the test of the courts. It will be necessary for your Board sitting as the board of health to adopt these regulations, to have them spread upon the minutes and published in the newspapers as an official publication.

Please be kind enough to attend to this matter at your earliest convenience. Every board of health in the State of Colorado is receiving a like request, and the adoption by every board will insure uniformity and greatly facilitate the stamping out of contagious diseases, and the management of general health matters.

Please notify us of the action taken by your board.

Respectfully,

G. E. TYLER,
Secretary and Executive Officer.

The BOARD OF HEALTH, Colorado.

[Inclosure No. 1.]

Public health regulations for the State of Colorado.

1. The properly constituted health officer of the municipality shall have full power to quarantine all contagious diseases.

2. He shall have the authority to post upon the dwelling or building in which there may be a person afflicted with a contagious disease a poster or placard with the name of the disease plainly written or printed thereon, and it shall be unlawful for any person to remove such placard without the permission of such health officer.

3. The health officer shall have authority to take such measures as may be necessary to prevent the spread of contagious diseases.

4. He shall have the authority to take the following steps for the prevention and spread of the following-named diseases:

Diphtheria.—He shall quarantine every case of diphtheria for at least twenty-one days from the time the disease began. If he shall find it necessary to prolong such quarantine, having proof that the disease still exists, he shall have the authority to keep such case quarantined until he shall have satisfactory evidence that the patient or patients are free from the bacilli of diphtheria.

Scarlet fever.—(a) The health officer shall quarantine each house or building in which the patient suffering from scarlet fever may be for at least six weeks and longer, if, in his opinion, said disease is not entirely eradicated.

(b) No person who lives in said house shall be allowed to attend day school, Sunday school, or other place of public meeting for at least eight weeks from the time the patient or patients in said house were taken with the disease; and in any case said person or persons shall not be permitted to attend any such place of public gathering for a period of two weeks after the building has been fumigated.

Smallpox.—(a) Every person suffering from smallpox shall be sent to an isolation hospital immediately upon the discovery of such disease upon such person.

(b) Every person who shall have been in any manner exposed to smallpox shall be vaccinated and kept in detention for two weeks from the time of such exposure.

(c) The local health officer shall have authority to order a house or premise, in which a smallpox patient may be, properly disinfected; and in case of refusal or neglect of the owner or occupant to so disinfect, said health officer may proceed at once to do the disinfection.

(d) The State board of health shall approve the kind, quality, and amount of the disinfectant used or ordered by the local board or local health officer.

5. Any person who shall willfully violate the above rules shall, on conviction, be fined in the sum of not less than \$25 nor more than \$300 for every offense.

[Inclosure No. 2.]

Instructions to health officers, issued by order of State board of health of Colorado.

JUNE 11, 1901.

Under the law you are responsible for the control of contagious diseases in your jurisdiction. It is your duty to demand from every householder and from every physician practicing in your jurisdiction an immediate report of every case of contagious disease. Blanks are furnished for this purpose by the State board of health. It is then your duty to immediately forward such reports, properly countersigned, to the State board of health.

Quarantine and disinfection.—The law holds you responsible for quarantine and disinfection. The regulations of the State board of health as to each contagious disease are found on the back of the report blanks and in circular No. 22.

Vaccination.—The health officer should compel the immediate vaccination of all exposed to smallpox, taking an officer along, if necessary.

Disinfection.—Full directions as to disinfection are found in circular No. 22. The State board of health will insist that its directions as to disinfection be rigidly followed out.

Quarantine.—Quarantine means that the person or persons shall not be permitted to mingle at all with the unquarantined, and that no one shall go into or come out of a quarantined house, except a delegated officer of the local board of health, State board of health, nurse, or physician acting under the board of health. No letters, papers, or other material shall be permitted to leave a quarantined house. No exception whatever shall be made to this rule.

Diphtheria.—The State board of health makes free examinations in diphtheria cases and cases of suspected sore throats. Each county has a supply depot where mailing cases can be secured.

Careful attention to the above rules will be expected.

Questions will be cheerfully answered and assistance given local health officers in every possible way.

Inspection of vessels for Cape Nome at Seattle.

SEATTLE, WASH., June 7, 1901.

SIR: I have the honor to report that the following vessels have been inspected at this station before sailing for Cape Nome: April 29, steamer *Jeanie*, crew, 25; passengers, 49; steamer *Nome City*, crew, 43; passengers, 104. May 9, steamer *Dora*, crew, 26; passengers, 70. May 27, steamer *Santa Anna*, crew, 37; passengers, 38. May 29, steamer *Roanoke*, crew, 45; passengers, 187; steamer *Senator*, crew, 87; passengers, 261.

Respectfully,

CHAS. B. FORD,
Acting Assistant Surgeon, U. S. M. H. S.

Disinfection of the schooner Zularmira.

BOSTON, MASS., June 10, 1901.

SIR: Schooner *Zularmira*, from Brava, Cape Verde Islands via New Bedford, arrived in quarantine June 8. All persons on board were removed to Galloupes Island, bathed, and clothing sterilized at temperature of 230° F. for thirty minutes. All quarters of vessel were subjected to a preliminary disinfection by burning roll sulphur, 8 pounds per 1,000 cubic feet for ten hours. All bedding fabrics of any kind were then removed and sterilized by steam 230° F. for thirty minutes. All woodwork was washed with 5 per cent solution of formalin. All quarters were then disinfected by 10 per cent volume of formaldehyd gas for twenty-four hours. Hold was not deemed infected, but was disinfected by burning roll sulphur, 8 pounds per 1,000 cubic feet for forty-eight hours. All persons on board were vaccinated at New Bedford, but were revaccinated at this port as a matter of extra precaution.

Respectfully,

PAUL CARSON,
Port Physician.

Arrival at Reedy Island Quarantine of vessels from Mexican and West Indian ports.

REEDY ISLAND QUARANTINE,
via Port Penn, Del., June 9, 1901.

SIR: Through the medical officer in command, national quarantine service on Delaware Bay and River, I have the honor to report the arrival at this station of the following vessels: June 3, 1901, British steamship *Georgian Prince*, from Havana, with molasses; no passengers; bill of health signed by Surgeon Glennan; Danish steamship *Tyr*, from Banes, with fruit; no passengers; bill of health signed by Acting Asst. Surg. Benjamin de Zayas. June 4, 1901, American bark *Matanzas*, from Havana, with molasses; no passengers; bill of health signed by Surgeon Glennan; British steamship *Wimeira*, from Sagua, via Matanzas, with sugar; no passengers; Sagua bill of health signed by Acting Asst. Surg. Pedro Garcia Riera; Matanzas bill of health signed by Passed Assistant Surgeon Guitéras. June 5, 1901, British steamship *King Frederick*, from Vera Cruz, via Cardenas and Matanzas, with sugar; no passengers; Vera Cruz bill of health signed by Acting Asst. Surg. D. E. Dudley; Cardenas bill of health signed by Acting Asst. Surg. Enrique Saez; Matanzas bill of health signed by Passed Assistant Surgeon Guitéras.

Respectfully,

T. F. RICHARDSON,
Assistant Surgeon, U. S. M. H. S., In Command.

Arrival at Baltimore of vessels from West Indian ports.

BALTIMORE, MD., June 15, 1901.

SIR: I have to report the arrival at this port of the following vessels for the week ended this day: June 10, Norwegian steamship *Yumuri*, from Banes, with fruit; Norwegian steamship *Agnes*, from Banes, with fruit. June 12, Norwegian steamship *Hero*, from Daiquiri, with ore.

Respectfully,

C. W. RAPHUN,
Deputy Collector.

Reports from the Mexican border.

Eagle Pass, Tex.—Inspection service.—I have the honor to make the following report for the week ended June 8, 1901:

LEA HUME,
Sanitary Inspector, U. S. M. H. S.

Laredo, Tex., June 9, 1901—Inspection service.—I have the honor to submit the following report for the week ended June 8, 1901: Number of trains entering from Mexico inspected, 14; persons on trains entering from Mexico inspected and passed, 400; immigrants inspected, 52; immigrants vaccinated, 13. June 5, disinfected 6 large bundles of wearing apparel of 5 Italian immigrants from Mexico City, said immigrants' baggage detained for twelve hours. June 7, disinfected 1 trunk and 4 valises of 2 persons ten days out from Vera Cruz originally from Tehuantepec. June 8, disinfected 4 large bundles of clothing of immigrants. Disinfected Pullman Company linen from Mexico for week reported, 3,945 pieces.

H. J. HAMILTON,
Acting Assistant Surgeon, U. S. M. H. S.

Statistical reports of States and cities of the United States—Yearly and monthly.

CALIFORNIA—Los Angeles.—Month of May, 1901. Census population, 102,479. Total number of deaths, 148, including diphtheria, 2; enteric fever, 3, and 34 from tuberculosis.

Oakland.—Month of May, 1901. Estimated population, 75,000. Total number of deaths, 81, including diphtheria, 2, and 11 from tuberculosis.

Sacramento.—Month of May, 1901. Estimated population, 30,000. Total number of deaths, 36, including enteric fever, 1; whooping cough, 1, and 6 from phthisis pulmonalis.

ILLINOIS—Chicago.—Month of April, 1901. Census population, 1,698,575. Total number of deaths, 2,116, including diphtheria, 37; enteric fever, 20; measles, 13; scarlet fever, 18; whooping cough, 24; smallpox, 1, and 259 from tuberculosis.

INDIANA—Evansville.—Month of May, 1901. Census population, 59,007. Total number of deaths, 39, including enteric fever, 1, and 6 from phthisis pulmonalis.

IOWA—Clinton.—Two weeks ended June 8, 1901. Estimated population, 24,000. Total number of deaths, 9, including 2 from tuberculosis.

KANSAS—Leavenworth.—Month of May, 1901. Census population, 21,556. Total number of deaths, 20, including smallpox, 1, and 4 from tuberculosis.

MARYLAND—Baltimore.—Month of May, 1901. Estimated population, 541,000—white, 464,000; colored, 78,000. Total number of deaths, 754—white, 564; colored, 190—including diphtheria, 16; enteric fever, 8; scarlet fever, 1; typhus fever, 1; whooping cough, 3, and 115 from tuberculosis.

MISSOURI—St. Louis.—Month of April, 1901. Census population, 575,200—white, 538,000; colored, 37,000. Total number of deaths, 883—white, 780; colored, 103—including diphtheria, 25; enteric fever, 4; measles, 4; scarlet fever, 4; whooping cough, 7; smallpox, 1, and 127 from tuberculosis.

Year ended December 31, 1900. Total number of deaths, 9,847—white, 8,638; colored, 1,109—including diphtheria, 409; enteric fever, 168; measles, 45; scarlet fever, 57; whooping cough, 15; smallpox, 3, and 1,412 from tuberculosis.

NEW HAMPSHIRE—Franklin.—Month of May, 1901. Estimated population, 5,843. Total number of deaths, 4. No deaths from contagious diseases.

NORTH CAROLINA—*Charlotte*.—Month of May, 1901. Estimated population, 27,000. Total number of deaths, 37, including whooping cough, 2, and 1 from phthisis pulmonalis.

OHIO—*Cleveland*.—Month of May, 1901. Estimated population, 390,000. Total number of deaths, 533, including diphtheria, 8; enteric fever, 11; measles, 2; scarlet fever, 9; smallpox, 3, and 53 from tuberculosis.

PENNSYLVANIA—*Newcastle*.—Month of May, 1901. Census population, 2,835. Total number of deaths, 36, including enteric fever, 1, and 10 from tuberculosis.

RHODE ISLAND—*Newport*.—Month of May, 1901. Estimated population, 23,000. Total number of deaths, 31, including scarlet fever, 1, and 5 from phthisis pulmonalis.

TENNESSEE—*Knoxville*.—Month of May, 1901. Estimated population, 35,000—white, 26,000; colored, 9,000. Total number of deaths, 43—white, 22; colored, 21—including smallpox, 1, and 13 from tuberculosis.

UTAH—*Salt Lake City*.—Month of May, 1901. Estimated population, 70,000. Total number of deaths, 51, including scarlet fever, 1, and 5 from tuberculosis.

Respectfully,
The DEPUTY CONSUL-GENERAL FOR THE UNITED STATES.

*Assistant Under Colonial Secretary.**Plague at Port Elizabeth.*CAPE TOWN, AFRICA, *May 14, 1901.*

SIR: I am directed to draw your attention to the fact that 2 cases of plague having occurred at Port Elizabeth, and the disease having made its appearance among the rats in a portion of the town, the Government has decided to declare the town and port of Port Elizabeth an infected area within the meaning of Chapter II, Heading II of the Venice Sanitary Convention. 1897.

Respectfully,

_____,
Secretary.

The UNITED STATES CONSUL-GENERAL.

BRAZIL.

*Report from Rio de Janeiro—Yellow fever and smallpox.*RIO DE JANEIRO, BRAZIL, *May 10, 1901.*

SIR: I have the honor to transmit to you the official sanitary report for April 16 to April 30, inclusive:

There were 552 deaths from all causes, a decrease of 51 as compared with the foregoing fortnight, being at the rate of 36.8 per diem, and

corresponding to an annual death rate of 16.93 per 1,000 against 40.20 and 18.58 during the previous period.

The number of deaths in regard to infectious and contagious diseases was as follows: Tuberculosis, 100, the same as before; yellow fever, 33 against 31; smallpox, 5, the same as before; beriberi, 5 against 6; diphtheria, 2 against none; dysentery, 1 against 3; influenza, 10 against 6; typhoid fever, 5 against 1; malarial fever, 34 against 46.

There were 577 births—that is, an average of 38.46 per diem, corresponding to an annual birth rate of 17.70 per 1,000.

Respectfully,

W. HAVELBURG,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

CANADA.

Report from Quebec—Immigrant inspection service.

QUEBEC, CANADA, June 8, 1901.

SIR: I have the honor to report that for the week ended June 8 there were inspected 935 immigrants; passed, 924. Cause of detention: Caries of spine, 1; hernia, 3; measles, 1; pregnancy, 1; trachoma, 4; atrophy and shortening of right leg, 1.

On June 5 I inspected 16 immigrants at Montreal of whom 1 was detained on account of hernia.

Respectfully,

VICTOR G. HEISER,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

CHINA.

Report from Hongkong—Plague and smallpox.

HONGKONG, CHINA, May 8, 1901.

SIR: I have the honor to transmit herewith the report of inspection work at this station for the week ended May 4, 1901:

Seven steamers were inspected during the week, 846 baths were given, and 1,082 pieces of baggage were disinfected by steam. In addition 45 pieces of baggage from the U. S. A. transport *Meade* were disinfected at the station because of the case of smallpox aboard that vessel. The report of this case was made in my report for the week ended April 27, 1901.

The plague epidemic continues to increase in severity, 93 cases and 92 deaths having been reported during the week. The weather continues warm, very damp and cloudy, with several heavy rainfalls, conditions which certainly have some influence over the rise of the epidemic. Thus far all the cases have been among Chinese, except 2, who were European chemists employed by the Hongkong Dispensary.

One case of enteric fever, 4 cases of smallpox, and 2 deaths were also reported during the week. This is a slight decrease over the number reported last week. No definite information was obtainable regarding the situation at Canton.

Respectfully,

JOHN W. KERR,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

*Report from Hongkong—Plague and smallpox.*HONGKONG, CHINA, *May 13, 1901.*

SIR: I have the honor to transmit herewith the report of inspection work at this station for the week ended May 11, 1901:

Eleven steamers were inspected during the week, 1,103 individuals were bathed, and 1,675 pieces of baggage were disinfected by steam.

[[Since May 1, Asiatic steerage passengers have been prohibited entry into the Philippine Islands in accordance with regulations issued by P. A. Surg. J. C. Perry. To prevent this class traveling as cabin passengers, all Asiatics, prior to engaging passage, are required to obtain a certificate that they are free from quarantinable disease. They are then inspected a second time just prior to the departure of the steamer.

One hundred and twenty-eight cases of plague and 117 deaths were reported during the week. Another European employee of the Hongkong Dispensary was removed to the hospital suffering with plague. This is the third case from this store (2 having been reported last week), and the disease was probably contracted from vermin, as dead rats were found around the premises. One case of smallpox and 2 cases of enteric fever were also reported during the week.

Unofficial reports state that the plague epidemic at Canton is severe.

Respectfully,

JOHN W. KERR,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

COLOMBIA.

*Report from Bocas del Toro—Fruit port.*BOCAS DEL TORO, COLOMBIA, *June 5, 1901.*

SIR: I have the honor to transmit herewith the following report of the transactions at this port for the week ended Tuesday, June 4, 1901, inclusive:

The following vessels have cleared from this port during the week, and I inclose herewith the triplicate certificates for same: May 29, Norwegian steamship *John Wilson*, Hansen, master; crew, 17; no passengers; for Mobile, Ala. May 30, Norwegian steamship *Bodo*, Johannesen, master; crew, 16; no passengers; for Mobile, Ala. June 1, Norwegian steamship *Harald*, Halverson, master; crew, 17; no passengers; for Mobile, Ala.

I have endeavored to get some statistics of the deaths in Bocas del Toro since January 1, and through the clergymen have obtained the following information as to the number of funerals conducted by each, viz, Rev. Nicholas Rhoden, Catholic, 5; Rev. John Chinn, Methodist, 6; Rev. C. W. Notmann, Baptist, 8; Rev. ——— Webb, Episcopal, 6.

The death rate among the Chinese population I have been unable to obtain, although it has been promised to me. The death rate, however, among the latter does not exceed that of the others.

The above number of deaths includes those which have occurred at the settlement (Old Bank), on Provision Island, Careening Cay, and Solarte Cay (in local parlance, Nancy's Cay). One death was due to tuberculosis and 1 to accidental drowning.

So far as I can learn none were due to either infectious or contagious diseases.

This port and its surrounding territory is healthy.

Respectfully,

PAUL OSTERHOUT,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

COSTA RICA.

Reports from Port Limon—Fruit port.

PORT LIMON, COSTA RICA, *June 1, 1901.*

SIR: I have the honor to submit the following weekly report: May 27, cleared steamship *Alleghany*, for New York, with 17 passengers; May 31, cleared steamship *Tordensjold*, for Havana, Cuba, with 1 passenger.

May 30, inspected and cleared, steamship *Olympia*, for New Orleans; May 31, inspected and cleared, steamship *Hispania*, for New Orleans; June 1, inspected and cleared, steamship *Venus*, for New Orleans. None of these 3 carried passengers or baggage. Triplicates of certificates given to masters of fruit vessels are inclosed.

For the week ended May 28, 4 deaths occurred in Port Limon, viz, 1 negro, male, adult, of peritonitis; 1 negro, male, adult, of pneumonia; 1 native infant, of marasmus, and 1 negro, adult male, of railroad accident.

For the last ten days it has been unusually dry and hot here, but there is no material change in the general health of the port or vicinity, neither for better nor worse.

As far as I am able to ascertain there is no quarantinable disease present here.

Respectfully,

D. W. GOODMAN,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

One recent death from yellow fever at Alajuela.

PORT LIMON, COSTA RICA, *June 7, 1901.*

SIR: I have the honor to submit the following weekly report: Three steamships have been inspected and cleared for New Orleans, on June 2, the *Stillwater*, crew, 28; on June 6, the *Beverly*, crew, 39, and on June 7, the *Utstein*, crew, 17. None carried passengers. Triplicates of certificates given to masters are inclosed.

On June 3, I cleared steamship *Altai* for New York with 6 passengers.

Only 2 deaths occurred at Port Limon for the week ended June 2; 1 adult, Colombian, of tuberculosis, and 1 adult, Colombian, of cerebral hemorrhage.

The published records show an abatement in the prevalence of yellow fever at Liberia, mention of which was made in my weekly report of May 25, but there has been at least 1 death from this disease at Alajuela very recently, and fears are entertained that it may spread and prove as disastrous as it did there two years ago.

The health and sanitary condition of Port Limon remain about the

same as when last reported, and the port is apparently free from quarantinable diseases.

Respectfully,

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

D. W. GOODMAN,

Acting Assistant Surgeon, U. S. M. S.

One case yellow fever present.

[Telegram.]

PORT LIMON, COSTA RICA, June 12, 1901.

One case yellow fever.

GOODMAN.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

CUBA.

Report from Havana—One case of yellow fever.

HAVANA, CUBA, June 11, 1901.

SIR: I have the honor to submit the following report of transactions at this station for the week ended June 8, 1901:

The yellow fever report for the week shows 1 case and no deaths, the above case being reported on the 5th instant.

On the 6th instant Asst. Surg. T. D. Berry reported from Cienfuegos that there were 2 cases of smallpox at Jucaro. An officer of this service was immediately ordered by wire from Cienfuegos to Jucaro and departed that night, with sufficient virus to vaccinate crews and passengers embarking and landing at that port. Jucaro is a small port situated on the south coast of the province of Puerto Principe, and in the past was only of importance in that it was the port of entry for the town of Ciego De Avila, the latter being situated on the military railroad which connects Jucaro on the south coast with Moron on the north. At the present time, the port is of some importance, owing to the fact that the Cuban Central Railroad Company, which is engaged in constructing a railroad from Havana to Santiago, is landing a large amount of supplies and equipment at the port, thus assembling a considerable number of employees, the majority of whom are probably not immune to yellow fever.

A case of smallpox was reported, unofficially, from Manzanillo, but upon inquiry the case proved to be one of chicken pox.

During the past week and for some time previous there have arrived at this port a large number of Chinese, the majority having come in bond from San Francisco via New Orleans. It is believed that most of these Chinese are coming to the island in order to gain entrance from here into the United States.

Attention is respectfully invited to the number of vessels disinfected during the week. This is an increase in the number of vessels, also the quantity of dunnage, over last year's report for the same period.

Acting Asst. Surg. F. E. Menocal reports that there were no immigrants or third-class passengers examined by the immigration depart-

ment for passage to any port in the island of Cuba not connected by rail with the city of Havana for the week ended June 8, 1901.

I inclose the usual mortuary and other statistics for the week.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.,

Chief Quarantine Officer for the Island of Cuba.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Resolution adopted by the Louisiana State board of health relative to treatment of baggage from Cuban ports.

HAVANA, CUBA, June 12, 1901.

SIR: I have the honor to inclose herewith a copy of a communication received from the secretary of the Louisiana State board of health.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Island of Cuba.
The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

LOUISIANA STATE BOARD OF HEALTH,
New Orleans, La., June 3, 1901.

GENTLEMEN: At a special meeting of the Louisiana State board of health held Saturday, June 1, 1901, the following resolution was adopted:

"Resolved, that the Southern Pacific Company and all parties interested be informed that any vessel from Cuban ports on which undisinfected baggage is found, regardless of destination of such baggage, will be detained five full days after disinfection of such baggage, at the Mississippi River Quarantine Station."

A copy of the above will be transmitted to-day to Dr. Jno. N. Thomas, resident physician, Mississippi River Quarantine Station, and to Dr. A. H. Glennan, surgeon, United States Marine-Hospital Service, Havana, Cuba.

Respectfully,

G. FARRAR PATTON,
Secretary Louisiana State Board of Health.

The SOUTHERN PACIFIC COMPANY AND ALL OTHERS CONCERNED.

Reports from Nuevitas, Gibara, and Puerto Padre.

NUEVITAS, CUBA, June 3, 1901.

SIR: I have the honor to submit the following report for the week ended June 1, 1901:

Six vessels arrived at this port, and 9 bills of health were issued. There were 3 deaths—1 from senility, 1 from valvular insufficiency, and

1 from cholera infantum. The weather is very warm, with rain every day. The sanitary condition of the town is good.

Gibara.—Reports show the arrival of 10 vessels, the issuance of 13 bills of health, no deaths, and good sanitary condition.

Puerto Padre.—Reports show the arrival of 4 vessels, the issuance of 5 bills of health, 2 deaths—1 from asphyxia, and 1 from pernicious fever, and good sanitary condition.

No quarantinable disease is reported at any point in the district.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Reports from Nuevitas and Puerto Padre.

NUEVITAS, CUBA, June 11, 1901.

SIR: I have the honor to submit the following report for the week ended June 8, 1901:

Eight vessels arrived at this port and 11 bills of health were issued. There was 1 death from infantile tetanus. The very warm weather, with rain every day, continues. The sanitary condition of the town is good.

Gibara.—Reports show the arrival of 10 vessels, the issuance of 10 bills of health, 3 deaths—1 nephritis, 1 pulmonary tuberculosis, and 1 infantile tetanus. The sanitary condition of the town is good.

Puerto Padre.—Reports show the arrival of 4 vessels, the issuance of 8 bills of health, 3 deaths—1 from dropsy, 1 from dysentery, and 1 from paludal fever. The sanitary condition of the town is good.

No quarantinable disease is reported at any point in the district.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON GENERAL,

U. S. Marine-Hospital Service.

ENGLAND.

Report from London—Plague diminishing in Cape Town.

LONDON, ENGLAND, June 1, 1901.

SIR: I have the honor to make the following report: The general health of England and the British Isles remains satisfactory. One case of typhus fever is reported at Londonderry for the week ended May 25, and in London for the same period there were 6 deaths attributed to influenza as against 19, 17, and 16 in the preceeding three weeks.

The number of cases of plague reported from Cape Town continues to diminish. The total number of cases from the beginning of the outbreak to May 25 was 666, with 308 deaths.

Reports from Hongkong show that the plague has become epidemic and for the week ended May 25 there are reported to have been 200 cases of plague, with 187 deaths.

Respectfully,

A. R. THOMAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

GERMANY.

Report from Berlin—Plague in various places—Cholera in India.

BERLIN, GERMANY, June 3. 1901.

SIR: I have the honor to submit the following information obtained from the imperial health office in Berlin:

Plague.

EGYPT.—On May 15, in that part of the city of Alexandria called Gabboni, the corpse of a 30 year-old workman was found. The bacteriological examination confirmed the suspicion that death was due to plague. The necessary precautions were adopted accordingly. The prescriptions regarding the entry of appropriate remarks in the papers of outgoing vessels and also concerning the medical inspection and disinfection which had been repealed on the 15th of the month have been again put in force.

BRITISH EAST INDIA.—During the week ended April 26 there occurred in the Presidency of Bombay 1,350 new plague cases and 1,107 deaths from plague, being 296 cases and 253 deaths less than during the foregoing week. From the town of Karachi, however, there were reported 297 new cases and 263 deaths—that is to say, 61 cases and 53 deaths more than during the previous week. In the city of Bombay, however, the disease now appears to be decreasing considerably, for during the week ended April 27 there were only 504 new cases (200 less than during the foregoing week), and of the 1,337 deaths recorded in the last weekly report only 395 (168 less) were proved to be due to plague, whereas, however, a further 403 deaths were entered as suspected plague.

In the beginning of May, 35 to 40 new plague cases were reported daily from Karachi. The total number of plague cases which occurred in Karachi during the present epidemic up to May 2 are estimated at 1,861, with 1,533 deaths.

CHINA—*Hongkong*.—According to a communication of May 21, the plague has now attacked the Europeans. Of 8 plague cases among these, up to the present, 4 have ended fatally.

CAPE COLONY.—In the course of the week ended April 27, 63 plague patients were received at the plague hospital in Cape Town, among them being 22 Europeans. After 32 plague patients had died during the week and 22 had been discharged as cured, there were on April 27, still 127 cases under treatment, among them being 43 Europeans. In the contact camps, on April 27, there were 854 persons under observation, only 44 of them being natives. The total number of plague cases in Cape Town up to April 27 amounted to 519. Of the deaths from the plague 160 occurred among male patients and 57 among female.

QUEENSLAND.—In the week from April 7 to April 13, 3 new cases of plague occurred in the colony, 1 ending fatally.

Cholera.

BRITISH INDIA.—In Calcutta, during the period from April 14 to April 20, 76 persons died of cholera.

In the province of Burma, according to a communication of April 25, the number of cases of cholera as well as smallpox has decreased. From March 17 to April 20, 18 cases of cholera and 20 cases of smallpox have been reported.

Respectfully,

FRANK H. MASON,
*United States Consul-General.*The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

HONDURAS.

Report from La Ceiba—Fruit port.

LA CEIBA, HONDURAS, June 4, 1901.

SIR: I have the honor to submit report of the transactions at this station for the week ended June 1, 1901, and inclose copies of certificates issued.

Four vessels have been inspected and cleared direct for the United States. May 26, Norwegian steamship *Sunniva*, Johannesen, master; crew, 14; destination, New Orleans. May 28, British steamship *Usk*, Hurry, master; crew, 20; destination, New Orleans. May 30, American steamship *Geo. W. Kelley*, Culotta, master; crew, 18; destination, New Orleans. June 1, Norwegian steamship *Adria*, Neilsen, master; crew, 15; destination, Mobile.

The health of La Ceiba and surrounding country continues satisfactory.

Respectfully,

R. H. PETERS,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Report from Puerto Cortez—Fruit port.

PUERTO CORTEZ, HONDURAS, May 28, 1901.

SIR: I have the honor to make the following report of the sanitary happenings at my port for the past week: The health of port continues excellent. No deaths. List of ships inspected and passed under the regulations inclosed.

Respectfully,

SAMUEL HARRIS BACKUS,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

[Inclosure.]

NOTE—Cargo, tropical fruit.

HOLLAND.

Report from Amsterdam—Declaration of quarantine against Port Elizabeth, Cape Colony.

AMSTERDAM, May 23, 1901.

SIR: I have the honor to transmit herewith a declaration of pest against Port Elizabeth, Cape Colony.

Respectfully,

FRANK D. HILL,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

[Inclosure.]

The minister of the interior of the Netherlands, having received official information that the pest prevails at Port Elizabeth, Cape Colony, has, in accordance with the law of March 28, 1877, declared Port Elizabeth to be infected with pest, and has fixed the quarantine at ten days.

ITALY.

Report from Naples—Inspection of immigrants—Smallpox.

NAPLES, ITALY, June 3, 1901.

SIR: I have the honor to report that for the week ended June 2, 1901, the following ships were inspected:

May 28, the steamship *Calabria*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 325 steerage passengers and 19 pieces of large baggage; 465 pieces of baggage were disinfected by steam.

May 29, the steamship *Liguria*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 845 steerage passengers and 155 pieces of large baggage; 1,328 pieces of baggage were disinfected by steam.

On May 30, the steamship *Nord America*, of the Veloce Line, bound with passengers and cargo for New York. There were inspected and passed 917 steerage passengers and 140 pieces of large baggage; 1,547 pieces of baggage were disinfected by steam. The steamship *Trave*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 906 steerage passengers and 120 pieces of large baggage; 1,133 pieces of baggage were disinfected by steam. The steamship *Brittania*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 617 steerage passengers and 78 pieces of large baggage; 926 pieces of baggage were disinfected by steam.

May 31, the steamship *Christiana*, of the Hamburg American Line, bound with passengers and cargo for New York. There were inspected and passed 243 steerage passengers and 31 pieces of large baggage; 364 pieces of baggage were disinfected by steam.

Smallpox and typhus.—During the week ended June 2, 1901, there were officially reported at Naples 169 cases of smallpox, with 30 deaths, and 4 cases of typhus fever with no deaths. During the same period, 4,213 persons were vaccinated prior to embarkment as emigrants for New York.

Operations of service for May, 1901.—During the month of May 18,661 souls left Naples as steerage passengers for New York on 22 steamships. For the month, 956 pieces of large and 14,065 pieces of small baggage were disinfected; 14,986 pieces of baggage were inspected.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

MEXICO.

Report from Progreso—Weather very hot.

PROGRESO, MEXICO, June 1, 1901.

SIR: I have the honor to make the following report for the week ended May 31, 1901:

There were 9 deaths reported from all causes, one of which was from pernicious fever. There were no cases or deaths reported from any

contagious diseases. There has been no sickness among the shipping and I have issued nothing but clean bills of health, stating that there was smallpox in Merida. The heat during the past week has been oppressive, the thermometer ranging between 104° F. and 106° F. during the day and stopping in the 90's during the night. The rainy season is the unhealthy part of the year, but if it brings the temperature down a bit it will be welcome.

Respectfully,

S. H. HODGSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Report from Tampico.

TAMPICO, MEXICO, *June 8, 1901.*

SIR: I have the honor to submit the following report for the week ended June 2: The following ships were inspected: May 28, steamship *Wearside*. British; master, Kish; crew, 31; water ballast; cleared for Norfolk, Va. May 29, steamship *Pensacola*, American; master, Simmons; crew, 21; water ballast; cleared for Pensacola, Fla.; steamship *Texan*. British; master, Lund; crew, 43; cabin passengers, 4; steerage passengers, 2; cargo, general; cleared for New Orleans via Vera Cruz and Progreso. May 31, steamship *Ithaka*, German; master, Rorden; crew, 31; cabin passengers, 4; cargo, general and cattle; cleared for New York via Havana, Cuba. June 1, steamship *Themis*, Norwegian; master, Anderson; crew, 21; cabin passengers, 3; cargo, general; cleared for New Orleans via Mexican ports; steamship *Mira*, British; master, Vincent; crew, 35; cargo, general; cleared for New Orleans; steamship *Neucholm*, British; master, Voss; crew, 25; water ballast, cleared for Pensacola, Fla.; steamship *Albis*, Norwegian; master, Langlie; crew, 20; cargo, cattle; cleared for Havana, Cuba.

Respectfully,

V. B. GREGORY.

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Mortality report.

TAMPICO, MEXICO, *June 11, 1901.*

SIR: I have the honor to submit the following reports of deaths in this municipality for the two weeks ended June 9: Septicæmia, 1; meningitis, 1; splenitis, 1; gastritis (chronic), 1; tuberculosis, 5; pyæmia, 1; bronchial pneumonia, 1; pneumonia, 2; apoplexy, 1; diarrhea (chronic), 1; gastro-enteritis, 1; malarial cachexia, 1. Total, 17.

The rainy season has not started in here as yet, in consequence of which the general health is good and the rate of mortality comparatively low for this season of the year.

Respectfully,

V. B. GREGORY,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON GENERAL,

U. S. Marine-Hospital Service.

Reports from Vera Cruz—Last death from yellow fever occurred May 21.

VERA CRUZ, MEXICO, June 5, 1901.

SIR: I have the honor to submit the following report for the week ended June 1, 1901:

Notwithstanding the very hot weather of the past few weeks, the mortality of the city remains low. Twenty-five deaths are reported for the week. The last death from yellow fever occurred on May 21.

During the week 5 vessels were inspected and given bills of health. The Ward Line steamship *Yucatan* ran upon a reef while trying to enter the port on the morning of the 27th, and as a consequence of this accident was not able to sail on her regular day, and her passengers for New York and Havana were obliged to wait over for the next boat.

I inclose the weekly mortality report.

Respectfully,

D. E. DUDLEY,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

[Inclosure.]

Mortality report for the week ended June 1, 1901, Vera Cruz, Mexico.

Tuberculosis	5	Malaria	1
Enteritis	2	Perniciosa.....	1
Tetanus.....	1	Deaths from all causes.....	25
Pneumonia.....	3		

No deaths from yellow fever.

VERA CRUZ, MEXICO, June 10, 1901.

SIR: I have the honor to submit the following report of the transactions at this station during the week ended June 8, 1901:

Since the appearance of the much needed rain on the night of the 6th, the temperature in Vera Cruz has been several degrees lower and our days more comfortable.

No deaths from yellow fever were reported during the week; 1 death from scarlet fever occurred on the 3d of the month.

The Ward Line steamer *Yucatan* sailed for New York via Progreso without passengers. Just before her departure my attention was called to a seaman who was reported sick. He was taken ill two days before, with a chill followed by fever. When I saw him he had a temperature of 103-6° F, and complained of headache and was slightly delirious, and suffered considerable nausea. I had the man sent to the hospital for treatment and observation. The vessel had been lying alongside the wharf, and the history and clinical symptoms presented by the case was certainly suspicious of yellow fever. The attending physician at the hospital reports no albumin and considers the case to be malarial.

A family of Cubans, consisting of mother and 4 children, wishing to sail for Havana on the steamship *Seguranca*, presented themselves at this office for certificates. The children had never been vaccinated, and the youngest, a baby of about 4 months, was suffering from measles and desquamation was plainly evident on the other children. Under the conditions I declined to issue the certificates.

Respectfully,

D. E. DUDLEY,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

[Inclosure.]

Mortality report for the week ended June 8, 1901, Vera Cruz, Mexico.

Tuberculosis.....	1	Enteritis.....	5
Pneumonia.....	1	Perniciosa.....	1
Scarlet fever.....	1	Dysentery.....	1
Malaria.....	1	Deaths from all causes.....	26
Meningitis.....	1		

Concerning a reported case of yellow fever.

A communication has been received from Dr. E. Liceaga, president superior board of health, Mexico, inviting attention to a report of a case of yellow fever at Vera Cruz, as published in the PUBLIC HEALTH REPORTS, May 10, 1901, and stating that the patient referred to (an American), according to reports received by Dr. Liceaga, died of remittent paludic fever.

NICARAGUA.

Report from Bluefields—Fruit port.

BLUEFIELDS, NICARAGUA, June 6, 1901.

SIR: I have the honor to submit herewith report of transactions at this port for the week ended June 5, 1901:

Only 1 vessel was inspected, clearing from this port for the United States. May 30, Norwegian steamship *Alabama*, Gjemre, master; crew, 18; passengers, 8, and Marine Medical Officer W. G. Thigpen, Louisiana State board of health; cargo, fruit and rubber, for New Orleans direct.

The very general observance of the annual fiesta at Rama, up the Bluefields River, where fruit steamers receive the greater part of their cargo, sufficiently explains the fact that only 1 steamer received a cargo of fruit during the past week.

There have been 2 deaths in Bluefields—a colored infant from inanition and a white male from chronic nephritis. The town of Bluefields unquestionably continues healthy and there is no reasonable ground for suspicion that a correspondingly satisfactory sanitary condition does not prevail in the immediate adjacent territory.

I inclose herewith 1 United States Marine-Hospital Service certificate (triplicate) and 8 personal certificates (duplicate) issued, respectively, to vessels and passengers leaving the fruit ports of Central and South America for ports in the United States, under special regulations.

Respectfully,

WM. H. CARSON,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PHILIPPINE ISLANDS.

Reports from Manila—Plague and smallpox.

MANILA, P. I., May 2, 1901.

SIR: I have the honor to report that so far as I have been able to ascertain cases of plague have only occurred in 3 places in the Philippines outside of Manila, 1 case in Cebu, 1 case in Cavite, and 1 at Santa Rosa. The latter town is on the Laguna de Bay, and is in direct communication with Manila. Both of the cases in these towns were traced to Manila.

During the week ended April 27 there were 24 cases of plague with 22 deaths in this city. Of this number 16 were Chinese and 8 Filipinos. During the same period there were 5 cases of smallpox and 209 deaths from all causes.

Respectfully,

J. C. PERRY,
*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

MANILA, P. I., May 8, 1901.

SIR: I have the honor to report that 29 cases of plague with 20 deaths occurred in Manila during the week ended May 4, 1901. Fifteen Chinese and 14 Filipinos were affected.

During the same period there were 3 cases of smallpox and 223 deaths from all causes.

Respectfully,

J. C. PERRY,
*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippines Islands.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

MANILA, P. I., May 17, 1901.

SIR: I have the honor to inform you that plague showed a slight increase in Manila during the week ended May 11, 1901, 41 cases, with 37 deaths, having been reported during this period. The cases were as follows: Twenty-nine Chinese, all fatal; 12 Filipinos, with 8 deaths.

One other case has occurred in Santa Rosa, the infection having been contracted in Manila.

On this date a well-marked case of plague was detected by the inspector of ferries and taken to the plague hospital. This patient, an adult Filipino, was stopped as he was attempting to go on board; his family were also rejected and the board of health notified of the house from which they came.

During the period embraced by this report there occurred in this city 10 cases of smallpox, with no death, and 222 deaths from all causes.

In this connection I will also state that the board of health have supplemented their energetic measures for controlling the mild epidemic with a corps of night inspectors, the object being to apprehend those cases of the ambulant type absent from the houses during the day inspection, as well as to enable them to secure the other cases as soon as possible.

Respectfully,

J. C. PERRY,
*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Quarantine transactions.

MANILA, P. I., April 29, 1901.

SIR: I have the honor to hereby submit report of quarantine transactions of outgoing boats for the week ended April 27, 1901, as follows:

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Mortality statistics of Iloilo.

MANILA, P. I., May 14, 1901.

SIR: I have the honor to submit the following mortality statistics of Iloilo, P. I., for the month of April, 1901, extracted from Asst. Surg. L. D. Fricks' report:

The report of deaths is as follows: Aortic lesion, 2; eclampsia, 10; asphyxia, new born, 3; malarial fever, 7; asphyxia, 1; apoplexy, 1; broncho-pneumonia, 1; dysentery, 2; capillary bronchitis, 1; debility, 1; lupus, 1; valvular insufficiency, 1; pulmonary tuberculosis, 8; gastric fever, 1; acute enteritis, 2; measles, 1; bronchitis, 1; chronic enteritis, 1; meningitis, 1; anæmia, 1. Total, 47.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,

*U. S. Marine-Hospital Service.**Regulations to prevent introduction of plague from Hongkong and Amoy, China.*

MANILA, P. I., May 17, 1901.

SIR: I have the honor to inform you that owing to the marked increase of plague in Hongkong, and the commencement of the epidemic in Amoy, China, I had a conference with the agents of the different steamships on the 1st instant, with the result that the following regulations have been in effect since that date:

No Chinese or native steerage passengers are allowed to come to Philippine ports from Hongkong and Amoy during the prevalence of plague in those cities.

The crews are retained on board during the time the vessels are in Hongkong, and they are bathed and their clothing disinfected each voyage just prior to sailing.

Disinfection of steerage passengers for Australia, as well as the crews of these vessels, is also required.

The cabin passengers must be certified to by Asst. Surg. J. W. Kerr, and the ships must be thoroughly searched for stowaways before leaving the ports mentioned.

I consider the above regulations wise, and they are carried out without friction and with the cooperation of the steamship companies. They reduce the danger of infected ships arriving to a minimum, and do not interfere to any appreciable extent with commerce.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

PORTO RICO.

Report from San Juan.

SAN JUAN, P. R., June 6, 1901.

SIR: I have the honor to submit herewith the following report of the transactions of the Service at this and the several subports of the island of Porto Rico during the month of May, 1901:

San Juan.—Number of vessels inspected, 16; number of bills of health issued, 26; number of persons vaccinated, 10.

On the 16th instant the French steamship *St. Simon* arrived from St. Marc, Gonaives, Petit Goave, Port au Prince, Cape Haitien, and Puerto Plata. The vessel presented clean bills of health and was admitted to free pratique.

The provisional flag steamship *Julia* entered on the morning of the 19th from Havana, Nuevitas, Gibara, Baracoa, Santiago, and Santo Domingo, having touched at Ponce and Mayaguez. The vessel had been disinfected at Santiago as usual, and, her passengers presenting satisfactory evidence of immunity, she was granted free pratique.

The Spanish steamship *Cataluña*, from Port Limon, Colon, Sabanilla, Puerto Cabello, La Guayra, and Ponce, also arrived on the 19th instant. This vessel was held in quarantine while here and transacted her business under guard. Her passengers for San Juan were immunes and permitted to land. Eleven pieces of baggage, taken on at Colon, were disinfected at the island.

The provisional flag steamship *Maria Herrera* entered on the 28th from Cuban ports and Puerto Plata. She had undergone disinfection at Santiago. All passengers immunes and allowed to land. Five pieces of baggage belonging to passengers from Puerto Plata were disinfected at the island.

I inclose herein the vital statistics of San Juan for May. The following is a report of the number of vessels inspected at the several subports: Mayaguez, 10; Arecibo, none; Humacao, 6; Aguadilla, 1; Fajardo, 2; Arroyo, 1. The following is the mortality report from the subports: Mayaguez, 118; Arecibo, 67; Humacao, 29; Aguadilla, 18; Fajardo, 25; Arroyo, 9.

Respectfully,

H. S. MATHEWSON,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

Inspection of immigrants at San Juan for the month of May, 1901.

Total number of immigrants inspected, 45; number passed, 45.

H. S. MATHEWSON,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

Inspection of immigrants at San Juan for the week ended June 1, 1901.

SAN JUAN, P. R., June 4, 1901.

SIR: I submit herewith report of alien steerage passengers arriving at this port during the week ended June 1, 1901.

May 30, Spanish steamship *Isla de Panay*, from Genoa, Barcelona, Malaga, Cadiz, Las Palmas, Teneriffe, and Santa Cruz de la Palma, with 8 immigrants.

Respectfully,

H. S. MATHEWSON,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Inspection of immigrants at San Juan during the week ended May 8, 1901.

SAN JUAN, P. R., June 10, 1901.

SIR: I herewith submit report of alien steerage passengers arriving at this port during the week ended June 8, 1901:

June 3, French steamship *Olinde Rodrigues*, from Havre, Bordeaux, and St. Thomas, with 4 immigrants.

Respectfully,

H. S. MATHEWSON,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Inspection of immigrants at subports of Porto Rico during the week ended June 8, 1901.

SAN JUAN, P. I., June 11, 1901.

SIR: I herewith submit report of alien steerage passengers arriving during the week ended June 8, 1901, at subports of Porto Rico.

Mayaguez.—June 3, Dominican sloop *Corinto*, from St. Domingo, Macoris, with 1 immigrant.

Respectfully,

H. S. MATHEWSON,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Ponce—No new cases of smallpox reported.

PONCE, P. R., May 27, 1901.

SIR: I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended May 25, 1901:

Five vessels were inspected and passed and 8 bills of health were issued, including 1 for the steamship *Californian*, which took 795 emigrants from Guanica, a subport of Ponce. They are destined for Hawaii.

There are at present but 2 cases of smallpox under treatment in the hospital. No new cases have been reported during the past two weeks.

Respectfully,

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Ponce—Last case of smallpox discharged.

PONCE, P. R., June 3, 1901.

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended June 1, 1901. Also the report of immigrants and a summary of transactions for the month of May, 1901.

Three vessels were inspected and passed and 1 bill of health was issued.

The last case of smallpox was discharged during the week and the hospital closed. Later I will send a summary of the cases and the amount of vaccination done.

Respectfully,

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

Ponce—Smallpox—Total number of cases during prevalence.

PONCE, P. R., June 10, 1901.

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract bills of health reports for the week ended June 8, 1901, also mortality report of the city for the month of May, 1901:

Six vessels were inspected and passed and 4 bills of health were issued.

The total number of smallpox cases during the prevalence of that disease was 181. Of these, 101 were men, 80 women—53 colored, 125 white—82 under 15 years and 99 adults. One death among the first cases was reported to me, but that is now said to have been due to pneumonia. The cases ranged from the mildest possible to grave confluent, the majority being very mild; some had been vaccinated at various times and a few had scars of previous attacks. The average duration of the cases was about twenty days. Something over 9,000 vaccinations were done. The hospital and management of the epidemic was under the direction of the superior board of health, through the local member, Dr. P. J. Salicrup.

Respectfully,

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

ARGENTINA—Buenos Ayres.—Month of March, 1901. Estimated population, 800,000. Total number of deaths 1,197, including diphtheria, 21; enteric fever, 23; measles, 4; scarlet fever, 54; smallpox, 76, and 118 from tuberculosis.

BRAZIL—Rio de Janeiro.—Two weeks ended April 30, 1901. Estimated population, 793,000. Total number of deaths, 552, including diphtheria, 2; enteric fever, 5; smallpox, 5; yellow fever, 33, and 101 from tuberculosis.

BRITISH COLUMBIA—Victoria.—Month of May, 1901. Estimated population, 26,000. Total number of deaths, 24, including 2 from tuberculosis.

BRITISH GUIANA—Demerara—Georgetown.—Four weeks ended April 27, 1901. Estimated population, 53,176. Total number of deaths, 157. Two deaths from tuberculosis reported.

BRITISH HONDURAS—Belize.—Month of March, 1901. Estimated population, 35,000. Total number of deaths, 77, including 4 from phthisis pulmonalis.

CANADA—Manitoba—Winnipeg.—Month of May, 1901. Estimated population, 25,642. Total number of deaths not reported. One death from diphtheria, 1 from enteric fever, and 2 deaths from tuberculosis reported.

Province of Ontario.—Reports to the provincial board of health for the month of April, 1901, from 745 municipalities having an aggregate estimated population of 2,214,461, show a total of 2,427 deaths, including diphtheria, 39; enteric fever, 12; measles, 18; scarlet fever, 17; whooping cough, 14, and 236 from phthisis pulmonalis.

Hamilton.—Month of May, 1901. Estimated population, 52,558. Total number of deaths, 57, including diphtheria, 2; enteric fever, 1, and 6 from tuberculosis.

CHILE—Antofagasta.—Month of April, 1901. Estimated population, 16,000. Total number of deaths, 52, including enteric fever, 1; whooping cough, 2, and 5 from tuberculosis.

CHINA—Amoy.—Period from September, 1900, to April 22, 1901. Estimated population, 350,000. Number of deaths not reported. Enteric fever present among Chinese and foreigners. Smallpox present among Chinese.

Week ended April 27, 1901. Ten deaths from plague reported.

DUTCH GUIANA—Paramaribo.—Month of April, 1901. Estimated population, 31,427. Total number of deaths, 69. No contagious diseases.

FRANCE—Rouen.—Month of April, 1901. Estimated population 112,657. Total number of deaths, 267, including diphtheria, 1; enteric fever, 4; whooping cough, 3, and 61 from tuberculosis.

St. Etienne.—Two weeks ended May 15, 1901. Estimated population, 146,030. Total number of deaths not reported. Two deaths from diphtheria, 2 from enteric fever, 4 from whooping cough, and 16 from tuberculosis.

GERMANY—*Weimar*.—Month of April, 1901. Estimated population, 29,633. Number of deaths not reported. One death from diphtheria reported.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 33 great towns in England and Wales during the week ended May 25, 1901, correspond to an annual rate of 16.7 per 1,000 of the aggregate population, which is estimated at 11,463,187. The highest rate was recorded in Wolverhampton, viz, 22.6, and the lowest in Croydon, viz, 11.2.

London.—One thousand three hundred and sixty-four deaths were registered during the week, including measles, 44; scarlet fever, 18; diphtheria, 22; whooping cough, 58; enteric fever, 5, and diarrhea and dysentery, 22. The deaths from all causes correspond to an annual rate of 15.7 per 1,000. In Greater London 1,804 deaths were registered, corresponding to an annual rate of 14.2 per 1,000 of the population. In the "outer ring" the deaths included 9 from diphtheria, 16 from measles, 2 from scarlet fever, and 23 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended May 25, 1901, in the 22 principal town districts of Ireland was 22.3 per 1,000 of the population, which is estimated at 1,058,722. The lowest rate was recorded in Armagh, viz, 0.0, and the highest in Portadown, viz, 30.9 per 1,000. In Dublin and suburbs 178 deaths were registered, including 5 from whooping cough.

Scotland.—The deaths registered in 8 principal towns during the week ended May 25, 1901, correspond to an annual rate of 20.7 per 1,000 of the population, which is estimated at 1,652,928. The lowest mortality was recorded in Perth, viz, 14.2, and the highest in Dundee, viz, 23.6 per 1,000. The aggregate number of deaths registered from all causes was 659, including diphtheria, 2; measles, 19; scarlet fever, 2; smallpox, 1, and 40 from whooping cough.

ITALY—*Genoa*.—Month of February, 1901. Estimated population, 230,969. Total number of deaths, 593, including enteric fever, 1; whooping cough, 1, and 46 from tuberculosis.

Month of March, 1901. Total number of deaths, 597, including diphtheria, 2; enteric fever, 3; measles, 1; whooping cough, 5; smallpox, 1, and 54 from tuberculosis.

Milan.—Month of April, 1901. Estimated population, 511,723. Total number of deaths, 1,005, including diphtheria, 23; enteric fever, 8; measles, 20; scarlet fever, 1, and 93 from phthisis pulmonalis.

JAMAICA—*Kingston*.—Month of May, 1901. Estimated population, 46,542. Total number of deaths, 187, including 8 from phthisis pulmonalis.

Port Antonio.—Two weeks ended May 25, 1901. Estimated population not reported. Total number of deaths not reported. One death from enteric fever reported.

JAPAN—Formosa.—Month of February, 1901. Estimated population, 2,797,543. Total number of deaths not reported. One death from diphtheria, 1 from smallpox, 2 from typhus, 4 from dysentery, and 61 from plague reported.

Month of March, 1901. One death from dysentery, 1 from smallpox, 4 from typhus, and 154 from plague reported.

Nagasaki.—Ten days ended May 10, 1901. Estimated population, 131,701. Number of deaths not reported. One death from diphtheria and 1 from enteric fever reported.

Ten days ended May 20, 1901. Estimated population, 131,701. Number of deaths not reported. One death from enteric fever reported.

JAVA—Batavia.—Two weeks ended May 4, 1901. Estimated population, 150,000. Total number of deaths not reported. No contagious or epidemic diseases.

MALTA.—Week ended May 25, 1901. Estimated population, 183,679. Total number of deaths, 68, including 1 from enteric fever.

PHILIPPINE ISLANDS—Manila.—Month of April, 1901. Estimated population, 300,000. Total number of deaths, 886, including enteric fever, 7; plague, 91, and 87 from tuberculosis.

ST. HELENA.—Week ended May 4, 1901. Estimated population, 3,877. Total number of deaths, 2. No deaths from contagious diseases.

SPAIN—Malaga.—Two weeks ended May 15, 1901. Estimated population, 133,000. Total number of deaths not reported. Three deaths from enteric fever and 1 death from smallpox reported.
